By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 26) COMTEX - Saying the time to act is now to boost the competitive position of the U.S. banking industry both at home and abroad, Sen. Christopher Dodd (D-Conn.) and Rep. Charles Schumer (D-N.Y.) introduced legislation in the Senate and House today to provide for full interstate banking.

The bill effectively repeals the Douglas amendment to the McFadden Act of 1927, allowing acquisitions of banks by out-of-state holding companies after 1992, and permits interstate branching as of Jan. 1, 1994, unless a state enacts a law prohibiting such branching between Jan. 1, 1990 and Dec. 31, 1993. The measure also contains similar provisions for interstate movement by savings and loan institutions.

"We think the time is right to move on this," said Dodd. "Full interstate banking makes good sense."

"This will help usher in a new era in U.S. banking," added Schumer. "The bottom line is we have to foster competitive quality in the U.S. banking system."

The congressmen, who serve on their respective Senate and House Banking committees, are seeking swift action on the measure.

"We urge our respective committees to move expeditiously on this issue, preferably before the end of this year," said Dodd.

Dodd added the idea has the backing of Federal Reserve Chairman Alan Greenspan and Securities and Exchange Commission Chairman Richard Breeden.

"Greenspan and Breeden conceptually support the notion of full interstate banking, although they haven't seen this specific bill to comment on it," Dodd said.

Schumer said the bill will promote international competition, noting after 1992 banks in Europe will be able to branch across national boundaries while U.S. banks presently cannot even branch across state lines. On the domestic front, the congressman contends banks that wish to expand beyond state and regional markets would be less susceptible to downturns in regional economies and interstate banking would reduce regulatory barriers making it cheaper and easier to charter banks and delivery of banking services more effective.

Sen. Dodd said that 47 states already have some form of interstate banking and noted the success of the New England region, in which Massachusetts, Connecticut and Rhode Island have authorized reciprocal banking.

"There was a fear this would hurt small banks but a large number of smaller banks have emerged since the adoption of the New England regional banking compact," said Dodd. "We've seen the success of regional banking, now it is time to move to full interstate banking."

MELBOURNE, Australia (JULY 26) - Australian fathers won the right Thursday to take up to one year's unpaid paternity leave following the birth of a child.

In a landmark decision, the Australian Industrial Relations Commission recognised the nature of modern parenting had changed and that mothers were no longer sole providers of infant care.

But the Australian Council of Trade Unions (ACTU) failed in its bid to secure the right for new parents to take a year's unpaid leave together.

The commission decided instead that a new-born child's parents should be allowed to share total parental leave of 52 weeks.

Women were granted up to a year's maternity leave in 1979, and employers required to give them back their old jobs when they returned to the work force.

New South Wales Employers Federation executive director, Garry Brack, said he did not expect many men to take advantage of the new provision in the short term.

The Confederation of Australian Industry had argued that the paternity claim would cost companies 3,512 dollars (2,741 U.S. dollars) per each absent male worker and claimed that only eight per cent of employers actually supported paternity leave.

PORT MORESBY (JULY 26) - Protesters pelted Papua New Guinea Prime Minister Rabbie Namaliu with sticks, stones and bottles on Thursday accusing him of corruption and demanding his resignation.

The incident occurred as Mr. Namaliu, surrounded by his ministers and more than 300 policemen, was addressing a crowd of several thousand people demanding that parliament be dissolved.

When he rejected the crowd's demands that he and senior ministers resign, some protesters began throwing missiles as the majority walked away.

Noone appeared to have been injured and Mr. Namaliu later told reporters, "I wasn't threatened at all."

The rally outside parliament followed allegations that corruption had helped Mr. Namaliu defeat a recent no-confidence motion in parliament.

Student leaders said up to 8,000 people took part in the rally.

#90207d0320 07/26/1990 ~French/German News Agency

HARARE (JULY 26) - Zimbabwe has announced a sweeping land reform program that will ban foreign ownership and redistribute land from whites to blacks.

Agriculture Minister Witness Mangwende told parliament that the program would involve amendments to the constitution, the control of prices of agricultural land, the phasing out of absentee landlords and the regulation of farm sizes.

No individual or company would be allowed to own more than one farm -- apart from exceptional circumstances -- he said in a special statement to parliament on Wednesday night.

He said the government wanted to acquire five million hectares (12 million acres) to resettle some 110,000 families, but stressed that "there is no intention whatsoever ...to grab land from productive farmers."

Owners would be paid in local currency rather than in the currency of their choice as stipulated in the British-brokered constitution adopted when the formerly white-minority ruled country became independent under a black government in 1980.

Entrenched clauses in that constitution effectively limiting the government's ability to acquire privately-owned land expired on the tenth anniversary of independence in April.

Some 4,000 mainly white commercial farmers still own nearly 30 per cent of the land in a country of around 10 million people, most of them peasants living in overcroweded communal areas.

TOKYO (JULY 26) - The central Bank of Japan believes the country's annual rate of money supply growth is too fast and wants to reduce it to single digits, a senior bank official said Thursay.

"At this moment it is too fast," the official said, referring to figures which show the bank's main measure of money supply -- M-2 plus certificates of deposit -- expanding at an annual pace of 12.6 per cent in June.

"We want to bring it down," he said, adding that the central bank would prefer an annual rate of less than 10 per cent and that it was willing to accept "if necessary" a subsequent slowdown in the Japanese economy.

The official, who asked not to be named, said containing inflatonary pressures remained the central bank's top priority but he refused to comment on the possibility of a discount-rate hike.

The rapid rate of monetary growth reflects the strength of the economy as well as financial deregulation, while inflationary pressures are mainly coming from higher oil prices and the country's acute labour shortage, he said.

The official noted that the recent decline of the yen had subsided and that "a stronger yen should be preferable."

He ruled out the likelihood of of a renewed slump in Japanese share prices. "I don't think we are facing now this kind of danger," he said.

GENEVA (JULY 26) - Negotiators of some 100 countries Thursday were faced with the prospect of a three-month crash effort to agree on a final Uruguay Round package that would significantly free up world trade and favour fairer competition.

The high-level Trade Negotiations Committee (TNC), overseeing the multilateral bargaining, was set to endorse a revamped negotiating procedure with a tight time-table intended to clear the ground for political horse-trading at a final ministerial session opening in Brussels on December 3.

Senior European trade officials were fairly optimistic that the most ambitious trade liberalization effort ever undertaken under the General Agreement on Tariffs and Trade (GATT) could produce a "reasonably satisfactory" overall outcome "if we get down to serious business quickly."

The officials said a considerable work-load remained to be cleared three

years and eight months into the negotiations, which have so far focussed almost exclusively on procedure.

The approval of the new, upgraded negotiating procedure, presented in plenary session by GATT's Director General Arthur Dunkel, was the only concrete development during this week's five-day TNC meeting, billed in advance as crucial.

In the event, there was an air of anti-climax about the meeting.

This followed a surprise announcement as it opened on Monday that the United States and the European Economic Community (EEC) had called a truce in their long drawn-out procedural feuding over agricultural reform and were now committed to negotiating in earnest.

Sharp clashes over farm trade between the two trading giants, involving to a lesser extent Japan as well, marked recent international economic meetings including May's ministerial conference of the Organization for Economic Cooperation and Development (OECD).

The issue was a focal point of the Houston Summit earlier this month of the seven major industrial democracies, whose leaders pledged "a high degree of personal involvement" and "the political leadership necessary to ensure the successful outcome" of the Uruguay Round.

U.S. insistence on a phasing out of trade-distorting internal farm support, export subsidies and import protection, backed by developed and developing food exporters of the 13-nation "Cairns group", has turned agriculture into a make or break issue of the Uruguay Round.

Senior European negotiators said that although neither side budged from their fundamental positions, their readiness to negotiate warranted guarded optimism, since a major crisis in this sector had been a real possibility.

But they said negotiators were increasingly nervous that there might be too little time left to sort out differences in many other areas covered by 15 separate negotiating groups.

The groups were supposed to present at least a "profile" of final deals in all areas to this week's TNC meeting.

But texts on such issues as trade in services, intellectual property rights, and textiles and apparel, of key importance to many developing countries, fell short of this.

Trade diplomats said the quarrel among the "majors" over agriculture had indirectly prevented adequate advances in other areas, such as market access,

tariff cutting and non-tariff barriers to trade.

They said this explained a barrage of criticism against the big powers from developing countries in the TNC, accusing them of neglecting the interests of their poorer partners.

There was no attempt to negotiate improvements to these texts during the week, and a GATT spokesman conceded there was "some disappointment in certain delegations."

The revamped negotiating structure, proposed by Mr. Dunkel, emerged from intensive private consultations with key negotiators from all groups of participating countries.

It sets specific deadlines for various stages of the negotiating process up to the drafting of a final report to ministers at the end of November.

High-level officials of the TNC will be asked to be available on short notice whenever their Geneva experts need "political" decisions to remove roadblocks on the way to Brussels, trade diplomats said.

#90207d0410 07/26/1990 ~French/German News Agency

CANBERRA (JULY 26) - Beleaguered Australian businessman Alan Bond was Thursday judged unfit to hold a television licence as his crumbling empire threatened to totally disintegrate.

Amid reports of an imminent revolt by his U.S. creditors, the High Court upheld an appeal by the Australian Broadcasting Tribunal that Mr. Bond and his subsidiary companies were not fit or proper to hold a television licence.

Financial analysts said Mr. Bond, who lost control of his Channel Nine television stations to Sydney billionaire Kerry Packer earlier this month, could now be forced to sell his remaining shares in the national network.

Mr. Bond has since offered to step down as chairman of his flagship company Bond Corporation Holdings Ltd., which is saddled with billions of dollars of debt.

The tribunal appealed to the High Court after the Federal Court set aside its original decision on Mr. Bond's fitness to hold broadcasting licences.

The case was related to a 400,000 dollar (312,200 U.S.) defamation payment made by Mr. Bond to then Queensland Premier, Sir Joh Bjelke-Petersen, and an allegedly threatening phone call made by Mr. Bond.

The High Court ordered Mr. Bond to pay the costs of the appeal.

TOKYO (JULY 26) - Share prices in Japan's telecommunications giant, Nippon Telegraph and Telephone Corp. (NTT), closed at a record low of one million yen (6,700 dollars) Thursday, down 20,000 yen (134 dollars) from Wednesday's finish.

NTT share prices first dropped to the one million yen level at one stage during morning trading and closed the day at the same level after failing to recover.

Stock prices fell on the Tokyo market on reports that more than 10 Japanese securities firms failed to report income totaling over 16 billion yen (107 million dollars) to the tax office.

NTT shares have lost ground steadily since they hit an all-time high of 3.18 million yen (21,340 dollars) briefly in May 1987.

Shares of NTT, which was put under private management in 1985, were first listed on the market in November 1986.

TOKYO (JULY 26) - Japan's Nissan Motor Co. Ltd. said Thursday it planned to acquire 25 percent stakes in two manufacturing units of Siam Motors Co. Ltd. in Thailand for nine billion yen (60 million dollars).

The investment, to be finalised in late September, will enable Siam Motors to strengthen its production and marketing activities of Nissan vehicles while making it a key figure in the Japanese company's Asian operations, it said.

Nissan will pay 6.7 billion yen (45 million dollars) for its stake in Siam

Motors and Nissan Co. Ltd., a company official said. The company produces four types of Nissan cars in Thailand and is currently wholly owned by Siam Motors.

Japan's second-biggest carmaker will pay an additional 2.3 billion yen (15 million dollars) for its interest in Siam Automotive Industry Co. Ltd. which produces Nissan pick-up trucks and is also wholly owned.

Siam Motors and Nissan, set up in 1962, produced 6,622 Nissan cars last year while Siam Automotive Industry, established in 1973, produced 31,058 pick-up trucks. Thailand's vehicle demand is expected to jump from 200,000 units last year to 300,000 this year, reaching 500,000 vehicles by 1995, Nissan said.

TAIPEI (JULY 26) - Taiwan's cabinet on Thursday approved a proposed aviation rights exchange allowing Austria's Lauda Air to fly to the island later this year, an official with the Ministry of Communications (COA) said.

The proposal was submitted by the ministry following June talks on opening air links in Vienna between Austria's aviation authorities and Taiwan officials and representatives of the country's flag carrier China Airlines (CAL) and the private airline Eva Airways Corp.

Taipei's Chiang Kei-shek International Airport and the Vienna International Airport will sign the agreement soon on behalf of the two governments, he said, adding that both sides could appoint more than one airline company to serve the Taipei-Vienna route with two stops in third countries.

Lauda Air would inaugurate the service with three flights per week in late 1990 and Eva Airways is expected to start flying to Vienna in June with two new Boeing 767's, he said.

Eva, a wholly-owned subsidiary of the Taipei-based Evergreen Group which runs the world's largest container shipping fleet, has secured landing rights in Thailand, Malaysia and Vietnam and is expecting approval from the COA to open services to these countries, Eva president Hsu Juei-yen said.

Eva, Taiwan's first privately-run international airline company set up in April last year, has ordered 26 passenger jets totalling 3.6 billion U.S. dollars for delivery beginning in 1992, he said.

TOKYO (JULY 26) - Asahi Glass Co., Japan's largest glass maker, on Thursday reported a 3.9 percent rise in its net income to 21.84 billion yen (143 million dollars) in the six months to June.

Asahi said sales in the first half of the year also rose 11.6 percent from the same period last year to 487.68 billion yen (3.187 billion dollars).

The company projected its total 1990 sales at 1.01 trillion yen (6.6 billion dollars), up 9.1 percent, and net income at 45.2 billion yen (295 million dollars), up 0.3 percent.

-30- 707

TOKYO (JULY 26) - Sales at major retail stores in Japan jumped 11.9 percent from a year ago to 1.62 trillion yen (50.82 billion dollars) in June, the Ministry of International Trade and Industry (MITI) said Thursday.

MITI officials attributed the rise to booming sales of summer clothing and air conditioners due to the unusually hot and dry summer, which brought high temperatures throughout the country.

Department store sales rose 14.6 percent to 877.2 billion yen (5.85 billion dollars), while supermarket sales came to 754.4 billion yen (5.03 billion dollars), MITI said.

KUALA LUMPUR (JULY 26) - South Korean conglomerate Samsung Co. Ltd. is holding talks with Petronas, Malaysia's national oil company, on taking part in a proposed refinery in southern Malacca state, a top official said Thursday.

Trade and Industry Minister Rafidah Aziz told reporters after meeting her South Korean counterpart Park Pil Soo at her office here that Samsung's interest came up in their talks.

The proposed one billion dollar (370 million U.S.) refinery is to have a capacity of 200,000 barrels per day and is expected to come on stream in 1992.

Petronas is believed to be still considering bids for the project and is also understood to be looking for foreign companies to share in its capacity.

The South Korean minister arrived here Wednesday with a high-powered

business delegation for a four-day visit.

#90207d0600 07/26/1990 ~French/German News Agency

LONDON (JULY 26) - British Defense Secretary Tom King Thursday defended cuts in Britain's armed forces, saying they would lead to no "major redundancies" and would lead to substantial savings later.

But defense industry analysts and officials said the reductions announced by Mr. King Wednesday, including halving the size of the British Army on the Rhine (BAOR), had dealt a blow to the industry and questioned the extent of the expected savings.

"The defence industry is not dead, it has merely suffered a blow," said Brigadier Brian Lower of the Defence Manufacturers' Association.

He said some defence firms, notably Britain's sole submarine manufacturer VSEL, could "wither on the vine" as a result of the cuts but said the general reaction in the industry was more one of relief than anxiety.

The cutbacks announced by Mr. King included reducing Britain's submarine fleet from 27 to 16 although he said plans for four new subs equipped with Trident nuclear missiles would go ahead.

Several experts predicted that the latest cuts would be followed by further reductions and described them as overly-cautious and insufficient.

"By and large, the announcement was a damp squib," said Brian Newman, defence analyst with Henderson Crossthwaite. "The defence secretary said the obvious."

Paul Rogers, lecturer at Bradford University School of Peace Studies, predicted that further cuts would be necessary under pressure from the Treasury to save more money in light of the reduced threat from Warsaw Pact countries.

Mr. Rogers said the cuts announced by Mr. King were "clever" but predicted that the Treasury "may force greater cuts" over the coming year.

"This is just the start of a major financial battle," he said.

#90207d0670 07/26/1990 ~French/German News Agency

JOHANNESBURG (JULY 26) - Six people were killed and several injured as political unrest continued to sweep through South Africa Wednesday night, police confirmed Thursday.

Two of the deaths occurred in the strife-torn Natal province, where a power struggle between rival factions has left some 3,000 people dead in three years.

In Soweto, near Johannesburg, a woman died of gunshot wounds after a clash between supporters of the conservative Inkatha party and train commuters who expressed loyalty to the African National Congress (Anc), the main players in the Natal conflict.

In Cape Town 107 people were arrested while demonstrating against the appearance in court of two school teachers. Police did not say what charges the teaches faced.

Meanwhile, a police investigation has revealed that a bus crash at Inanda in Natal last week in which 26 people died was not the result of an ambush.

Major-General Johan van Niekerk, regional police commissioner for Natal, said the bus had in fact collided with the burnt-out wreck of a car, causing the driver to lose control when a tyre burst.

It was initially believed that the bus was caught in crossfire between Inkatha and Anc supporters.

A state of emergency first imposed nation-wide in 1986 was retained in Natal when State President Frederik de Klerk decided against renewing it on June 8 this year.

KIEL, WEST GERMANY (JULY 26) - Former West German Chancellor Helmut Schmidt, hospitalized here Wednesday for an "acute illness", will remain in hospital for the moment, a spokesman said Thursday.

The spokesman for the university hospital in this northern city said Mr. Schmidt, 71, was in relatively good condition considering the circumstances.

The nature of his illness has not been disclosed.

The former chancellor was taken ill while on holiday with his wife Loki in their lakeside house at Brahmsee near Eckernfoerde.

He has suffered from heart problems for the past 10 years and has twice undergone operations to implant heart pace-makers. In May he was taken ill on several occasions.

AMRITSAR, India (JULY 26) - Indian security forces shot dead nine suspected Sikh militants Thursday in three separate battles around this Sikh holy city in the northern state of Punjab, police said.

Three suspected militants and a police officer were killed in a shoot-out after the trio kidnapped a Sikh factory worker, a police spokesman said. The kidnapped man also died in the crossfire.

Two other gunbattles near here left six alleged militants dead.

Sikh separatists have been fighting a violent campaign aimed at carving out a Sikh homeland in Punjab, a rich farming region bordering Pakistan.

Violence related to the seven-year-old conflict has killed about 1,310 people so far this year.

#90207d0770 07/26/1990 ~French/German News Agency
KUALA LUMPUR (JULY 26) - A top Malaysian official said Thursday the Asia-Pacific Economic Cooperation (APEC) forum should not waste time on political issues such as the membership of China, Taiwan and Hong Kong.

"The question of participation by these countries should be dealt with at a political forum," Trade and Industry Minister Rafidah Aziz said, adding that it involved legal and diplomatic issues which even the United Nations could not solve.

Ms. Rafidah was responding to Canadian External Affairs Minister Joe Clark's call to include the three as new members of APEC, which is holding its second ministerial meeting in Singapore on Monday and Tuesday.

Ms. Rafidah said Malaysia would like to see APEC being more project-oriented so that its projects directly resulted in regional economic cooperation in trade and investment and technology inflow.

"Let's not get the whole thing bogged down by political issues ... Let's talk more about programmes and projects. That's what it (APEC) is supposed to be for," she said.

Malaysia, together with South Korea, is coordinating and promoting projects in trade promotion, human resources development and technology transfer.

APEC, formed last year as part of an Australian initiative to promote regional economic ties, groups Brunei, Indonesia, Malaysia, the

Philippines, Singapore, Thailand, Japan, South Korea, Australia, New Zealand, Canada and the United States.

FREETOWN, (JULY 26) - A Ghanaian ship has anchored off Freetown and will remain here until Ghanaians fleeing fighting in neighboring Liberia reach the Sierra Leonean capital, Ghanaian High Commissioner Anthony Twumasi said Thursday.

Brigadier Twumasi said between 500 and 1,000 Ghanaians had assembled in the rebel-besieged Liberian capital Monrovia, but had been unable to escape so far because the road to the border was closed.

As soon as they managed to reach Freetown, the ship would dock to collect them and leave immediately for Ghana.

The ship, M. V. Tano River, can hold up to 1,500 people.

An official statement Friday said the ship would also pick up any other foreigners wishing to leave.

Ghana's Foreign Secretary Obed Asamoah said Wednesday that three navy ships were also on "patrol" in Ghana and Ivory Coast territorial waters to help nationals fleeing Liberia in small boats.

Foreign ministry sources said there are between 70,000 and 100,000 Ghanaians living in Liberia. Most of them are fishermen.

Fighting escalated in Liberia after National Patriotic Front of Liberia (NPFL) rebels led by former government official Charles Taylor walked out of peace talks here last Friday.

Liberian President Samuel Doe, holed up in his Executive Mansion with 500 soldiers of his Krahn tribe, has refused to step down despite calls for his resignation by members of his cabinet.

#90207d0860 07/26/1990 ~French/German News Agency

TOKYO (JULY 26) - The Japanese Government agreed Thursday to restrict the increase of defense outlays to 5.84 percent in fiscal 1991, the lowest targetted growth in 30 years, government officials said.

The decision to boost military spending by just 243 billion yen (1.62 billion dollar) came during talks between Finance Minister Ryutaro Hashimoto and Defense Agency Chief Yozo Ishikawa, the officials said.

A day earlier the Defense Agency decided to ask for a 6.3 percent or 262 billion yen (1.75 billion dollars) increase, but the finance ministry, backed by Prime Minister Toshiki Kaifu, insisted on reduced defense spending because of the worldwide detente, the officials said.

Defense outlays for the current fiscal year, ending next March, amounted to 4.16 trillion yen (27.7 billion dollars), up 6.1 percent from the preceding fiscal year.

It was also agreed at a separate meeting between Mr. Hashimoto and Foreign Minister Taro Nayakaya that the growth target for foreign aid, known as official development assistance (ODA), be fixed at 9.7 percent or 79 billion yen (526.7 million dollars).

The government set aside 817.5 billion yen (5.54 billion dollars) for ODA, up 8.2 percent in the current fiscal year.

The government also tentatively agreed on a 4.4 percent or 1.57 trillion yen (10.47 billion dollar) growth target for general operating expenditures in the general account budget.

The target will be formally adopted at the cabinet meeting Friday as part of a growth limit set for budget for fiscal 1991, which starts on April 1.

On the basis of the 4.3 percent spending limit, the ministries concerned will present budget requests by the end of August to the finance ministry which will make the final budget draft toward the end of the year, officials said.

#90207d0930 07/26/1990 ~French/German News Agency

HARARE (JULY 26) - Zimbabwe's President Robert Mugabe said Thursday he was pardoning a wide range of convicted persons ranging from political prisoners to women guilty of infanticide, in a general amnesty to mark the country's 10 years of independence.

According to a government statement signed by Mr. Mugabe, the amnesty was being proclaimed "to enhance national reconciliation and unity among Zimbabweans and to mark the 10th independence anniversary".

The pardon does not include those convicted for murder, rape or conspiracy or incitement to commit murder or rape.

Habitual criminals serving extended prison terms and any person who escaped from prison on or before April 18, Zimbabwe's independence date, this year and is still at large, are also not included.

But a free pardon is being granted to every anti-government dissident, irrespective of the offence, as well as to dissident collaborators, for any offence committed before June 30, 1988, the statement said.

On April 19, 1988, the government declared an amnesty for all Zimbabwe's dissident rebels in a bid to bolster a merger between the opposition Zimbabwe African People's Union (ZAPU) of Joshua Knomo and the ruling Zimbabwe African National Union (ZANU).

The rebels, who operated mainly in the country's southern Matabeleland region, took up arms against the government in 1982 for what they thought was unfair treatment of Mr. Nkomo and his minority Ndebele people.

Under an amnesty deadline of May 31, 1988 a total of 113 rebels surrendered and the amnesty was officially declared "100 per cent succesful".

The merger of the two main parties in December 1987 paved the way for an end to armed conflict around the country.

Thursday's amnesty also includes "every former ZAPU political fugitive in exile" for any offence committed before June 30, 1988.

Zimbabwe's last political detainee, an alleged South African assassin, was released from prison just hours before the expiry of the country's 25-year-old state of emergency Wednesday, according to his lawyer.

Leslie Johannes Lesia, 53, who had been detained without trial for three years, was immediately taken away by immigration officials as he left the gates of Chikurubi Maximum Security prison in Harare, his lawyer said.

He was served with a notice declaring him a prohibited immigrant, and arrangements were being made with South African government representatives to fly him home.

Mr. Lesia was accused of plotting to use a booby-trapped television set to kill the chief representative in Harare of South Africa's African National Congress (ANC).

GENEVA (JULY 26) - China has told its Uruguay Round partners that host countries' "sovereign right" to direct foreign investment towards their national development objectives must not be tampered with in attempts to draw up rules for trade-related investment measures.

China is taking part in the Uruguay Round of trade liberalization talks

though it is not yet a contracting party to GATT (General Agreement on Tariffs and Trade).

The country specifically rejected proposals to prohibit the imposition on foreign investors by host country authorities of special requirements with a bearing on local contents, export performance and trade balancing.

A Chinese submission in the Trade Negotiations Committee (TNC), the Uruguay Round governing body, said China, which was seeking to improve the investment climate "with a view to absorbing more foreign investment", felt prohibition "serves only to contain international investment flows" and would harm the common interest of both investors and recipients.

Trade-related investment measures (TRIM's), so far not covered by GATT, are one of the new areas which have been included in the Uruguay Round talks, on the grounds that special conditions imposed on investors may "restrict or distort" trade flows.

The most widespread such measures include the 'local contents' requirement, committing an investor to purchase a given proportion of local materials for production purposes, the 'export performance' requirement, under which a given part of production must be exported, and the 'trade balancing' requirement, under which an investor has to use export earnings to pay for imported materials.

A list of a dozen TRIM's have been identified and discussed during the preliminary Uruguay Round talks.

The United States considers they all have adverse effects on trade and should be disciplined or prohibited, and the European Economic Community and Japan have sided with the U.S. on seven such measures.

Many developing countries, led by India, see TRIM's as legitimate instruments of national development policies and object to negotiation of special provisions under GATT.

A compromise text submitted to the TNC as a possible basis for negotiations proposed that some TRIM's be eliminated because of their unavoidable impact on trade, while some others would be permissible to the extent where they would not harm the interests of a country's tradiong partners.

#90207d1170 07/26/1990 ~French/German News Agency

FREETOWN (JULY 26) - African efforts to defuse Liberia's bloody civil war came "too late to be of much significance," the independent Globe newspaper said here Thursday.

In an article titled "The fire next door," editor Sam Tumoe charged that the 16-nation Economic Community of West African States (ECOWAS) and the Organization of African Unity (OAU) for a long time "stayed silent on the whole (Liberian) issue."

This was "either because they felt it was an internal matter which could be crushed soon or because they were too busy holidaying the Xmas and the New Year away."

National Patriotic Front of Liberia (NPFL) rebels led by former civil servant Charles Taylor launched their bid to unseat President Samuel Doe on December 24 in northeastern Nimba County and have pushed to the gates of the capital Monrovia.

"Now seven months after the first guns were fired, ECOWAS leaders, fearful that victory for the Liberian rebels might give ideas of rebellion to dissatisfied citizens in the region, have hurriedly convened peace talks to help give (Mr. Doe) a safe and legitimate exit if he has to go."

Four rounds of peace negotiations, first under the mediation of religious leaders and later the ECOWAS mediating committee, broke down here without a cease-fire accord.

Mr. Tomou added: "President Doe, the object of the rebels' attack, remains holed-up like a rat in the executive mansion, obstinately refusing to give up power even though he has lost all moral, political and social clout.

"This has been the tragedy of Africa. Many a time, the people have rejected the leadership but the leaders in turn, using doubtful constitutional procedures and guns bought by the people, have continued to perpetuate themselves in power.

He warned that the "fire in Liberia today is a fire which could flare in any of the developing countries tomorrow if the leaders do not take urgent steps towards correcting both the political and economic imbalances in their societies.

"Liberia, once so sedate and carefree, that it can erupt into a hotbed of rebellion, anarchy and near civil war, is a lesson which must not be ignored by other African leaders," he concluded.

PARIS (JULY 26) - A union representing French airport mechanics on Thursday threatened to urge all French airline staff to strike if a court banned a strike called for the week-end.

Several unions representing ground staff and flight engineers employed by the French domestic Air Inter airline are set to strike for a third successive week-end on Friday and Saturday.

The weekend is one of the busiest holiday periods of the year, and Air Inter has sought a court order requiring unions to delay the strike for one week.

But the mechanic's union SNMSAC said: "We condemn this procedure and we could not accept a legal ruling making the strike illegal. If that happened we would be obliged to urge all French airline staff to stop working."

Air Inter deputy managing director Pierre Denizet said that the airline had been "obliged to take this step in the interest of clients", and denied that it was "an attack on the right to strike".

The company is expecting some 90,000 passengers on 690 weekend flights as July holiday-makers return home and others leave.

Negotiations on union demands for a pay rise of 1,500 francs (270 dollars) a month broke down on Wednesday, causing the unions to call a new strike, one week after a two-day strike which forced Air Inter to cancel a quarter of its domestic flights.

The court was expected to give a ruling later on Thursday.

COTONOU (JULY 26) - The Benin government has reshuffled the military high command, naming Colonel Aristide Boni as chief of the armed forces general staff, state radio reported Thursday.

He replaces Col. Vincent Guezodje, who has been given a military administrative post.

Col. Michel Hodonou becomes Col. Boni's deputy, the new army chief of staff is Col. Seraphin Noukpo, and Col. Christophe Tchibozo is to head the para-military national gendarmerie.

Lt.-Col. Mama Sika was promoted to lead the air force, and Lt.Commander Prosper Kiando heads the tiny navy.

Prime Minister Nicephore Soglo, who holds the defence portfolio, brought Cols. Andre Atchade and Edouard Zodehougan over from the defence ministry, where they were director-general and deputy, to hold similar posts in his own office.

At the interior ministry, divisional commissioners Theophile Nda and Marc Guirigou were named director of the police and inspector-general respectively.

TUNIS (JULY 26) - Tunisian President Zine el Abidine Ben Ali, irritated by the frequent absenteeism of MPs from parliament, "boycotted" an official ceremony at parliament buildings this week, newspapers reported Thursday.

The occasion was Republic Day on Wednesday, when all the MPs and the diplomatic corps gathered at the Bardo, where parliament sits.

La Presse newspaper said that in the past fortnight several items of legislation could not be put to the vote because of lack of a quorum.

Mr. Ben Ali had stayed away "to make it clear he disapproved of the attitude of the MPs which is disturbing government work and shows a state of mind bordering on the irresponsible," the paper said.

#90207d1400 07/26/1990 ~French/German News Agency

LONDON (JULY 26) - The High Court here agreed Thursday to a request from the National Union of Mineworkers for a three-month suspension of legal action against NUM president Arthur Scargill and the International Mineworker's Organization for their handling of funds donated by Soviet miners.

But the supension of the proceedings was overshadowed by confirmation that Scotland Yard fraud detectives, acting on a "complaint" against the NUM, had opened their own investigation into the union.

A Scotland Yard spokesman refused to disclose who had lodged the complaint or give any details on its nature.

But a London-based industrial newsletter Soviet Labour Review said separately that police detectives were acting on a Soviet miner's complaint concerning Mr. Scargill's handling of more than one million dollars donated by Soviet mineworkers to help striking British miners in 1984.

The expected court reprieve came after the NUM asked that proceedings against Mr. Scargill, NUM Secretary-General Peter Heathfield and the Paris-based IMO be postponed to allow time for further talks between the NUM and the IMO on control of the Soviet funds.

Mr. Scargill is also president of the IMO. The High Court earlier this month agreed to NUM requests to issue writs against Mr. Scargill, Mr. Heathfield and the IMO to freeze IMO assets in Paris and Dublin.

NUM executive committee member Henry Richardson said he was confident the investigation of the missing funds could now be resolved out of court but refused to be drawn on Mr. Scargill's future as leader of the union.

"This is an NUM affair -- we will decide this inside the union," Mr. Richardson said.

According to a recent independent investigation into NUM finances, the money ended up in IMO-controlled bank accounts instead of being used to help British miners and their families during a prolonged strike in 1984 and 1985.

The complaint to Scotland Yard's Serious Fraud Office, alleging theft, forgery and false accounting, came from a Soviet mineworker and was made in a letter posted earlier this month, according to a spokesman for the anti-communist Soviet Labour Review.

Sergei Massalovitch, a Soviet mineworker who visited Britain recently at the invitation of the newsletter, was acting "independently" when he lodged the complaint against Mr. Scargill but would report back to unofficial Soviet mineworker's groups, the spokesman said.

Those groups would then decide whether to issue a formal complaint, he added.

According to a separate report, the fraud investigators had hoped to interview Mr. Massalovitch, said to be in his early 30s, but discovered he had recently returned to Vorkuta in the north of the Soviet Union.

Mr Scargill has refused to comment on the Scotland Yard investigation.

Thursday's developments came after Mr. Scargill held intensive talks earlier this week in a hotel near a Paris airport with IMO Secretary-General Alain Simon focussing on the missing funds.

An IMO official said after the talks that Mr. Scargill was "in the clear."

Mr. Simon, earlier accused of hindering the Lightman inquiry into the handling of the Soviet funds, agreed in his talks with Mr. Scargill to allow NUM officials to examine IMO financial records.

#90207d1450 07/26/1990 ~French/German News Agency

MOSCOW (JULY 26) - The Soviet Union has reduced its budget deficit to 24 billion rubles (38.4 billion dollars) over the past sixth months, Finance Minister Valentin Pavlov said in an interview published here Thursday.

"Recently" the deficit still stood at 120 billion rubles (192 billion dollars), Mr. Pavlov told the trades union daily Trud.

He did not indicate how this had been reduced to 24 billion rubles, but said that while the Soviet Union's financial situation was very complex it was not "catastrophic."

The minister said that he opposed price increases as one of the first steps in the transition to a market economy, a proposal in a draft reform plan by Prime Minster Nikolai Ryzkhov which has come under severe criticism.

"This only discredits the idea (of moving to a market economy), and raises social tension and widespread discontent among the population," Mr. Pavlov said.

"There are other, more acceptable ways, even if the transition to a market economy is impossible without price reform, particularly changes to retail prices," Mr. Pavlov said.

#90207d1700 07/26/1990 ~French/German News Agency

BERLIN (JULY 26) - An East German MP on Thursday called for the banning of U.S. fast food chain McDonalds and other such outlets from the country, the ADN news agency said.

Ernst Doerfler, the president of the parliamentary environment commission, said that banning fast food outlets was "the only chance to avoid one of the most serious mistakes" committed by other developing countries in the field of environmental protection.

McDonald's "and other generators of rubbish of the same kind" must be banned, he said, referring to the fact that the U.S. chain sells its takeaway hamburgers and fries in plastic and paper packaging with

disposable cutlery, all of which is thrown away afterwards.

McDonald's has 324 outlets in West Germany, but none so far in East Germany. It is planning to check out the East German market initially by setting up a mobile outlet on Alexanderplatz, East Berlin's largest public square.

#90207d1730 07/26/1990 ~French/German News Agency

MILAN, Italy (JULY 26) - The Milan stock exchange authorities on Thursday announced the surprise suspension of shares in all listed companies in the Ferruzzi group, but gave no reason, sparking speculation and rumours here.

Ferruzzi published a brief statement later in the day which simply said that the group led by Raul Gardini had itself asked for the suspension "because of rumours in the press on possible decisions by the boards of Montedison and Ferruzzi Agricola."

The group would give no more details, but said it would be holding a press conference Friday.

Press reports here made no mention of rumours of decisions within the group,

Italy's largest private concern after Fiat, but there were suggestions in business circles here that Ferruzzi could be planning to announce a merger of some of its companies, notably Montedison, Ferruzzi Agricola and Enimont.

Such a move would be particularly delicate as concerns chemicals concern Enimont because of an ongoing battle for control of the company between state-owned ENI and chemicals company Montedision, which each hold a 40 per- cent share.

Trouble arose after allies of Mr. Gardini acquired the remaining 20 percent when it was offered publicly, thus winning two places on the board.

Ferruzzi had a turnover last year of clost to 30,000 billion lire (25 billion dollars).

#90207d1870 07/26/1990 ~French/German News Agency

MANILA (JULY 26) - President Corazon Aquino said here Thursday that the Philippines would seek 500 million dollars in extra foreign aid and a reduction of the country's foreign debt burden to fund reconstruction nationwide.

Mrs. Aquino added that the reconstruction would not only cover areas hit by the devastating July 16 earthquake but would include the modernization of transport and communications infrastructure throughout the country.

"We will seek further debt relief from our creditors in order to free additional resources for reconstruction efforts," she said. But she opposed any unilateral action on the foreign debt, saying that such an approach "will founder because it does not consider individual limitations."

Philippine Foreign Secretary Raul Manglapus said meanwhile he would discuss prospects for emergency aid for his earthquake-ravaged country when the non-communist Southeast Asian nations meet their major trading partners in Jakarta starting Friday.

More than 1,600 people were reported killed, more than 1,000 missing and 3,500 injured after a quake registering 7.7 on the open-ended Richter scale struck the northern part of the country.

Mrs. Aquino said her government had made special appeals to the so-called Paris Club of developed nations "for a temporary easing of financial terms of official loans to the Philippines under options open to each government."

The Philippines has a 26.1 billion dollar foreign debt whose servicing consumes about one-third of annual export earnings. The majority of this debt is owed to multilateral and bilateral sources.

#90207d1930 07/26/1990 ~French/German News Agency

Kuala Lumpur (JULY 26) - Malaysia's national oil company, Petronas, Thursday caught the oil industry by surprise by introducing lead-free petrol at eight petrol stations, industry officials said.

''This makes Malaysia one of the first countries in Southeast Asia to do so,'' an official said.

Under the lead-free oil project, the zero lead content petrol is being offered at four stations in the Malaysian capital Kuala Lumpur and one each at four other places in the country.

The move towards lead-free petrol is in the interest of a cleaner environment, as lead pollutants in vehicles' exhaust fumes can be hazardous to health, officials said.

The petrol, which has the same 97 octane level as premium petrol, is also

being sold - for the moment at least - at the same pump price of 1.05 Malaysian dollars or 35 U.S. cents a litre.

Paris (JULY 26) - The French government has agreed to stand as guarantor for a loan of ten billion francs (1.8 billion dollars) by a consortium of French banks to Algeria, banking sources said here Thursday.

According to the Banque de L'Union europeenne (Bue), which has the assumed the role of technical advisor to Algeria, Algiers needs the cash to pay off debts due in this year and in 1991-92.

Over this three-year period Algeria is scheduled to pay back almost its total foreign debt of 25.3 billion dollars.

The French banks involved are the Bnp, Credit Lyonnais, Credit Agricole and the Banque francaise du commerce exterieur.

#90207d2140 07/26/1990 ~French/German News Agency

LONDON (JULY 26) - National Power, Britain's largest electricity producer and due to be privatised next year, said Thursday it made a net annual loss of 605 million pounds (1.08 billion dollars) in the year ending March.

The company also announced it would be axing 5,000 of its 16,000 jobs over the next five years, mainly through voluntary departures.

Last year's losses were largely due to exceptional and extraordinary provisions totalling 914 million pounds (1.6 billion dollars) to cover costs linked to the wage cuts and the closure of outdated plant.

National Power currently represents 50 percent of Britain's electricity production capacity, with 40 power plants and turnover of 3.9 billion pounds (6.5 billion dollars).

Before tax and provisions, the company made an operating profit of 409 million pounds (681 million dollars) in the 12 months ending in March.

Opposition Labour Party energy spokesman Frank Dobson slammed the results as "virtually meaningless," saying "most of these figures have been rigged to suit the government's privatisation plans."

National Power chairman Sir Trevor Holdsworth said he was continuing to prepare for privatisation of the company through its introduction on the stock market in February.

He said he would prefer this method to a direct sale to a private group, a controversial option which the government is considering for National Power's direct rival PowerGen, also due for privatisation next year.

Analysts estimate the privatisation of National Power will bring the state between two billion and 2.5 billion pounds (3.3 and 4.1 billion dollars).

#90207d2160 07/26/1990 ~French/German News Agency

PRAGUE (JULY 26) - Czechoslovakia and the Soviet Union have failed to reach a concrete solution to the problem of reduced Soviet oil deliveries after talks in Moscow, Foreign Trade Minister Slavomir Stracar said here Thursday.

The Czechoslovak delegation to the talks Tuesday and Wednesday had asked Moscow to deliver at least 40,000 tonnes of crude oil daily, the minimum needed to ensure adequate energy supply for the country.

But Soviet Foreign Trade Minister Konstantin Katuchev "was not in a position to promise us this quota of crude," nor could he offer increased natural gas supplies to compensate for the shortfall, Mr. Stracar said.

Deliveries fluctuated between 30,000 and 38,000 tons a day in early July, forcing the Prague government to dip into its reserves to ensure that businesses could carry on operating and to supply service stations.

The Soviet Union had been due to provide 16.2 million tons of oil to Czechoslovakia this year, but experts here estimate the actual amount will fall some 2.5 million tonnes below that level.

The fall in deliveries, which has worsened each month since the beginning of the year, has seen drivers flocking to petrol pumps in a wave of panic buying to build up their stocks.

The government responded by raising fuel prices 50 percent in a bid to shorten queues and reduce consumption.

Mr. Stracar made an urgent visit to Moscow this week after a sharp fall in deliveries of Soviet oil and other raw materials in recent weeks.

He was also due to finalize conditions for trade deals for next year, and set terms of payment by Moscow for Czechoslovak exports.

#90207d2330 07/26/1990 ~French/German News Agency

HARARE (JULY 26) - Zimbabwe's avowedly socialist government announced an economic reform programme Thursday that called for dismissing civil servants and diverting cash from social services to production.

Finance Minister Bernard Chidzero told parliament that in view of economic problems that had dogged the country since independence in 1980, the government was committed to implementing major economic reforms to promote growth.

These include a planned reduction in recurrent expenditure and diversion of investment from social services to the productive sector.

Also envisioned are savings on the defence budget, tax concessions, strict control of parastatal organizations, revision of education financing policy and a reduction in the size of the civil service.

The scheme aims for a gross domestic product growth rate of five per cent a year, compared to the average of 3.2 percent a year over the past 10 years.

Mr. Chidzeros said that to achieve this target, the government would divert major spending from social services and put emphasis on material production such as agriculture, mining and manufacturing, while developing the transport, power and communications infrastructure.

In an economic policy statement, Mr. Chidzero said investors had been unhappy with the investment climate over the past decade because of factors such as price and wage controls, and investment regulations, particularly those relating to profit remittances.

He said that to release more funds for productive investment, the government would progressively reduce the budget deficit to five per cent

of GDP by 199495.

Admitting taxes already were high, Mr. Chidzero said there was limited scope for using taxes to reduce the deficit.

Therefore tax incentives would be directed towards sectors aimed at the export market, creating employment and improving existing technology.

A planned trade liberalisation programme would depend on a sustained and rapid growth in exports, and the government had designed a number of measures to strengthen the export performance of local companies, he said.

These included an "export retention scheme for the productive sectors of the economy, based on actual export earnings."

#90207d2560 07/26/1990 ~French/German News Agency

WASHINGTON (JULY 26) - The United States Thursday welcomed the announcement of imminent Kuwaiti-Iraqi talks to defuse tension in the Gulf and called on Kuwait and Baghdad to resolve their oil dispute by peaceful means.

State Department spokesman Richard Boucher described as a "step in the right direction" Egyptian President Hosni Mubarak's announcement that Iraq and Kuwait would begin direct talks in Saudi Arabia this weekend.

"We urge the parties to work out their differences in a peaceful and constructive manner," he added.

He noted that in his talks with U.S. Ambassador in Baghdad April Glaspie Wednesday, Iraqi President Saddam Hussein had stated "his desire for a peaceful resolution" of the situation and informed the U.S. envoy of his plans for talks with Kuwait.

Mr. Boucher said Mr. Glaspie had taken the opportunity to "reaffirm the U.S. commitment to peace and stability in the Gulf region and to urge that all sides seek to settle their dispute by peaceful means."

The flurry of diplomatic activity came in response to a troop buildup on both sides of the Iraqi-Kuwaiti border and the announcement of joint U.S.-United Arab Emirates naval exercises in the Gulf. Iraqi troops were reported to be pulling back from the border with Kuwait early Thursday.

Iraq has accused Kuwait of stealing its oil and of pushing world oil prices lower by overproducing.

#90207d2580 07/26/1990 ~French/German News Agency
JOHANNESBURG (JULY 26) - The anti-apartheid African National Congress Thursday warned it would retaliate if rightwingers failed to stop their attacks on the ANC and allied organisations.

"Our people are subjected to sustained brutal assaults by armed bandits of the white right-wing lunatic fringe," ANC National Executive Committee (NEC) member Steve Tshwete told a meeting here Thursday.

He said the attacks continued even in the present "climate of negotiation" created by exploratory talks between the white-minority government and the ANC, held in May and due to resume August 6.

Police suspect right-wing extremists were behind a string of recent bomb attacks which killed at least two blacks and injured scores of others.

"If they continue to use violence, we (the ANC) will reach a stage where we will reply in kind," Mr. Tshwete said. He accused the government of shying away from decisive action against rightwingers.

Meanwhile, Andries Treurnicht, leader of the Conservative Party (CP), the official opposition in the white chamber of South Africa's segregated parliament, warned that his organization, together with police and the South African Defence Force would prevent the ANC from taking over the country by force.

In a statement published in Pretoria, he claimed the ANC planned to use the negotiating process to bring about a transfer of power to itself.

The CP demanded that the government stop negotiations with the ANC immediately, he said.

#90207d2710 07/26/1990 ~French/German News Agency
ROME (JULY 26) - Three months after the deaths of eight candidates in the bloodiest Italian elections since World War II, members of a parliamentary anti-Mafia commission have assessed in detail the level of Mafia infiltration of local administrations in the south of the country.

According to the report, more than 270 candidates and municipal officials in Calabria and the Naples region are being prosecuted for misappropriation of funds or Mafia involvement.

In Calabria, of 13 candidates accused of Mafia involvement by the magistrature, eight were elected, as were 59 of 106 candidates tried for misappropriation of funds.

In the Naples regions, some 100 municipal councillors are being prosecuted for misappropriation of funds and 53 candidates were suspected of having Mafia ties.

The commission, which spans the political spectrum from Christian Democrats to Greens and the Italian Communist Party, blamed the political parties, who undertook before the election to select candidates so as to avoid Mafia infiltration.

The report called attention to the prevalence of "omerta," the Mafia code of silence which allows Mafia dons to extend their influence with little opposition.

The commission said that municipal councillors who were colleagues of the eight assassinated candidates had "denied the Mafia origins of these crimes and dismissed the possibility that the Mafia might have any influence in their districts."

One such councillor reportedly explained the assassinations as "a coincidence of evil forces."

It seems "honestly inexplicable that these municipal councillors could have denied the factual evidence turned up by judiciary investigations," said the report, which was profoundly skeptical regarding the usefulness of such officials in the struggle against the Mafia.

The Mafia problem has also spread to the north, along the Ligurian coast between Ventimiglia and Genoa, where groups close to the powerful southern families have taken root, according to a report by the internal security service published by the weekly Epoca.

Through their operation of rackets and drug trafficking and their investment in real estate and commercial distribution networks, these groups have reportedly involved reputable citizens in their affairs and are benefitting from complicity in economic circles and through political contacts.

#90207d2850 07/26/1990 ~French/German News Agency

BAGHDAD (JULY 26) - The vice chairman of Iraq's Revolutionary Command Council Izzat Ibrahim will lead his country's delegation to talks with Kuwait in the Saudi city of Jeddah to resolve their dispute over oil prices and border markings, the official INA news agency said Thursday.

Egyptian Foreign Minister Esmat Abdel Meguid said earlier the leader of the Kuwait delegation at Sunday and Monday's talks would be Crown Prince Sheikh

Saad al-Abdallah al-Sabah.

Baghdad had engaged in week-long denunciations of Kuwait and the United Arab Emirates which it said were deliberately flooding the oil market and keeping prices depressed to undermine Iraq.

#90207d3210 07/26/1990 ~French/German News Agency

PRETORIA (JULY 26) - President Frederik de Klerk had a two-and-a-half hour crisis meeting with anti-apartheid leader Nelson Mandela here Thursday following police allegations of a communist coup plot, Mr. De Klerk's office said.

Mr. De Klerk, in a brief statement after the talks at the administrative Union Buildings, said Mr. Mandela had requested another meeting next week, so "consequently I have nothing further to say at this stage."

The president had called for an urgent meeting with the Deputy President of the African National Congress (ANC) Thursday in the wake of the arrest in the past few weeks of some 50 ANC members, among them at least 40 guerrillas.

The ANC and South African Communist Party (SACP) memberships overlap, with several SACP leaders serving on the ANC's National Executive Committee (NEC).

Allegations of an SACP coup plot came to a head Wednesday night with the arrest in Johannesburg of NEC and SACP Central Committee member Mac Maharaj, just four days ahead of the SACP's public relaunch Sunday in the light of Mr. De Klerk's decision in February to lift a 40-year-old ban.

Reacting to Mr. Mandela's denials that there was a communist coup plot, the president's office said Thursday the NEC "does not appreciate the seriousness of the facts brought to light by South African police investigations of the past few days."

Mr. Mandela had told a media conference Wednesday in Johannesburg that infiltration by armed guerrillas was merely part of the ANC's ongoing "armed struggle", lashing out at the "hysteria" of media reports that it was part of a blueprint for insurrection.

A Western diplomatic source here confirmed to Agence France-Presse that the government had briefed foreign diplomats Tuesday on an SACP meeting in May at which party leaders had allegedly agreed to opt out of any ceasefire signed by the ANC and the government.

Chris Hani, Chief-of-Staff of the ANC's army Umkhonto we Sizwe (Spear of

the Nation, known as MK), told a media conference in Umtata, capital of nominally-independent Transkei, the arrest of Mr. Maharaj was provocative.

He dismissed as "just another ploy to try to rubbish the climate of negotiation" police allegations of an SACP plot to overthrow the white minority regime if the preliminary talks the government began with the ANC in Cape Town on May 2-4 fizzled out.

Mr. Maharaj's arrest was "also an act of provocation by the South African security police to create an atmosphere that will hinder the talks about talks."

"We do hope that this government did not grant an indemnity to the leadership of the ANC in order to organise a Trojan horse."

The 35 Lusaka-based members of the 38-member NEC have been granted a temporary amnesty to take part in talks with the government.

Asked about the ANC's refusal to declare a ceasefire, Mr. Hani said: "The ANC does not think it should negotiate with a pistol to its head. The armed struggle will continue until there is a mutually-binding ceasefire."

Police Commissioner General Johan van der Merwe appeared on state-run television Thursday to reinforce police claims that the SACP planned an insurrection, a rare move by South Africa's top policeman.

"The detentions and actions of the police are based on reliable evidence and rest on firm legal grounds. We are in possession of a large quantity of documents and various other exhibits."

He said he expected more arrests, and would not rule out the possibility that a warrant had been issued for NEC member Ronnie Kasrils, who made a dramatic appearance at a foreign correspondents' lunch in Johannesburg Thursday before announcing that he was going underground to escape arrest.

Mr. Hani, asked if he feared arrest, said: "What is prison? I am ready to go to prison. they will regret for keeping us in prison.

"If they think that apartheid will survive by keeping us inside, let them do so."

#90207d3290 07/26/1990 ~French/German News Agency

WASHINGTON (JULY 26) - The United States Thursday commended Zambian President Kenneth Kaunda for releasing all political prisoners and urged him to steer his economically troubled country toward multi-party democracy.

Wednesday, Mr. Kaunda pardoned and released all Zambians jailed in connection with riots over food price hikes and a coup attempt late last month as well as those jailed for coup plots and political offenses earlier in the decade.

The Zambian leader, who is facing strong popular discontent over an economic austerity program and strong pressure to introduce political reforms, also postponed a planned referendum on multi-party rule until August 13 of next year, pending a new registration of voters.

The referendum had originally been scheduled for October 17. An updating of the electoral roll had been a demand of opponents of the country's one-party system.

Commenting on the prisoners' release, State Department spokesman Richard Boucher said: "We welcome this initiative and commend President Kaunda for his action on this question."

"We've urged the Zambian president to lead his country to a pluralistic democracy and to ensure that the campaign and the vote on the referendum on multi-party democracy be as free and fair as possible," he added.

"We also welcome the president's announcement that voter registration will be open to all eligible Zambians and we hope the preparations for that referendum can proceed in an expeditious manner and that elections can be held as soon as possible," the spokesman said.

OSNABRUECK, West Germany (JULY 26) - About 330 Soviet refugees of German origin were to be placed in quarantine upon their arrival here Thursday because of recent outbreaks of both bubonic plague and cholera in the region they came from, medical authorities said.

The refugees, 180 of whom are from the Soviet central Asian republic of Kazakhstan, are to undergo medical examinations and be interviewed to determine whether they have been in contact with infected persons.

The Soviet press recently reported one death from bubonic plague in the region.

LAGOS (JULY 27) - Twelve youths sentenced to death two years ago by a Nigerian military tribunal for armed robbery will not have their sentences

commuted, Colonel Raji Alagbe Rasaki, the military governor of Lagos state said Thursday.

During a news conference to mark his second anniversary as governor, Colonel Rasaki was categorical in his refusal to commute the sentences.

The youths, all below 17 at the time of the offence in 1986 in Ikorodu, a town about 25 kilometres (15 miles) north of here, had appealed the sentence in November, 1988, before a high court claiming they had not received a fair trial.

The appeal was rejected on the grounds that the court had no jurisdiction to question the the decision of the military tribunal, said the same source.

Under Nigerian civilian law, no one under 17 can be sentenced to death.

Both Amnesty International and the Nigerian Civil Liberties Organisation have appealed to Colonel Rasaki commute the death sentences.

Col. Rasaki has earned a reputation for hard-line policies. On July 14, he began the demolition of 15,000 houses in Maroko, a Lagos slum, making its 300,000 inhabitants homeless with a week's notice.

ROME (JULY 27) - Four Christian Democrat ministers on Thursday announced their resignations from the Italian government over a controversy involving the amount of time allowed for commercials during televised films.

The four to resign, all representing the left-wing of the Christian Democratic Party, were Defense Minister Mino Martinazzoli, Education Minister Sergio Matarella, Minister of Southern Affairs Ricardo Misasi, and Minister of State Participation Carlo Fracanzani.

The resignation announcement came after Christian Democratic Prime Minister Giulio Andreotti announced before parliament that he would be calling for a vote of confidence on a draft law setting January 1, 1993, as the date when new regulations governing the time allowed commercials during films would take effect.

The left-wing of the Christian Democratic Party was opposed to the draft law which has yet to be approved by parliament.

The party's left-wing is headed by former prime minister Ciriaco De Mita, whose government collapsed last year under the pressure of opposing

factions with the party.

Mr. Matarella, announcing the resignation Thursday, said it was inadmissible to call for a vote of confidence to "violate a European Economic Community guideline."

The European Commission has recommended that the timing of commercials should respect the natural flow of television programs.

Italy's coalition government is composed of 15 Christian Democrats, 10 Socialists, two Liberals and two Social Democrats.

MANILA (JULY 26) - The Philippines' trade deficit widened to 1.6 billion dollars in May, up 69 percent from last year, the Central Bank said Thursday.

Oil and raw materials for export industries accounted for the bulk of imports from January to May, which rose 20 percent to 4.85 billion dollars compared to 4.04 billion dollars in the same period for 1989.

Exports, led by electronics and garments, rose five percent to 3.26 billion dollars from January to May 1990.

The Philippines' mounting current-account and government deficits have put steady pressure on the peso in recent months, and businessmen say the local currency, now trading at 23.70 to the dollar, should be allowed to depreciate faster.

LONDON (JULY 26) - Britain will begin importing South Korean Kia model cars next year under an agreement expected to be signed in September, the Financial Times reported Thursday.

A letter of intent was signed earlier this year by Kia and MCL, a British group that already imports Mazda and Polish-made FSO cars, the article said, adding that MCL hoped to sell around 7,500 Kia cars in the year starting next June.

The import deal could also give a boost to MCL's 100 FSO dealerships in Britain who are facing shortages of cars because of the breakdown of distribution and export structures in Poland following the radical political changes there in the past year, the FT said.

HARARE (JULY 26) - Workers at five major commercial banks in the Zimbabwe capital, Harare, went on strike on Thursday demanding better working conditions and pay increases.

Hundreds of bank workers abandoned their branches and assembled in the city's main First Street shopping mall where they milled around refusing to return to work.

Banking sources said the strike resuled from a major disagreement which emerged Wednesday between the workers representatives and the employers over pay increases.

In May the Zimbabwe Government announced a wage adjustment of at least 10 per cent for all workers and asked unions to bargain with employers on the percentage scales.

There was no sign of police or other law enforcement agencies on Thursday.

One striker told AFP "The strike will go on for as long as is necessary. The banking sector has been doing well in this country and we deserve better treatment."

The strike is expected to affect most of commerce and industry as well as foreign exchange transactions. There has, as yet, been no official comment on the strike and it is not clear whether the strike has spread to other branches nationwide.

PARIS (JULY 26) - France is to make early repayment on Friday of foreign debt of 400 million dollars, representing nearly all of the loans raised in 1982 and 1983, Finance Minister Pierre Beregevoy said on Thursday.

He also told a press conference that early repayment would be made on July 1, 1991 of 30 million European Currency Units (ECU's) (38 million dollars) of debt due in 1993 as the terms of the loan did not permit earlier repayment.

In 1982 France borrowed four billion dollars and in 1983 four billion ECU's (5.08 billion dollars).

TOKYO (JULY 26) - Japan's automobile exports totaled 2.9 million vehicles in the first half of the year, down 5.2 percent from the same period last year, an industry report said Thursday.

The Japan Automobile Manufacturers Association (JAMA) said the 5.2 percent drop was the fourth straight year-on-year decline for the six-month period.

The association attributed the fall to a 15.6 percent drop in exports to the United States.

The half-year exports comprised 2.23 million passenger cars, 643,900 trucks and 19,400 buses.

By value, foreign sales of finished cars and parts came to 32.76 billion dollars, down 4.1 percent from the the January-June period last year, JAMA said.

It said exports in June totaled 490,500 vehicles, up 10.3 percent over May and 4.1 percent from a year earlier.

BEIJING (JULY 26) - The Chinese leg of a new Sino-Soviet railway is to be completed in late August, one month ahead of schedule, the official New China News Agency said Thursday.

Only 20 kilometers (12 miles) of track remains to be laid on the 460-kilometer (285-mile) route linking Urumqi, capital of the mainly Moslem region of Xinjiang, and an existing Soviet railway in Kazakhstan, it said.

Construction began in May 1985.

When completed, the line is expected to slash days off the time it takes to ship freight between China and Europe, which must now go by sea or via the Trans-Siberian Railway.

Passenger trains are also expected to travel the route.

#90207d9640 07/26/1990 ~French/German News Agency

TOKYO (JULY 26) - Japan's mining and manufacturing output fell 0.4 percent in June 0.4 from the previous month's level, but was up 2.7 percent from a year earlier, the Ministry of International Trade and Industry (MITI) said in a preliminary report Thursday.

Shipments from factories also fell 0.2 percent from May, but rose 4.3 per cent from a year ago, the report said.

Active output of machinery largely offset a slide in production of motor vehicles, MITI officials said.

Inventories also declined 1.9 percent from May, but moved up 1.5 percent from a year ago.

The 1.5 percent year-on-year rise in inventories was the slowest advance since June 1988, the officials said.

MITI also said that industrial production in the second quarter of 1990 rose 1.8 percent from the preceding quarter and jumped 3.3 percent from the same period last year.

The 1.8 percent quarter-to-quarter rise was the biggest since the first quarter of 1989, when companies rushed to roll out as many products as possible before the introduction of the three percent consumption tax, officials said.

Shipments during the April-June period were up 1.4 percent from the January-March period and 4.3 percent from a year earlier.

Inventories during the period under review were down 0.2 percent from the previous quarter, but up 3.7 percent from the same period of last year.

#90207d9680 07/26/1990 ~French/German News Agency

TOKYO (JULY 26) - Japanese tax authorities were reported Thursday to have accused several stockbrokers, including Yamaichi Securities Co. Ltd. and Daiwa Securities Co. Ltd., of evading taxes by manipulating warrant deals.

The companies failed to report income of 16 billion yen (108 million dollars) and were ordered to pay seven billion yen (47 million dollars) in penalty taxes, Tokyo Regional Tax Administration sources were quoted as saying.

Yamaichi, the country's fourth-biggest securities firm, failed to report income of eight billion yen (54 million dollars) while Daiwa, which ranks second, underestimated its income by "several billion yen," Jiji Press said.

Other reports said the amount for both companies was only eight billion yen.

The number of securities firms involved in the scheme, apparently cooked up to cover losses suffered by clients after the world stock market crash in 1987, was unclear. Reports cited figures ranging from 12 to several dozen.

The scheme reportedly involved selling warrants to clients at a discount and then buying them back at higher prices. The transactions were recorded as losses or entertainment expenses, the reports said.

Warrants are usually attached to bonds and allow holders to buy shares in a company at a certain price over a given period of time.

The Tokyo Regional Tax Administration refused to comment on the reports.

LONDON (JULY 26) - Art auctioneers Sotheby's said Thursday they made record sales last year, topping the three billion dollar level for the first time for a 39 percent rise over the previous year's figure.

The New Bond Street-based dealers said they had sold 367 works at more than a million dollars, 56 at more than five million, 19 at more than 10 million and five at more than 20 million.

A sale of Impressionist and Modern artists in New York in May brought in 286.2 million dollars, an all-time record for an auction.

The sale of Renoir's "Au Moulin de la Galette" in New York for 78.1 million dollars was the star item in an Impressionist season somewhat tarnished by less impressive sales in London.

Sotheby's said it had signed a joint venture agreement with New York dealer William Acquavella to buy the stock of the gallery of Pierre Matisse, son of painter Henri Matisse.

It also said it would continue sales in Japan in collaboration with the Seibu group, and would be opening a saleroom in Berlin as well as enlarging its London salerooms.

#90207d9780 07/26/1990 ~French/German News Agency

PARIS (JULY 27) - The life of the bouncy basic Deux Chevaux Citroen car will come to an end in Portugal on Friday, 41 years after the first of seven million vehicles lurched onto the road.

The design specification, laid down in 1935, was for "a car capable of carrying two people and 50 kilos (120 pounds) of potatoes at 60 kilometres (38 miles) per hour and consuming only three litres (1.5 gallons) per 100 kilometres (63 miles)".

The first models, were manufactured in 1949 and had an unfurling fabric roof to enable driver and passengers to wear top hats. The cars were available in one colour - grey. One of the constant peculiarities of the car, which could draw great affection from owners, was high and soft suspension, causing it to roll around corners but enabling it to bounce across uneven ground.

During the 1950s the delivery delay extended to six years. The car, powered by an air-cooled 375 cubic centimetre engine, reached a peak of popularity in 1966 when annual production totalled 168,384 vehicles.

Citroen cut two thirds of annual production two years ago when it closed a factory at Levallois in the outskirts of Paris. The last model will be

kept as a museum piece by Citroen when it comes off an assembly line at Malgualde in Portugal where 85 cars have been produced daily in recent months.

CHTAURA, Lebanon (JULY 26) - Nine people were burned alive and 20 were hurt when a hotel here went up in flames after a fuel tanker rammed into cars in an adjacent parking lot, setting them ablaze, police said.

The driver of the truck lost control late Wednesday as he was negotiating a turn on the outskirts of this central Lebanese town located on the Beirut-Damascus highway, according to police.

They said the truck ended up in the parking lot of the Kassouf Hotel, where it slammed into cars and set them on fire. Thousands of liters of fuel spilled from the tanker and flooded the hotel lobby, which was quickly engulfed in flames.

Eight of the injured are severely burned, according to police, who said there had been around 50 people on the lower four floors of the hotel on Wednesday night, mostly Lebanese.

Firemen battled the blaze for more than 10 hours, aided by Syrian firefighters who arrived from Damascus, according to police.

#90207e0015 07/26/1990 ~Latin America New Agency

MADRID (JULY 26) EFE - A sharp rise in imports and slump in tourism profits was Thursday blamed by officials for a 17 percent jump in the country's current account deficit for the first six months of 1990.

Bank of Spain figures released this week showed the current account deficit for January to June at dlrs 7.5 billion, compared with the dlrs 5.8 billion deficit for the same period in 1989.

Officials said the main reason for the worsening deficit was Spain's continued increase in imports while income from tourism has gradually dropped.

According to the bank's figures, the trade deficit for January to June was dlrs 12.7 billion compared with dlrs 11.2 billion for 1989.

Imports for the period rose to dlrs 38 billion while exports brought in just dlrs 25.3 billion.

Meanwhile, tourism earnings registered a drop of dlrs 277 million for the period in comparison with last years's figures.

For the six months to June, Spain showed a surplus of dlrs 5.590 billion from tourism as against dlrs 5.865 billion in 1989.

#90207e0034 07/26/1990 ~Latin America New Agency

HARARE (JULY 26) EFE - The government of Zimbabwean Prime Minister Robert Mugabe Thursday lifted the state of emergency that was decreed 25 years ago by the former white government in its civil war against black rebel groups.

Despite the end of white rule in 1980, the Mugabe government had renewed the state of emergency every six months as a safeguard against possible attacks from South Africa, which borders Zimbabwe to the south, and rightist rebels in neighboring Mozambique.

But critics of Mugabe, who has pledged to introduce a one-party Marxist-Leninist state, claimed the state of emergency was also used to stifle rival political groups.

After unilaterally declaring independence from Britain in 1965, the former prime minister of what was then Rhodesia, Ian Smith, imposed the state of emergency in his government's war against black rebel movements headed by Mugabe and other black leaders opposed to white rule.

Mugabe pledged to lift the state of emergency a week ago.

Thursday's decision follows reforms by the South African President F.W. de Klerk aimed at dismantling South Africa's apartheid system.

The de Klerk government has also pledged to cooperate with Zimbabwe on security matters.

At the same time, the Mozambican government has agreed to hold talks with the rightist RENAMO guerrilla group aimed at ending the country's 15-year-old civil war.

Land-locked Zimbabwe is dependent for its external trade on ports in South Africa and Mozambique where it has deployed 5,000 troops.

Mugabe's ZANU-PF party has governed Zimbabwe since the end of white rule.

TEGUCIGALPA (JULY 26) EFE - Honduran banana workers entered their second month on strike Thursday that is costing the country dlrs 200,000 a day in lost export earnings.

The 7,300 workers are demanding a dlrs two increase on the current dlrs four daily rate they are paid by the U.S.-based Tela Railroad Company, a subsidiary of the U.S. multinational, Chiquita Banana.

"We are prepared to face any pressures and we will even take charge of production if the company decide to pull out of the country," union president Rene Ayestas said.

Honduran President Rafael Callejas told the strikers Thursday that he would discuss the real amount of the company's profits with the Central Bank.

Callejas admitted this week that the Honduran economy was very fragile and said, "We depend on the banana tree for our survival."

Earlier this year, Tela was involved in the so-called Banana War, when it claimed that it had exclusive rights to export the fruit of independent Honduran producers, but eventually had to allow the British company Fyffes into the market.

#90207e0037 07/26/1990 ~Latin America New Agency

MADRID (JULY 26) EFE - Spanish Foreign Minister Francisco Fernandez Ordonez said Thursday that he had no plans to meet in Peru with Cuban leader Fidel Castro, with whose government Madrid is currently locked in a bitter diplomatic row.

Fernandez Ordonez told reporters that "no interview had been requested with Commander Castro." Both are to attend Peruvian President-elect Alberto Fujimori's inauguration on Saturday.

It had been rumored that the two could meet after the ceremony to discuss the crisis, sparked by asylum-seekers holed up in the Spanish embassy in Havana.

Diplomatic relations between Spain and Cuba, usually close friends, are at one of their lowest levels due to the row about the refugees, 18 of whom have sought asylum in Spain's diplomatic mission in Havana.

Four others are at the Italian embassy compound, while refugees who managed to get into the Czechoslovak embassy and the Swiss diplomatic mission have left the buildings of their own accord.

Spain recalled its ambassador to Havana a week ago and suspended aid programs after the Cubans unleashed a barrage of insults against Fernandez Ordonez.

Castro has said the asylum-seekers will not be allowed to leave the Communist island.

#90207e0042 07/26/1990 ~Latin America New Agency

WASHINGTON (JULY 26) EFE - The United States used the 37th anniversary of the beginning of the Cuban revolution Thursday as the occasion for a searing attack on Fidel Castro, accusing the 63-year-old leader of betraying the Cuban people.

State Department spokesman Richard Boucher said the Cuban people "were paying the price for devotion to Castro and a discredited Marxist model."

Boucher's comments came on the day the Cuban people traditionally remember the failed attack on the Moncada barracks by Castro and a handful of revolutionaries in 1953, considered the seed of the popular revolution carried out in 1959.

Boucher added, "The revolution was supported by the Cuban people because it promised democracy, economic opportunities and the end to dictatorship. Tragically the promises of the revolution were betrayed by Castro on assuming power in 1959."

Answering reporters' questions, Boucher said Castro was the principle obstacle" to the democratic evolution of Cuba, and that Castro was not responding to the changes in the world.

The United States severed diplomatic ties with Cuba in 1961, shortly before launching the botched Bay of Pigs invasion.

#90207f2210 07/26/1990 ~United Press International

CHICAGO (JULY 26) UPI - The strength of a rally in beans pulled corn and wheat out of the doldrums to close higher across the board Thursday on the Chicago Board of Trade. Oats also were higher.

Renewed optimism about the potential of Soviet buying boosted beans strongly higher. The renewed interest in beans came after news that the Soviet Union will get a $1 billion advance against uncut diamond sales that could be used to pay outstanding grain debts and make new purchases.

Professionals were a factor in the bean upsurge at midsession, with

improving sentiment on soymeal adding to the complex. Ideas continue that Pakistan may tender for soyoil. Bangladesh already has tendered.

Corn, which closed near the day's highs, benefitted from the action on beans. It gained additional strength on the announcement that Taiwan would tender Monday for corn while exporters said there were strong indications that Japan already had bought at least 300,000 tons of U.S. corn during the last week.

Wheat's gain was aided by professional buying. Cash-connected selling had held prices down earlier in the day.

Corn was up 1/4 to up 2 3/4, beans were up 7 to 12 1/2, wheat was up 1/4 to 1 1/2 and oats were up 2 3/4 to 4.

As OPEC ministers arrived in Geneva, Iraq and Kuwait continued their verbal warfare over prices and production. Iraq rejected Egyptian efforts to mediate the dispute with Kuwait and the United Arab Emirates. For Iraq, the high tension translated into hopes for higher oil prices; Columbia Savings and Loan sold its bond portfolio to Gordon Capital after having it on the block for four months. The sale, the biggest ever in the junk bond market, brings to an end Columbia's controversial investment in high yield bonds; the 2,500 S&Ls not under government control lost $270 million in the first quarter; it was a first for Silicon Valley -- a meeting of companies that feel pressure that sell computer screens with less extremely low frequency radiation; Myron Kandel wades into the morass of Middle East and OPEC politics. (Transcript #147)

Back transcripts available on oil, computers and the savings and loan crisis.

Oprah Winfrey July 25, 1990

New Year's Resolutions: People who seven months ago vowed on camera to lose weight, quit smoking or stop shopping give progress reports on whether they've kept or broken their New Year's resolutions. Dr. Craig K. Polite, psychologist, reveals the psychological reasons about why we hang on to bad habits and the surprising ways it affects aspects of your life that you never realized. (Transcript #1008)

#90207k0018 07/26/1990 ~Japanese News Agency

TOKYO, JULY 26 KYODO - SALES AT MAJOR JAPANESE RETAIL STORES IN JUNE ROSE 11.9 PERCENT FROM A YEAR EARLIER TO 1,623 BILLION YEN DUE TO BOOMING SALES OF SUMMER CLOTHING IN THE RELATIVELY DRY RAINY SEASON, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED THURSDAY.

THE JUNE UPSWING FOLLOWED A 15.8 PERCENT YEAR-ON-YEAR RISE IN APRIL AND A 10.4 PERCENT INCREASE IN MAY.

''RETAIL SALES REMAIN ON A FIRM FOOTING,'' MITI OFFICIALS SAID. THE BRISK SALES AT MAJOR RETAILERS WERE ALSO TRACED TO AN EARLY START OF SUMMER GIFT BUYING, WHICH PROVIDED A SIZABLE KICK TO THE SALES OF FOOD PRODUCTS.

DEPARTMENT STORE SALES ROSE 14.6 PERCENT IN THE MONTH, TOTALING 877.2 BILLION YEN.

SALES AT CHAIN STORES SURGED 8.9 PERCENT TO 745.4 BILLION YEN.

#90207k0028 07/26/1990 ~Japanese News Agency

TOKYO (JULY 26) KYODO - JAPAN'S INDUSTRIAL OUTPUT IN JUNE EDGED DOWN A SEASONALLY ADJUSTED 0.4 PERCENT FROM THE PREVIOUS MONTH IN A REACTION TO A SHARP UPSWING IN MAY, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID IN A PRELIMINARY REPORT THURSDAY.

MITI OFFICIALS, SAYING THE JUNE DROP WAS QUITE MODERATE CONSIDERING THE ACUTE RISE IN MAY, ARGUED THAT INDUSTRIAL PRODUCTION IS STILL ON A PATH OF STEADY ASCENT.

COMPARED WITH THE SAME PERIOD LAST YEAR, PRODUCTION AT FACTORIES AND MINES CLIMBED 2.7 PERCENT IN JUNE.

THE INDUSTRIAL PRODUCTION INDEX STOOD AT A SEASONALLY ADJUSTED 124.5. ACTIVE OUTPUT OF MACHINERY LARGELY OFFSET THE SLIDES IN PRODUCTION OF TRANSPORTATION MACHINES SUCH AS AUTOMOBILES, THE MITI OFFICIALS SAID.

JUNE SHIPMENTS FELL A SEASONALLY ADJUSTED 0.2 PERCENT FROM THE PREVIOUS MONTH, BUT GAINED 4.3 PERCENT FROM A YEAR EARLIER.

INVENTORIES ALSO DROPPED 1.9 PERCENT FROM MAY, AND MOVED UP 1.5 PERCENT WHEN COMPARED WITH THE YEAR-EARLIER LEVEL.

THE 1.5 PERCENT YEAR-ON-YEAR RISE IN INVENTORIES WAS THE SLOWEST ADVANCE SINCE JUNE 1988.

THE SEASONALLY ADJUSTED INDEXES FOR SHIPMENTS AND INVENTORIES WERE 127.1 AND 108.4, RESPECTIVELY.

INDUSTRIAL PRODUCTION IN THE SECOND QUARTER OF 1990 ROSE 1.8 PERCENT FROM THE PRECEDING QUARTER AND SURGED 3.3 PERCENT FROM THE SAME PERIOD A YEAR AGO.

THE 1.8 PERCENT QUARTER-TO-QUARTER GAIN WAS THE BIGGEST RISE SINCE THE FIRST QUARTER OF 1989, WHEN COMPANIES RUSHED TO ROLL OUT AS MUCH PRODUCTS AS POSSIBLE BEFORE THE CONSUMPTION TAX WAS INTRODUCED ON APRIL 1 LAST YEAR.

SHIPMENTS OF THE APRIL-JUNE PERIOD PICKED UP 1.4 PERCENT FROM THE PREVIOUS THREE MONTHS, AND SHOT UP 4.3 PERCENT FROM A YEAR EARLIER.

INVENTORIES IN THE THREE-MONTH PERIOD WERE 0.2 PERCENT LOWER THEN THE PREVIOUS PERIOD, BUT 3.7 PERCENT HIGHER COMPARED WITH THE SAME PERIOD LAST YEAR.

KOBE (JULY 26) KYODO - THE HYOGO PREFECTURAL BOARD OF EDUCATION THURSDAY FIRED THE HIGH SCHOOL TEACHER WHO INADVERTENTLY CLOSED A SLIDING SCHOOL GATE ON A LATE STUDENT, CAUSING HER TO SUFFER FATAL HEAD INJURIES.

BOARD OFFICIALS SAID THE TEACHER, TOSHIHIKO HOSOI, 39, OF THE PREFECTURE-RUN KOBE TAKATSUKA HIGH SCHOOL IN NISHI WARD, KOBE, WAS NEGLIGENT BECAUSE HE FAILED TO MONITOR STUDENT SAFETY WHILE FOLLOWING

SCHOOL REGULATIONS TO SHUT THE GATE AT THE START OF MORNING CLASSES, TO WARN STUDENTS NOT TO BE LATE.

THE STUDENT, 15-YEAR-OLD RYOKO ISHIDA, DIED AT A HOPSITAL SHORTLY AFTER THE INCIDENT.

TSUNEO SHIMOKAWA, WHO CHAIRED THURSDAY'S EMERGENCY BOARD MEETING, SAID IN A STATEMENT THAT HE REGRETTED ''THE INCIDENT HAPPENED AT A SCHOOL, A PLACE OF EDUCATION, WHERE IT SHOULD NEVER HAVE HAPPENED.''

''WE HAVE DECIDED TO TAKE STRICT PUNISHMENT BASED ON THE FACT THAT A PRECIOUS LIFE WAS LOST,'' HE SAID. ''WE PAY TRIBUTE TO THE STUDENT ONCE AGAIN AND APOLOGIZE TO HER FAMILY MEMBERS.''

THE BOARD ALSO ACCEPTED THE PLEA OF RESIGNATION BY SCHOOL PRINCIPAL ATSUO NOMURA ON THE SAME DAY WHILE ADMONISHING FOUR OTHER SCHOOL AND BOARD OFFICIALS.

THE SCHOOL GATE INCIDENT HAS SPURRED A NATIONAL DEBATE OVER THE RIGIDITY OF SCHOOL REGULATIONS AND THE QUALIFICATIONS OF TEACHERS.

POLICE SAID THEY WILL TURN OVER THE RESULTS OF THEIR INVESTIGATION TO PROSECUTORS FOR POSSIBLE CHARGES AGAINST HOSOI.

-30- 1593

#90207k0082 07/26/1990 ~Japanese News Agency

MANILA (JULY 26) KYODO - JAPAN REMAINED THE BIGGEST FOREIGN INVESTOR IN THE PHILIPPINES FOR THE FIRST SIX MONTHS OF 1990, POURING IN 5.1 BILLION OF THE 26.8 BILLION PESOS IN EQUITY INVESTMENTS, IT WAS ANNOUNCED THURSDAY.

JAPANESE EQUITY INVESTMENTS FROM JANUARY TO JUNE REGISTERED A HEFTY 166.2 PERCENT INCREASE FROM ONLY 1.9 BILLION PESOS POSTED DURING THE SAME PERIOD LAST YEAR.

THIS WAS THE SECOND STRAIGHT YEAR THAT THE JAPANESE LED FOREIGN INVESTORS IN THE COUNTRY.

TAIWAN WAS THE SECOND BIGGEST FOREIGN INVESTOR WITH EQUITY CONTRIBUTIONS OF 3.2 BILLION PESOS, WHILE CANADA RANKED THIRD WITH AN EQUITY SHARE OF 1.1 BILLION PESOS.

THE BOARD OF INVESTMENTS (BOI) SAID TOTAL INVESTMENTS REGISTERED DURING THE PERIOD REACHED 48.7 BILLION PESOS, ALREADY 60 PERCENT OF THE 80 BILLION PESO TARGET FOR THE WHOLE YEAR.

DESPITE EARLIER PREDICTIONS OF A POSSIBLE DROP IN INVESTMENTS BECAUSE OF THE DECEMBER COUP ATTEMPT AND POWER SUPPLY PROBLEMS, INVESTMENTS IN

PLANNED PROJECTS GREW BY OVER 9 PERCENT OR 4.1 BILLION PESOS FROM THE PREVIOUS YEAR'S LEVEL OF 44.6 BILLION PESOS.

AMONG THE BIGGEST PROJECTS APPROVED BY THE BOI WERE A CHEMICAL MANUFACTURING PROJECT OF ASAHI-REPUBLIC CHEMICAL CORP., A CEMENT PRODUCTION PROJECT OF BACNOTAN CEMENT CORP., AND A CAUSTIC SODA AND LIQUID CHLORINE MANUFACTURING BUSINESS.

#90207k0084 07/26/1990 ~Japanese News Agency

TOKYO (JULY 26) KYODO - JAPAN'S EXPORTS OF CARS, TRUCKS, AND BUSES FELL 5.2 PERCENT IN THE FIRST SIX MONTHS OF THE YEAR FROM THE SAME PERIOD OF 1989 TO 2,900,626, THE LOWEST FIRST-HALF LEVEL IN SEVEN YEARS, THE JAPAN AUTOMOBILE MANUFACTURERS ASSOCIATION ANNOUNCED THURSDAY.

THE LAST TIME THAT EXPORTS IN THE JANUARY-JUNE PERIOD FELL TO SUCH A LOW LEVEL WAS IN 1983 WHEN EXPORTS TOTALED 2,873,636 VEHICLES, IT SAID.

THE SLUMP IN EXPORTS WAS THE EIGHTH CONSECUTIVE SIX-MONTH DECLINE, THE ASSOCIATION SAID.

JAPANESE AUTOMAKERS' FULL-SCALE PRODUCTION IN THE UNITED STATES, A MAJOR AUTO IMPORTER, HAS SHARPLY REDUCED THE NUMBER OF DOMESTICALLY PRODUCED CAR EXPORTS TO THAT COUNTRY, IT SAID.

AUTO EXPORTS BOUND FOR THE U.S. IN 1990 WILL FALL FAR BELOW LAST YEAR'S LEVEL OF 1,955,474 VEHICLES, INDUSTRY ANALYSTS PREDICTED.

JAPANESE AUTOMAKERS ARE CALLING FOR A HALT TO SO-CALLED VOLUNTARY RESTRAINTS ON EXPORTS TO THE U.S. IN VIEW OF THE DECLINE, THEY SAID.

DURING THE FIRST HALF OF THE YEAR, CAR EXPORTS DECLINED 1.4 PERCENT TO 2,237,316 VEHICLES. TRUCK EXPORTS FELL 16.6 PERCENT TO 643,932, WHILE EXPORTS OF BUSES ROSE 13.0 PERCENT TO 19,378.

OVERALL EXPORTS TO THE U.S. FELL 15.6 PERCENT TO 1,503,589 VEHICLES, NARROWING JAPANESE MAKERS' MARKET SHARE TO 36.3 PERCENT FROM 40.7 PERCENT IN THE FIRST HALF OF 1989. CAR EXPORTS TO THE U.S. DECLINED 10.6 PERCENT TO 874,228.

THE ASSOCIATION ALSO REPORTED THAT EXPORTS IN JUNE ROSE 4.1 PERCENT FROM THE SAME PERIOD OF 1989 TO 490,506 VEHICLES.

#90207k0086 07/26/1990 ~Japanese News Agency

OSAKA (JULY 26) KYODO - MARUBENI CORP. SAID THURSDAY IT WILL ESTABLISH A

MENSWEAR MAKER IN BANDUNG, INDONESIA, IN AUGUST JOINTLY WITH AN INDONESIAN TEXTILE FIRM AND A JAPANESE APPAREL MAKER.

THE NEW FIRM, TO BE NAMED P.T. TRIMAS GARMENT INDUSTRY, WILL START OPERATION APRIL NEXT YEAR, MARUBENI OFFICIALS SAID.

THE INDONESIAN PARTNER, JAKARTA-BASED TRIMEX SARANA TRISULA LTD., WILL INVEST 51 PERCENT OF THE TOTAL INVESTMENT OF 2 MILLION DOLLARS. MARUBENI AND ANOTHER JAPANESE INVESTOR, HIROSHIMA-BASED SEIKOU LTD., WILL INVEST 24.5 PERCENT EACH.

THE PLANNED COMPANY IS EXPECTED TO PRODUCE 840,000 PAIRS OF MEN'S TROUSERS A YEAR FOR SALE MAINLY TO JAPAN AT A PRICE OF 3,000 YEN PER PAIR, THE OFFICIALS SAID.

MARUBENI HAS INVESTED FOR SIMILAR JOINT VENTURES IN SUCH FOREIGN MARKETS AS TAIWAN AND SOUTH KOREA, BUT PROFITABILITY IN THOSE MARKETS HAS BECOME LOWER DUE TO RISING LABOR COSTS, THE OFFICIALS SAID.

IT THEN DECIDED TO SHIFT ITS OPERATION BASES TO INDONESIA AND THAILAND, WHERE WAGES ARE LOWER. IN THAILAND, ONE OF THOSE NEWLY FORMED FIRMS STARTED PRODUCTION OF MEN'S TROUSERS EARLIER THIS MONTH, THEY ADDED.

#90207k0099 07/26/1990 ~Japanese News Agency
DHAKA (JULY 26) KYODO - THE BANGLADESH GOVERNMENT ANNOUNCED THURSDAY A COMPREHENSIVE NATIONAL HEALTH POLICY THAT INCLUDES RESTRICTING PRIVATE PRACTICES AND RAISING THE MINIMUM LEGAL AGE OF MARRIAGE TO HELP CONTAIN THE NATION'S RAMPANT BIRTH RATE.

HEALTH AND FAMILY PLANNING MINISTER AZIZUR RAHMAN PLACED THE COUNTRY'S FIRST EVER HEALTH POLICY BEFORE PARLIAMENT ON A DAY WHEN NEARLY 8,000 DOCTORS ATTACHED TO GOVERNMENT HOSPITALS STAGED A STRIKE IN PROTEST AT THE NEW POLICY.

RAHMAN SAID THE PRIME OBJECTIVE OF THE NEW POLICY IS TO ENSURE FREE MEDICAL CARE TO THE COUNTRY'S DESTITUTE PEOPLE AND TO WIDOWS. THE POLICY, WHICH WILL BE IMPLEMENTED IN PHASES, COMES INTO FORCE OCTOBER 17.

IN A NATIONWIDE ADDRESS WEDNESDAY, BANGLADESH PRESIDENT HOSSAIN MOHAMMAD ERSHAD SAID THERE IS ONLY ONE DOCTOR FOR OVER 8,000 BANGLADESHIS AND ONLY 21 PERCENT OF THE POPULATION GOES TO HOSPITALS RUN BY THE GOVERNMENT.

THE NEW POLICY, WHICH EMPHASIZES PREVENTIVE AND CURATIVE TREATMENT, PROPOSES RAISING PUBLIC SECTOR SPENDING ON OVERALL HEALTH AND SOCIAL WELFARE TO 10 PERCENT OF TOTAL EXPENDITURE AGAINST CURRENT SPENDING OF 3 PERCENT.

THE POLICY COMPLETELY PROHIBITS PRIVATE PRACTICES BY TEACHERS OF MEDICAL COLLEGES AND GRANTS LIMITED PERMISSION TO SENIOR AND PRINCIPAL CONSULTANTS TO RUN PRIVATE PRACTICES.

THE MINIMUM LEGAL AGE FOR MARRIAGE FOR BOTH SEXES WILL BE RAISED FROM THE CURRENT 21 FOR MEN AND 18 FOR WOMEN.

THE GOVERNMENT HAS ALSO DECIDED TO SET UP A CENTRAL BUREAU FOR RECORDING BIRTHS AND DEATHS, AND TO MAKE MARRIAGE REGISTRATION COMPULSORY.

-30- 1766
#90207k0101 07/26/1990 ~Japanese News Agency
TOKYO (JULY 26) KYODO - DAI-ICHI KANGYO BANK SAID THURSDAY IT WILL BEGIN MONDAY TO OPERATE A COMPUTER SYSTEM FOR FORECASTING BOND FUTURES YIELDS.

THE SYSTEM IS BASED ON THE CONCEPT OF A ''NEUROCOMPUTER'' WHICH IS CAPABLE OF PROCESSING DATA ACCORDING TO A PATTERN SIMILAR TO THAT BELIEVED TO BE CENTRAL TO THE WORKINGS OF THE HUMAN BRAIN.

BANK OFFICIALS SAID THE NEW SYSTEM, THE FIRST OF ITS KIND DEVELOPED BY A JAPANESE FINANCIAL INSTITUTION, WOULD POST AN ACCURACY RATE OF 75 PERCENT,

COMPARED WITH UP TO ABOUT 60 PERCENT SO FAR. UP TO NOW, FINANCIAL INSTITUTIONS HAVE DEPENDED ON PREDICTIONS BY EXPERTS BASED ON THEIR KNOWLEDGE AND EXPERIENCE.

THE NEW SYSTEM, WHICH COST 100 MILLION YEN TO DEVELOP, IS A PRACTICAL VERSION OF AN EXPERIMENTAL SYSTEM DEVELOPED JOINTLY BY THE BANK AND FUJITSU LTD.

THE OFFICIALS SAID THE NEW SYSTEM CAN FORECAST A RISE OR A FALL IN THE BOND FUTURES YIELD ONE TO FIVE DAYS LATER WITH 75 PERCENT ACCURACY. IT CAN ALSO FORECAST THE SIZE OF RISE OR FALL IN THE BOND FUTURES YIELD ONE TO FIVE DAYS LATER WITH AN ERROR RATE OF 0.03 PERCENT.

THE OFFICIALS SAID THE BANK WOULD TRY TO DEVELOP A SIMILAR SYSTEM FOR FORECASTING FOREIGN EXCHANGE RATES AND EXTERNAL BOND YIELDS BY THE END OF THIS YEAR.

WASHINGTON (JULY 26) KYODO - THE UNITED STATES HAS MADE ''SUBSTANTIAL PROGRESS'' TOWARD CONCLUDING A TRADE AGREEMENT WITH MONGOLIA, A U.S. TRADE OFFICIAL SAID THURSDAY.

THE OFFICIAL SAID THE STATE DEPARTMENT IS CONSIDERING EXTENDING MOST FAVORED NATION (MFN) TRADE STATUS TO MONGOLIA.

SECRETARY OF STATE JAMES BAKER MIGHT CONCLUDE A BASIC TRADE AGREEMENT DURING HIS TRIP TO THE EAST ASIAN COUNTRY AUGUST 2-5, A U.S. SOURCE SAID.

THE TRADE OFFICIAL SAID MONGOLIAN OFFICIALS WERE IN WASHINGTON LAST WEEK FOR TALKS WITH OFFICIALS OF THE STATE DEPARTMENT AND THE U.S. TRADE REPRESENTATIVE'S OFFICE ON TRADE AND OTHER ISSUES.

HE SAID MONGOLIA WILL HAVE NO MAJOR DIFFICULTY IN RECEIVING MFN TRADE STATUS BECAUSE MONGOLIANS ARE ALLOWED TO EMIGRATE.

A COUNTRY WISHING TO OBTAIN MFN TRADE STATUS FROM THE U.S. IS REQUIRED TO HAVE A FREE EMIGRATION POLICY UNDER THE JACKSON-VANIK AMENDMENT OF THE U.S. TRADE LAW.

#90207m0001 07/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The General Accounting Office has recommended that the Pentagon totally overhaul its management system, and has likened the problem to the S&L crisis. ... DE BEERS has signed a five-year, $5 billion agreement with the Soviet Union for exclusive rights to sell for Soviet diamonds. ... EASTERN AIRLINES and nine of its managers were indicted on charges that supervisors at four airports routinely ignored vital repairs and maintenance and then falsified records to make it appear as if the work had been performed. ... The NATIONAL ASSOCIATION OF REALTORS says sales of existing single-family homes rose 1.2% from May to June for the first monthly increase since September. ... PACIFIC TELESIS and CELLULAR COMMUNICATIONS agree to combine their cellular telephone interests in the Midwest. ... DU PONT CO. and MERCK & CO. announce that they are forming an independent drug company to develop and market new lines of drugs. its Jeeps in Toledo, Ohio., closing a plant in Brampton, Ontario.

WHAT'S AHEAD:

U.S. import and export prices indexes will be released by the Labor Department at 10 a.m. EDT. ... The risks of Freddie Mac, Fannie Mae and Ginnie Mae will be assessed at a House Banking Committee hearing, to take place at 9:30 a.m. EDT. ... The Resolution Trust Corp. will announce its list of properties for sale at 10:30 a.m. EDT.

FROM THE BULLS:

"The great bulk of companies are showing pretty good earnings," says MONTE GORDON, director of research at the DREYFUS CORP. "I think the market has been focusing its attention in the wrong place, and therefore losing sight of the fact that the economy is doing better." He continues, "I think it is time to bargain hunt. ... I think this hesitation [in the stock market] will turn out to be rejuvenating rather than weakening." (FNN "Marketwrap", 7/25)

KIDDER, PEABODY strategist STEFAN ABRAMS thinks the stock market slide that began last week has ended -- or will end within a few days. He expects prices to head gradually higher, led by growth stocks with dependable earnings. He also expects moderate gains in bonds, with long-term interest rates dropping to 8% by year end. Kidder, Peabody actually raised its recommended exposure to both stocks and bonds Monday as a result of the sell-off. DEAN WITTER REYNOLDS SECURITIES INC. is also positive on the market and is sticking with its recommended 85% allocation in stocks. "Inflation is subpar, inflation is going down," says strategist JOHN CONNOLLY. He expects interest rates to decline and stock prices to rise relative to per-share earnings. "If we were to have a big budget deal, all this would happen even sooner." (WSJ, 7/26)

"I must believe the market is going to go north," says CHARLES LEWIS of SHEARSON LEHMAN HUTTON. "I believe the market is going to move up because money is definitely moving down and the Fed Chairman gives you that clue. I have to support him in his effort to drive money out of the banks. Put your seatbelt on ... we're going north!" (CNBC "Business View", 7/25)

FROM THE BEARS:

"The market has been and still is flashing danger ahead," writes ELLIOT BRENNER of "Wall Street Micro Investor." He says the market still requires a substantial decline to complete an intermediate correction which he says began last October. He is targeting November for a Dow low of 2400 or possibly as low as 2100. GENE INGER of the "Inger Letter" says that this is the time to be short or be out of the market. He writes, "The bull market is all over but the shouting." (FNN "Marketwrap", 7/25)

"Our view is not very bullish for equity investors," writes MICHAEL SIVY, senior editor of "Money" magazine. He continues, "Once there's a budget accord, the Fed will ease - just enough for rates to decline one-half of one percentage point by spring. ... The economy will weaken. ... Corporate profits will get shakier. The bottom line is that the stock market is vulnerable to a setback that could knock the Dow industrials down to 2500." ("Money", August 1990)

STOCK MARKET:

"We're going [up and down] on this seesaw whether we're more worried about inflation or a recession," says SID DORR, head of institutional trading at CHARLES SCHWAB & CO. "Right now we're more worried about inflation." ("USA Today", 7/26)

"Confidence has been shaken in earnings," says HUGH JOHNSON, head strategist for FIRST ALBANY CORPORATION. "Investors are extremely tentative, and that's reflected in the low volume." In describing the current attitude of investors, Johnson says, "It's not just a malaise; it's an edginess, a lack of confidence, concern that we'll get blind-sided by some earnings disappointment or disappointment emerging for the current budget negotiations." (NYT, 7/26)

Yesterday's "action was encouraging," says GLENN CUTLER, editor of "Market Mania." "The market was clearly stabilizing and there was firmness to its tone. However, investor psychology was damaged by the fall on Monday and it will take time to rebuild that." Cutler thinks the Dow will correct to 2840 or 2830, but will then rally above 3000, possibly as high as 3140 by the end of the year. ("Investor's Daily", 7/26)

GREG SMITH, strategist at PRUDENTIAL-BACHE SECURITIES INC., describes the market as nervous. "My modest optimism on this year has been predicated on the idea that at some point we're going to get a drop in interest rates." Smith is now starting to doubt that expectation. Still, he thinks stock and bonds will slightly outperform cash for the year and is recommending that investors keep 55% of their portfolios in stocks. (WSJ, 7/26)

Remain cautious, says SHEARSON's NEWTON ZINDER, who also advises investors to stop focusing on the Dow. "The broad market is doing far worse. It remains well below any all time highs and has recouped very little of what it lost on Monday," says Zinder. "We really have two markets out there -- a handful of blue chips and almost everything else." (FNN "World Business Update", 7/26)

"It's still an earnings-driven market," says JIM O'NEILL, co-manager of OTC trading for ROBINSON-HUMPHREY CO. He says the selling pressure abated somewhat yesterday, but adds that investors "aren't stepping over each other" to buy. (WSJ, 7/26)

"It usually pays to be cautious in a market that's heating up as the economy is cooling off," says BILL BLOUNT, a veteran stockbroker at PAINEWEBBER in Portland, Ore. He says that he is not elated by the Dow's new highs in this aging bull market. ("Money", August 1990)

JOSEPH McALINDEN, director of equity research at DILLON READ, predicts

that for the rest of the summer technology stocks, natural- resource stocks and energy stocks will take turns bolstering the broad market. He describes Monday's drop as "a decisive crack in the one-decision stocks" and adds "we're now getting some pickup in stocks that do well in an inflationary environment." (WSJ, 7/26)

STOCK TIPS:

STEVE SCHROLL, a bank and savings & loans analyst for PIPER, JAFFRAY & HOPWOOD, says there are some good values to be found in the banking and S&L area for the long-term investors. "Anytime when you have an industry that gets into problems, the whole industry gets taken down even though there may be some good plays within that industry." Recommended on solid fundamentals for long-term investments only are: KEYCORP, a bank holding company with holdings in the Northeast and the Pacific Northwest, that should have earnings up 17% next year; TCF FINANCIAL CORP., the largest S&L in Minneapolis/St. Paul, that is a good turn around company with a strong new management; FIRST BANK SYSTEM, helped by a new management turnover is returning to tight cost controls which should result in a earnings growth of up to 40% this year and maybe 20% the year after. (FNN "Marketwrap", 7/25)

Computer company profits have come under pressure as sales of lower priced computers have increased and mainframe sales have declined, says SANJIV HINGORANI, computer analyst at SALOMON BROTHERS. Although the computer industry continues to grow at two-to-three times the GNP, Hingorani says the industry is in a cyclical downturn in demand. "Investors have sold indiscriminately," says Hingorani, who believes there are now some bargains in the technology area. He advises investors to look for companies which will benefit from the lower dollar and companies that have cut costs. His three favorites: IBM, STORAGE TECHNOLOGY and NCR. (CNN "Business Morning", 7/26)

DIGITAL EQUIPMENT CORP. reported a $256.7 fourth-quarter loss yesterday that works out to $2.11 a share. The stock closed down 5/8 at 74 7/8. "DEC as an organization hasn't responded to the changes in computing and does not seem culturally able to," says ROBERT HERWICK of HAMBRECHT & QUIST. However, MARC SCHULMAN of UBS SECURITIES INC. says, "Things are as bad as they're going to get and now they're going to get better." ("USA Today" and "The Washington Post", 7/25)

MICHAEL GERAN of GERAN & CO. says DIGITAL's restructuring plan will pay off later this year. "That will roughly buy DEC a cost savings of $200 million per year, which is roughly $2 per share, by the fourth quarter of this year." (CNBC "Business View", 7/25)

Oil stocks have had a big run-up and are vulnerable on a very short term basis, says NEWTON ZINDER, stock analyst for SHEARSON LEHMAN HUTTON. "But

I also think that the trend in oil prices is probably up, so pullbacks should be viewed as buying opportunities." (FNN "World Business Update", 7/26)

#90207m0002 07/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The dollar definitely has a soft tone and I would look for the dollar to stay soft," says FRANK PUSATERI of BANK OF BOSTON, noting potentially conflicting forces such as Middle Eastern developments and concern about lower U.S. interest rates. (Reuters, 7/25)

"I think the market is poised fundamentally to lower the dollar," says RONALD HOLZER, vice president and chief dealer at HARRIS TRUST & SAVINGS BANK in Chicago. Holzer also says the attention on the currency market will focus on the first estimate of U.S. second- quarter gross national product, due for release tomorrow. (WSJ, 7/26)

Fed governor WAYNE ANGELL, told an audience in Boston that any further easing of monetary policy would confuse the world financial markets and cause long-term interest rates to rise. "The bottom line is that Angell was articulating a view that is his own, one that reflects a difference of opinion between himself and the consensus at the Fed," says DANA JOHNSON, chief money market economist at the FIRST NATIONAL BANK OF CHICAGO. "But at this point I think the Fed would agree that a further easing in policy would be unwise. It has to wait for the market to see more evidence of economic weakness or of a substantive reduction in the Federal budget deficit before it moves again." (NYT, 7/26)

Fed governor MEMBER WAYNE ANGELL sent the bond market into a tizzy yesterday by announcing that he was against easing to avoid a recession. "The long end took comfort in the fact that Angell made the comments he did," said FRED LEINER of CONTINENTAL BANK. "The short end got set back." ("Investor's Daily", 7/26)

RICHARD RAHN, chief economist for the U.S. CHAMBER of COMMERCE, says the 3.2% decline in durable goods orders for June should push the Fed to ease. "The continuing drop from the previous year - we're down 5.9% from last year - shows we have very slow growth for a weakening economy and it shows it's very important for the Fed to move more boldly than they have to reduce interest rates." ("Nightly Business Report", 7/25)

"High-quality bonds are likely to turn in strong returns," writes MICHAEL SIVY, senior editor of "Money" magazine. "If yields on long- term Treasuries drop to 8% by April [1991], bonds could post returns of 10% in nine months - or 14% at an annual rate." ("Money", August 1990)

"Bonds look the best to me because the stock market has already embedded in its price a much lower bond yield," says GOLDMAN, SACHS strategist STEVEN EINHORN. He sees stocks declining 5% to 10% over the next few months as investors get "frustrated" when interest rates fail to decline. Goldman, Sachs is recommending 55% of a portfolio be in bonds and only 35% in stocks. (WSJ, 7/26)

THE ECONOMY:

A new "Washington Post-ABC News Poll" finds 58% of the respondents thinking the economy is getting worse, 9% thinking it is getting better and 32% saying it is staying about the same. ("The Washington Post" 7/26)

"It is likely the economy will do better in the second half of the year, and certainly around the fourth quarter of the year, than it is doing at the present time," says MONTE GORDON, director of research at DREYFUS CORP. (FNN "Marketwrap", 7/25)

Commenting on the 3.2% drop in durable goods orders for June, ROBERT McGEE an economist at TOKAI BANK in New York, says, "I think these numbers say the improvement [in the manufacturing sector] has gone as far as it can go." (FNN "Marketwrap", 7/26)

With the volatile durable goods numbers, one month does not a trend make, according to IAN BORSOOK, senior economist at MERRILL LYNCH. "For the year so far, the series is going sideways - there isn't a clear trend upward or downward," says Borsook. "It shows that manufacturing is still weak overall, but it's not getting worse - just a keeping-its-head-above-water kind of thing." ("Investor's Daily", 7/26)

ALLEN SINAI, chief economist at BOSTON CO. ECONOMIC ADVISORS, says yesterday's durable goods report "is more evidence that the economy will probably come as close as it can get to a recession without going into one. But to many people, it's almost a moot point now whether we do or don't have a national recession. Some sectors and regions are already in their own recessions." ("USA Today", 7/26)

"I am surprised at this weakness" in the durable goods numbers, says EVELINA TAINER of FIRST NATIONAL BANK OF CHICAGO. These most recent numbers "seem to be at odds with the idea that the manufacturing sector has bottomed out," according to Tainer. ("Investor's Daily", 7/26)

"This decline [in durable goods orders] is worrisome, but I wouldn't make

it into a recession without seeing a few more numbers," says KATHRYN KOBE, an economist with JOEL POPKIN & COMPANY, a Washington forecasting firm. (NYT, 7/26)

IN WASHINGTON:

The House of Representatives, yesterday failed to override PRESIDENT BUSH's veto of legislation guaranteeing workers as much as 12 weeks annual unpaid leave for childbirth, adoption or serious family illness. The vote 232-195 in favor of the bill fell 53 votes short of the two-thirds required to override a veto. President Bush criticized "rigid, federal-imposed requirements" on private industry. "George Bush is going to have a family-leave bill on his desk every year," says SEN. CHRISTOPHER DODD (D. - Conn.), who led the fight for the bill in the Senate. He and SEN. EDWARD KENNEDY (D. - Mass.) said they would soon re-introduce the legislation. REP. GEORGE MILLER (D. - Calif.) charges that the veto "makes an absolute mockery out of this President suggesting that he is pro-family." (WSJ, 7/26)

The 2,505 savings and loans not under direct government control lost about $271 million during the first three months of this year, reports the TREASURY DEPARTMENT's Office of Thrift Supervision. Industry analyst BERT ELY says the "data doesn't bode well for the survival of a separate [S&L] industry." He predicts thrifts eventually will merge with banks. ("USA Today", 7/26)

#90207p8878 07/26/1990 ~PR Newswire

YORK, PA. (JULY 26) PR NEWSWIRE - Rheem Empreendimentos Industries e Comerciais, the largest manufacturer of steel cans and drums in Brazil, recently announced the formation of a joint venture with Graham Engineering of York.

The resulting company, Rheem Graham Embalagens Ltda., will invest in excess of $20 million to set up two plants in Brazil, one in Sao Paulo and one in Rio de Janiero, to produce in excess of 100 million plastic bottles per year. The joint venture is owned 70 percent by Rheem and 30 percent by Graham.

Bilateral negotiations occurred throughout 1989 for the formation of the new company to produce "plastic packaging that promises to revolutionize the Brazilian market," said Rheem's president, Fernando Bergallo.

The first line, now under start-up, will produce multi-layered bottles to be supplied to the farm pesticide and herbicide sectors. Additional lines will be added to supply bottles to the household chemical, automotive and food and beverage markets.

Jean Rubie, president of Graham Engineering, indicated that this venture represents another in a series of moves that the Graham Cos. are undertaking to broaden their international activities in the packaging field.

#90207p8880 07/26/1990 ~PR Newswire

ANN ARBOR, MI (JULY 26) PR NEWSWIRE - Medstat Systems Inc. (NASDAQ: MDST) announced today record revenues and earnings for the third quarter and nine months ended June 30, 1990.

Quarterly revenues rose 41 percent to $3,345,000 from $2,376,000 in the prior year's third quarter. Operating income was $483,000 up 26 percent form $383,000. Net income was $356,000 or 13 cents per share for the quarter, up 11 percent from $322,000, or 12 cents per share in the third quarter of 1989.

For the nine months, revenues were ahead by 37 percent to $9,255,000 from $6,778,000. Operating income grew 28 percent to $1,350,000 from $1,057,000. Net income was $1,033,000, or 38 cents per share, up 20 percent form $859,000, or 32 cents per share.

"Our year-to-date results reflect that we are on track with the year-end financial targets we outlined for fiscal 1990: 30 to 35 percent revenue growth; 15 percent operating margins; and 16 to 17 percent pre-tax margins " said Ernest G. Ludy, Medstat chairman and chief executive. "As we enter our fourth quarter, we are confident we will achieve our revenue and margin targets for the year."

Medstat Systems Inc. is a healthcare information company serving corporations, insurance, healthcare and consulting organizations with specialized databases, software and consulting services for controlling medical costs and measuring healthcare markets.

#90207p8881 07/26/1990 ~PR Newswire

HAYWARD, CA (JULY 26) PR NEWSWIRE - Nellicor Inc. today reported record revenue of $142.6 million for fiscal year 1990, a 20 percent increase from revenue of $118.7 million reported in fiscal 1989. Net income was $14.4 million ($0.96 per share) compared to $8.1 million in fiscal 1989.

Revenue for the fourth quarter of fiscal 1990 was $39.8 million, a 35 percent increase from revenue of $29.5 million in the fourth quarter of fiscal 1989. Net income was $4.3 million ($0.28 per share) in the fourth quarter compared to net income of $1.7 million ($0.12 per share) reported for the fourth quarter of fiscal 1989.

Revenues increased this year primarily due to increased sales of Nellcor's proprietary, patient-dedicated sensors, reflecting continued growth in the installed base of the company's monitors. Oximeter revenues did not materially change from fiscal 1989 levels, however, because unit volume

increases were substantially offset by unit price decreases. Revenue from multi-function monitor products, including the N-1000 and the new N-2500 anesthesia safety monitor, also remained relatively constant.

Gross margin as a percentage of revenue increased to 56 percent in fiscal 1990 from 50 percent in fiscal 1989. This increase primarily reflects improved manufacturing overhead absorption, lower product enhancement costs and a shift in product mix to patient-dedicated sensors.

Nellcor also announced the retirement of Jack Lloyd, a founder of the company, from his positions as chairman and director.

Nellcor Inc., founded in 1981, develops, manufacturers and markets high-performance monitoring equipment for patient safety and management in operating rooms, recovery rooms, intensive care units and other hospital sites. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

#90207p8882 07/26/1990 ~PR Newswire

WASHINGTON (JULY 26) PR NEWSWIRE - Results from the first human tests of the HGP-30 AIDS vaccine are "very encouraging" according to Dr. Allan Goldstein, who heads the research team that discovered HGP-30.

Dr. Goldstein, of the George Washington University Medical Center, confirms that "for the first time an AIDS vaccine has been reported to elicit a CD8 cytotoxic (killer) T-cell response in humans."

HGP-30 is being developed by CEL-SCI Corporation (NASDAQ: CELI) of Alexandria, Va., and Alpha 1 Biomedicals, Inc. (NASDAQ: ALBM), of Washington. In a phase I clinical trial, 18 healthy volunteers were vaccinated with HGP-30 with no evidence of adverse side effects. The study was conducted at the Kobler AIDS Clinic at St. Stephen's Hospital in London. This was the first human trial of a core-based AIDS vaccine in the world.

The CD8 cytotoxic T-cell response is considered to be vital for any effective AIDS vaccine, according to Dr. Goldstein. He noted that at the recent International AIDS Conference in San Francisco, Dr. Jay Berzofsky, chief of the Molecular Immunogenetics and Vaccine Branch of the National Cancer Institute, had stated "to be effective, a vaccine against AIDS should ... be able to elicit CD8 cytotoxic T-cells." These cells "may be necessary to eliminate already-infected cells that serve as a reservoir for HIV, and to prevent the virus from spreading from one cell to another directly."

Dr. Goldstein added "one of the most important features of the HGP-30 vaccine is that it is derived from a part of the virus core that is very stable and does not undergo genetic drift." Unlike HIV-envelope-based vaccines which do not protect against all strains of the HIV virus, the HGP-30 vaccine should provide protection against all forms of the AIDS virus. Another important feature of this vaccine is that there is absolutely no possibility that it can cause an AIDS infection.

Dr. Goldstein explained that HGP-30 may also be useful as a treatment for individuals that have been infected by the AIDS virus. During the latent period, which may last up to 10 years from the time of infection before the onset of AIDS, the virus can be found in many cells within the body. Recent studies indicate that long-term survival of HIV-infected individuals is correlated with a strong CD8 cytotoxic (killer) T-cell response. It is the job of CD8 cytotoxic (killer) T-cells to identify and destroy all of the HIV-infected cells. This robs the virus of its ability to reproduce within the body, thereby slowing down or preventing the disease from progressing. "It is our intent," noted Dr. Goldstein, "to evaluate HGP-30 as an AIDS immunotherapeutic drug for HIV-infected individuals as quickly as possible."

Additional phase I trials of the HGP-30 vaccine are planned to begin at San Francisco General Hospital and the University of California Medical Center in Los Angeles in the next few months.

#90207p8884 07/26/1990 ~PR Newswire

DEARBORN, MI (JULY 26) PR NEWSWIRE - Ford Motor Company (NYSE: F) earned $771 million, or $1.67 per share, in the second quarter of 1990, Chairman Harold A. Poling and President Philip E. Benton Jr. said today. Although second-quarter earnings were up $265 million from the first quarter, they were down $636 million from last year's second- quarter earnings of $1.4 billion, or $3.00 per share.

The company's worldwide sales and revenues were $26.9 billion, up $982 million from the second quarter of 1989. Factory unit sales were 1,686,000, down 129,000 units, or 7 percent.

Ford's worldwide automotive operations earned $529 million in the second quarter, down $705 million compared with a year ago, on sales of $23 billion. Ford's U.S. automotive profits in the second quarter were $356 million, down $103 million from a year ago, because of lower vehicle

production, higher incentive costs and higher costs for developing new products.

Outside the U.S., automotive profits were $173 million, down $602 million from a year ago. Lower profits resulted primarily from lower vehicle production in Europe, partially due to a strike, and government economic reform actions in Brazil which affected the results of Autolatina, Ford's joint venture with Volkswagen in Brazil and Argentina.

The company's second-quarter earnings from the Financial Services Group were $242 million, up $69 million from 1989, primarily reflecting improved net interest margins and operating efficiencies. Financial Services contributed 52 cents per share to the company's second-quarter earnings.

"Despite the many challenges we faced in the second quarter, we continued to be profitable through our business diversification and emphasis on the business fundamentals -- customer satisfaction, quality products, teamwork and cost control," Mr. Poling and Mr. Benton said.

During the first six months of 1990, Ford's share of the U.S. car market was 21.3 percent, down 1 point from the 1989 full-year market share. "We believe our share will improve with full availability of our new 1991 products," commented Mr. Poling and Mr. Benton.

The new Ford Escort and Mercury Tracer were introduced in the second quarter, and the Mercury Capri 2-plus-2 convertible was introduced last week. "The response by dealers, customers and the media to all three vehicles has been very positive," said Mr. Poling and Mr. Benton.

Ford's U.S. truck share was 29.3 percent for the first six months of 1990, up 5/10 of a point from the 1989 full-year market share. "Our truck share continues to grow," Mr. Poling and Mr. Benton noted. "The Explorer the new utility vehicle introduced in March, has had a highly successful launch. In June, the Explorer outsold all other nameplates in its segment." Ford Division retained truck sales leadership, and the F-Series truck continued to be the best-selling vehicle in the U.S.

In Europe, Ford's 1990 car share through June was 11.8 percent, down 1/10 of a point, compared with all of 1989, and Ford's truck share was 11 percent, down 9/10 of a point, reflecting the effect of labor disruptions in Britain and Belgium. Ford continued to be the market share leader in Australia and Taiwan for the first six months of 1990.

Automotive capital expenditures were $1.7 billion in the second quarter, up $83 million from the same period in 1989. "Increased capital spending is consistent with Ford's objective to provide continuous product improvement and outstanding customer value," Mr. Poling and Mr. Benton added.

Stockholder equity was $23.6 billion, or $49.89 per share, at the end of the second quarter. Total debt of the company's automotive operations was $6.4 billion at the end of the second quarter, up $2.6 billion from March 31, 1990. Cash and marketable securities of the company's automotive operations were $6.4 billion, or $13.92 per share outstanding, at the end of the second quarter, up $2.5 billion from March 31, 1990.

#90207p8886 07/26/1990 ~PR Newswire

SANTA CLARA, CA (JULY 26) PR NEWSWIRE - Stanford Telecommunications, Inc. (NASDAQ: STII) announced today that it recorded first quarter record results for net income, earnings per share and revenues. First quarter fiscal year 1991 net income of $858,000 and earnings per share of $.17 compare with net income of $475,000 and earnings per share of $.10 achieved during the first quarter of fiscal year 1990. Revenues of $24,385,000 posted for the first quarter of fiscal year 1991 increased 7 percent over the revenues achieved during the first quarter of the previous fiscal year.

During the quarter the company received funded contract bookings of $10.1 million. Funded backlog at the end of the first quarter of fiscal year 1991 stands at $57.9 million as compared with $61.0 million at the end of the first quarter of the previous fiscal year. After the end of the first quarter of fiscal year 1991, NASA Goddard Space Flight Center announced that Stanford Telecom has been selected for contract negotiations to provide system engineering support for the Advanced Tracking and Data Relay Satellite (ATDRS) System and the Advanced Network Control Center. The Government anticipates awarding a three year basic contract with a two year option on a cost reimbursable type basis. The Government estimates the contract could be valued at $30 million at the end of five years.

In announcing the results of the first quarter of fiscal year 1991, Dr. James J. Spilker, Jr., president and chairman, said, "In the latter half of last fiscal year we made changes in policy and in criteria for accepting fixed price development contracts in order to better position ourselves for increased profitability. I believe the results achieved during the first quarter of fiscal year 1991 provide some indication that those changes are beginning to bear results. We must now begin to focus our efforts and resources in identifying and pursuing new business opportunities in the government and commercial sectors. The commercial sector includes mobile satellite communication and satellite navigation systems."

#90207p8888 07/26/1990 ~PR Newswire
SUNNYVALE, CA (JULY 26) PR NEWSWIRE - Dionex Corp. (NASDAQ: DNEX) today announced revenues and earnings for its fourth fiscal quarter and year ended June 30, 1990.

Sales for the quarter were $21,002,000, a 6 percent increase over the $19,804,000 reported in the like period last year. Net income was $2,816,000, or $.32 per share. As previously announced, the company recorded a pretax charge of $942,000, or $.07 per share in the quarter associated with the change to direct distribution of Dionex products in Japan. This charge includes costs related to the termination of Dionex's existing distributor relationship in Japan and the start-up of its new Japanese subsidiary, Nippon Dionex K.K.

For the 12 months ended June 30, 1990, sales totaled $80,643,000, a 7 percent increase compared to the $75,479,000 reported for fiscal 1989. Net income for the year was $12,957,000, or $1.44 per share, up 7 percent from last year's $1.34 per share. EPS also reflects the repurchase of 583,000 shares of Dionex common stock under two repurchase programs established last year.

Dionex Corp. is a leading manufacturer and marketer of chromatography systems for chemical analysis. The company's systems are used in environmental analysis and by the chemicals, petrochemicals, life sciences power generation and electronics industries in a wide variety of applications.

DETROIT (JULY 26) PR NEWSWIRE - Meadowdale Foods, Inc., The Kroger Co. (NYSE: KR) and Foodland Distributors jointly announced today that, pursuant to a previously announced agreement in principle entered into on May 18, the companies have signed a definitive agreement for the sale of Meadowdale's Great Scott! retail stores to Kroger and its Abner Wolf wholesale operations to Foodland.

As part of the proposed sale, Kroger and Foodland will assume certain of Meadowdale's real estate and equipment leases, trade payables, and other obligations and liabilities.

The companies said that with the signing of the definitive agreement, the transaction could be finalized by mid to late August. Completion of the

transaction is subject to several remaining contingencies, including completion of a review of the transaction by the Federal Trade Commission and satisfactory arrangements with various unions representing Meadowdale's retail store and wholesale division employees.

CONTACT: Paul Bernish of The Kroger Co., 513-762-1304; Paul Coleman of Meadowdale, Foods, Inc., 313-943-3531; or Greg Gallus of Foodland Distributors, 313-523-2100.

#90207p8891 07/26/1990 ~PR Newswire

PORT WASHINGTON, NY (JULY 26) PR NEWSWIRE - Luxottica Group S.p.A. (NYSE: LUX) today announced its results for the second quarter and six months ended June 30, 1990. The company's results, as presented herein, are in accordance with U.S. GAAP, and all dollar amounts are calculated at an exchange rate of $1.00 equals Lire 1,226 in effect on June 30, 1990.

Net sales for the quarter increased 19.7 percent to Lire 92,839 million (US$75.7 million) from Lire 77,541 million in the second quarter last year. Net income rose 24.1 percent to Lire 13,263 million ($10.8 million) compared with Lire 10,685 million in the comparable quarter last year.

Earnings per American Depositary Share (ADS) for the second quarter of 1990 were Lire 588, equivalent to approximately $0.48.

For the six-month period ended June 30, 1990, net sales increased 17.6 percent to Lire 182,362 million ($148.7 million) from Lire 155,103 million in the first half last year. Net income rose 28 percent to Lire 26,372 million ($21.5 million) compared with Lire 20,608 million in the comparable half last year.

Earnings per ADS for the first half of 1990 were Lire 1,170, equivalent to approximately $0.95.

Commenting on the results, Leonardo Del Vecchio, chairman of the board and chief executive officer, said, "We are very pleased with Luxottica's first half results. The 18 percent increase in net sales for the first half reflects the expansion of Luxottica's designer portfolio, which now includes Giorgio Armani, Genny, Byblos, Giugiaro and Valentino.

"Our joint venture with Charmant of Japan has begun marketing eyeglass frames and sunglasses under the Giorgio Armani, Genny, Byblos and Giugiaro names in Japan and East Asia. We are very excited about the initial results of the joint venture that were posted during its first operating month in June. Also during the second quarter, we announced the signing of an agreement with Yves St. Laurent and will begin manufacturing and

marketing YSL eyeglass frames and sunglasses in both North America and Europe in 1991.

"Finally, we acquired during the second quarter full ownership of our Spanish distribution subsidiary, and also established a distribution company in Portugal, which we own fully. The initial results of our Portuguese company are extremely encouraging."

In discussing the first half, the company noted that the increase in net sales reflects Lire 26,812 million from expanded sales of its designer lines, which are sold at higher unit prices than the company's traditional lines. Designer lines increased to 26 percent of sales for the first half compared to 13 percent of sales in the first half last year. The volume of frames sold increased by 10.5 percent to over 4,500 million units.

The company also noted that the unfavorable exchange rate of the dollar versus the Lire adversely affected the increase in sales during the first half of this year when compared to the same period in 1989.

Gross profit increased 14.9 percent in the first half of 1990 to Lire 118,072 million compared to Lire 102,782 in the earlier period. Income before taxes increased to 25.7 percent of sales compared to 22.8 percent during the first half of 1989. Net income as a percentage of sales increased to 14.5 percent versus 13.3 percent for the first half of the earlier year.

Luxottica Group is a world leader in the design, manufacture and marketing of high quality eyeglass frames in the mid- and premium-priced categories. The company's products, which are designed and manufactured in Italy and include over 850 styles available in a wide array of colors and sizes, are sold through wholly-owned distributors in the United States, Canada, Italy France, Spain, Portugal, Sweden and West Germany and 50 percent-owned distributors in the United Kingdom and Japan.

HAUPPAUGE, NY (JULY 26) PR NEWSWIRE - Knogo Corp. (NYSE: KNO) announced today that it intends to initiate immediately a share repurchase program pursuant to which it will purchase up to $1 million worth of its common shares.

At the close of business on July 23, Knogo's common shares closed at

$8.25. The company had 5,252,894 shares of common stock outstanding as of May 31.

Arthur J. Minasy, president and CEO of Knogo, said, "We feel that the price of our stock does not reflect the company's prospects and represents an excellent long-term investment."

Minasy indicated that he too expected to make modest purchases of common stock for his personal account. Minasy currently owns approximately 678,471 common shares, or 13 percent of the shares outstanding.

The purchases will be made in open-market transactions, subject to the availability of stock in accordance with the rules of the Securities and Exchange Commission.

Knogo Corp., founder of the Electronic Article Surveillance (EAS) industry in 1966, is the world's technological leader in the design and manufacture of anti-theft systems for retailers. Its Swept Radio Frequency (SRF) systems protect apparel and its Micro-Magnetic (MM) systems protect all types of hard goods. Dual Radio Frequency (DRF) systems also protect apparel and are now gaining acceptance in protecting business assets. Knogo's Jensen Data Displayer, when used with Knogo's Surveillor Closed Circuit Video Systems (CCVS), protects retailers against internal shrinkage by recording point-of-sale transactions onto permanent videocassettes.

MINNEAPOLIS (JULY 26) PR NEWSWIRE - United Banks of Colorado, Inc. (NASDAQ: UBKS), and Norwest Corporation (NYSE: NOB) today announced the signing of a definitive agreement for the merger of United Banks, a bank holding company with headquarters in Denver, into Norwest, a diversified financial services organization based in Minneapolis. The agreement, approved by the boards of directors of both companies, is subject to approval by shareholders of United and regulatory agencies.

Under the agreement, each share of United common stock will be exchanged for 1.22 shares of Norwest common stock and each share of United preferred stock will be converted into the right to receive $51.50 and accrued dividends in cash at the time of closing. Based on a 30-day average of Norwest's stock price before July 10, the day merger discussions were announced, United's common shareholders would receive Norwest stock with a value of approximately $440 million. The transaction is structured to be a tax-free exchange for United's common shareholders and accounted for as a pooling of interests.

In addition, United has granted to Norwest an option exercisable, in whole or in part, under certain circumstances to purchase authorized but unissued shares of United common stock equal to 24.99 percent of United's shares currently outstanding.

"We are pleased about the bringing together of our company with one of the nation's top diversified financial services companies," said N. Berne Hart, chairman and chief executive officer of United. "The opening of Colorado to nationwide interstate banking next year offers many opportunities for United, Norwest and our customers. Those opportunities will continue to increase as the Colorado economy gains strength."

"This merger with United fits our long-term strategy of expanding our business beyond our core Upper Midwest banking franchise into states which have a banking culture and a business environment similar to the markets we currently serve. Norwest brings to this merger more than 60 years of experience in interstate banking in more than 250 communities across 1,500 miles," said Lloyd P. Johnson, chairman and chief executive officer of Norwest.

The merger is expected to result in less than 1 percent earnings dilution in 1991 and will be accretive for Norwest's stockholders in 1992, the first full year of operations. Pursuant to the merger agreement, adjustments to align United more closely with Norwest's accounting and credit standards, as well as transaction-related expenses, which are currently estimated to total as much as $95 million, will be reflected in United's 1990 results. Such amounts will be in addition to the special provisions for loan losses and real estate write-downs, aggregating approximately $95 million, which were announced today by United Banks.

United Banks of Colorado, headquartered in Denver, has assets of $6.3 billion and more than 3,600 employees. It serves more than 500,000 customers throughout the Rocky Mountain region through its 40 Colorado banks and other affiliates engaged in data processing, insurance, mortgage banking, trust, and securities brokerage.

Norwest, based in Minneapolis, has assets of $26.8 billion and provides banking, banking-related and specialized financial services through more than 1,270 offices in 47 states and internationally.

#90207p8894 07/26/1990 ~PR Newswire

CHARLESTON, WV (JULY 26) PR NEWSWIRE - Key Centurion Bancshares Inc. (NASDAQ: KEYC) has reported second quarter 1990 net income of $6.7 million.

This largest single quarterly amount in company history reflects a 12 percent increase compared with $6.0 million reported for the second quarter 1989. For the six months period ending June 30, 1990, net income reached $13.1 million, also a record and a 6 percent increase compared with $12.3 million reported for the first six months of 1989.

On a per share basis, second quarter 1990 income of 33 cents increased 10 percent compared with second quarter 1989 net income of 30 cents. For the six months ended June 30, 1990, net income of 63 cents increased 3.3 percent compared with 61 cents earned in the six months ended June 30, 1989.

All results reflect the addition of First National Co., Pikeville, Ky. (from July 3, 1989), and Guyan National Bank, Barboursville, W.Va. (from Aug. 31, 1989). These mergers were accounted for on a purchase basis and, accordingly, were included in Key Centurion's results from those respective dates.

A. Michael Perry, president and chief executive officer, called the record earnings "substantive progress," but also noted the significance of the elements which produced the record. "This income was produced primarily by increases in net income of 13 percent and 15 percent for the second quarter and six months, respectively. Furthermore," he said, "second quarter results also were boosted by an increase of $673,000 (20 percent) in non-interest income."

"The net result," he continued, "is that these levels came about solely from operating income -- net interest income plus fee income -- and without the benefit of any non-recurring items, extraordinary items, or securities gains. Moreover, the earnings also provide tangible evidence of our efforts to control non-interest expenses through ongoing consolidation of 'backroom operations.'"

During the second quarter of 1990, average total loans of $1.226 billion increased 14 percent compared with average total loans of $1.075 billion for the second quarter of 1989, primarily as a result of the First National Co. transaction. Meanwhile, non-performing assets which includes non-accruing loans, other real estate owned, and restructured loans ended the second quarter of 1990 at $11.7 million (97 basis points of total loans). This compares with $9.4 million non-performing assets (87 basis points of total loans) at the end of the comparable 1989 quarter, and $11.2 million (92 basis points) at March 31, 1990. A basis point represents one one-hundredth of one percent. Correspondingly, the allowance for loan losses was $15.4 million at June 30, 1990, compared with $11.9 million at June 30, 1989, and $15.7 million at March 31, 1990.

Marshall T. Reynolds, chairman of Key Centurion, said, "We are encouraged

not only by the record quarterly earnings report but also by the merger announcements made during this past quarter. We have moved forward aggressively with our long-standing merger program which has contributed, we believe, historically to Key Centurion's shareholder value." Reynolds pointed out that total assets should increase approximately 23 percent, assuming completion of these mergers, and that the proposed new companies will add to Key Centurion's future income. "We are confident the financial results from the new mergers will further enhance and strengthen our income stream," he said. "Our previous record demonstrates our ability to produce such results."

Key Centurion in April 1990 announced proposed merger agreements with the boards of Southern Bankshares Inc. and Spectrum Financial Corp. Southern is a $300 million asset, two bank holding company located in Beckley, Raleigh County and Oak Hill, in adjacent Fayette County, W.Va. Spectrum is also a two bank holding company located in Wheeling, Ohio County, and New Martinsville, Wetzel County, W.Va., with $264 million in assets. Southern and Spectrum are West Virginia's 12th and 14th largest bank holding companies based on year end 1989 results. On a combined pro forma basis, Key Centurion would approach $3 billion in commercial bank assets and $1.3 billion in discretionary trust assets and almost $2 billion in total trust assets with the completion of these two proposed mergers.

Key Centurion has banking subsidiaries with 45 offices in West Virginia and Kentucky, operating as: Cardinal State Bank NA, Beckley; The Central National Bank of Buckhannon, Buckhannon; Charleston National Bank, Charleston; Union National Bank of West Virginia, Clarksburg; The First Huntington National Bank, Huntington; The Lincoln National Bank of Hamlin, Hamlin; The National Bank of Logan, Logan; Boone National Bank, Madison; First National Bank in Philippi, Philippi; Citizens National of Point Pleasant, Point Pleasant; Citizens National Bank of St. Albans, St. Albans; Nicholas County Bank, Summersville; Wayne County Bank, Wayne; The National Bank of Commerce of Williamson, Williamson, all in West Virginia and First National Bank of Pikeville, Pikeville, Ky.; and Reliable Mortgage Co. with 11 offices in West Virginia, Maryland, and Ohio.

#90207p8896 07/26/1990 ~PR Newswire

WHITE PLAINS, NY (JULY 26) PR NEWSWIRE - American Savings Bank (NYSE: ASB) today reported a net loss of $40.0 million, or a net loss per share of $6.89, for the quarter ended June 30, 1990. In the same period of 1989, American reported net income of $7.4 million, or $0.85 per fully diluted share. For the first six months of 1990, the Bank's net loss was $49.4 million, or a net loss of $8.67 per share, compared with earnings of $13.9 million, or $1.60 per fully diluted share, for the first half of 1989. Results for the year-ago three- and six-month periods included a one-time recovery of $3.5 million (pretax) related to the settlement of a lawsuit involving a subsidiary of the Bank.

American's second quarter results reflect substantial provisions for loan

and asset losses which the Bank attributed to weakness in the real estate markets, resulting in a need to increase both general reserves and specific reserves on certain non-performing assets. The provisions reflect management's current analysis of the overall loan portfolio. In making its determination, management considered the views of the FDIC examiners, who recently completed the field portion of a regular examination of the Bank. The provisions amounted to $41.0 million in the second quarter and $54.3 million in the first six months of 1990.

William G. Lillis, president and chief executive officer, said, "As of the close of the second quarter, American exceeded the FDIC total minimum capital and risk-based capital requirements. Also, our aggressive efforts to reduce operating expenses and scale down assets are succeeding. We are proceeding with our 'back to basics' strategy by consolidating the operations of our Riverhead Savings subsidiary into American, and pursuing the sale of all or part of our other operating subsidiaries."

American's ratio of total regulatory capital to average assets stood at 6.12 percent at June 30, 1990, and exceeded the FDIC minimum total capital requirement of 6.00 percent by approximately $5.1 million. The total risk-based capital ratio was 8.01 percent at the end of the recent quarter exceeding the current 7.25 percent FDIC requirement by some $25.8 million. Total stockholders' equity was $125.3 million at June 30, 1990.

American's total assets were $4.14 billion at June 30, 1990, declining $288.1 million since the end of 1989 and $436.8 million from June 30, 1989. The asset reduction in the recent quarter was largely the result of the Bank's redemption in April 1990 of money market preferred stock issued by two of its financing subsidiaries, totaling approximately $175 million. The Bank had $3.58 billion in loans and mortgage-backed securities and $3.21 billion in deposits at the end of the 1990 second quarter.

Net interest income before provision for loan losses was $19.5 million for the 1990 second quarter and $39.0 million for the latest six months, compared with $23.7 million and $49.6 million for the respective periods of 1989. The interest rate margin was 2.15 percent for the quarter ended June 30, 1990, compared with 2.05 percent for the 1990 first quarter and 2.31 percent for the second quarter of 1989. Total other income was $2.4 million for the 1990 second quarter and $6.8 million for the first half of this year. For the respective periods of 1989, total other income was $9.4 million and $15.4 million, including the previously noted one-time recovery.

Total other expenses declined to $19.6 million for the second quarter of 1990 from $21.0 million for the comparable quarter of 1989, and fell to $38.5 million for the recent six months from $41.5 million in the year-ago period. The expense improvement reflected a company- wide reduction in

staff of approximately 185 employees, or nearly 15 percent, during the past 12 months.

Non-performing assets (net of reserves) at June 30, 1990, were $183.7 million or 4.44 percent of total assets, compared with $205.0 million or 4.65 percent of assets at March 31, 1990, and $134.6 million or 2.94 percent of assets at June 30, 1989. The reduction as of the end of the recent quarter was the result of increases to consolidated reserves for possible loan and asset losses, which reserves were $81.1 million at June 30, 1990, $41.6 million at March 31, 1990, and $31.1 million at June 30, 1989.

On a separate matter, Lillis said that American has cancelled its notice to withdraw from membership in the Federal Home Loan Bank of New York. The Bank's conversion from a federal to a New York State- chartered institution in December 1989 gave it the option to withdraw from the Federal Home Loan Bank system and earlier this year American filed notice of its intention to do so. As a state-chartered bank, American can determine at any time to reinstate the withdrawal process.

American Savings Bank is a New York State-chartered savings bank with executive and administrative offices in White Plains. Together with its wholly-owned subsidiary, Riverhead Savings Bank, FSB, American operates 39 branch offices in New York City and in Westchester, Nassau and Suffolk Counties. The Bank's common stock and $1.8125 cumulative convertible exchangeable preferred stock, Series A, are both listed on the New York Stock Exchange.

WESTBORO, MA (JULY 26) PR NEWSWIRE - ALDEN Electronics, Inc. (NASDAQ: ADNEA) announced today that it has been selected by the National Oceanic & Atmospheric Administration, National Weather Service (NOAA/NWS) as one of three companies (i.e., "Providers") to distribute Doppler Radar Data nationally for the next ten years to external users from the government's new network of Next Generation Radars (NEXRAD).

Alden projects that its NEXRAD revenues including data, radar data terminals and software should total $5 million over the next ten years.

The NEXRAD Network of 175 radars will be installed over the next five years in the continental U.S., Alaska, Hawaii and at foreign locations. The new radars will be deployed by the National Weather Service (NWS),

Federal Aviation Administration (FAA) and Department of Defense (DOD). In order to serve the radar data needs of broadcast TV, commercial users and other organizations external to the government, NWS used a competitive process to select several companies as licensed NEXRAD radar data "Providers."

The NEXRAD data consists of precipitation reflectivity, Doppler imagery (which provides velocity information), integrated rainfall data -- hourly and storm total and radar data gathered vertically and horizontally.

Alden is a leading supplier of computer based, color weather display systems for the processing, manipulation, storage and display of radar information, satellite pictures and weather graphics.

#90207p8899 07/26/1990 ~PR Newswire

SAN FRANCISCO (JULY 26) PR NEWSWIRE - Samuel Armacost, 51, has joined Weiss Peck & Greer as a general partner and a member of the firm's management committee. Most recently, Armacost was a managing director of Merrill Lynch Capital Markets. Prior to that he was president and chief executive officer of Bank of America and BankAmerica Corp.

At Weiss Peck & Greer, Armacost will be principally involved in the investment management and management buyout areas. He will be based in the firm's San Francisco office.

Philip Greer, a partner of Weiss Peck & Greer, said "Weiss Peck & Greer is a perfect outlet for Sam Armacost's management and entrepreneurial skills. His considerable talent, experience and reputation will add significant value at Weiss Peck & Greer. While he will be involved in the firm's activities on a worldwide basis, we particularly see opportunities for development of our business on the West coast."

Armacost said that "I have been fortunate over the years to have worked with two fine financial institutions. Both are multinational and publicly-owned companies. I am excited about the prospect of becoming a partner of a private, highly-focused entrepreneurial firm. I look forward to the opportunity to contribute to the growth of Weiss Peck & Greer and its clients."

Armacost noted that he has known the senior partners at Weiss Peck & Greer for almost 20 years. "In fact, in the early 1970s, when I was with the Bank of America, I served on the investment committee of a joint venture between Weiss Peck & Greer and the Bank of America which was established to invest in venture capital companies, and have always been

impressed with the firm's quality and breadth of expertise," he said. "Moreover, as I look at the investment industry of the 90s, it is clear that Weiss Peck & Greer's strategic focus on three areas, investment management, management buyouts and venture capital, positions the firm solidly for the current decade."

Weiss Peck & Greer is a private investment firm with more than 200 employees in four offices: New York, San Francisco, Palo Alto and Chicago.

#90207p8901 07/26/1990 ~PR Newswire

BENTON HARBOR, MI (JULY 26) PR NEWSWIRE - Economic conditions in Brazil, while moderating, continued to adversely affect an otherwise strong performance by Whirlpool Corporation (NYSE: WHR) in the second quarter and first half of 1990, Whirlpool announced today.

Whirlpool reported second-quarter 1990 net earnings of $37 million, or $.54 per share, compared to $50 million, or $.72 per share, in the second quarter of 1989. The company's equity interest in Brazilian operations was a loss of $.09 per share in the second quarter, compared to a $.20 per share profit in the second-quarter 1989. Current year losses were partially offset by the reversal of non-operating reserves established in 1989.

Excluding the results of the company's Brazilian affiliates in the second quarters of both 1989 and 1990, net earnings for the company actually rose 18 percent, improving from $.52 per share in the second- quarter 1989 to $.63 per share in second-quarter 1990. Second-quarter 1990 consolidated net revenues were $1.71 billion compared to $1.64 billion in 1989, an increase of 4.3 percent, due primarily to the effects of a weakening dollar against foreign currencies.

Net earnings for first-half 1990 were $66 million, or $.96 per share, compared to $91 million, or $1.31 per share, in 1989. Excluding Brazil, first-half net earnings in 1990 improved 14 percent over first- half 1989, from $1.14 per share to $1.30 per share. First-half consolidated net revenues for 1990 were $3.34 billion compared to $3.21 billion in 1989, an increase of 4.0 percent.

"We're very pleased with our continued strong performance in North America in the second quarter," said David R. Whitwam, chairman, president and CEO. "Our revenues, operating profits and unit volumes were up despite a soft and declining market. Whirlpool Financial Corporation also

demonstrated strong revenue and earnings gains compared to second-quarter 1989 results."

According to Whitwam, the strong results in North America were due to higher shipment volumes, effective material cost controls, ongoing productivity improvement gains and aggressive marketing efforts. Whitwam said the North American market is adversely affected by high interest rates in Canada and by a poor builder market and low microwave and room air sales in the U.S.

During the second quarter Whirlpool announced a joint venture agreement with Matsushita Industrial Electrical Co. to manufacture vacuum cleaners for the North American market at the Danville, Ky. facility. Closing on the agreement is expected on July 31.

"In Europe, sales revenues were up for most product categories in the second quarter, while gross margins improved over second-quarter 1989," Whitwam said. "We continued our investment in the dual branding project to introduce the Whirlpool name in Europe, where the program is being well received by dealers. In June we held a leadership conference for 140 senior officers from 16 countries and established 15 global project teams to help speed integration efforts and optimize synergies with Whirlpool International B.V.

"The European marketplace is very competitive, and we're facing a significantly down market in microwaves, where we're an industry leader, and difficult economic conditions in the U.K. that affect the entire industry. We've taken a number of steps to deal with these competitive conditions, and we believe that the second half of the year will demonstrate stronger performance.

"In Brazil, our affiliates have responded aggressively to the tough economic conditions, and their combined efforts resulted in an overall profitable quarter in local currency," Whitwam said. "President Collor's economic reforms continue to be necessary and vital. While the outlook for the remainder of the year remains uncertain, we're very encouraged to see that improvements noted in the second quarter have continued into the third quarter."

Earlier this month Whirlpool and its Brazilian affiliates culminated three years of planning and development by dedicating a new "world washer" production facility at Rio Claro. With an annual production capacity of 700,000 units, and eventually employing 1,000 workers, the Rio Claro plant will serve heavily unsaturated washer markets in Brazil and South America. Two other world washer plants in India and Mexico will start up production later this year.

Looking ahead at the industry for the balance of 1990, Whitwam said,

"We've lowered our forecast for the industry in the U.S. to down 1-3 percent for the year, largely due to poorer than expected housing starts dampened by the savings and loan crisis. The European marketplace should continue to grow moderately, in the range of 1-3 percent, and remain very competitive. The Brazilian economy remains uncertain, although second-quarter improvements are encouraging."

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, the company manufactures in 10 countries and markets products under nine major brand names in more than 45 countries.

#90207p8903 07/26/1990 ~PR Newswire

CINCINNATI (JULY 26) PR NEWSWIRE - Zonic Corp. (NASDAQ: ZNIC) reported a 42 percent increase in earnings on a 16 percent increase in sales for the first quarter of its 1991 fiscal year.

Gerald J. Zobrist, president and chief executive officer, said the strong results for the quarter reflect a continuation of the company's growth during the last two years. He added that the current backlog combined with significant new orders signal a healthy year ahead.

For the 1991 fiscal first quarter ended June 30, net earnings were $50,187 or 2 cents per share compared with restated net earnings of $35,438 or 1 cent per share for the first quarter of the previous fiscal year. Sales for the quarter were $1,400,000 compared with $1,200,000 for the year-ago period.

Zobrist said that new orders for the 1991 fiscal first quarter were $3,813,000, almost double new orders of $1,920,000 for the comparable 1990 period. He attributed the increase to increased orders for the company's System 7000 and 3500 Analyzer product lines and new development projects underway with A&D Co., Ltd. of Japan.

Backlog at the end of the 1991 fiscal first quarter was $4,090,000, up 16 percent from $3,524,00 at the end of the comparable 1990 period.

"All segments of the business contributed to the gains," said Zobrist. "Zonic A&D Company, the sales and marketing joint venture we formed two years ago with A&D Co., Ltd., of Japan, has become increasingly effective.

"Our strategic relationship with A&D Co., Ltd. of Japan and our Zonic A&D Company joint venture are starting to produce excellent returns in all

aspects of our business -- marketing, product development and production," Zobrist said.

Zonic's earnings for the 1990 fiscal year and previous four years have been restated by a total of $166,000 to properly reflect taxes, interest and penalties incurred from payroll and other related tax filings, deposits and payments. The effect of this restatement for last year's first quarter was to reduce earnings by $20,431 and reduce earnings per share by seven tenths of 1 cent.

Zonic Corp. manufactures, markets and services data acquisition and computer graphic systems which are used in industrial applications utilizing computer-aided engineering, computerized machinery monitoring and maintenance systems. The company is headquartered in the Greater Cincinnati metropolitan area and has sales and service facilities in North America, Western Europe and the Pacific Rim.

LONDON (JULY 26) PR NEWSWIRE - United Distillers, the spirits company of Guinness PLC, announces today that it is to acquire the entire share capital of Schenley Canada Inc. ("Schenley Canada") from a group of Canadian institutional investors.

Schenley Canada, based in Montreal-Quebec, is a leading producer and marketer of Canadian spirits. In the premium category, its brands include Gibson's Finest 12 Year Old Canadian whisky and Silent Sam Vodka. Other major brands are Golden Wedding and Schenley O.F.C. Canadian whiskies and Ron Carioca rums. Schenley Canada also markets imported wines and spirits. In the year to Dec., 31, 1989, Schenley Canada had total turnover of Canadian $63.5 million.

Schenley Canada, originally part of Schenley Industries Inc. the United States wines and spirits business, was the subject of a management buy-out in 1981. In 1987, United Distillers acquired Schenley Industries, Inc.

Tony Greener, managing director of United Distillers, said: "This acquisition will add some important Canadian brands to our existing global brand portfolio, which includes Johnnie Walker and Dewar's whiskies as well as Gordon's and Tanqueray gins. The result will be to strengthen our portfolio in Canada."

SOLON, OHIO (JULY 26) PR NEWSWIRE - Keithley Instruments, Inc. (AMEX: KEI), a leader in test and measurement instrumentation, today announced the results for its third quarter and nine months ended June 30, 1990.

Net sales for the quarter ended June 30, 1990 were $24,382,000, up 5 percent from the third quarter of last year. Income before income taxes decreased 8 percent to $1,027,000. Net income of $406,000 was 34 percent below the prior year. Net income per share decreased 29 percent to $.12 from the $.17 reported in the same period last year.

The decline in income was attributed to a higher effective tax rate and increased operating expenses. The higher tax rate for the quarter was

due to tax credit limitations and non-deductible amortization in a period of reduced earnings. Increased operating expenses were principally in product development and marketing.

"While the quarter was adversely impacted by the higher tax rate and costs which had been previously committed, our MetraByte acquisition contributed to net income, versus a $.01 per share reduction last year. We continue to manage our assets and have reduced our debt by $4.9 million in the first three quarters," said Thomas G. Brick, Keithley's president and chief executive officer.

The increase in net sales was due to higher European sales partially offset by lower domestic shipments. "Worldwide orders were about two million below sales. We expect the soft order levels to continue in the short term and will focus on new products while controlling expenses. We now expect net income for fiscal year 1990 to be lower than the $1.18 per share of last year," added Brick.

For the nine months ended June 30, 1990, net sales were $74,777,000, up 16 percent from the same period last year. Net income declined 22 percent to $2,261,000. Net income per share was $.65 compared to $.82 in the prior year.

Keithley Instruments, Inc. is a leading source of advanced hardware and software for test and measurement instrumentation and data acquisition and control applications of scientists and engineers worldwide. Its products and systems are found in universities, industrial research laboratories, engineering development departments, quality control areas and manufacturing production lines.

#90207p8916 07/26/1990 ~PR Newswire

NORCROSS, GA. (JULY 26) PR NEWSWIRE - CytRx Corp. (NASDAQ: CYTR) announced today the results of growth promotion studies conducted at Mississippi State University.

In studies conducted over a two-week growout period, chicks which had CRL87-51 and CRL87-61 supplemented to their feed showed a significant improvement in weight gain compared to chicks on a normal starter diet. The feed conversion ratio (amount fed/resultant body weight) in chicks receiving the CytRx compounds was also significantly improved.

Dr. J. Paul Thaxton, Ph.D., professor, Poultry Science, Mississippi State University, commented: "These results demonstrate (the CytRx copolymers)

increase growth and improve feed conversion efficiency in broiler chicks during the first two weeks of the growout period. The economic impact of any potential feed addition which can cause an average 14 percent increase in growth with a concomitant 6 percent improvement in feed efficiency is staggering. In the U.S. alone, 5.2 billion broilers will be produced in 1990."

Jack J. Luchese, president and CEO of CytRx, said, "We are very pleased wtih Dr. Thaxton's study which supports earlier observations in other species." Luchese also said: "Most agents used to enhance growth performance in food animals are either antibiotics or hormones. There is a growing concern that the continued use of these agents represents a significant threat to human health. A recent publication in Science, July 6, 1990, suggests the widespread use of antibiotics in food animals is responsible for the increasing occurrence of drug-resistant infections. CytRx compounds are not antibiotics and not hormones. Such a product profile shows great promise for the world market since regulatory pressure to ban the use of antibiotics and hormones seems to be mounting."

CytRx is currently holding licensing discussions with a number of participants in the feed additives industry.

CytRx Corp. is a development-stage pharmaceutical company engaged in the research and development of therapeutics incorporating copolymers. The company's other products are intended for use in the treatment of vascular immune system and infectious diseases.

#90207p8917 07/26/1990 ~PR Newswire

LOWELL, MASS. (JULY 26) PR NEWSWIRE - COMFED Bancorp, Inc. (AMEX: CFK) announced a loss of $5.9 million or 71 cents per share, for its first fiscal quarter ended June 30, 1990, compared with a $3.7 million or 44 cents per share loss for the comparable year earlier quarter. COMFED's loss for the current quarter can be attributed primarily to lost interest income, provisions for loan losses, and foreclosure and workout expenses associated with its non-performing assets. Non-performing assets, which included loans on non-accrual of $133 million and foreclosed real estate of $61 million, totalled $194 million at June 30, 1990, compared to $176 million at March 31, 1990. During the quarter the bank added $3.6 million to loan loss reserves, which totalled $37.3 million at June 30, 1990.

The most recent quarter also includes a pretax gain of $4 million resulting from the successful sale of approximately $1 billion of loan

servicing rights. An additional gain of $0.6 million on this sale was deferred to future reporting periods.

As a result of the loss for the quarter, COMFED's tangible capital has declined to negative $20.3 million at June 30, 1990. As previously announced, the company is unlikely to be able to come into compliance with federal capital requirements without a restructuring which would probably include some form of federal assistance. The company is continuing its discussions with the Office of Thrift Supervision (OTS) regarding operating restrictions resulting from the OTS' disapproval of the company's capital plan two weeks ago.

During the fiscal 1991 first quarter, COMFED originated $134 million of residential mortgages, and sold $138 million of loans in the secondary market. Deposits totalled $919 million at June 30, 1990 and stockholder's equity was 2.2 percent of total assets, or $3.72 per share.

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, it engages in residential mortgage lending, loan servicing and retail banking. COMFED Mortgage Company maintains a netwok of 13 offices in five Northeastern states. COMFED Savings Bank operates 28 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio ranks in the top 20 among Thrifts nationwide. COMFED BANCORP, INC. is listed on the American Stock Exchange, symbol; CFX.

#90207p8918 07/26/1990 ~PR Newswire

TWINSBURG, OH (JULY 26) PR NEWSWIRE - Revco D.S., Inc., today announced it has reached an agreement to sell 13 retail drug stores in Arkansas to Affiliated Food Stores, of Little Rock, a supplier for independent groceries, which operates as a cooperative. The purchase price was not disclosed.

Revco is currently operating under provisions of Chapter 11 of the U.S. Bankruptcy Code. The sale of stores to Affiliated Food is subject to certain conditions, such as approval by the U.S. Bankruptcy Court. A court hearing is scheduled for Aug. 14, 1990.

Boake A. Sells, Revco Chairman and Chief Executive Officer, said, "Our divestiture program is proceeding on schedule. We anticipate a smooth completion of this sales agreement."

Two Revco stores in Forest City and Magnolia, Ark., are still for sale. Today's announcement represents a further implementation step in Revco's plan, announced Jan. 26, to divest 712 of its stores in 17 states. Revco has now disposed of 538 of the 712 stores it planned to divest.

At that time, the company said it will focus growth, build market share and enhance competitive position by reducing its store base to 1,100-plus drugstores in 10 contiguous eastern states accounting for 64 percent of chain sales.

Revco will concentrate future growth in these 10 states where its stores provide the greatest return on assets: Georgia, Maryland, New York, North Carolina, Ohio, Pennsylvania, South Carolina, eastern Tennessee (metropolitan Chattanooga and east), West Virginia, and Virginia.

The other Revco drugstores still for sale are southwestern stores in the following states: 101 stores in Arizona, 22 in New Mexico, three in Colorado and 46 in western Texas.

Revco, one of the nation's foremost drugstore chains, is a privately held company based in Twinsburg, Ohio.

#90207p8920 07/26/1990 ~PR Newswire

DETROIT (JULY 26) PR NEWSWIRE - General Motors Corporation (NYSE: GM) earned net income of $900 million in the 1990 second quarter on sales and revenues totaling $33.9 billion, Chairman Roger B. Smith and President Robert C. Stempel said today. In the second quarter of 1989, General Motors reported net income of $1,454 million on sales and revenues of $33.5 billion.

Smith and Stempel said: "General Motors results in the second quarter of 1990 reflected outstanding efforts by the corporation's major business organizations during a period of challenging external developments. The decline in earnings from the comparable 1989 quarter was primarily due to higher sales incentives in North America and economic and automotive disruption in Brazil."

"In the quarter and for the first six months of the calendar year, GM was the only domestic manufacturer to increase its U.S. market share for cars, trucks and total vehicles," Smith and Stempel said. "And, GM is in the right position to continue to strengthen its market position because of the public's growing recognition that the quality of GM cars and trucks has improved significantly."

Second quarter earnings reflected the adverse impact of higher sales incentives on GM's North American automotive operations. The profit performance of GM's overseas operations (excluding Brazil) continued at a record level, and the corporation's three major subsidiaries, Electronic Data Systems Corporation (EDS), GM Hughes Electronics Corporation (GMHE) and General Motors Acceptance Corporation (GMAC), made significant contributions to 1990 second quarter net income.

Earnings attributable to $1-2/3 par value common stock during the second quarter of 1990 amounted to $800 million, or $1.32 per share. Reported earnings attributable to $1-2/3 par value common stock in the 1989 second quarter were $1,350 million, or $2.23 per share.

EDS reported record second quarter earnings of $125 million, primarily reflecting the continued strong growth of its business. Second quarter earnings attributable to Class E common stock rose to a record $0.52 per share, up from $0.44 per share in the second quarter of 1989. Since EDS was acquired in October 1984, the GM subsidiary has reported increased second quarter earnings for five consecutive years.

GMHE reported second quarter profits of $189 million. Earnings attributable to Class H common stock were $0.47 per share. In the second quarter of 1989, earnings attributable to Class H common stock were a record $0.60 per share. Pretax earnings for the second quarter of 1990 were down $9 million or three percent from last year, with the year-to-year change in net income primarily attributable to a higher effective tax rate in 1990.

GMAC and its subsidiaries reported strong quarterly earnings of $302 million, $33 million above the 1989 second quarter performance. GMAC's quarterly earnings improvement is due primarily to lower borrowing costs in the United States.

For the first six months of 1990, General Motors earned net income of $1.6 billion on sales and revenues of $64.1 billion. In the comparable year-ago period, GM earnings totaled $3.0 billion on sales and revenues of $66.8 billion.

Action Plan cost savings in the first half of the calendar year were $1.6 billion. Cumulative savings of $13.1 billion under the four-year plan (1987 through the second quarter of 1990) have now exceeded the total $12-1/2 to $13 billion goal.

In the second quarter, worldwide factory sales of vehicles to GM dealers totaled 2,142,680 units -- down 1.8 percent from the same period in 1989.

GM total vehicle sales overseas were at record levels in the second

quarter and for the first half of the 1990 calendar year. The continuing strong overseas sales performance was led by record second quarter and record six-month total vehicle sales in the European and Asia/Pacific regions.

In the second quarter, GM's U.S. passenger car and truck market shares were 36.5 percent and 34.4 percent, respectively -- both above last year's second quarter performance. During the period, total industry sales were down 6.3 percent compared to the second quarter of 1989. GM dealers in the U.S. sold 1,385,025 cars and trucks in the 1990 second quarter -- down 5.5 percent from the year-ago level of 1,466,444 total vehicles. Despite lower U.S. industry sales in the first half of the year, GM increased its U.S. market share for cars, trucks and for total vehicles.

"Through June, General Motors is the only domestic manufacturer to outperform the market in the 1990 calendar year," Smith and Stempel said, "and GM is the only domestic manufacturer to post consecutive market share gains in the first three quarters of the 1990 model year."

In the coming model year, GM will again offer more all-new vehicles than any other automaker and more all-new and restyled cars and trucks than Ford and Toyota combined. Included among GM's 1991 model year product offerings will be Saturn's sedan and coupe models; the Geo Metro convertible; Buick's Park Avenue luxury sedan and mid-size Regal sedan; and Oldsmobile's four-door Bravada, joining Chevrolet and GMC Truck in the sport utility segment, and its Ninety-Eight Regency luxury sedan.

In reflecting on GM's significantly improved product quality, the two executives pointed to GM's leadership performance in J. D. Power's most recent surveys -- the Initial Quality Survey and the Customer Satisfaction Index. For the third straight year, the number-one ranked domestic nameplate for trouble-free cars came from the GM family as Buick was the highest-ranked domestic nameplate in Power's 1990 Initial Quality Survey. For the fourth straight year, Cadillac was ranked the top domestic nameplate for combined product quality and dealer service in Power's 1990 Customer Satisfaction Index.

"GM's efforts to enhance product quality and to improve the overall ownership experience continue to gain recognition," Smith and Stempel said. "As everyone on the GM team continues to do the best possible job, GM will continue to win the customer's loyalty and to improve its competitive position worldwide."

PARAMUS, NJ (JULY 26) PR NEWSWIRE - MEDphone Corporation (NASDAQ: MPHO) announced today that it has completed a $997,750, financing with Paris-based G.M.F. - Garantie Mutuelle des Fonctionnaires.

MEDphone Corporation, a leader in interactive transtelephonic medicine, developed the patented MDphone(TM) System, which permits immediate communication, diagnosis and treatment to be delivered by telephone in the event of an emergency, before conventional assistance can arrive.

G.M.F. Group, in addition to being one of the largest insurance groups in France, has interests in the retail, communication, banking and agribusiness sectors, with 11,000 employees.

The investors received 307,000 shares of restricted common stock and 153,500 warrants. The warrants are exercisable at $3.50 per share and will expire in June 1992.

S. Eric Wachtel, chairman and chief executive officer of MEDphone Corporation, said that proceeds of the financing would be used to enhance marketing and new product development.

Wachtel comments, "We are pleased to have G.M.F. as an investor in MEDphone Corporation. Their investment further reinforces the importance we place on marketing the MDphone System within the European economic community."

MDphone System base stations are currently in use at seven hospital locations in the United States. Portable units are marketed to corporations, as well as high risk patients.

The portable unit, the size of a briefcase, is a sophisticated device which automatically dials and telephonically links the site of an emergency with the hospital base station. From there, a trained medical professional will assess the patient's condition by verbally communicating with those at the remote site.

The MDphone System will also allow the trained medical professional to monitor, from the hospital base station, the patient's electrocardiogram (ECG) and to implement the most appropriate action within minutes. If a patient were to be suffering a life threatening cardiac arrest, the MDphone would enable the attending clinician to remotely defibrillate (electrically shock) the victim's heart.

MEDphone Corporation, Paramus, manufactures and distributes the MDphone System nationwide. Contact MEDphone at The Atrium, Suite 210, No.80 Route 4 East, Paramus, N.J., 07652. Phone: 201-843-6644.

CONTACT: S. Eric Wachtel of MEDphone, 201-843-6644, or Larry Grant or Mary Ann Matlock of Hercky-Pasqua-Herman Public Relations, 201-241-9474, for MEDphone.

NEW YORK (JULY 26) PR NEWSWIRE - T&N plc and J. P. Industries, Inc.

(NYSE: JPI), today announced that T&N Automotive Components Inc. has extended the expiration date for its ongoing $17.30 per share tender offer for all outstanding shares of common stock of J. P. Industries until 11:59 p.m., New York City time, on Friday, Aug. 17, 1990. The companies agreed to the extension in order to allow additional time for the previously announced discussions with the staff of the Federal Trade Commission regarding a possible negotiated resolution of antitrust objections raised by the staff in connection with the acquisition.

The tender offer is the first step in the companies' previously announced agreement to effect a merger of T&N Automotive Components, a wholly owned subsidiary of T&N plc, into J. P. Industries.

As a consequence of the extension of the expiration date, holders of J. P. Industries common stock are entitled to tender or withdraw their shares pursuant to the tender offer until 11:59 p.m., New York City time, on Friday, Aug. 17, 1990 unless the expiration date is extended further by T&N Automotive Components. Prior to the extension announced today, the tender offer had been scheduled to expire on July 27, 1990.

Based on the latest count of tendered shares, including shares tendered pursuant to guarantees of delivery, 6,862,285 shares of J. P. Industries common stock have been validly tendered and not withdrawn pursuant to the tender offer.

MACKINAW CITY, MICH. (JULY 26) PR NEWSWIRE - One of the most innovative engineering projects to take place in Michigan's north country -- and one which assures reliable electric supplies into the 21st century -- was viewed today by state and local dignitaries at a ceremony in the Straits of Mackinac.

Consumers Power Company, Michigan's largest utility, and Edison Sault Electric Company of Sault Ste. Marie, unveiled a new electric transmission circuit being installed underwater across the Straits. The two cables which make up the circuit are being installed by Durocher Dock & Dredge of Cheboygan, and were designed and manufactured by Alcatel STK of Oslo, Norway.

The new 138 kilovolt line will allow Consumers Power to provide additional backup electric capacity to Edison Sault, which is experiencing increased electric demand. The new line replaces an existing 46 kilovolt line and will better serve Edison Sault's capacity requirements.

"Installation of this new electric transmission line across the Straits of Mackinac required complex coordination and teamwork, indicative of the historical relationship between Edison Sault and Consumers Power Company," said Michael G. Morris, executive vice president of Consumers Power.

William R. Gregory, president of Edison Sault, said the new line could help increase economic development in the eastern Upper Peninsula. "Reliable electric supplies are a key to a healthy economy. New supplies of backup electric power will increase reliability to the Upper Peninsula " said Gregory.

The two cables, each about 22,000 feet in length, are being installed approximately two miles west of the Mackinac Bridge in water with a maximum depth of 280 feet. Near both shorelines where water depths are 25 feet or less, the cables are being installed in a 7-foot- deep trench to protect them from ice scouring action. Installation of the cables will be complete in August, with final inspection, testing and energizing scheduled for September.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

FORT LAUDERDALE, FLA. (JULY 26) PR NEWSWIRE - Alamo Rent A Car, Inc., the largest independently owned and operated car rental firm in the United States, today announced that its shareholders have purchased the upscale United Kingdom car rental firm Guy Salmon Services, Ltd., a privately-held company providing luxury car rental and chauffeur services throughout the U.K. Terms of the acquisition were not disclosed.

With 23 rental locations in the U.K., the name Guy Salmon has been synonymous with superior service and a prestigious car rental fleet since 1962. In addition to the daily car rental business, Guy Salmon offers valet delivery service, chauffeur- drive services, chauffeur-driven tour services, executive replacement company cars and traditional corporate car rentals. Its 1990 peak fleet of more than 4,000 vehicles includes Jaguar, Mercedes, Porsche, BMW, Range Rover and Rolls Royce.

Guy Salmon is expected to reach some $40 million in revenues for calendar year 1990. According to Platt, Alamo's shareholder ownership of Guy Salmon places both firms in an excellent position for continued growth and expansion on the continent and internationally. Guy Salmon will continue to operate independently under its existing brand name and Guy Salmon customers can continue to expect the same exceptional level of service the company has provided for nearly thirty years.

While Managing Director Michael Buckingham will run Guy Salmon from its Woking, U.K. headquarters, Alamo Rent A Car has signed a management agreement to provide Alamo technology, reservations services and data processing tools to the newly- acquired firm.

Alamo Rent A Car, Inc. has owned and operated four locations in the U.K. since 1988, serving Heathrow, Gatwick, Glasgow and Manchester. Alamo also owns and operates 86 car rental locations in the U.S., serving some 92 percent of annual deplaning passenger traffic at or near the nation's most popular airports. Annual revenues for 1989 were some $510 million and Alamo operates a peak fleet of approximately 85,000 vehicles.

BROOKFIELD, WI (JULY 26) PR NEWSWIRE - Bando McGlocklin Capital Corporation (NASDAQ: BMCC) today reported that total profitability and

loan volume have increased to record levels for the 10th consecutive year.

For the 12 months ended June 30, 1990, total operating income climbed to $8,798,728 from $6,878,719, a 27.9-percent increase from the year earlier.

Net operating income rose 18.2 percent from the year to reach $1,513,324; compared to the 1989 figure of $1,280,199 which included both net operating income and realized gains.

Net operating income per share for the 12 months increased to 74 cents from 63 cents the previous year.

Loans on June 30, 1990, rose to $69,723,553. This compares to total loans of $53,476,960 during fiscal 1989, a 30.4-percent increase.

For the fourth quarter, total operating income climbed to $2,325,298, a 25.6-percent increase from the same period a year earlier of $1,851,216. Quarterly net operating income rose to $400,032 vs. $269,856 during the same period in fiscal 1989, a 48.2-percent increase.

Net operating income per share climbed to 19.6 cents based upon 2,044,253 shares outstanding, a record 48.2-percent increase over the 13.2 cents per share the previous year.

The board of directors declared a quarterly cash dividend equal to 22 cents per share payable Aug. 15, 1990, to shareholders of record on Aug. 5 1990.

Consdensed Comparative Financial Data

As of June 30	1990	1989
Loans	$69,723,553	$53,476,960
Total assets	80,170,205	63,703,239
12 Months Ending June 30 Total operating income	8,798,728	6,878,719
Interest expense	6,287,100	4,821,679
Other oper. expense	998,304	850,716
Total oper. expenses	7,285,404	5,672,395
Net oper. income	1,513,324	1,280,199(a)
Net oper. income per share	$.74	$.63(a)
Weighted shares outstanding	2,044,253	2,044,253

(a) Includes realized gains in 1989.

In announcing fourth-quarter and year-end results, Chairman and Chief Executive Officer George R. Schonath said: "We are pleased to report another successful year ... with profitability and growth again at record

levels."

"Since our initial public offering on May 13, 1987, through June 30, 1990, the total annual compounded rate of return on investment was 24.59 percent. The total return on investment for the recently concluded fiscal year of July 1, 1989, to June 30, 1990, was 29.59 percent."

The calculation of total return on investment is based upon cash dividends the reinvestment of cash dividends through the firm's Dividend Reinvestment Plan, and capital appreciation.

The Bando McGlocklin 1990 Annual Report will be mailed to shareholders on Aug. 31.

Founded in 1980, Bando McGlocklin Capital Corporation provides long- term real estate financing to entrepreneur-based businesses, and is a Federal Licensee under the Small Business Investment Act of 1958. The firm recently opened its second office in Indianapolis.

#90207p8936 07/26/1990 ~PR Newswire

PANAMA CITY, FL (JULY 26) PR NEWSWIRE - Florida First Federal Savings Bank (NASDAQ-NMS: FFPC) announced that for the quarter ended June 30, 1990 a loss of $384,000 or $.21 per share was posted compared to a loss of $489,000 or $.26 per share for the quarter ended June 30, 1989. For the six-month periods ended June 30, 1990 and 1989, the Savings Bank recorded losses of $683,000 or $.37 per share and $799,000 or $.43 per share. However, losses before income tax benefit only amounted to $384,000 and $683,000 for the three and six months ended June 30, 1990 as compared to $624,000 and $1.2 million for the same period in 1989, a substantial decrease.

Total net non-performing assets, which includes loans on non-accrual, real estate owned and troubled debt restructurings, totaled $29.0 million at June 30, 1990 compared to $29.5 million at Dec. 31, 1989. Provision for loan losses increased by $95,000 and $176,000 for the three and six months ended June 30, 1990 when compared to the same periods in 1989. These increases in loan losses resulted from depreciation in collateral value of multi-family properties owned by the Savings Bank, reflecting a continued poor income producing real estate market.

Andrew W. Stein president and chief executive officer, said, "Though resolution of problem assets continues to be slow and operating results are still negative, the Savings Bank continues to show improvement in

operating costs and the net interest spread. Total operating costs decreased $610,000 when comparing the six months ended June 30, 1990 to the same period in 1989. These improvements exceed the results originally anticipated from the restructuring of the Savings Bank which took place during 1989. In addition, the net interest spread has improved from 1.69 percent at Dec. 31, 1989 to 2.11 percent at June 30, 1990 primarily due to the repricing upward of adjustable-rate loans and the reduction in the cost of funds driven by general market interest rate decreases and the concerted effort of management to reduce the "cost of funds."

For the six months ended June 30, 1990 compared to the same period in 1989 improvements were realized in all categories of non-interest expenses with significant reductions in compensation and benefits, advertising costs, real estate owned operating expense and other operating expense. For the same comparative periods, other operating income decreased by $43,000 as evidenced by an increase in origination and other fees offset by a reduction in gain on sale of investments.

Total assets increased slightly from $284.4 million at Dec. 31, 1989 to $285.2 million at June 30, 1990. This increase primarily reflected increases in investments offset partially by decreases in cash, interest-bearing deposits and net loans receivable. Liquid assets were used to fund maturing public deposits of approximately $8.4 million. Total deposits concurrently decreased from $208.1 million at Dec. 31, 1989 to $201.9 million at June 30, 1990. However, total borrowings increased by $7.1 million, which funds were used to purchase investments and overnight federal funds.

Stockholders' equity at June, 1990 was $12.2 million or $6.55 per share compared to $12.9 million or $6.92 per share at Dec. 31, 1989 reflecting the loss incurred for the first half of 1990. The Savings Bank continues to meet all three capital requirements applicable under current regulations. Core and tanglible capital both amounted to $4.3 percent of total adjusted assets, which is in excess of the 1.5 percent and 3.0 percent requirements, respectively. Risk-based capital was 6.42 percent of total risk-based assets, slightly exceeding the current requirement of 6.40 percent.

The Savings Bank conducts business through nine full-service offices and is the largest thrift institution headquartered in the Florida Panhandle. Florida First Federal's common shares trade under the symbol "FFPC" on the NASDAQ National Market System.

RESTON, VA. (JULY 26) PR NEWSWIRE - If the federal government pursues its current proposal to unduly control Freddie Mac's operations with a crisis mentality, it could have enormous negative implications for American homebuyers and the mortgage marketplace, warned Leland C. Brendsel, chairman and chief executive officer of Freddie Mac (NYSE: FRE), in testimony today before the U.S. House Banking Housing and Urban Development Subcommittee.

Brendsel referred to a draft proposal submitted by the U.S. Treasury Department and Office of Management and Budget (OMB) to the budget summit that would impose onerous capital and operating requirements on government-sponsored enterprises (GSEs) such as Freddie Mac and the Federal National Mortgage Association (Fannie Mae).

In his prepared remarks, Brendsel said the draft proposal being advanced by the Treasury and OMB ignores the uniqueness of the corporation's housing mission and the benefits derived from its successful fulfillment

of that mission.

"Freddie Mac must balance two competing goals -- to serve our housing mission while protecting the federal government from risks arising from our operations. Earlier this week, we celebrated our 20th year of balancing these two goals successfully and profitably. In so doing, we've helped one in eight American families achieve homeownership. Our record of unbroken profitability is the result of never straying from prudent business practices. Some would have you believe otherwise -- doomsayers that claim GSEs are hovering like mushroom clouds above American taxpayers ready to rain down another financial catastrophe."

According to Brendsel, the Treasury/OMB proposal would delegate decisions about GSE activities to rating agencies outside the control of the federal government that could drive up the cost of homeownership. Under the proposal, all GSEs would be required to achieve a triple-A rating from two separate rating agencies without taking their government sponsorship into consideration. This, Brendsel said, would "appear to be an extreme standard of capital adequacy, since no other domestic lending institutions are currently rated triple-A by two rating agencies.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of homeownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in every eight American homes, including more than 700,000 apartment units.

DAYTON, OHIO (JULY 26) PR NEWSWIRE - Mead Data Central, Inc., will soon triple the number of brokerage house reports available through its LEXIS(R) and NEXIS(R) services.

Under an agreement announced today, Mead Data Central will add company and industry research reports from the Investext(R) database to the LEXIS and NEXIS services. The material will be available online on Sept. 1.

"We are excited about this partnership with a premier provider of textual analysis and opinion," said Joseph C. Rhyne, vice president and general manager of Business Information Services for Mead Data Central.

Investext, a service of Thomson Financial Networks Inc., of Boston, is the

world's largest database of reports from more than 100 leading brokerage and financial research companies. Among the sources are Kidder Peabody & Co., Merrill Lynch, Morgan Stanley & Co., Salomon Brothers, Shearson Lehman Hutton, PaineWebber, and Prudential-Bache Securities. The full-text reports cover more than 11,000 public companies worldwide in 53 industry groups.

NEXIS is an information service of general and business news from more than 750 full-text sources, and is the exclusive online source for the full text of The New York Times. Other sources include the Institutional Investor, Business Week, Forbes and Fortune, as well as the AP, UPI and Reuters wire services. The NEXIS service also includes abstracts from more than 2,000 sources, including The Wall Street Journal.

LEXIS is the world's leading full-text computer-assisted legal research service, with state, federal and international case law, statutes and specialized law libraries.

Mead Data Central, Inc., the world's leading provider of full-text, online information services, is a wholly owned subsidiary of The Mead Corporation (NYSE: MEA), a leader in forest products. Both companies are headquartered in Dayton, Ohio.

Thomson Financial Networks, with headquarters in Boston, is a pioneer in the delivery of real-time and online financial information and software to the international investment and corporate communities.

#90207p8941 07/26/1990 ~PR Newswire

DENVER, CO (JULY 26) PR NEWSWIRE - Total Petroleum (North America) Ltd. (AMEX: TPN) today announced results for the six months and second quarter ended June 30, 1990.

For the six months ended June 30, net income was $4.9 million or $0.05 per share compared to net income of $28.1 million or $0.97 per share for the first six months of 1989.

For the second quarter ended June 30, net income was $17.2 million or $0.50 per share compared to $26.3 million or $0.90 per share in the second quarter of 1989.

Per share results for both periods in 1990 are after payment of preferred dividends while per share results for both periods in 1989 are after assuming conversion of the convertible preferred shares.

Commenting on the results, Philippe Dunoyer, chairman and chief executive officer, said:

"Refining margins recovered to seasonal highs in the second quarter. However, the recovery in our market areas was not as strong as it was nationwide, so that second quarter cash flow from refining and marketing did not match the second quarter of 1989.

In Canada, for the six months ended June 30, 1990, natural gas sales were approximately 30 percent higher than in the first half of 1989, crude oil and liquids production increased slightly and cash flow was over 30 percent higher than in the first six months of 1989."

Total Petroleum (North America) Ltd. is a petroleum company with refining and marketing operations in the Central United States and exploration and production in Canada. Its shares are listed on the American, Toronto, Montreal and Pacific stock exchanges. Total Compagnie Francaise des Petroles owns approximately 52 percent of the voting shares of Total Petroleum (North America) Ltd.

NEW YORK (JULY 26) PR NEWSWIRE - Thomson McKinnon Asset Management L.P. announced today that Thomson McKinnon Inc. and its affiliates have executed a definitive purchase and option agreement for the acquisition of its general partnership interest in Thomson McKinnon Asset Management L.P. ("TMAMLP") by Thomson Advisory Group Inc., a company formed by members of TMAMLP management and by investment partnerships associated with TA Associates and Greylock Management Corporation. The terms of the transaction, which had been announced in April, are essentially as previously announced and do not include purchase of any publicly held limited partnership units. The transaction is subject to several conditions including approval by the limited partners of TMAMLP, by the stockholders of various mutual funds advised by TMAMLP, and by the bankruptcy court. A fall closing is anticipated. In September, TMAMLP will change its name to Thomson Advisory Group L.P.

TMAMLP manages a group of Thomson McKinnon mutual funds, and serves as an advisor to private accounts through its Columbus Circle Investors and Foxhall Investment Management divisions. As of June 30, 1990, TMAMLP managed over $7 billion in assets.

PHILADELPHIA (JULY 26) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) announced today it has agreed in principle to purchase the Chicago Heights Ill., plant of DeSoto Inc. (NYSE: DSO) from the Sherwin- Williams Co. (NYSE: SHW).

The transaction will take place upon completion of the sale of DeSoto's consumer paint business to the Sherwin-Williams Co.

The purchase is part of a Midwest expansion program for Rohm and Haas's Polymers and Resins business. The Chicago Heights operation currently manufactures both paint and latex emulsion polymers. Following the sale, Rohm and Haas will manufacture latex emulsions at the site, while the Sherwin-Williams Co. will continue to operate the paint production facility.

"The Chicago Heights operation is well located to service all our emulsion customers in the important Midwest region," said Frank Robertson, business director for Rohm and Haas's Polymers and Resins operation in North America. "It will provide significant additional capacity without a grassroots expansion." Rohm and Haas maintains seven additional emulsion plants in the United States and Canada.

Terms of the agreement, which are subject to regulatory approval and certain other conditions, were not disclosed.

MEMPHIS, TN (JULY 25) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) will introduce a new early morning departure to its Dallas/Fort Worth hub on Sept. 1, offering new early arrivals to dozens of destinations throughout the West.

Also, Delta is beginning construction on a new Crown Room at Memphis International Airport that will more than double the size of Delta's current Crown Room facility.

"Our new 6 a.m. departure to Dallas/Fort Worth gives passengers to the West a head start, as Delta will offer local passengers the earliest arrivals to points such as Los Angeles, Portland (Oregon), San Francisco, Salt Lake City, and San Diego," said Nikki Giampapa, Delta's district marketing manager. "It also offers new connections to points in Alaska, Mexico and the Far East.

"Passengers are sure to enjoy the convenience of one-terminal connections via Delta's 31 gates at DFW's Terminal 4E, widely known as 'Easy Street' for the ease of travel there," she added. Delta offers over 250 flights to 67 nonstop destinations from Dallas/Fort Worth, Delta's second largest hub.

The Sept. 1 schedule also will feature a new 8:37 p.m. return flight from Dallas/Fort Worth, arriving in Memphis at 9:55 p.m. Both flights feature the new, high-technology MD-88 aircraft, seating 142 passengers.

Delta's new Crown Room facility will be conveniently located on Concourse A near Delta's gates. With construction beginning now, the new facility will be open for the busy holiday season. Delta offers membership Crown Room facilities at 33 of its major airport terminals, offering travelers a quiet place to work or just relax.

CINCINNATI (JULY 26) PR NEWSWIRE - The Midland Company (AMEX: MLA) today reported net income for the second quarter ended June 30, 1990 of $2,185,000, $.68 per common share, compared to $1,918,000, $.58 per common share in the second quarter of 1989. Revenues in the second quarter of 1990 totaled $45,789,000 compared to $40,783,000 in 1989. Net income for the first six months of 1990 was $2,995,000, $.93 per share on revenues of $88,475,000. For the same period in 1989, net income was $4,968,000, $1.49 per share, on revenues of $78,157,000.

J.P. Hayden, Jr., Midland's chairman, stated, "We are pleased that 1990 second quarter earnings improved over the comparable period in 1989. Midland's insurance operations have been negatively affected by increased weather-related catastophe losses in the first half of 1990. The entire industry has been hurt by the much publicized flooding and storm damage throughout the midwest and southern states during this year.

"The company's river transportation division continues to report operating profits in line with management's expectations. Our success in the second half of the year is somewhat dependent on the continued export market for U.S. coal."

Midland, which is headquartered in Cincinnati, is engaged in insurance and finance operations, the transportation of bulk commodities on the inland waterways, and the imprinted sportswear business.

#90207p8949 07/26/1990 ~PR Newswire

TOWSON, MD (JULY 26) PR NEWSWIRE - The Black & Decker Corp. (NYSE: BDK) today announced that net earnings for the second quarter of 1990 were $16 million or 26 cents per share, compared to a loss of $5.2 million or nine cents per share last year.

Operating income for the quarter was $122 million, 88 percent higher than in the same period last year. Revenues for the three months ended July 1, 1990 rose 44 percent to $1.2 billion.

These results include revenues and earnings of Information & Electronic Systems (I&ES) and Dynapert, formerly reported on the consolidated balance sheet as businesses held for sale. Prior periods are not restated.

I&ES and Dynapert contributed approximately $220 million in revenue during the quarter, and their net results were slightly accretive after related interest expense and taxes. The results for these businesses also were slightly accretive for the 11 months from their acquisition date through March 1990.

This cumulative effect has been included in other income in the second quarter of 1990. Since I&ES and Dynapert have not been sold and 12 months have elapsed since the acquisition of Emhart, the corporation has fully consolidated these businesses into its financial statements.

While this significantly increased goodwill, the corporation said it anticipates subsequent reductions in goodwill when other businesses are sold at prices in excess of book value.

Commenting on Black & Decker's asset sale and debt reduction program, Nolan D. Archibald, chairman and chief executive officer, stated, "Having already paid down approximately $500 million of our acquisition debt, we are moving forward aggressively with additional divestitures and remain committed to our goal of reducing debt by at least $1 billion."

On the results for the quarter, Archibald stated, "We are pleased with our sales and operating performance. Continued emphasis on manufacturing efficiency, and effective expense control has resulted in substantial margin improvement. We are well positioned to benefit from upturns in retail activity."

The corporation also announced that a regular quarterly dividend of ten cents per share will be paid on Sept. 28, 1990, to stockholders of record on Sept. 14.

Black & Decker is the world's leading marketer and manufacturer of power tools and other quality products used in and around the home and for commercial applications.

#90207p8954 07/26/1990 ~PR Newswire

BEDMINSTER, NJ (JULY 26) PR NEWSWIRE - Bell Atlantic Mobile Systems announced today that it will conduct this nation's first technical trial of second generation cordless telephone technology, telepoint CT2-CAI (common air interface). While operational in the United Kingdom, telepoint CT2-CAI has never been implemented in the United States' cellular communications spectrum.

Telepoint CT2 is like a hybrid of cellular and pay phone services. Subscribers to the service would use personal, pocket-sized cordless telephones to make outgoing calls when within up to 200 yards of any base station. The base station would be connected to the public switched telephone network, so calls could be made to any phone worldwide.

Bell Atlantic Mobile will begin testing later this year in Philadelphia to determine if telepoint CT2 can consist in the same radio frequencies as cellular mobile telephones. The trial will be conducted at the 891.5 894 MHz range. Telepoint CT2 is the application of cordless phone technology in public locations. CT2 also has possible home and business applications.

As with traditional portable cellular telephone service, users could carry their phone with them and be free to move around within the base station's coverage area. Telepoint CT2 differs from cellular service, and from office and home CT2 service, in that the user could not receive calls, and calls could not be automatically "handed off" from one base station to another.

Subscribers to the service would own or lease their own phones and would be billed monthly for system access and usage. Handsets may be programmed with the personal identification number of each user for billing purposes.

Telepoint CT2 base stations would be located in convenient locations to serve the telecommunications needs of people on the move. Since the system would be fully digital, calls would be clearer and more secure than conversations held on today's cordless home phones.

Bell Atlantic Mobile's technical trial telepoint CT2 will take place during a three-month period. Using a small number of base stations and handsets, the system will be closely monitored to discern the feasibility of mingling telepoint CT2 and cellular units in the same spectrum.

CAI is the technical standard which would enable consumers to use their handsets when roaming to other telepoint CT2 networks, The CT2-CAI standard was recently formalized by a Memorandum of Understanding signed in March by the major telephone operators in the U.K., France, West Germany, Spain, Belgium, Finland, and Portugal. It is expected that consumers will be able to use their handsets in all major European cities by 1993.

HAMILTON, MT (JULY 26) PR NEWSWIRE - Ribi ImmunoChem Research Inc. (NASDAQ: RIBI) announced today its financial results for the second quarter and six months ended June 30, 1990.

Sales revenues for the second quarter of 1990 increased 17 percent, achieving $249,998 as compared to $213,624 in the second quarter of 1989. Total revenues, as a result of lower interest income, declined in the second quarter of 1990, achieving $343,902 as compared to $350,718 for the second quarter of 1989.

The net loss for the second quarter of 1990 was $652,420, or 8 cents per share, compared to $703,494, or 8 cents per share, in the second quarter of 1989.

Sales revenues for the six months ended June 30, 1990, increased 28 percent, achieving $520,100 as compared to $406,255 in the comparable period in 1989. Total revenues increased in the six months ended June 30, 1990, achieving $715,493 as compared to $687,245 for the comparable period in 1989, despite lower interest income.

The net loss for the six months ended June 30, 1990, was $1,245,684, or 14 cents per share, compared to a net loss of $1,422,302, or 16 cents per share, for the comparable period in 1989.

SCOTTSDALE, AZ (JULY 26) PR NEWSWIRE - Giant Industries Inc. (NYSE: GI) reported today 1990 second quarter net earnings of $3,392,000, or $.28 per share. This compares to $5,515,000 in net earnings for the second quarter of 1989, or $.76 per share. Revenues for the second quarter totaled $81,340,000, compared to $84,566,000 for the second quarter of 1989.

For the six-month period ended June 30, 1990, the company earned $4,047,000, or $.33 per share, compared to earnings of $7,790,000, or $1.08 per share for the same six-month period in 1989.

Had the merger with Hixon Development Co. occurred Jan. 1, 1989, earnings and EPS would have been $6,167,000 and $.66 for the 1989 second quarter and $8,920,000 and $.95 for the six-month period ended June 30, 1989.

James E. Acridge, president and chief executive officer, commented on second quarter results by saying, "Even though the second quarter's net earnings were significantly better than the first quarter's, net earnings for the second quarter were negatively impacted by the scheduled refinery turnaround in April and by inventory adjustments caused by lower crude oil prices." Acridge further stated, "During the refinery turnaround, the initial debottlenecking phase was completed which increased the refinery's rated crude oil capacity by 7 percent to 19,300 barrels per day."

Giant Industries Inc. is primarily a refiner and marketer of petroleum products, supported by crude oil and natural gas exploration and production. Specifically, Giant currently operates a crude oil refinery with a rated capacity of 19,300 barrels per day, a 360-mile crude oil gathering pipeline, 71 truck transports, a unique Travel Center and a chain of 28 modern service station/convenience stores in Arizona, New Mexico and Colorado.

MEDIA, PA (JULY 26) PR NEWSWIRE - VWR Corp. (NASDAQ: VWRX) today reported that income from operations for the second quarter was $3,969,000, 12.2 percent higher than last year.

For the six months, income from operations was $8,550,000, an improvement of 9.7 percent. Income from continuing operations for the quarter was $1,554,000 (30 cents per share), an increase of 4.7 percent over the last year. For the first half, income from continuing operations of $3,538,000 (67 cents per share) was almost equal to the first half of last year.

Effective March 1, 1990, VWR spun-off its non-laboratory distribution businesses into a new public company. Momentum Distribution Inc. (MDI). Results of MDI are presented as companies distributed in the financial statements.

Sales of $106,702,000 for the second quarter represent growth of 17.7 percent from last year. Sales of $211,726,000 for the six months were 19 percent ahead of last year. Record second quarter sales were reached as a result of growth in VWR's core business, and the effect of the acquisitions of Sargent-Welch Scientific Co. (acquired in September 1989) and Oxford Scientific Laboratories of London, Ontario, Canada (acquired in April 1990).

According to Jerrold B. Harris, president and chief executive officer of VWR Corp., "Business conditions have, in general, slowed across the United States. The economic pattern is not an even one. We're experiencing varying levels of activity from one geographic region to another. Although there are some areas of difficulty, likewise there are new areas of opportunity. We feel the net will result in a continuation of our sales and operating profit trends established in the first half of 1990."

Harris indicated that Sargent-Welch operations are now fully integrated into VWR and are making solid progress. He also noted that it's still too early to tell how much of Sargent-Welch's educational business has been regained as the school replenishment cycle is just getting into full swing.

"Since the start of the year, VWR substantially improved overall service levels to customers. Improvements have been made in phone response time, order cycle time, order fill rates and reduction of errors. The better service is being noticed by our customers...it's helping us maintain our growth rate. We feel customer service is the key element that separates

VWR from the competition," Harris said.

VWR Corp., headquartered in Media, is the nation's second largest distributor of laboratory supplies and equipment, with annual sales in excess of $400 million.

#90207p8963 07/26/1990 ~PR Newswire

FOSTER CITY, CA (JULY 26) PR NEWSWIRE - Gilead Sciences announced today that Glaxo, a global pharmaceutical company, is investing approximately $20 million in a collaboration with Gilead in one of the most promising new fields of pharmaceutical development. Known as genetic targeting, it involves the use of oligonucleotide molecules to selectively inhibit the activity of disease-causing genes. Genetic targeting offers the prospect of highly specific medicines for the prevention and treatment of disease.

This agreement is the first of its kind by either company. Through it, Glaxo will gain access to Gilead's expertise and intellectual property in the field of genetic targeting for anti-cancer applications. The agreement covers both a minority equity shareholding in Gilead by Glaxo, and an initial five-year research program directed toward the development of anti-cancer agents.

At the contract signing ceremony held at Glaxo Group Research's United Kingdom headquarters today, Michael L. Riordan, M.D., Gilead's president and CEO, said, "This large vote of confidence by Glaxo will accelerate the development of pharmaceuticals that attack cancer at its source -- the genetic code. We at Gilead are particularly pleased to join forces with Glaxo's scientists and management, who are of the highest caliber in the industry worldwide. This powerful partnership will define a new leading edge for medical science."

Richard B. Sykes, Ph.D., Glaxo's research and development director, stressed the strategic significance of the research agreement. "This is a very exciting area of modern science with immense potential," he said. "It is essential for Glaxo, as a research-based company, to be part of this enabling technology's evolution."

Gilead Sciences, founded in 1987, is an emerging pharmaceutical company

using genetic targeting to develop therapeutics against life threatening diseases such as cancer, viral infections and others whose molecular genetics are being elucidated by rapid advances in molecular biology.

The Glaxo group of worldwide companies comprises one of the largest ethical pharmaceutical companies in the world. It discovers, develops, manufacturers and markets prescription medicines in such therapeutic areas as peptic ulcers, asthma, anti-infectives and cancer. Glaxo has an international R&D staff of some 5,500 scientists.

#90207p8965 07/26/1990 ~PR Newswire

DANIA, FL (JULY 26) PR NEWSWIRE - Sound Advice, Inc. (NASDAQ: SUND), a specialty retailer of upscale consumer electronics products, today announced record sales for the fourth quarter ended June 30, 1990. Total sales for the quarter grew 28 percent and for the year grew 19 percent compared to the same prior periods. Sales increases came from the same number of stores (17), including four expansions during fiscal 1990. Fourth quarter gross profit margin also rose to 34.4 percent of sales from 33.4 percent in the same period last year.

"We are extremely pleased that both our sales and margin performance met our expectations despite increased competition and our aggressive posture in the marketplace," said Peter Beshouri, Sound Advice's president and chief executive. "Our strategy for fiscal '91 is to increase our operating efficiency and net income by adding two new showrooms and significantly expanding the capacity of three existing facilities. Also, for 1992 we are actively seeking additional sites in the Florida market."

Sales for the fourth quarter ended June 30, 1990 were $23 million compared $18 million in 1989. This year's fourth quarter net income of $649,000 was slightly above last year as the company continued its strategy of aggressively taking market share and building its management infrastructure to support anticipated growth. The dilutive effect of 600,000 additional shares issued in June 1989 resulted in a decrease in earnings per share to $.18 compared to $.20 per share a year ago.

For the year ended June 30, 1990, net sales were $91.5 million compared to $76.6 million for fiscal 1989. Net income for 1990 was $2.6 million compared to $2.9 million for 1989, primarily due to nonrecurring inventory shrink in the first quarter of 1990 and expenses during fiscal 1990 associated with anticipated growth. Earnings per share decreased from $.93 for fiscal 1989 to $.70 for 1990 due to the various factors mentioned above.

#90207p8966 07/26/1990 ~PR Newswire

DALLAS (JULY 26) PR NEWSWIRE - Intellicall, Inc. (NASDAQ: INCL) today reported that net income for the second quarter of 1990 increased approximately 117 percent compared with the second quarter of 1989, on the strength of an increase in sales and revenues of $28,847,000.

For the three months ended June 30, 1990, Intellicall earned $1,873,000 on sales and revenues of $50,276,000, or $.27 per share on 6,863,000 average shares outstanding. For the same period in 1989, the company reported earnings of $865,000 on sales and revenues of $21,429,000, or $.17 per share on 5,083,000 average shares outstanding.

For the first six months of 1990, Intellicall's net income totaled $3,523,000, or $.51 per share on 6,857,000 average shares outstanding, representing an increase of approximately 115 percent from $1,636,000, or $.32 per share on 5,079,000 average shares outstanding, for the comparable period in 1989. Sales and revenues for the current six- month period totaled $91,953,000, compared with $37,545,000 for the first six months of 1989.

According to R. Stephen Polley, president and chief executive officer, Intellicall's record performance for the second quarter of fiscal year 1990 resulted primarily from an increase in call revenues generated by the company's proprietary technology, Intelli*Star, which automates certain services for pay telephones. At the same time, sales of pay telephones and related equipment remained strong.

"We're pleased to report that Intellicall licensed more than 10,000 additional Intelli-Star systems during the quarter, indicating continued acceptance for our technology and creating additional streams of revenue for the company," Polley said. "During the second quarter, Intelli-Star call revenues increased approximately 26 percent over the first quarter of this year."

Polley said that Intellicall also continues to expand the applications for its automated technology beyond the pay telephone market, and these applications represent new avenues of growth for the company. For example Intellicall recorded strong sales during the current quarter of its Intelli*Max product, a call processing system designed for the hospitality industry.

"Our research and development efforts have kept this company squarely in front of the competition," he said. "We believe that this ongoing

commitment to innovation, combined with the outstanding growth we've achieved during the past year, will enable Intellicall to maintain its position of leadership."

Intellicall, Inc. is a diversified telecommunications company providing innovative technology and services to private pay telephone networks throughout the United States.

NEW YORK (JULY 26) PR NEWSWIRE - The board of directors of Imperial Chemical Industries PLC (NYSE: ICI) of London today declared a first interim dividend of 21 pence per one pound sterling ordinary share (1989 first interim dividend 21 pence). The total dividend for the year 1989 was 55 pence.

The current income tax convention between the United Kingdom and the United States includes provisions which, in effect, allow many U.S. resident ADR holders to receive this dividend gross of U.K. advance corporation tax, less a 15 percent withholding tax which may, subject to certain limitations, be offset against U.S. federal taxes on overseas income.

For ADR holders able to benefit fully under these arrangements, the interim dividend of 21 pence per ordinary share represents $1.95 per ADR using the conversion rate of one pound equals US$1.74. The actual rate of exchange used in determining the dollar payment to ADR holders will be that obtaining on Oct. 1, 1990.

The record date for the 1990 first interim dividend payable to ICI ADR holders is Aug. 23, 1990, and payment will be made through Morgan Guaranty Trust Company on Oct. 9, 1990. ICI ordinary shares are expected to trade ex-dividend on the New York Stock Exchange from Aug. 17, 1990.

Alan Clements, finance director, noted that it is the usual practice of Imperial Chemical Industries PLC to pay the annual dividend in two instalments. The first interim dividend is announced with the half-year results, and paid in early October. The second interim dividend, paid in early May, subsequently becomes the final dividend once it has been approved at the annual general meeting.

In recent years, ICI has paid the following dividends on ordinary shares, in pence (four ICI one pound ordinary shares traded in London are represented by one ICI ADR traded on the New York Stock Exchange).

BOSTON (JULY 26) PR NEWSWIRE - Boston Edison Company (NYSE: BSE) today reported earnings (loss) per common share for the three, six and 12 months ended June 30, 1990. Earnings (loss) per share for the three months ended were (17 cents) compared to (9 cents) last year; for the six months ended were 51 cents vs. 11 cents; and for the trailing 12 months earnings (loss) were (47 cents) vs. $1.79 for the same period last year. The results of operation for the six and 12 months ended June 30, 1990 includes 41 cents per common share due to the cumulative effect of a change in accounting principle to begin recording unbilled revenues, effective Jan. 1, 1990. This accounting change provides a better matching of revenues and expenses by recording an estimate of customer usage which is unbilled at end of each month. Results for the 12 months ended June 30, 1990, also included an after-tax charge of $106,280,000 relating to provisions for settlements of Pilgrim Nuclear Power Station litigation and rate proceedings recorded in the fourth quarter of 1989.

#90207p8973 07/26/1990 ~PR Newswire

TWINSBURG, OH (JULY 26) PR NEWSWIRE - The improved operating results and the settlement of legal disputes with its former parent enabled General Computer Corporation (NASDAQ: GCCC) to be profitable in the fourth quarter and to significantly reduce its loss for the fiscal year ended May 31, 1990.

In the Fiscal '90 fourth quarter, operating profit was $56,000 on $3.1 million in sales, compared to a $390,000 operating loss on $2.9 million in sales in the final quarter of the prior fiscal year. Pre-tax and net earnings in the Fiscal '90 quarter were $43,000, or 3 cents per share, compared to a pre-tax loss of $456,000 and a net loss of $365,000, or 23 cents per share, in the fourth quarter of Fiscal '89. The Fiscal '90 quarter was favorably affected by $100,000 (included in sundry income), or 6 cents per share, due to the settlement with Revco D.S., Inc.

For the year ended May 31, 1990, pre-tax and net operating loss totaled $1.7 million, or $1.10 per share, on revenues of $12 million, versus Fiscal '89 pre-tax operating loss of $2.7 million and net loss of $2.4 million, or $1.50 per share, on revenues of $11.5 million.

"Our operating performance improved steadily each quarter of Fiscal '90 principally because of strong growth in our prescription claims processing business," Richard R. Pilarczyk, GCC president and chief executive officer said. "This growth is helping us realize our goal of being a more service-oriented company with a substantial recurring revenue base that makes us less dependent on the more volatile computer system sales." In Fiscal '90, service revenues were 54 percent of GCC's total revenues compared to 46 percent in Fiscal '89. Claims processing revenue amounted to $900,000 in the fourth quarter of Fiscal '90 compared to $367,000 in the comparable period a year earlier.

"In Fiscal '90, our fourth quarter claim processing revenue was 42 percent above the third quarter despite the normal seasonal decline in prescription volume," Pilarczyk said. "This is due to the addition of new customers and the advent of claim 'switching'. Our ability to 'switch' claims should provide access to even more pharmacies throughout the country." (In "switching", the claim in not adjudicated or billed by

GCC, but is routed by computer over high-speed telecommunications lines to the appropriate claim processor.)

In May of 1990, the bankruptcy court approved the settlement agreement between General Computer and Revco, D.S., Inc. The agreement in addition to having a favorable impact on operations, improved GCC's balance sheet and settled substantially all claims between the parties.

A pilot program for the company's Med-Minder(TM) prescription refill reminder system continues at leading pharmacy chains. Results to date of this market test have been termed "encouraging" by the company.

"While we are confident that our claims processing revenues and profits will continue to grow in Fiscal 1991, we caution that for the near term the more volatile systems sector may continue to contribute to quarterly fluctuations," Pilarczyk said.

General Computer (NASDAQ/NMS: GCCC) is a leading developer and marketer of electronic systems and services for pharmacies and medical offices.

LANSING, MI (JULY 26) PR NEWSWIRE - Cade Industries, Inc. (NASDAQ-NMS: CADE), a major manufacturer of advanced composite gas turbine engine components, aircraft structures, test nacelles and bellmouths used in large commercial jet engine applications, announced today its substantially improved results for the second quarter ended June 30, 1990.

-- Net income of $636,000 vs. $179,000 for 1990 and 1989, respectively. -- Net income per share of $.04 vs. $.01 for 1990 and 1989, respectively.

-- Sales of $6,720,000 vs. $8,173,000 for 1990 and 1989, respectively. Sales for 1989 included operations since sold.

For the advanced composite operations (excluding operations which have been sold), second-quarter sales and net income increased 27 percent and 255 percent, while six-month sales and net income increased 14 percent and 131 percent over the comparable periods of the prior year.

Richard A. Lund, Cade's president, said that "We anticipate this trend to continue, due to strong demand, and record production levels at the company's Cade Composites and Auto-Air Composites subsidiaries."

"Our subsidiaries continue to show outstanding progress in their manufacturing efficiencies, and increased customer and product diversification," Lund said.

Cade Industries is a world supplier of molded composites and adhesively bonded assemblies for the commercial and military aerospace industries.

PITTSBURGH (JULY 26) PR NEWSWIRE - In a move that will place it among the top three office furniture manufacturers, Westinghouse Electric Corp. (NYSE: WX) today announced it has agreed to purchase the assets and trade name of Knoll International Inc., headquartered in New York, for stock.

Other terms were not disclosed.

Knoll is a leading designer, manufacturer and marketer of high-quality modular office systems, office seating, desks and office accessories.

To capitalize fully on the strategic advantage of the Knoll global position, Westinghouse plans to combine Knoll and existing Westinghouse North American office furniture operations -- Westinghouse Furniture Systems, of Grand Rapids, Mich., the Shaw-Walker Company, of Muskegon, Mich., and Reff Incorporated, of Toronto, Ont.

In addition to the extensive Knoll product line, the Westinghouse Furniture Systems, Shaw-Walker, and Reff brands each will continue to offer their own distinctive product lines.

"The Knoll acquisition, coupled with Westinghouse Furniture Systems and the recent Shaw-Walker and Reff acquisitions, will make Westinghouse among the top three in the profitable office furniture industry," said Westinghouse Chairman Paul E. Lego.

"Knoll's commanding European presence in all eight Common Market countries will help establish Westinghouse as a leading designer and manufacturer of office furniture systems worldwide.

The purchase of Knoll, a privately held company, will include its headquarters operations in New York, all of its manufacturing operations in East Greenville and Iron Run, Pa., both near Philadelphia; Montreal; Milan; and Paris; and its field sales and branch offices throughout the world. Knoll employs about 2,800 people.

It is expected the purchase will be completed in the third quarter, following the due diligence process and review by the appropriate government agencies.

#90207p8980 07/26/1990 ~PR Newswire

HOUSTON (JULY 26) PR NEWSWIRE - Enron Oil & Gas Co. (NYSE: EOG) today reported net income of $5.6 million, or 7 cents per share, for the second quarter of 1990.

The company reported a loss of $4.1 million, or 6 cents per share, for the same period a year ago.

Comparable net operating revenues were $78.6 million in the recent quarter compared to $65.2 million for the second quarter of 1989.

Enron Oil & Gas reported net income of $16.8 million, or 22 cents per share, for the first six months of 1990. The company reported a loss of $4.8 million, or 8 cents per share, for the same period a year ago.

"We were very pleased with the level of profitability achieved in the second quarter of 1990 compared to a year ago, even though faced with wellhead natural gas prices that were 17 cents per thousand cubic feet less in 1990 than 1989," said Forrest E. Hoglund, chairman, president and CEO of Enron Oil & Gas.

"With the low wellhead prices, we cut back production from shorter-lived fields in core areas and sold reserves in place from non-core areas," Hoglund said. Current producing capacity is about 550 MMcf/d, but EOG is holding sales to slightly more than 400 MMcf/d, he noted.

"Wellhead natural gas sales volumes of 432 million cubic feet per day (MMcf/d) combined with other natural gas sales volumes of 140 MMcf/d, both up significantly from last year, were major factors in the increase in net operating revenues." EOG's lease and well expenses and depletion, depreciation and amortization, while up in total, were down on a per unit of sales basis, Hoglund noted. Second quarter other income in 1990 included $12.2 million in pre-tax gains from property sales, essentially the same as in 1989. Net income for the second quarter of 1990 also benefited from a lower effective federal tax rate, reflecting a partial utilization of a net operating loss carryforward.

Wellhead natural gas prices averaged $1.30/Mcf during the second quarter of 1990 compared to $1.47/Mcf a year ago. Crude oil and condensate prices averaged $15.53/barrel during the current period vs. $17.45/barrel in the

prior quarter.

Net revenue from other natural gas marketing volumes was $14.7 million in the second quarter of 1990, up from $6.6 million the prior year. The company's discretionary cash flow increased to $51.6 million for the second quarter of 1990 compared to $40.4 million a year ago.

Results year-to-date remain very strong with net operating revenue for the first six months of 1990 at $174.8 million vs. $139.8 million for 1989, and discretionary cash flow in 1990 of $113.5 million vs. $76.0 million in 1989.

Enron Oil & Gas Co. is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved reserves.

MILLVILLE, NJ (JULY 26) PR NEWSWIRE - Lucas Industries plc, the major international aerospace, automotive and industrial systems group, announced today that it has purchased Digital Electronics Corp. (DEECO) of Hayward, Calif.

The transaction, concluded on July 23, 1990, provides for the purchase of all the outstanding shares of Digital Electronics Corp. for $15 million.

DEECO is a U.S.-based supplier of display systems and terminals including touch screens and electronics integration. The company has annual sales of $10 million and employs 70 people in Hayward. The company serves a wide range of customers in the medical, process control, factory automation equipment industries and automotive and aerospace markets.

The company will be part of Lucas Industrial Systems Inc. under the name Lucas DEECO. The company will be operated as a division of Lucas Duralith, headquartered in Millville.

Lucas Duralith is an industry leader in the membrane switch and control and display assembly markets. DEECO will expand these product ranges with significant synergistic benefits.

Commenting on this latest expansion of its North American interests, John Berkenkamp, president of Lucas Industrial Systems Inc., said: "The acquisition of DEECO is part of our continuing strategy to expand and strengthen existing Lucas electronics and sensing technologies in support of Lucas automotive and aerospace as well as related high growth markets. This acquisition is further evidence of our commitment to those strategies."

CALGARY, ALBERTA (JULY 26) PR NEWSWIRE - Coho Resources Ltd. (Alberta,

Montreal, Toronto: COH), a Calgary, Canada-based oil and gas exploration and development company announced today that its wholly owned U.S. oil and gas exploration and development subsidiary, Coho Resources, Inc. has agreed to issue 3,500,000 common shares to an Underwriting Group for $13.00 (U.S.) per share.

The group is co-managed by Salomon Brothers Inc. and Howard, Weil, Labouisse, Friedrichs Inc. Coho U.S. has also agreed to issue to the underwriters a 30 day option to purchase an additional 350,000 shares at the same price.

Immediately prior to the completion of the offering, Coho U.S. will merge with a private U.S. company indirectly controlled by K.H. Lambert, president and chief executive officer of Coho, in exchange for 347,000 common shares of Coho U.S. This private company owns a 6.7 percent working interest in all the areas of the Laurel Mississippi oil field in which Coho U.S. owns an interest.

The proceeds of this offering, estimated to be approximately $41 million (U.S.), will be used to repay floating rate bank debt. If the underwriters exercise their option, net proceeds will be approximately $46 million (U.S.). It is expected that the underwriting will close on August 1, 1990.

With the completion of this offering, Coho will own approximately 68 percent of the 11,847,000 shares outstanding of Coho U.S. and if the underwriters' option is exercised Coho will own approximately 66 percent of the 12,197,000 shares outstanding.

Coho will continue to consolidate the results of the Coho U.S. operations in its accounts. For Coho's consolidated balance sheet the transaction will result in an increase in the consolidated shareholders' equity as well as an increase in minority interests in subsidiary companies and an increase in deferred taxes. Coho will enjoy a favorable debt to equity ratio and will have increased financial flexibility.

Coho U.S. will be listed on the NASDAQ market system and will trade under the symbol COHO.

WASHINGTON (JULY 26) PR NEWSWIRE - Fannie Mae (Federal National Mortgage Association (NYSE: FNM) today termed irresponsible new proposals by the Treasury Department and the Office of Management and Budget (OMB) for government-sponsored enterprises (GSEs).

In a first round of studies released in May, Treasury proposed that GSEs be required to obtain a triple-A rating, absent any implicit government guarantee, from private credit rating agencies.

The purpose of the reviews is to examine the financial stability of private companies, such as Fannie Mae and Freddie Mac (Federal Home Loan Mortgage Corporation), that are chartered by Congress to support housing and other public policy objectives. The studies, required by last year's S&L legislation, are scheduled to be completed next spring.

The Treasury and OMB last week submitted the triple-A proposal to the budget summit for its participants' consideration.

"The Treasury/OMB proposals are not responsible," said James A. Johnson, Fannie Mae's vice chairman, before the housing subcommittee of the House banking committee. "The summit's acceptance of these proposals could result in significant disruption of the housing and mortgage finance markets and the general economy."

Johnson told the panel that the effects of requiring a triple-A rating might include a rise in mortgage interest rates, a drop in the supply of mortgage credit, an increase in the government's cost to bailout the S&L industry, and a worsening of "recessionary tendencies of the economy."

Mortgage availability would fall, he said, if excessive capital requirements require Fannie Mae and Freddie Mac to shrink or shut down major parts of their operations.

More than 80 percent of residential mortgage loans made to consumers are financed by Fannie Mae and Freddie Mac, except for FHA/VA loans and those for high-income families, according to Fannie Mae.

"Cutting back new lending and selling off assets to meet the proposal's restrictions would increase primary mortgage rates substantially," Johnson said. "A rise in mortgage rates would have obvious effects on the housing market and also could have a recessionary impact throughout the entire economy.

"Inclusion of this proposal in the final summit agreement could cause the value of mortgages and related assets, including mortgage-backed securities and GSE debt to drop precipitously," he said. "That would reduce the value of bank and thrift assets and add to the RTC's losses."

PARSIPPANY, NJ (JULY 26) PR NEWSWIRE - Athlone Industries, Inc. reported net sales of $133,888,000 and net earnings of $3,656,000 or $.56 per common share for the first six months of 1990. For the first half of 1989 the company reported record sales of $159,549,000 and net earnings of $12,755,000 or $2.21 per common share.

The company presently expects earnings for the second half of 1990 to be ahead of the first half of 1990 and the second half of 1989, due in part to lower interest costs and to increasing shipments of stainless steel plate.

The company also said it is continuing to review its diversified operations with the overall objectives of concentrating on its core business, specialty metals, and to be positioned to consider other opportunities to enhance the value of the company's common stock.

Commencing in 1989 to date the company has retired $50,000,000 of its $75,000,000, 15-5/8 percent notes. The source of funds for this retirement program was internally generated cash including the proceeds of the sale of the Dudley Division. The company is presently negotiating to arrange financing at current market rates to refund the remainder of these notes. The retirement of these notes will result in substantial interest savings to the company.

The company's specialty metals operations consist of Jessop Steel Company and Green River Steel Corporation. Jessop, located in Washington, Pa., is a producer of stainless steel plate, nickel alloy plate and tool steel. Jessop also operates distribution and processing centers in Los Angeles and the Philadelphia area. Green River Steel, located in Owensboro, Ky., produces semi-finished specialty alloy and carbon steel bars and billets. Green River's quench and temper facility completed in 1989 is operating at capacity, and the installation of new production facilities to double this output will be completed in early 1991.

On July 19, 1990, the board of directors declared the regular quarterly dividend of $.25 per common share payable Aug. 17, 1990 to stockholders of record Aug. 3, 1990.

A comparison of net sales and earnings follows:

ATHLONE INDUSTRIES, INC.
(In thousands, except per share data)

	Three months ended		Six months ended	
June 30	1990	1989	1990	1989
Net sales	$64,937	$75,639	$133,888	$159,549
Earns. from cont. opers. bef. prov. for inc. taxes	1,154	8,607	4,810	18,100

Provision for income taxes	541	2,112	2,034	4,785
Earns. from cont. opers.	613	6,495	2,776	13,315
Earns. (loss) from discontinued operations	--	(164)	1,067	(76)
Earns. bef. extraord. item	613	6,331	3,843	13,239
Extraord. item, net of taxes	(54)	(484)	(187)	(484)
Net earnings	$ 559	$ 5,847	$ 3,656	$12,755
Earns. (loss) per comm. shr.:				
Continuing operations	$ .07	$ 1.11	$ .41	$ 2.30
Discontinued operations	--	(.03)	.18	(.01)
Extraordinary item	(.01)	(.08)	(.03)	(.08)
Net earnings per common share	$ .06	$ 1.00	$ .56	$ 2.21

Notes to consolidated earnings:

(1) For financial reporting purposes, during the first six months of 1989, the company utilized approximately $7,400,000 of its net operating loss carry-forward to reduce its provision for income taxes. At Dec. 31, 1989, no net operating loss carry-forward remained.

(2) Extraordinary item is in connection with the early retirement of the company's 15-5/8 percent subordinated notes in 1990 and 1989.

(3) Earnings per common share are computed by dividing net earnings (less preferred stock) dividends and accretion of preferred stock of $143,000 and $285,000 for the three and six month periods ended June 30, 1990 and $141,000 and $281,000 for the three and six month periods ended June 30, 1989) by the average common shares outstanding during each period or 5,982,000 in 1990 and 5,654,000 in 1989.

#90207p8994 07/26/1990 ~PR Newswire

NEW YORK (JULY 26) PR NEWSWIRE - ICI has taken a major step to reorganize its business portfolio in Europe by agreeing in principle to sell its U.K. fertilizer business to Kemira Oy of Finland.

Kemira will acquire the fertilizer production assets of Severnside, near Bristol, at Leith, Edinburgh and also the liquid fertilizer production plants.

The fertilizer production plants at Billingham, Cleveland and the associated headquarters facilities will close.

It is intended to complete the sale of the fertilizer business to Kemira, subject to detailed negotiations and appropriate regulatory approvals, by

the end of 1990. Some 540 ICI employees will transfer to Kemira.

ICI Fertilizers, in common with other manufacturers in Europe, has faced falling demand for fertilizers as European Commission measures to reduce crop surpluses and to limit nitrogen applications for environmental reasons have taken effect. Despite actions in recent years to reduce costs and improve efficiency, ICI considers that further rationalization of both production capacity and the number of manufacturers is essential for the European and U.K. industry to return to even a modest state of health.

In view of the market conditions ICI has concluded that its U.K. fertilizer business is no longer viable and has decided to close the Billingham fertilizer assets and sell the remaining fertilizer business to Kemira. Fertilizer sales account for over one-third of Kemira's corporate turnover. Kemira is keen to continue ICI Fertilizer's tradition of service to the British agricultural industry.

The plants that will close at Billingham are the ammonium nitrate and granular compound fertilizer plants, together with one ammonia and three nitric acid plants. In addition, the headquarters facilities will no longer be required. About 640 employees will be affected at Billingham. The company's security of employment statement will be applied.

ICI is also in discussion about the sale of other businesses associated with its fertilizer operations -- the agricultural merchanting operations of Scottish Agricultural Industries PLC and BritAg Industries Ltd. and the Liquid Carbon Dioxide and "Drikold" businesses.

The value of the consideration involved in this transaction represents less than 2 percent of ICI Group net assets. The ICI Group 1190 half-year results announced today include an extraordinary item of 100 million pounds sterling (net of tax relief) in respect of provision for losses on the disposal of the U.K. fertilizer businesses and related closures.

NEWTON, IA (JULY 26) PR NEWSWIRE - Donald C. Byers, secretary and general counsel for Maytag Corporation (NYSE: MYG), will retire from the firm on July 31, according to to Daniel J. Krumm, chairman and chief executive officer.

Byers began his career as an attorney for Maytag Company in 1953. He was elected secretary in 1973 and assumed the post of general counsel the same

year.

Following Maytag's merger with Magic Chef, Byers joined the staff of Maytag Corporation as secretary and general counsel in 1986. Byers was also director of government affairs for Maytag Corporation and chairman of its Political Action Committee. In addition, he was president of the Heartland Rail Corporation, a shipper-owned railroad made up of the former east-west Rock Island line, and president of the Appliance Manufacturers Assurance Company, a risk retention insurance firm, which provides general and product liability insurance coverage for the appliance industry.

Born in Fargo, N.D., Byers was raised in New London, Iowa. He is a graduate of Iowa Wesleyan College, Mt. Pleasant, Iowa, where he received a bachelor's degree in 1949. He was awarded his Juris Doctor degree from Drake University, Des Moines, Iowa, in 1951.

Currently chairman of the Board of Governors for Drake University, Byers also served on the board of counselors of Drake Law School and is a recipient of the Drake Distinguished Service Award. He is also the recipient of a distinguished service award from Iowa Wesleyan College.

Active in community affairs, Byers served for nine years on the Newton Community School Board, during which time he was elected president twice. He is a past chairman of the Community Betterment Committee of the Newton Chamber of Commerce and is chairman of an environmental and community beautification group called "Project AWAKE."

Byers is the chair-elect and a member of the board of governors for FINE Foundation, an educational research group created by the state of Iowa for educational research. He currently serves on a special committee, formed by the director of the department of education, to study the status of school administrators.

He also is a long-time member of the Iowa Association of Business and Industry and is the only member to serve two successive terms as chairman of the organization.

READING, PA (JULY 26) PR NEWSWIRE - Carpenter Technology Corp. (NYSE: CRS) today reported sales and earnings for the fourth quarter and full fiscal year ended June 30, 1990.

Paul R. Roedel, chairman of the board and chief executive officer, said, "We are pleased with the improved earnings for our full fiscal year 1990,

which were achieved despite weakness in several of our key end-use markets."

For the full fiscal year, net income was $45 million vs. $29 million for the prior year. Earnings per share were $5.05 compared to $3.16 last year. Last year's results included a previously reported special charge of $13.5 million after tax, or $1.50 per share, for shutdown costs associated with closing its Bridgeport, Conn., plant.

Excluding the effect of the special charge, fiscal year 1990 earnings per share of $5.05 increased 8 percent over last year's adjusted $4.66 per share.

For the full fiscal year, sales were $584.4 million or 8 percent lower than the record sales of $634.3 million reported for the same period a year ago.

For the fourth quarter ended June 30, 1990, net income was $12.2 million, compared to $13.6 million for the same period a year ago. Earnings per share were $1.37, down 7 percent from the $1.48 reported for the same period a year ago. Net sales were $154.3 million, 10 percent lower than the $171.2 million reported for the same period a year ago.

Roedel stated, "While we were disappointed that our earnings for the fourth quarter were lower than the prior year's fourth quarter, chiefly as a result of the slower economic growth, we are pleased that the programs to upgrade our mix and reduce our costs are contributing significantly to our earnings performance."

Roedel continued, "The programs, further refined during fiscal year 1990, to improve our mix of products sold, reduce our costs and utilize our most cost effective facilities will continue to be our driving force into fiscal year 1991."

Roedel further stated that the company continues to experience weakness in the consumer-oriented markets of its business, particularly in the automotive, housing, and appliance markets. But, he said, this weakness is being somewhat offset by stronger capital spending in markets such as aerospace and energy.

JAMESTOWN, NY (JULY 26) PR NEWSWIRE - Bush Industries, Inc. (AMEX: BSH), a leading manufacturer of RTA (ready-to-assemble) furniture, announced results for the second quarter and first half ended June 30, 1990, at today's annual meeting of shareholders.

Second-quarter sales increased to $24,645,000 from $23,971,000 in last year's like quarter, while net earnings dropped to $221,000 or 5 cents per share from $725,000 or 16 cents per share in the same period.

This year's first-half sales were $49,544,000, compared with $51,405,000 in fiscal 1989's first half, while net earnings decreased to $617,000 or 14 cents per share from $1,795,000 or 40 cents per share.

"Sales in the second quarter increased over a year ago even in the face of a very soft retail climate," Paul Bush, chairman, noted. "These gains have been a direct result of our diversification into traditional furniture and home office markets. Combined with our new display programs, which have gained strong acceptance from leading retailers, this diversification has broadened our distribution base and positioned the company for future growth.

"Efficiencies in our manufacturing operations improved for the second quarter in a row, and our operating margin was the highest since the first quarter of 1988," he pointed out.

"However, our profitability in 1990 has been impacted by our substanital investment to support our growth strategy. In 1990, we have made significant investments in our new merchandising display programs at major furniture retailers, increases in inventory levels to meet customer demand and the launch of our new distribution center in Ohio," Bush continued.

"In the last two years, we have undertaken a difficult strategy of diversification to meet the challenges of a changing RTA market. Although there have been difficulties, and we have not yet achieved the increase in profits we anticipated, this strategy is both necessary and vital to our future growth and strength," he emphasized.

"Internally, we have rededicated ourselves to our traditional concepts of team work and training. Our continued emphasis is on improving our performance and profitability," Bush concluded.

#90207p9002 07/26/1990 ~PR Newswire

PITTSBURGH (JULY 26) PR NEWSWIRE - At a news conference this morning, Mellon Bank Corp. (NYSE: MEL) and Giant Eagle Inc. announced the signing of an agreement to place Mellon Bank branches in 21 Giant Eagle stores in the western half of Pennsylvania.

Hailed by officials at both companies as a dramatic advance in customer service, the new full-service consumer branches will offer extended evening and weekend hours and provide a complete range of consumer banking services.

Installation of the 21 branches -- to be located in Giant Eagle stores in Allegheny, Butler, Cambria, Crawford, Washington and Westmoreland counties -- represents the largest supermarket banking effort to date in the Central Atlantic region. The first branch is expected to open in October 1990 in the Giant Eagle store in McMurray in Washington County, followed in November 1990 by the Monroeville and Peebles Road Giant Eagle locations in Allegheny County. Installation of the remaining stores should take place in the following 18 months and is expected to be completed by mid-1992.

"Supermarket banking is the biggest advance in customer convenience in this area since the advent of the automated teller machine," said Richard A. Gaugh, Mellon's vice chairman of Retail Banking. "Our supermarket branches will offer Mellon customers the most convenient hours in our marketplace, and they'll be the first of this magnitude in the Pittsburgh area."

Each of the branches will be approximately 400 square feet with both teller and private office facilities, employing an average of six associates working in two shifts. The branches will be placed in convenient in-store locations, with most near the check-out lines at the front of the stores. Automated teller machines will continue to be available at all locations.

"This is another ground-breaking step for Giant Eagle," said David S. Shapira, president and chief executive officer of Giant Eagle Inc. "Supermarket banking is an excellent opportunity for us to expand the

variety of services we offer to better serve our customers -- especially those who tend to shop when banks traditionally are closed."

Gaugh noted that supermarket banking has been highly successful in other parts of the country and provides a cost-effective means of expanding a bank's delivery system. "The locations for the supermarket banking branches were selected carefully to build on our existing branch network, provide added convenience for our customers and enable us to reach a broader base of customers," he said. "We believe there's strong customer interest in receiving complete banking services during extended hours seven days a week."

Shapira added that Giant Eagle is pleased to be expanding its relationship with Mellon, a business partner for several years. Mellon currently has automated teller machines in 65 of Giant Eagle's 78 Pennsylvania stores.

As with any new branch opening, Mellon must file applications and receive approval from the Office of the Comptroller of the Currency. The first applications are expected to be filed today and will continue on a branch-by-branch basis over the next 18 to 20 months.

CONTACT: Thomas W. Butch, 412-234-6436, or J. T. Tuskan, 412-234-0850, both of Mellon Bank; or Joseph R. Faccenda of Giant Eagle, 412-963-2510

ANAHEIM, CA (JULY 26) PR NEWSWIRE - Odetics (AMEX: O.B, O.A) announced today that two of the company's space tape recorders on board Magellan will be critical during the primary mapping vision of Venus starting Aug. 10, 1990.

The on-board recorders store 1.8 gigabits (Gb) of radar data during periods when either the sun or Venus itself prevents direct data transmissions to Earth. Once the transmission path is clear, the information stored in the Odetics recorders will be downloaded to Earth.

The surface of Venus is hidden by a very dense atmosphere with opaque clouds. Using Magellan's radar imaging, scientists and astronomers will for the first time be able to see detail that exceeds what they have viewed during previous missions to Venus.

The Magellan Project is managed by the Jet Propulsion Laboratory for NASA's Office of Space Science and Applications.

Odetics has provided recorders similar to those on Magellan for the Galileo mission to Jupiter.

Odetics, headquartered in Anaheim is a leading manufacturer of intelligent machines, including information systems, for collecting digital and analog data, as well as robotic and artificial intelligence systems.

IRVING, TX (JULY 26) PR NEWSWIRE - IMCO Recycling Inc. (NASDAQ: IMRI) today announced that it will expand its Morgantown, Ky. aluminum recycling facility in a move that will raise the company's total annual capacity by 15 percent.

The expansion, scheduled for completion at the end of 1990 at a cost of about $1.8 million, will increase the Morgantown plant's capacity by 50 percent. On completion of the program, IMCO Recycling's annual capacity will rise to 500 million pounds from the present level of 430 million pounds.

Ralph L. Cheek, chairman and chief executive officer, said the Morgantown expansion "is being carried out because of the favorable reception the plant's cost-effective recycling service has received from customers since its opening in late 1989."

The Morgantown facility is located near three major aluminum rolling mills and is capable of providing deliveries of molten metal to each of them. This delivery method saves customers the time and expense required to remelt aluminum before beginning the can stock manufacturing process.

"Our decision to expand Morgantown's capacity is based on anticipated regional demand for the plant's services, particularly its molten metal delivery capability," Cheek said. "We are confident that its greater capacity will be fully utilized by existing customers."

IMCO Recycling is the largest independent recycler of aluminum beverage

cans and their by-products in the U.S. and is the nation's only publicly owned firm whose activities are concentrated in the aluminum can recycling market.

MIAMI LAKES, FL (JULY 26) PR NEWSWIRE - Preferred Homecare of America, Inc. (NASDAQ: PFRD) today announced the signing of contracts with two health care providers in South Florida and one in Washington, D.C. Preferred Homecare will provide home intravenous therapies to the patients of these organizations.

The first contract is with Metrocare of Washington, a high-tech provider of highly skilled professionals to critically ill patients in their homes with the use of computerized monitoring systems.

The second contract is with Preferred Health Providers of Miami, a Preferred Provider organization with approximately 75,000 members and 12 insurance companies as participants, servicing all of South Florida.

The third contract is with Physician Choice, Inc. of Boca Raton, Fla., a physician-owned company servicing patients from Ft. Lauderdale to West Palm Beach.

Carlos M. Herrera, president and chief executive officer of Preferred Homecare, stated, "The signing of these contracts reflects the company's ability to expand its marketing capabilities outside the physician-owned home infusion companies, acquired earlier."

Herrera added, "The company plans to market managed care providers regionally, as well as manage new physician groups, in addition to its existing referral network."

Preferred Homecare of America, Inc. is a high-tech home infusion therapy company and provider of pharmaceuticals to sub-acute care facilities. The company has offices servicing patients in Miami/Ft. Lauderdale, Pasco County, Ft. Myers, Fla.; the New York/New Jersey metropolitan area, and the Washington, D.C./Maryland/Virginia region.

LOUISVILLE, KY (JULY 26) PR NEWSWIRE - W. L. Lyons Brown, Jr., chairman and chief executive officer of Brown-Forman Corporation (AMEX: BF.A BF.B), told stockholders at the company's annual meeting today that in the fiscal year ended April 30, the company gained market share in a highly competitive domestic wine and spirits industry, expanded its presence and profitability in the international market and completed acquisitions of strategic importance within the consumer durables sector.

"Brown-Forman's continued strong performance in fiscal 1990 is the result of increasing consumer demand for our large and profitable brand franchises," Brown said.

Excluding nonrecurring items, net income for the 1990 fiscal year rose 9 percent to $139.6 million, or $4.97 per share, compared to $127.6 million, or $4.54 per share, the previous year. The largest of the nonrecurring items was a charge of $59.9 million for a write-off of California Cooler's remaining intangible assets. Including nonrecurring items, reported fiscal 1990 net income was $92.5 million, or $3.29 per share, compared to $144.5 million or $5.15 per share, in the prior year.

The company's wine and spirits business in the U.S. continued to provide the majority of sales and operating income, while Brown-Forman's overseas business was the fastest-growing sector and the largest contributor to corporate earnings growth in fiscal 1990.

Operating income from wine and spirits improved 14 percent to a record $204.5 million in fiscal 1990, with major brands Jack Daniel's, Southern Comfort, Canadian Mist, Early Times and Korbel Champagnes accounting for much of the earnings. Brown-Forman International once again achieved extraordinary results, with all performance measures, including unit volume, market share, revenues and profits, reaching record levels.

The company continued to achieve growth within the premium segment of the domestic market, despite declining long-term trends in total wine and distilled spirits consumption in the United States. Brown-Forman has increased its emphasis on high quality, premium brands with the introduction of Gentleman Jack, a unique and very special whiskey, Icy Vodka, imported from Iceland, and Sempe, a fine French armagnac, "We are encouraged that these brands will improve the company's position in the premium segment," Brown told the stockholders. "And in the future, we will continue to aggressively pursue the development and introduction of premium products."

Brown-Forman Corporation is a diversified producer and marketer of fine quality consumer products, including Jack Daniel's Tennessee Whiskey, Canadian Mist, Southern Comfort, Korbel California Champagnes, Lenox China and Crystal, and Hartmann Luggage.

#90207p9016 07/26/1990 ~PR Newswire

NEW YORK (JULY 26) PR NEWSWIRE - Unicorp American Corporation (AMEX: UAC) announced today that it has closed its previously announced transaction with Coscan, Inc. -- a wholly-owned subsidiary of Coscan Development Corporation ("Coscan") (TSE: COT) -- regarding substantially all of Unicorp American's real estate assets. Certain of the assets were transferred to two partnerships comprising Unicorp American and subsidiaries of Coscan and certain other assets were financed with participating mortgages. Cash proceeds to Unicorp American from the transaction after property adjustments were $40 million. These proceeds were applied to repayment of Unicorp American's senior loan facility.

The partnerships acquired certain of the real estate assets from Unicorp American for a total cost of approximately $33.1 million, of which approximately $7.9 million consisted of the assumption of outstanding mortgage debt. $16.5 million of participating mortgage financing was provided for other real estate assets. A Coscan subsidiary is the managing partner, and Unicorp American a limited partner, of the partnerships. The Coscan subsidiary will loan additional funds to the partnership to cover operating deficits and capital requirements, if any. Net proceeds to the partnership from real estate operations and sales, refinancings and other capital transactions will be divided equally between Unicorp American and a Coscan subsidiary after payment of all partnership loans and other obligations. The participating mortgage loans will provide the lenders with a 50 percent participation in net cash flow and net proceeds.

The company contemplated the financial impact of this transaction during the fourth quarter of 1989 and adjusted its provision for loss on disposal of real estate operations accordingly. Therefore, no gain or loss will be reported on this transaction.

Coscan Development Corporation is an affiliate of Hees International Bancorp, Inc., which currently owns a 24.6 percent non-voting equity interest in Unicorp Canada Corporation, the parent company of Unicorp American Corporation.

HOUSTON (JULY 26) PR NEWSWIRE - DI Industries, Inc. (AMEX: DRL) announced

today its results of operations for the three months ended June 30, 1990, the first quarter of the current fiscal year.

Consolidated revenues increased 114 percent to $10,012,000 for the quarter as compared to $4,680,000 a year ago. The company recorded net income of $386,000 for the quarter as compared to net loss of $825,000 a year ago. Cash flow was $1,071, 000 for the quarter as compared to negative cash flow of $402,000 a year ago.

The company reported net income per share of $.01 for the quarter as compared to net loss per share of $(.04) a year ago.

Max M. Dillard, president, reported, "This is the company's second consecutive quarter of net income and the fourth consecutive quarter of positive cash flow. It is also the company's best consecutive quarterly results since 1982."

Dillard continued: "The positive change in quarterly earnings of $1,211,000 is a direct result of the company's aggressive acquisition program and the overall improvement in the drilling industry. During the current quarter, the company acquired the assets of a foundation drilling company through a lease purchase agreement. This acquisition resulted in the addition of 13 small drilling units to the growing fleet of 68 larger drilling rigs."

DI Industries, Inc., headquartered in Houston, is engaged primarily in the business of providing onshore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling, oil and gas exploration, development and production and equipment repair and sales.

#90207p9021 07/26/1990 ~PR Newswire

EAST HARTFORD, CT (JULY 26) PR NEWSWIRE - TAROM (Transporturile Aeriene Romane), the Romanian national flag carrier, has ordered Pratt & Whitney PW4156A engines to power three new Airbus Industrie A310-300 airliners. The firm order includes six installed power systems (engines and nacelles) plus two spare engines.

TAROM thus becomes the first Eastern European airline to power A310-300s with the PW4000, and it continues a long-standing relationship with Pratt & Whitney. The airline currently flies Boeing 707 aircraft powered by Pratt & Whitney JT3Ds.

TAROM will use the A310s on its current intercontinental routes, replacing some 707s and Soviet-made Ilyushin IL-62 airliners. The A310s are to be

delivered in March and May of 1992 and February 1993.

"We are very happy to continue our fine relationship with TAROM," Henri J. Picard, Pratt & Whitney vice president - European Marketing, said. "The high reliability and fuel efficiency of the PW4000 put TAROM in a very favorable position to take advantage of the dual forces of the opening up of Eastern Europe and the growing worldwide long-haul passenger market."

The PW4000 is Pratt & Whitney's newest and most powerful engine for wide-body transports. It is the most fuel efficient engine in its class, and it is widely recognized for the advantages it provides airlines in terms of lower operating and maintenance costs, higher thrust growth potential and high degree of commonality on all wide-body aircraft types.

Pratt & Whiteny is a unit of United Technologies Corporation (NYSE: UTX) of Hartford, Conn. United Technologies provides a broad range of high technology products and support services to the aerospace, building systems and automotive industries.

CHICAGO (JULY 26) PR NEWSWIRE - Midway Airlines Inc. (NYSE: MDW) today reported a net loss for the quarter ended June 30, 1990 of $11,432,000 ($1.24 per fully diluted share) on revenues of $170,574,000 compared to net income of $5,108,000 ($.46 per fully diluted share) on revenues of $126,481,000 during the same 1989 quarter. Operating loss for the quarter was $8,950,000 compared with operating income of $6,322,000 during the same 1989 quarter.

For the first six months of 1990, Midway Airlines reported a net loss of $34,352,000 ($3.63 per fully diluted share) on revenues of $327,734,000 compared with net income of $8,007,000 ($.72 per fully diluted share) on revenues of $243,744,000 for the first six months of 1989.

"There was a significant improvement in Midway Airlines' financial performance in the second quarter with a reduction in the operating loss from the $26.1 million reported for the first quarter to $8.9 million," said Alfred S. Altschul, vice president of finance and chief operating officer. "We are making excellent progress in the development of our new Philadelphia hub and we are encouraged by strong growth trends in our traffic and advanced bookings for the months of July and August," Altschul said.

On June 30, 1990, the company had 10,104,856 shares of common stock issued and outstanding.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

FINDLAY, OH (JULY 26) PR NEWSWIRE - OHM Corporation (NYSE: OHM) today announced substantially improved operating performance for the second quarter ended June 30, 1990. Net revenues for the quarter increased 45 percent to $52,876,000 while operating income, excluding nonrecurring charges, increased 90 percent to $5,787,000. Net income for the quarter was $7,179,000 or $.60 per share compared to net income of $335,000 or $.03 per share for the second quarter in 1989.

The 1990 second quarter results reflect a gain of $8,890,000 or $.67 per share resulting from the initial public offering of 1,725,000 shares of common stock of OHM's asbestos abatement subsidiary, NSC Corporation, which was completed in June.

The gain was partially offset by special charges of $4,341,000 or $.22 per share, including $1,215,000 for an anticipated loss on the divestiture of its mobile solvent recycling technology, $750,000 attributable to the company's share of losses related to its unconsolidated joint venture, and accruals and charges related to a retirement plan and other nonproductive assets.

Net income per share for the quarter, excluding the nonrecurring gain and

special charges, was $.15 per share, which represented a 400 percent increase over the $.03 per share earned in the 1989 quarter.

For the six months ended June 30, 1990, net revenues were $99,868,000, an increase of 44 percent over the comparable 1989 period. Operating income for the six months ended June 30, 1990, excluding nonrecurring charges, increased 439 percent to $9,995,000 from $1,854,000 in the comparable 1989 period. Net income for the six months was $7,987,000 or $.67 per share, compared to a net loss of ($1,310,000) or a loss of ($.11) per share for the first half of 1989. The results for the six months reflect the nonrecurring gain and special charges included in the second quarter results. Net income per share for the six months, excluding the nonrecurring gain and special charges, amounted to $.22 compared to a loss of ($.11) in the comparable 1989 period.

The company said that net proceeds from the initial public offering of 31 percent of the common stock of its NSC Corporation subsidiary, were $21,142,000 which were used to repay bank indebtedness to reduce its consolidated leverage.

OHM Corporation is a leading nationwide environmental services company with 30 locations across the United States and in Canada. The company provides a full range of environmental assessment, analytical, data management, engineering, design, remediation and waste treatment services to a broad base of industrial and government clients on both a planned and emergency basis.

LOS ANGELES (JULY 26) PR NEWSWIRE - TransTechnology Corporation (NYSE: TT) today reported profitable operations for its first quarter ended June 30, 1990, following substantial losses last year.

Revenues from continuing operations were $43,183,000, compared with $41,226,000 in first quarter of fiscal 1990, an increase of 5 percent. Net income from continuing operations for the quarter was $294,000, or 6 cents per share, compared with a loss of $1,707,000, or 33 cents per share, from continuing operations in last year's first quarter.

Dr. Arch Scurlock, chairman, said, "We were gratified to see a resumption of profitable operations during what is historically our weakest quarter, and we expect continued improvement as the year progresses."

TransTechnology Corporation is a manufacturer of aerospace products,

advanced-technology products, and industrial products.

BIRMINGHAM, AL (JULY 26) PR NEWSWIRE - William O. Bourke and John J. Phelan, Jr. were elected directors of Sonat Inc. (NYSE: SNT) today. Ronald L. Kuehn, Jr., Sonat chairman, president and chief executive officer, made the announcement following a meeting at which the company's board of directors elected the new directors. Their election increases Sonat's board from 13 to 15 members.

Bourke is chairman and chief executive officer of Reynolds Metals Company. He was executive vice president and a director of Ford Motor Company before he joined Reynolds Metals as executive vice president in 1981. He was elected president and chief operating officer of Reynolds Metals in 1983, president and chief executive officer in 1986, and was elected to his current position in 1988. He is a director of Merrill Lynch and Premark International, Inc. A native of Chicago, he earned his bachelor's degree in commerce from DePaul University.

Phelan is chairman and chief executive officer of the New York Stock Exchange (NYSE) and has been associated with the securities industry for 35 years. He served as vice chairman of the NYSE board from 1975 until 1980, when he was elected president and chief operating officer of the NYSE. He was elected to his current position in 1984. He is a director of Eastman Kodak Company and Metropolitan Life Insurance Company. A native of New York City, he graduated magna cum laude from Adelphi University.

Sonat, headquartered in Birmingham, Ala., is a worldwide energy company involved in natural gas transmission and marketing, oil and gas exploration and production, and oil services.

#90207p9032 07/26/1990 ~PR Newswire

CHICAGO (JULY 26) PR NEWSWIRE - UAL Corp. (NYSE: UAL) - the holding company whose primary subsidiary is United Airlines - today reported record second quarter net earnings of $148.3 million or $6.81 per share of common stock, which compare to the previous record second quarter 1989 net earnings of $141.1 million or $6.52 per share.

UAL Corp.'s second quarter operating revenues were $2.74 billion versus second quarter 1989 revenues of $2.52 billion. Revenue passenger miles were up 8.0 percent while yield (passenger revenue per mile flown) was up 1.9 percent to 12.84 cents.

Second quarter operating expenses were $2.57 billion versus second quarter 1989 expenses of $2.29 billion. Second quarter operating earnings of $178.5 million compare to $221.6 million in second quarter 1989.

Included in nonoperating income is a gain of $77.3 million on the disposition of property, principally two B727 and seven DC8 aircraft, compared to similar gains of $5.0 million recorded in the second quarter of 1989.

UAL Corp. Chairman, President and Chief Executive Officer Stephen M. Wolf said, "The results we have announced today demonstrate that United is very much on target in executing the strategic plans we formulated two years ago. Yield and strong traffic increased second quarter operating revenues by 9.0 percent.

"While the cost of fuel moderated significantly since the first quarter, cost increases in other areas continue to exert pressure on earnings. As we keep a watchful eye on the economy and traffic going forward, we will continue to work diligently to moderate these increases throughout the company.

"In the second half of this year, we will be the fastest growing airline in the United States. We have added more departures this summer than any other airline and are currently averaging 1,966 departures per day, an all-time company high.

"In May, we began service to Europe with daily flights to Frankfurt from our Chicago and Washington, D.C. hubs and, in our second month of operation, recorded a load factor of 81 percent. Next week, on Aug. 1, we inaugurate daily service from Chicago to Paris.

"In the Pacific, where United is the largest carrier, year-to-date traffic has increased 33 percent over last year on less than a 25 percent increase in capacity, giving us a load factor of more than 74 percent. This is on top of six-month traffic growth of 22 percent in 1989 and 25 percent in 1988.

"We will continue to expand our Pacific operation aggressively as we build our mini-hubs in Seoul and Taipei. In September we will place into service our fifth and sixth B747-400s, which will fly a San Francisco-Seoul-Manila routing."

DEERFIELD, IL (JULY 26) PR NEWSWIRE - Baxter and Comdisco, Inc. (NYSE: CDO), today announced plans to work together to help hospitals manage and finance high-technology capital equipment.

Comdisco will join Baxter's ACCESS program to provide asset- management services to hospitals that participate in Baxter's Corporate Program, analyzing and recommending better ways to acquire, utilize, safeguard and dispose of expensive high-technology equipment. The ACCESS Program is one of the value-added services available to Baxter corporate customers through the company's exclusive Corporate Program agreements.

"U.S. hospitals spent more than $10 billion on capital equipment last year on everything from advanced diagnostic imaging machines to computer mainframes," said Kenneth N. Pontikes, chairman and president of Comdisco. "Our program with Baxter will help hospitals contain costs and make better use of expensive and critically important equipment."

Baxter and Comdisco, working through its subsidiary, Comdisco Disaster Recovery Services, also will consult with hospitals to assist in the recovery of medical and financial computer records that are lost in the event of fire, flood or electrical outage.

"Planning and acquisition of high-technology capital equipment is becoming more critical and complex, as hospitals strive to keep their competitive edge in the face of limited resources and diverse technologies," said Terry J. Mulligan, corporate vice president at Baxter. "We're delighted to add Comdisco to our roster of ACCESS associates, which also includes Spectrum (with IBM), Kraft Foodservice Group and Waste Management, Inc. These corporate alliances enable Baxter to help solve some of the most pressing financial, administrative and clinical problems faced by hospitals today: better management of information systems, capital equipment, medical wastes and food services."

Comdisco, Inc., based in Rosemont, Ill., with more than 5,000 customers and assets of $4.0 billion, is the world's largest independent lessor and remarketer of high-technology equipment and provider of disaster recovery services.

Baxter International Inc. (NYSE: BAX) is the leading international manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries. The company had 1989 revenues of $7.4 billion.

METHUEN, MASS. (JULY 26) PR NEWSWIRE - NSC Corporation (NASDAQ: NSCC), a leading asbestos abatement services company, today announced a 53 percent increase in earnings per share for the second quarter ended June 30, 1990. The company reported net income of $1,471,000 or $.26 per share compared to $993,000 or $.17 per share for the second quarter of 1989. Net revenues for the quarter increased 81 percent to $11,386,000 from $6,291,000 in the comparable 1989 period.

For the six months ended June 30, 1990, net revenues increased 60 percent to $20,015,000 from $12,534,000 in the comparable 1989 period. Net income for the first half of 1990 was $2,420,000 or $.42 per share, a 46 percent increase from the $1,656,000 or $.29 per share for the first six months of 1989.

The company attributed the significant growth in its business to

continuing increased demand for its services in the New England area and its successful penetration of the New York metropolitan market which it entered in 1989. Gross revenues from the New England area for the first half of 1990 increased 18 percent over the first half of 1989 while revenues in the New York metropolitan area increased 700 percent.

Strength in both of NSC's primary markets is reflected in its backlog which increased 144 percent to a total of $14,900,000 at June 30, 1990, compared to $6,100,000 as of June 30, 1989. Backlogs in the New England and New York metropolitan market areas increased 50 percent and 573 percent respectively, at June 30 1990, compared to June 30, 1989.

NSC Corporation is a subsidiary of OHM Corporation (NYSE: OHM), a leading environmental services firm. NSC Corporation completed an initial public offering of 1,725,000 shares of its common stock in June, 1990. The company provides its asbestos abatement services primariy to private sector clients at commercial, industrial and institutional properties located in the Northeastern United States.

#90207p9039 07/26/1990 ~PR Newswire

NEW YORK (JULY 26) PR NEWSWIRE - Imperial Chemical Industries PLC (NYSE: ICI) of London today reported income before extraordinary items of $360 million for the second quarter of 1990, compared with $512 million on the same quarter in 1989. Net income after extraordinary items was $186 million versus $512 million in the same period last year.

Income per ADR before extraordinary items was $2.04 on sales of $5.86 billion which compares with $2.98 per ADR on sales of $5.97 billion in the second quarter of 1989.

This brings net income before extraordinary items for the first six months of 1990 to $821 million, or $4.69 per ADR, on sales of $11.87 billion, which compares with $978 million, or $5.71 per ADR, on sales of $11.56 billion, in the comparative 1989 period.

Group sales in the first half of 1990 increased by three percent compared with the same period in 1989 with the benefits of exchange movements (four percent) and increases in local selling prices (one percent) being partially offset by the effect of divestments (negative two percent).

In the consumer and specialty products segment, operating income increased by $73 million to $619 million. Pharmaceuticals operating income improved substantially because of the strong growth of most major products.

The profit performance of paints, colors and specialty chemicals was also encouraging. Polyurethanes was less buoyant and adverse market conditions affected the performance of advanced materials and films.

In the industrial products segment, operating income fell from $793 million to $376 million. In early 1989, the petrochemicals and plastics and general chemicals businesses were very buoyant; in the first half of 1990 competitive pressures eroded selling prices while costs continued to rise.

In the agriculture segment, operating income reduced by $17 million to $263 million because the fertilizer business continued to suffer from intense competitive pressures arising from excess capacity throughout the industry.

Income before tax of $55 million in the second quarter of 1990 was $285 million below the corresponding period in 1989. Operating income was sharply lower in the industrial products segment, largely due to reduced margins on many bulk products and also because of non-recurring gains in 1989.

Operating income was also lower in the agriculture segment because of excess capacity in fertilizers, and weather conditions which were unfavorable for agrochemicals in the latter part of the season.

ICI is today announcing a major step to reorganize its business portfolio in Europe by agreeing in principle to sell its U.K. fertilizer business. This has been reflected in the 1990 half-year results by an extraordinary item amounting to $174 million net of tax relief representing provisions for losses on the disposal of the U.K. fertilizer business and related closures.

CONTACT: Vincent Leheny of ICI, (212) 644-9274.

#90207p9048 07/26/1990 ~PR Newswire

ATLANTA (JULY 26) PR NEWSWIRE - Intermet Corp. (NASDAQ: INMT) today announced second quarter sales of $102.8 million, down 3 percent from the record second quarter of 1989.

Net income for the period slowed to $0.64 million ($0.03 per share), compared to $5.38 million ($0.25 per share) achieved in the same period of the prior year. Both sales and net income improved over results in the first quarter of 1990.

The drop in net income from levels of a year ago primarily reflected large startup costs at the company's 60 percent-owned INTAT Precision Inc., a joint venture in Rushville, Ind., which produces precision iron castings for the U.S. plants of Japan-based automakers and parts suppliers.

"Our wholly owned domestic plants, which account for more than 70 percent of our consolidated sales, registered a 10 percent gain in net profit -- setting a new record for those units, even though their sales were down 5 percent because of reduced demand from domestic automotive customers," George W. Mathews Jr., chairman and chief executive, explained. "However that strong performance was overwhelmed by the startup losses that we

continued to experience throughout the quarter at our INTAT joint venture."

Mathews said that the INTAT plant began to see definite gains in technical areas, such as scrap and machine uptime, late in the quarter and that some improvement in the loss picture there should appear in August as shipment levels expand.

For the first six months of 1990, net sales were down 7 percent from the same period of 1989 to $202.1 million, while net income fell to $0.98 million ($0.05 per share) compared to $10.9 million ($0.51 per share) in the same period a year earlier.

The results are unaudited and subject to adjustment. The Intermet board of directors today declared its regular quarterly dividend of $.05 per share payable Aug. 23 to shareholders of record Aug. 9.

Atlanta-based Intermet Corp. and its subsidiaries, with foundries in six states and three foreign countries, manufacture precision iron parts for automotive and industrial customers in North America, Europe and Asia. Intermet is the world's leading independent manufacturer of iron castings.

#90207p9050 07/26/1990 ~PR Newswire

ATLANTA (JULY 26) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) today reported net income for fiscal year 1990, which ended June 30, totaled $302,783,000 ($5.79 per share primary and $5.28 per share fully diluted).

Net income for the June 1990 quarter was $74,093,000 ($1.47 per share primary and $1.33 fully diluted). Net income for fiscal 1989 was $460,918,000 ($9.37 per share), and for the June 1989 quarter net income was $190,779,000 ($3.87 per share).

Delta Senior Vice President - Finance and Chief Financial Officer Thomas J. Roeck Jr., in reporting fiscal 1990 and June quarter 1990 results at the airline's regular board meeting in Atlanta, said, "The decline in net income from last year largely reflects increased fare competition, higher aircraft fuel prices, and the fact that 1989 results were inflated by a strike against a major competitor." The numerous deep discount fare programs introduced by some airlines and matched by Delta throughout the year held the airline's yield growth to less than 1 percent, while aircraft fuel price increases late in the December quarter of fiscal 1990 resulted in an 18 percent rise in the average price of fuel for the year.

Roeck told the board the June 1990 quarter results were particularly

impacted by the unexpected widespread availability of deep discount fares throughout the industry. Delta's average passenger mile yield was down one percent from the June 1989 quarter, while the company's success in its ongoing efforts to achieve greater productivity and lower costs was reflected in a one percent decline in the cost per available seat mile. Roeck said, "The June 1989 quarter was the most positively affected by the strike against a major competitor; therefore, it was difficult for us to match the record net income of that quarter."

Income from operations for fiscal 1990 was $419.5 million compared to $678.3 million last year. Operating revenues totaled $8.582 billion, 6 percent above the $8.089 billion earned in fiscal 1989. Passenger revenues grew 6 percent to $8.042 billion as revenue passenger miles increased 6 percent to 58.99 billion, and the average passenger mile yield increased less than 1 percent to 13.63 cents. Cargo revenues totaled $416.2 million, 6 percent more than in fiscal 1989, aided by a 6 percent growth in cargo ton miles.

Operating expenses for fiscal 1990 totaled $8.163 billion, up 10 percent from the $7.411 billion reported in the previous year. Operating capacity increased 6 percent to 96.46 billion available seat miles while aircraft miles grew 7 percent. Salaries and related expenses were 10 percent above last year as the average level of employment grew 6 percent. Aircraft fuel expense increased 25 percent due to an 18 percent increase in the average cost per gallon and a 6 percent increase in fuel gallons consumed. Other cash expenses grew 5 percent. Depreciation and amortization expense was up 17 percent over fiscal 1989, largely the result of the increased number of owned aircraft. For the fiscal year, the average cost per seat mile was 8.46 cents compared to 8.17 cents in fiscal 1989.

For the quarter ended June 30, 1990, operating income was $110.3 million, a decrease of 61 percent from the $284.2 million earned in the June 1989 quarter. Operating revenues totaled $2.240 billion, 3 percent below last year. Passenger revenues decreased 3 percent to $2.103 billion as a result of a 3 percent decrease in revenue passenger miles and a 1 percent decrease in the average yield per passenger mile. Cargo revenues were up 2 percent to $104.9 million, and other revenues decreased 6 percent to $32.2 million.

Total operating expenses in the current quarter grew 5 percent to $2.130 billion as operating capacity was increased 6 percent to 24.54 billion available seat miles. The average cost per seat mile was 8.68 cents, compared to 8.79 cents last year.

Salaries and related expenses grew 6 percent to $905.2 million. Aircraft fuel expense rose 7 percent over last year to $294.8 million as the average price per gallon grew 2 percent to 59.07 cents, and gallons consumed increased 5 percent to 499.0 million. All other cash costs

increased 2 percent to $810.3 million.

Depreciation and amortization expense increased 14 percent to $119.4 million, reflecting the addition of 25 owned aircraft over the 1989 quarter.

During the quarter, Delta repurchased 2,004,800 shares of common stock for $152.4 million, bringing the total number of shares repurchased to 8,260,462 at a total cost of $591.2 million. Average shares used to compute primary earnings for the quarter were 47,199,559, and average shares used to compute fully diluted earnings were 53,156,508.

The board of directors declared the regular cash dividend of 30 cents per share payable Sept. 1, 1990, to stockholders of record on Aug. 8, 1990.

The board of directors also set the date for the annual meeting of the stockholders for Oct. 25, 1990, at the Monroe Civic Center in Monroe, La. The company's bylaws generally require stockholders who intend to nominate persons for election to the board of directors or to introduce other business at the annual meeting to give certain written notice to the company not less than 55 days nor more than 75 days prior to the annual meeting.

#90207p9057 07/26/1990 ~PR Newswire

OAK BROOK, IL (JULY 26) PR NEWSWIRE - The Interlake Corp. (NYSE: IK) today reported that operating income from continuing operations rose 21 percent to $21.5 million for the second quarter ended July 1, compared to last year's second quarter. Excluding the results of non-core businesses held for sale (classified as unusual items of expense), operating income rose 27 percent. Second-quarter sales from continuing operations were $204.3 million, down 2 percent from a year ago.

Frederick C. Langenberg, chairman and CEO, said Interlake continues to generate strong results from its core businesses. "Operating income is more than sufficient to cover interest expenses stemming from last year's recapitalization," he said. "Current performance reflects our continuing efforts to reduce cost of goods sold, selling and administrative expenses and working capital."

Second-quarter 1990 earnings were negatively affected by higher non-operating expense, principally increased losses anticipated on the disposal of certain small, non-core businesses. In addition, a loss was incurred on the sale of Arwood's investment casting business, sold May 18 to a subsidiary of Wyman-Gordon Co. Combined with operating losses from

Arwood (classified as loss from discontinued operations), these results produced a second-quarter net loss of $8.5 million, or $.80 per share, compared to net income of $9.9 million, or $.98 per share, for the year-ago period.

For the first six months of 1990, operating income rose 3 percent to $34.7 million, compared to the same period in 1989. Excluding the results of non-core businesses held for sale, operating income rose 22 percent. Sales from continuing operations were $402.9 million, compared to $418.4 million for the year-earlier period. Over 90 percent of the sales decline was related to designated businesses held for sale. Net income, which was negatively affected by non-operating expenses and losses from discontinued operations, showed a loss of $10.8 million, or $1.02 per share, compared to net income of $18.1 million, or $1.79 per share, a year ago.

The following discussion of business segment results excludes results of non-core businesses held for sale.

The Interlake Corp. is a diversified multinational company operating in two business areas -- engineered materials, including aerospace components and handling/packaging systems.

CHICAGO (JULY 26) PR NEWSWIRE - Continental Bank Corporation (NYSE: CBK) today announced that it plans to file a shelf registration statement shortly with the Securities and Exchange Commission (SEC). The filing was requested by the Federal Deposit Insurance Corporation (FDIC) to facilitate the regulatory agency's exit from its remaining 26 percent equity interest in the bank holding company.

Successful disposal of the FDIC's remaining interest would terminate the restructuring agreement reached between Continental and the regulatory agency in 1984. All proceeds resulting from the disposal of its

remaining interest in Continental would go to the FDIC.

"This is a milestone with both financial and psychological significance for us," said Continental Chairman Thomas C. Theobald. "Many people have worked long and hard to get us back to this point."

Continental Bank Corporation is a market-driven bank holding company devoted to serving corporations, institutional investors and individuals with complex financial requirements. Through its subsidiaries, the corporation arranges financing, makes markets, manages financial risk and processes cash and securities on behalf of its customers in key capital markets worldwide.

The FDIC acquired its Continental stock ownership as part of its 1984 assistance agreement. In recent years, the FDIC has sold nearly 36 million shares of Continental common stock for about $788 million in three public offerings and in a sale to the Continental Employees Stock Ownership Plan. In addition, the FDIC sold its 12.8 million shares of Class A preferred stock to Continental for $273 million.

Any offering will be made by means of the prospectus in the registration.

COLUMBUS, OH (JULY 26) PR NEWSWIRE - David H. Crabtree, marketing and customer services director of Columbus Southern Power Company, today was named executive assistant to the vice president of marketing and customer services at the American Electric Power (NYSE: AEP) Service Corporation here. The move will be effective Aug. 1.

W.S. White, Jr., chairman and chief executive officer of AEP and Columbus Southern, said Crabtree also will be nominated for election to vice president of marketing and customer services at the Service Corporation's December board meeting, with an effective date of Jan. 1, 1991.

"These moves are being announced now," White said, "to effect an orderly transition in connection with the regular retirement at the end of this year of Paul C. Greiner, current vice president of marketing and customer services."

Crabtree is an engineering graduate of Virginia Polytechnic Institute and State University, Blacksburg, Va., where he also earned a master's degree in business administration. He attended the AEP Management Development Program at The Ohio State University in 1982 and the Sloan Senior

Executive Program at the Massachusetts Institute of Technolgy in 1988.

A 22-year AEP Sytem veteran, Crabtree began his career as an agriculture sales engineer in Pulaski, Va., with Appalachian Power Company. While most of his experience has been in marketing and customer services, he also has served in the human resources and environmental areas. He came to Columbus in May of 1988 as marketing and customer services director from Ft. Wayne, Ind., where he had been head of Indiana Michigan Power Company's marketing and customer services function since 1985.

He and his wife, Evelyn, reside at 5806 MacDermott Court, Dublin, Ohio.

WARREN, MI (JULY 26) PR NEWSWIRE - The CDI Transportation Group has formed a new unit to acquire selected assets of Premier Engineering Co., Inc., hire most of its former technical personnel and assume substantially all of Premier Engineering's client contracts.

According to Ralph L. Miller, president of the CDI Transportation Group, the addition to CDI's ranks of Premier's former technical personnel, who have special expertise in the areas of automotive electrical and engine design, will enhance CDI's ability to provide a full range of automotive engineering services.

The CDI Transportation Group offers concept-to-production engineering services to the worldwide transportation industry. These services are offered to clients either individually or in the form of integrated engineering.

Based in Warren, the CDI Transportation Group employs more than 5,000 specialists at 38 locations across Southeastern Michigan. The largest independent, full-service automotive engineering services operation in the world, the CDI Transportation Group is a subsidiary of CDI Corp. of Philadelphia (NYSE: CDI).

COLUMBUS, OH (JULY 26) PR NEWSWIRE - Leonard V. Assante, assistant treasurer of the American Electric Power Service Corporation has been elected treasurer, effective Aug. 1. The election took place during the corporation's board meeting held July 26.

Assante began his career with the Service Corporation in 1971 as an administrative assistant to the treasurer. He was promoted to senior tax accountant in 1973, senior tax accountant - special projects in 1974, supervisor - tax in 1976 and director of taxes in 1979. He was promoted to director - treasury staff in 1983.

Assante also is an assistant treasurer of the American Electric Power Company, Inc. (NYSE: AEP), the parent company of the Service Corporation, as well as the AEP System's operating companies and coal companies.

Prior to joining AEP, he was employed by the independent public accounting firm of Arthur Andersen & Co. from 1967-1971.

Assante holds a bachelor's degree in accounting from Pace University where he graduated magna cum laude. He also completed AEP's Management Development Program at the University of Michigan in 1977. He is a certified public accountant and a member of the American Institute of Certified Public Accountants.

DALLAS (JULY 26) PR NEWSWIRE - Retirement Living Communities, L.P. (RLC) announced today that it is extending until midnight, EDT, Aug. 15, its cash offer of $8 per beneficial unit certificate (BUC) evidencing ownership in Retirement Living Tax-Exempt Mortgage Fund Limited Partnership.

The tender offer and withdrawal rights, first announced on June 26, were due to expire at midnight, EDT, on July 25. As of 5 p.m. on July 25, RLC had received tenders (including those to be made pursuant to notices of guaranteed delivery) of approximately 407,879 BUCs, and has also been advised of intentions to tender with respect to approximately 108,400 BUCs for an aggregate of 516,279 BUCs (approximately 41 percent of the 1,264,000 outstanding BUCs).

The offer is part of RLC's previously announced plan to acquire at least a majority and no more than 60 percent of the outstanding BUCs which would better equip RLC to proceed with a work-out plan on the defaulted loans owned by the partnership.

RLC's work-out plan involves operating the partnership as a going concern and negotiating with project owners and guarantors regarding the defaulted mortgage loans and guarantees.

In the event RLC is not successful in acquiring at least a majority of the BUCs outstanding, executing the plan would require a lengthy solicitation of BUC holders to amend the partnership agreement and RLC would likely seek voluntary loans from BUC holders to provide operating capital and fund legal fees for the first year of the plan.

The amendment would require the affirmative vote of the holders of a majority of the outstanding BUCs, including those beneficially held through banks and brokerage firms. Seeking the amendment and the funds would be a lengthy process and there is no assurance as to the outcome.

Failure to obtain either the amendment or the funds could result in the partnership not being able to take any action with respect to recovery on the mortgage loans except for accepting any payments voluntarily made by the borrowers.

Service Data Corporation is acting as depositary in connection with the offer. Any questions or requests for assistance should be directed to the information agent for the offer, Georgeson & Company Inc., Wall Street Plaza, New York, N.Y., 10005, at the following toll-free number: 1-800-223-2064.

CONTACT: Carol Erick of Retirement Living Communities, (214) 770-5600, or Brian Maddox of Georgeson & Company, (212) 440-9862, for Retirement Living Communities.

#90207p9074 07/26/1990 ~PR Newswire

DENVER (JULY 26) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) today

reported earnings for the second quarter of $25.4 million, or 54 cents per share, on revenues of $465.3 million, compared with the second quarter 1989 earnings of $61.7 million, or $1.48 per share, on revenues of $453.5 million. A pre-tax $27.5 million write-down of the Company's investment in the Kanawha coal mine in West Virginia had a major impact on second quarter earnings, with an after-tax effect of 51 cents on primary earnings per share.

In the first six months of 1990 Cyprus earnings, after the write- off, were $55.5 million, or $1.17 per share, on revenues of $894.8 million. For the first six months of 1989, Cyprus earned $142.7 million, or $3.44 per share, on revenues of $889.3 million.

Segment income -- earnings before exploration expense, corporate overhead, equity and other, and income taxes -- for Cyprus' operations is as follows:

Copper/Molybdenum/Gold earned $61.6 million in the second quarter, a decrease of $27.2 million from the second quarter of 1989. Copper realizations averaged $1.20 per pound during the quarter, 3 cents per pound lower than the second quarter of 1989. Lower sales of produced copper and lower copper realizations accounted for approximately $11 million of the decrease in earnings.

Second quarter copper sales were 204 million pounds compared with 206 million pounds in the second quarter of 1989. Included in second quarter total sales for 1990 were 49 million pounds of purchased copper, including scrap for Warrenton and refined copper required to meet customer commitments. Second quarter sales in 1989 included 35 million pounds of purchased copper.

Increased copper costs accounted for $16 million of the decrease in earnings. Cyprus' average full mine production cost for copper, including freight and depreciation, averaged 75 cents a pound during the quarter, compared with 65 cents a pound during the same period in 1989.

Higher costs resulted from lower by-product molybdenum recoveries and production at Sierrita/Twin Buttes; however, progress was made in improving copper recoveries in the second quarter. Miami's second quarter 1990 costs were higher than 1989 because of higher strip ratios, lower grade, and higher power costs.

Cyprus' molybdenum operations experienced higher costs and lower realizations during the second quarter of 1990 compared with the second quarter of 1989. Costs were higher, due to lower grade and higher stripping costs at the Tonopah mine in Nevada, but showed improvement compared with the first quarter of 1990.

In the second quarter 1990, gold operations earned $7.5 million, $13

million better than the 1989 quarter, which included a $4.1 million write-off of Copperstone underground development expenditures. Record production of 40,800 ounces and lower unit costs, accounted for the increase in gold earnings. Realizations were essentially the same for the second quarter of 1990 and 1989 at $378 an ounce, as forward sales at higher prices partially offset the decline in gold market prices in the second quarter of 1990. For the second half of 1990, Cyprus has sold forward approximately 22,000 ounces of gold at an average price of $440 an ounce.

For the first six months of 1990, Copper/Molybdenum/Gold earnings of $100.3 million were $97.4 million below 1989 earnings primarily due to lower copper and molybdenum realizations and higher costs.

During the second quarter of 1990 the board of directors approved development of the Golden Cross gold property located in New Zealand. Upon completion in late 1991, the Golden Cross property is expected to produce 85,000 ounces of gold annually for Cyprus' account for seven years.

Lithium/Talc earned $5.9 million in the second quarter, compared with earnings of $7.5 million in the 1989 second quarter. Demand remained strong for lithium products during the first half of 1990 and is expected to continue to be strong for the remainder of the year. During the quarter earnings were reduced by a $1.5 million provision for environmental liabilities. Lithium earned $4.9 million in the 1990 second quarter, while Talc contributed $1 million.

For the first half of 1990, Lithium/Talc earned $11.4 million compared with $18.2 million in 1989, which included a pre-tax gain of $6.7 million from the sale of clay operations.

Coal/Iron Ore lost $18.7 million in the second quarter, compared with a loss of $3 million in the 1989 second quarter. The loss in 1990 included a $27.5 million write-down of the Company's investment in the Kanawha mine in West Virginia. Excluding the write-down, coal operating profit was $8.7 million in the second quarter of 1990 versus the $3 million loss in 1989, which included a $2.1 million change reflecting a price adjustment on a long-term coal contract. The improvement is primarily due to the new longwall equipment and a short-term sales contract at the Twentymile mine in Colorado, as well as continued cost savings resulting from the consolidation of Kentucky operations.

Cyprus wrote down the Kanawha property because of lower than expected reserves in the initial mountain top mining area, higher than anticipated reclamation costs for previously mined areas, and the disappointing performance of highwall mining machines. Cyprus may expense further development costs of approximately $7 million during the second half of 1990.

The second quarter of 1990 marked the first quarter of commercial operations for Cyprus' iron ore operation. Iron ore earnings were $0.1 million for the quarter. Cyprus Northshore sold 354,000 tons of iron ore pellets and became profitable in June 1990. The Northshore operation was purchased in 1989 and continued under development during the first quarter of 1990.

In the first six months, Coal/Iron Ore lost $10.6 million, compared with a loss of $0.5 million in 1989.

Corporate expenses were $6.6 million during the quarter, essentially the same as 1989.

Equity and Other includes interest expense, net of interest income, results of equity investments, minority interests, and exploration expenses. The increase in expenses of $4.8 million over second quarter 1989 was primarily for higher net interest expense associated with the successful completion of an offering of $150 million of notes in April 1990. This debt was incurred to finance the stock repurchase plan and provide funds for general corporate purposes including capital expenditures. To date about half of the 4.2 million share repurchase program has been accomplished.

Cyprus Minerals, headquartered in Englewood, Colo., is a major producer of copper, molybdenum, lithium, and talc. Cyprus is also one of the 20 top coal producers in the United States and an emerging producer of zinc, iron ore, and gold.

MINNEAPOLIS (JULY 26) PR NEWSWIRE - Cray Research, Inc. (CRI) (NYSE: CYR) today announced it has sold two computer systems worth about $45 million to two new U.S. government customers.

The two units, CRAY Y-MP8 systems, will be acquired by the Naval Oceanography Command and Eglin Air Force Base and are valued at approximately $27 million and $18 million, respectively.

The Navy order was placed by Grumman Data Systems, under prime contract with the Naval Oceanography Command in Bay St. Louis, Miss., for a CRAY Y-MP8/8 computer system valued at approximately $27 million.

The Navy system, to be installed in the fourth quarter of 1990, will be used with the development and operational use of global oceanographic and

meteorological models. The system will run UNICOS, the Cray Research operating system based on AT&T's UNIX system V, an industry standard.

For the U.S. Air Force, Cray said that Advanced Integrated Technology, under prime contract with Eglin Air Force Base in Fort Walton, Fla., has ordered a CRAY Y-MP8/2 computer system with 128 million words of memory valued at approximately $18 million.

The Air Force system will be installed in the third quarter of 1990 and will be used for computational fluid dynamics and structural analysis research.

Cray Research chairman and chief executive officer, John Rollwagen, said, "We are extremely pleased to add such important facilities to the growing list of Cray Research systems users around the world. We now have seven installations at five U.S. Air Force sites and four installations at four U.S. Navy locations."

Cray Research, Inc., designs, manufactures, markets, and supports large-scale, high-speed computer systems for scientific and engineering applications.

PURCHASE, NY (JULY 26) PR NEWSWIRE - The board of directors of PepsiCo, Inc. (NYSE: PEP) today approved a three-for-one split of PepsiCo's Capital Stock for shareholders of record at the close of business Aug. 10, 1990. This action also increases the number of authorized shares from 600 million to 1.8 billion.

"This stock split reflects the dramatic increase in the price of PepsiCo stock in recent years, as well as our Board's confidence in PepsiCo's outstanding growth prospects for the future, " said Wayne Calloway, chairman of the board and chief executive officer. "The price of PepsiCo stock has doubled since the beginning of 1989, and it's up nearly 25 percent this year alone."

Over the past five years, shareholders have earned a total return on PepsiCo stock of 37.8% compounded per year, based on stock price appreciation and reinvested dividends. That is the highest return of any Fortune 50 corporation during the 1984-89 period.

Calloway continued: "PepsiCo shareholders clearly have benefited from the continuing strength of our operating performance in all three businesses, and I'm confident that our best years are still ahead. The stock split also signals our strong interest in individual shareholders -- the men and women who buy our products. We want to retain their loyalty as both owners and consumers."

The board also declared a quarterly dividend of 10 cents per share on a post-split basis. The dividend is payable Sept. 30, 1990 to shareholders of record on Sept. 14, 1990. PepsiCo's dividend is at an annual rate of 40 cents per share after the split.

Existing PepsiCo stock certificates remain valid and outstanding. Certificates representing the additional shares of capital stock to which shareholders of record are entitled as a result of the split will be mailed to them Sept. 4, 1990. Each share will have the same voting rights, qualifications, limitations and restrictions as PepsiCo's presently outstanding capital stock. Shareholder approval of the stock split is not required under the laws of North Carolina, where PepsiCo is incorporated.

PepsiCo stock previously was split three-for-one in May 1986, three-for-one in May 1977 and two-for-one in June 1967. A $1,000 investment in PepsiCo stock made when the company was established in 1965 today would be worth, with reinvested dividends, about $39,000.

#90207p9080 07/26/1990 ~PR Newswire

TUSTIN, CA (JULY 26) PR NEWSWIRE - MAI Basic Four, Inc. (NYSE: MBF) today reported improved results for its three and nine months ended June 30, 1990 as compared to the comparable periods in 1989.

Third Quarter Results Revenue for the quarter ended June 30, 1990 rose 12.8 percent to $97.0 million from $86.0 million reported for the comparable quarter last year. Current quarter operating income was $4.6 million as compared to an operating loss of $45.8 million reported for the same period last year. A net loss of $.2 million was reported for the current quarter compared to a loss of $46.2 million reported during the third quarter of last year.

First Nine Months Results Revenue for the nine months ended June 30, 1990 declined 4.8 percent to $284.1 million from $298.4 million reported a year ago. Operating profit of $22.5 million during the current nine month period compared favorably with an operating loss of $21.0 million incurred during the first nine months of last year. Net income of $4.4 million was reported for the nine months ended June 30, 1990 as compared to a net loss of $38.4 million reported a year ago.

Management Comments Higher revenue for the quarter ended June 30, 1990 is primarily the result of the strong acceptance of the company's new Dual Universe GPx products. Additional factors contributing to this revenue growth included higher software product sales: additional revenues derived from the current quarter purchase of Computerized Lodging Systems, Inc. (CLS); and higher U.S. dollar values of European currencies.

The decline in revenue for the nine months ended June 30, 1990 reflects generally reduced demand for mid-range computer systems, especially in the United States, delayed buying decisions during the first half of the current year by customers awaiting the company's now- introduced GPx Series 70 systems and the divestitures of certain foreign operations in 1989.

Gross profit margins of 43.9 percent and 45.6 percent during the third quarter and first nine months of 1990, respectively, compared favorably with 36.1 percent and 43.2 percent reported during the same periods of last year. These increases resulted primarily from cost savings caused by the restructuring of customer service operations, lower product costs achieved through the out-sourcing of numerous hardware products and the negotiation of lower vendor prices on certain products and components, and lower inventory provisions.

Operating income for the quarter ended June 30, 1990 compared favorably with the same quarter a year ago, primarily as a result of higher current quarter revenue and gross profit margins coupled with third quarter of 1989 non-recurring charges of $39.2 million. Operating income for the first nine months of 1990 compared favorably with the same period a year ago, primarily because of the non-recurring charges mentioned above and a $5.5 million decline in operating expenses (excluding a $1.8 million gain recorded in the first quarter of 1989 from the sale of MBF subsidiaries in Norway and Sweden).

The current quarter net loss and the current nine month period net income compared favorably with the same periods a year ago due primarily to the factors affecting operations as discussed above. In addition, lower long-term debt balances and lower interest rates resulted in declines of $1.5 million and $3.2 million in net interest expense for the current quarter and nine months, respectively.

MAI Basic Four designs, assembles, markets and services a full line of mid-range business computers and information processing systems for multiuser applications throughout the world. The company's line of supermicro and superminicomputers and information system products is complemented by both its extensive software development capabilities and its worldwide maintenance organization. MAI Basic Four, with approximately 3,700 employees and a customer base of more than 45,000 shipped systems worldwide, markets its products in 36 countries.

#90207p9084 07/26/1990 ~PR Newswire

DEERFIELD, IL (JULY 26) PR NEWSWIRE - Premark International, Inc. (NYSE: PMI) reported today that second-quarter 1990 net income declined 71 percent to $6.8 million, or 22 cents per share, from $23.7 million, or 68 cents per share, in the prior year period. Sales increased nearly 5 percent to $668 million.

Included in second-quarter results is a previously announced $25.3 million pretax charge associated with manufacturing restructuring and organizational changes at the company's Tupperware operation. Excluding that charge, net income would have been $22.7 million, or 72 cents per share. The increase in earnings per share before the charge was due to the impact of the recently completed share repurchase program.

Segment profit declined as lower results at Tupperware and the food equipment group more than offset a good increase in profit in the consumer and decorative products segment. All business segments reported higher sales.

Tupperware sales were up slightly primarily because of a significant increase in European operations, but segment profit was down because of the charge, substantially lower sales volume in the United States, and higher manufacturing costs in Europe.

Food equipment group sales increased modestly due to favorable foreign exchange rates in Europe and improvement in the U.S. business. However,

segment profit for the food equipment group was down because of a sharp decline in results for the Canadian business due to soft market conditions and lower margins in Europe.

In the consumer and decorative products segment, profit was up due to the addition of Sikes Corp., which was acquired in June. In addition, a significant increase in sales and segment profit at Precor and lower legal expenses at Ralph Wilson Plastics offset declines in profit at West Bend and Tibbals.

"While we expect new products to help strengthen momentum at Tupperware's domestic business and are encouraged by the improvement in the food equipment group's U.S. business, we continue to be cautious in our expectations for the year," said Warren L. Batts, chairman and chief executive officer.

"Profits at the international operations of the food equipment group and Tupperware are not keeping pace with sales gains, and Tupperware's domestic business continues to face difficult challenges. In addition, domestic market conditions for commercial food equipment and the consumer and decorative products businesses are expected to remain soft. However, our long-term improvement programs are on track, and we expect to achieve much better results as our markets improve, especially in the United States."

For the first six months of 1990, Premark reported net income of $20 million, or 61 cents per share, compared with $46.1 million or $1.32 per share in 1989. Excluding the $25.3 million pretax charge, net income would have declined 22 percent to $35.9 million, or $1.09 per share, due to lower profit at Tupperware and the food equipment group. Sales for the first half were $1.3 billion, a 4 percent increase from the first six months last year.

Premark International, Inc. is a $2.6 billion multinational company that markets premium products under leading brand names such as Tupperware, West Bend, Wilsonart, Hobart, Vulcan, Hartco, Florida Tile and Precor. Premark stock is listed on the New York, Pacific and London Stock Exchanges.

#90207p9088 07/26/1990 ~PR Newswire

CLEVELAND (JULY 26) PR NEWSWIRE - The Hickok Electrical Instrument Company today reported gains in sales and earnings for the fiscal third quarter ended June 30.

The Cleveland-based manufacturer of electronic instrumentation and measuring devices said net income for the quarter amounted to $106,399, or 17 cents per share, up 17 percent from the $91,229, or 15 cents per share, of a year earlier. Sales were $2,480,230, 17 percent above the $2,122,641 of a year ago.

For the nine months this year, net income was $410,953, or 67 cents per share. In the like period last year, net income amounted to $415,400, or 68 cents per share, and included an extraordinary credit of $118,600, or 19 cents per share, from tax loss carryforwards. Current year nine-month sales were $7,051,192, an increase of 14 percent over the $6,180,805 of a year earlier.

The company said that year-to-date sales gains reflected demand for automotive diagnostic test equipment and aircraft cockpit instrumentation. Order backlog as of June 30 amounted to $3,231,000 and current order input was strong. The company noted, however, that backlog figures as well as sales and earnings can vary significantly from quarter to quarter because of the timing of customer release dates.

Hickok reported a strong financial position with current assets of $4,641,505 more than five times current liabilities. Working capital as of June 30 amounted to $3,750,199.

Fiscal 1989 figures reflect restatements as a consequence of the sale of Hickok Technical Institute which was treated as a discontinued operation.

SOUTHFIELD, MI. (JULY 26) PR NEWSWIRE - The H.W. Kaufman Financial Group (NASDAQ: HWKF) announced today that it has entered into a Purchase Agreement for the acquisition of a regional wholesaler and broker of insurance products and services.

In making the announcement, Herbert W. Kaufman, chairman and chief executive officer, did not divulge the name of the company to be acquired, saying "We are still negotiating specific terms of the acquisition, and revelation of the acquisition candidate at this time could interrupt that process. However, subject to due diligence proceedings and approval from our board, we are hopeful that the acquisition can be completed in early October."

Mr. Kaufman went on to say that, if completed as expected, the acquisition will result in the addition of more than $10 million in annual premium volume and over $1.5 million in commission and fee revenues for the H.W. Kaufman Financial Group.

Terms of the Purchase Agreement call for due diligence audits to begin immediately and on which a final purchase price will be determined.

"This is a significant development for us, and we are quite optimistic

that the acquisition will be completed as planned," Mr. Kaufman said. "The acquisition candidate covers five states and markets where we do not currently operate, has a very similar business philosophy to our own, and has a demonstrated track record in serving both agents and underwriters throughout its service area. In short, it is an excellent fit with our organization, and will significantly bolster our presence throughout the U.S."

The H.W. Kaufman Financial Group is a general agent and broker of specialty insurance products and services provided through 22 Burns & Wilcox offices, four Service General offices and two Royal Premium Budget, Inc. offices. Its common shares are traded on NASDAQ under the symbol HWKF.

#90207p9090 07/26/1990 ~PR Newswire

KING OF PRUSSIA, PA (JULY 26) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMC), a leading provider of wireless digital radio telephone systems, today reported second quarter 1990 unaudited consolidated revenues of $3.3 million compared to $694,705 for the same period in 1989.

For the first six months of 1990, revenues were $6.4 million vs. revenues of $1.2 million for the same period in 1989. The predominant revenue in 1989 and 1990 came from the sales of Ultraphone which grew more than 800 percent during this same period. Other revenue in 1990 came from IMM's ongoing developmental work in digital cellular. IMM's losses declined sharply as a result of tight control over expenses. In the second quarter of 1990, IMM lost $2.7 million or 18 cents loss per share compared to a loss of $4.8 million or 42 cents loss per share for the same period of 1989. In the first six months of 1990 IMM lost a total of $5.9 million vs. $9 million in the first six months of 1989.

In commenting about the second quarter results, Richard Pryor, IMM's chief operating officer, noted, "Sales of Ultraphone systems are increasing significantly as more of the Regional Bell Operating Companies, major independent telcos and international PTTs have begun to recognize that the Ultraphone system is a viable, dependable and cost- effective alternative to wire-based telephone systems. In Mexico, for example, Ultraphone is gaining widespread acceptance with Telmex, the country's national telephone company."

Pryor stated furthermore, "With the continued growth in Ultraphone sales

coupled with our ongoing program to control expenses, IMM expects to break even within the near future."

In the area of digital cellular development, he concluded that after a decade of research and successful field testing, IMM's core technology is a significant asset.

"The patents we have obtained, the standards we have helped define and adopt, the markets we have penetrated and the promising markets we have yet to penetrate all represent an investment in the future; the accumulation of IMM's intellectual capital that is now paying off."

IMM is a world leader in wireless digital access technologies.

DALLAS (JULY 26) PR NEWSWIRE - Sun Energy Partners, L.P. (NYSE: SLP), today announced a net loss of $6 million, or $.02 per unit, for the quarter ended June 30, 1990, compared with net income of $26 million, or $.07 per unit, for the second quarter of 1989. Revenues were $264 million for the 1990 second quarter versus $301 million for the second quarter in 1989.

Primary reasons for the lower earnings were lower oil prices and lower volumes for both oil and natural gas.

For the six months ended June 30, 1990, net income was $51 million, or $.13 per unit, compared with a net loss of $144 million, or $.40 per unit, for the first six months of 1989. The net loss in 1989 included a $199 million cumulative charge for a change in accounting method. Revenues were $600 million for the first six months of 1990 compared with $604 million for the same period in 1989.

The partnership also announced a cash distribution of $.22 per unit for the third quarter to be paid Sept. 10 to unitholders of record on Aug. 17.

Sun Energy Partners, L.P., whose managing general partner is Oryx energy Company, is traded on the New York Stock Exchange.

WHITE PLAINS, N.Y. (JULY 26) PR NEWSWIRE - IBM today announced it is donating $6 million of industrial equipment to 74 U.S. colleges and universities to support the schools' computer integrated manufacturing (CIM) training programs. CIM is the process by which manufacturers link their departments -- from design and engineering to production, business planning, marketing and distribution -- using information systems technology.

Each of these schools is a partner in IBM's CIM in Higher Education Alliance, a nationwide consortium dedicated to providing CIM training for students and manufacturers in the schools' local communities. Each school will receive up to three IBM Model 7552 Industrial Computers which are based on the IBM Personal System/2(see note) and are designed to meet the demanding requirements of the plant floor such as extreme temperatures power disruptions, shock and vibration. The computers will be used by the schools in their CIM laboratories to teach and demonstrate plant floor operations.

"It is vital for today's students to have access to the latest in plant floor technology," said John Klein, Manufacturing Systems Products laboratory director responsible for plant automation systems in IBM's Industrial Sector Division. "The combination of student training and continuing education to employees of local industry provides one of the best opportunities for American manufacturing to regain a competitive edge " he said.

The Industrial Computer Model 7552 can serve a variety of purposes on the plant floor, including personal workstation for processing information, a communications link, or as a controller for other plant floor devices.

IBM will ship the computers to the Alliance member schools during the next 90 days.

#90207p9095 07/26/1990 ~PR Newswire

NEW YORK (JULY 26) PR NEWSWIRE - SmartCard International Inc. (OTC: SMRT) today announced its financial results for the quarter and six months ended June 30, 1990.

Operating revenues for the quarters ended June 30, 1990 and 1989, were $7,950 and $33,185, respectively. The revenues for the 1990 quarter primarily reflect revenues from sales of smart cards and other read/write device products.

The company's net loss of $420,748 for the quarter ended June 30, 1990, was significantly greater than the 1989 quarter of $213,285 due to costs incurred in connection with the company's contract for the development of a transaction terminal that accepts both smart cards and magnetic stripe cards. The company expects to begin shipments of the terminals (under its previously announced contract with Bull HN Information Systems, Inc.) late in the third quarter. The value of the contract is approximately $500,000.

Cash and cash equivalents at June 30, 1990, were $111,022, as compared with $995,577 at Dec. 31, 1989. This decrease reflects the expenditure of funds to maintain the company's operations.

On July 25, 1990, the company received $600,000 in cash from Poly Ventures L.P., a venture capital firm, in exchange for 600 shares of the company's 9 percent Series A cumulative convertible preferred stock, which is convertible into 4.8 million shares of common. These funds will be used to provide working capital for the company's future operations, including additional development, production and marketing of its smart card systems and related hardware. The company is currently pursuing funding alternatives that may involve additional sales of equity in the near term.

SmartCard International is a development stage company which designs, manufactures and markets "smart card" systems. Smart cards are plastic cards having the approximate dimensions of a standard credit card, which are embedded with microchips, giving the card both logic and memory.

LISDEN, PORTUGAL (JULY 26) PR NEWSWIRE - Banco Comercial Portugues (BCP), Portugal's leading private commercial bank and the country's largest quoted company today announced financial results for the first six months of 1990.

BCP's turnover for the first half of 1990 reached Esc. 40.5 bn ($276 m(a)) up 91.3 percent from the same period last year, while pre-tax profit doubled to Esc. 8.2 bn ($56 m). Earnings per share, adjusted for a stock split which took place in March 1990, rose 36 percent from Esc. 91.5 in the first six months of 1989 to Esc. 124.4. Total assets increased from Esc. 376 bn to Esc. 648.5 bn in the 12 months ending June 1990.

Commenting on the remarkable performance of the bank, Jardim Goncalves, BCP's chairman, said that "financial accounts mirrored the bank's commitment to expand significantly the scope of its activities and reinforce its competitive edges, while maintaining a solid financial structure and adequate profitability."

In the first half of 1990, BCP has successfully increased its share capital from Esc. 30 bn to Esc. 66 bn, boosting its equity to nearly Esc. 117 bn ($800 m). BCP is currently one of Europe's top 100 banks in terms of own capitals and one of the 60 largest by market valuation. The bank

has recently announced the creation of an investment banking arm, which may be open to foreign participation, as part of its strategy of broadening financial services to its customer base.

The bank forecasts a net profit of Esc. 14 bn in 1990, with total assets nearing Esc. 800 bn. "The promotion of new initiatives with foreign institutions within the context of our internationalization process and the expansion into new segments of the Portuguese financial marketplace are our main priorities," emphasizes Jardim Goncalves.

DALLAS (JULY 26) PR NEWSWIRE - Associates Corporation of North America, part of the Financial Services Group of Ford Motor Company (NYSE: F), attained record earnings from its domestic operations for the six months ended June 30, 1990, Reece A. Overcash Jr., chairman, announced today.

Earnings before income taxes from domestic operations increased 17 percent to $252.5 million for the first six months of 1990 from $215.2 million for the same period a year ago. Net earnings for the period were $162.4 million compared with $161.7 million a year earlier. In 1989, earnings included foreign subsidiaries, which were acquired by other Ford subsidiaries at the time of the acquisition of The Associates by Ford in October 1989. Assets at June 30, 1990, for all domestic operations were $15.6 billion.

The Associates continues to manage finance and insurance affiliates in the United Kingdom, Japan, Canada and Puerto Rico on behalf of Ford. Results of these foreign operations are not included in those of The Associates for 1990. At June 30, 1990, the foreign operations had assets of $1.8 billion.

The company's domestic operations were led by increases in receivables in the consumer finance businesses of residential real estate-secured lending and credit card receivables. The commercial finance operation continued to benefit from growth in the financing and leasing of heavy-duty trucks and truck trailers. Revenue from the sale of credit-related insurance also grew significantly during the six-month period.

Revenue from domestic operation for the six months increased 20 percent to $1.3 billion compared with $1.1 billion in the prior-year period. Domestic gross finance receivables at June 30 were $15.2 billion compared with $12.1 billion last year, a 26 percent increase.

Domestic consumer finance gross receivables were $9.0 billion at June 30,

up about 50 percent from the $6.0 billion reported last year. Volume for this operation for the six months was $3.5 billion. The consumer operation includes installment and revolving credit loan products, credit card receivables and automobile club services.

Domestic commercial finance gross receivables totaled $6.2 billion at June 30 compared to $6.1 billion of a year ago. Commercial finance volume for the six months was $3.0 billion. Commercial receivables result from the financing and leasing of transportation, industrial and communications equipment.

Domestic revenue from insurance premiums was $105.7 million, up seven percent from $99.0 million for the same period last year. The insurance operating group is principally engaged in underwriting credit life, property, and accident and health insurance for customers of the finance operations.

Associates Corporation of North America and its affiliates provide consumer finance, specialized commercial finance and leasing, and insurance through a network of more than 1,000 offices in the United States, the United Kingdom, Japan, and Canada and Puerto Rico.

#90207p9117 07/26/1990 ~PR Newswire

NEW YORK (JULY 26) PR NEWSWIRE - Credit Suisse today issued the following release on results for the first half of 1990:

Interim balance sheet at June 30, 1990.

In the second quarter of 1990 the total assets of Credit Suisse rose by only 0.6 percent to Sfr 124.4 billion. This took balance sheet growth for the first half of the year to Sfr 6.8 billion or 5.7 percent, despite the dollar's loss of value and the decrease in the price of gold.

Lendings rose by 6.3 percent or Sfr 4.5 billion in the first quarter, only to fall in the second by 0.4 percent or Sfr 318 million, partly as a result of currency movement. Despite funding difficulties and a squeeze on margins, mortgage business continued to expand throughout the half-year period.

Customer deposits posted an increase of 3.5 percent or Sfr 2.7 billion, taking the total to Sfr 79.3 billion. Time deposits grew by 10.7 percent or Sfr 4.1 billion, whereas savings accounts shrank by 2.6 percent to Sfr 7.6 billion. Private and salary accounts fell 10.2 percent to Sfr 4.2 billion.

Credit Suisse increased its own securities portfolios by 6.5 percent to Sfr 8.6 billion.

Money due from other banks rose by 5.5 percent to Sfr 23.5 billion, while bills discounted and money market paper put on 10.5 percent to stand at Sfr 7.9 billion. Funds due to banks grew by 15.3 percent to Sfr 31.1 billion.

Profits were considerably higher in the second quarter than in the first. However, the improvement was still not enough to bring them up last year's high performance.

Earnings from balance-sheet business remained at last year's level despite a pronounced increase in business volume. By contrast, the recovery staged by prices on the Swiss stock exchanges had a positive impact on income from securities trading. Earnings from foreign exchange and banknote trading were slightly lower than in the equivalent period last year, while those from precious metal business were significantly down. Although just within budget, cost pressures remain heavy.

#90207p9118 07/26/1990 ~PR Newswire

RED BANK, N.J. (JULY 26) PR NEWSWIRE - The trustees of North European Oil Royalty Trust (NYSE: NET) announced today a quarterly distribution of 30 cents per unit payable Aug. 22, 1990 to holders of record Aug. 10, 1990. The quarter's distribution amounts to a 42.8 percent increase over the 21 cents paid at the same time last year. For the trust's first nine months of the current fiscal year, payments have totaled $1.02 a unit compared with payments totaling 75 cents a unit last year.

John H. Van Kirk, managing trustee, noted that the higher distribution for the quarter over the prior year period was primarily the result of an improvement of prices received for sales of gas and also an improvement in the average conversion rate of the Deutsche mark to U.S. dollars. Sales volume remained relatively constant with the year-ago period.

Distributions are made to unit owners of the trust from royalties received from gas, oil and sulfur sales from royalty holdings in West Germany. The distribution reflects royalties for sales during the second calendar quarter of 1990. The trust makes quarterly distributions to owners during the latter part of February, March, August and November.

JACKSONVILLE, FL (JULY 26) PR NEWSWIRE - Record operating earnings for the three months and six months ended June 30, 1990 were reported today by American Heritage Life Investment Corporation (NYSE: AHL).

Earnings from operations, excluding net realized investment gains, for the three months ended June 30, 1990 were $3,402,847, up 12.5 percent from the $3,024,387 for the same period in 1989. This represents $.57 per share for the second quarter of 1990 vs. $.51 for the second quarter of 1989.

Net earnings in the second quarter reached $3,461,377, up 11.8 percent from the $3,096,689 for the same period last year. On a per share basis, net earnings were $.58 compared to $.52 last year.

Thus, to summarize (second quarter results):

	Amount	Pct. Change from prior year
Earnings from operations	$3,402,847	+ 12.5 pct.
Realized investment gains	$ 58,530	- 19.0 pct.
Net earnings	$3,461,377	+ 11.8 pct.

Earnings from operations, excluding net realized investment gains, for the six months ended June 30, 1990 were $6,742,551, up 12.5 percent from the $5,990,968 for the same period in 1989. This represents $1.13 per share for the first six months of 1990 vs. $1.00 for the same period last year.

Net earnings for the six months ended June 30, 1990 were $6,812,622, up 10.4 percent from the $6,169,042 for the same period in 1989. On a per share basis, net earnings were $1.14 compared to $1.03 last year.

Thus, to summarize (6 months results):

	Amount	Pct. Change from prior year
Earnings from operations	$6,742,551	+ 12.5 pct.
Realized investment gains	$ 70,071	- 60.7 pct.
Net earnings	$6,812,622	+ 10.4 pct.

Total income for the six months ended June 30, 1990 was $109,754,521 compared to $102,817,680 for the same period last year, up 6.7 percent.

The company's assets at June 30, 1990 were $668,139,493 compared to $577,078,933 at June 30, 1989; equity per share at June 30, 1990 was $19.10 compared to $16.74 at June 30, 1989.

At the board of directors meeting today, the company declared three $.085

monthly dividends, payable Aug. 24, Sept. 21, and Oct. 26, 1990, to shareholders of record on Aug. 13, Sept. 10, and Oct. 15, 1990, respectively.

American Heritage Life Investment Corporation is a life insurance-oriented holding company, based in Jacksonville, Fla., whose principal subsidiary is American Heritage Life Insurance Company.

#90207p9123 07/26/1990 ~PR Newswire

CINCINNATI (JULY 26) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) announced that its board of directors has approved an offer to purchase up to 6 million shares of the company's common stock at a price of $26 per share. On Wednesday, July 25, Penn Central's common stock closed at $23.375 per share.

The offer, which will be commenced as promptly as practicable by a mailing to shareholders, will not be contingent upon any minimum number of shares being tendered. The company will reserve the right to purchase up to an additional 1.5 million shares of common stock if the offer is oversubscribed. Penn Central has approximately 62.7 million shares outstanding.

Carl H. Lindner, chairman of the board and chief executive officer of Penn Central, said, "I believe that Penn Central common stock is currently undervalued and that its acquisition through the tender offer is an attractive investment opportunity for the company, especially in relation to the stock's June 30 book value of $28.70 per share."

American Financial Corporation, which beneficially owns approximately 34.3 percent of Penn Central's outstanding shares, has indicated that it does not intend to tender any of its Penn Central shares. If Penn Central received 6 million shares pursuant to the offer, the percentage of ownership of American Financial would increase to approximately 37.9 percent.

Separately, Penn Central also announced that its board of directors has taken action excluding Penn Central from all provisions of the recently enacted Pennsylvania anti-takeover law. The new law, which became effective April 27, 1990, allows public companies incorporated in Pennsylvania to opt out of some or all of its provisions on or prior to July 26, 1990.

Penn Central operates businesses primarily in the areas of industrial

manufacturing, defense services, insurance and energy.

#90207p9126 07/26/1990 ~PR Newswire

SALT LAKE CITY (JULY 26) PR NEWSWIRE - First Federal Savings Bank (NASDAQ: FFUT) reported today unaudited net income for its fiscal year ended June 30, 1990 of $841,000 or 73 cents per share. This compares to a net loss of $889,000 or 77 cents per share for the prior year. Net income for the fourth quarter was $281,000 or 24 cents per share compared to a loss of $317,000 or 28 cents per share for the fourth quarter last year.

Gerald R. Christensen, chairman of the board and president attributed the gain in earnings to improvement in net interest income and a reduction in provision for losses on loans and real estate owned. Christensen stated the loan portfolio is of high quality. Non-performing assets at June 30, 1990 were .69 percent of total assets compared to 1.1 percent of total assets a year ago.

Net interest income, before provision for losses on loans, increased to $5,253,000 for fiscal 1990 from $3,861,000 last year.

Mortgage loan volume for the year totalled 638 loans for $64.8 million up from 385 loans and $40.2 million a year ago. The increase in loan volume was due to the Bank's increase in market share as well as increased activity in local real estate purchases and home building during the year.

Christensen stated, "The Bank's previously announced acquisition of the approximately $69 million retail deposits of CrossLand Savings Utah division should occur in late summer. The acquisition will have a positive impact on the Bank's market share," he said.

First Federal's assets hit an all time high of $305 million at June 30, 1990 and shareholder equity is $13.9 million or $12.12 per share.

MALVERN, PA (JULY 26) PR NEWSWIRE - Aloette Cosmetics Inc. (NASDAQ: ALET) today announced an 11 percent increase in net income for the second quarter ended June 30, 1990, to $1.1 million or 38 cents per share, as compared to $1 million or 34 cents per share for the same period in 1989.

Second quarter revenues increased 26 percent, to $6.7 million vs. $5.3 million in 1989.

Net income for the six months ended June 30, 1990, increased 13 percent, to $2 million or 67 cents per share vs. $1.7 million or 59 cents per share for the comparable 1989 period. Year-to-date revenues advanced 22 percent, to $12.1 million from $9.9 million.

John E. Defibaugh, president and chief operating officer, stated, "We are very pleased to announce record earnings for the 11th consecutive quarter. Our second quarter and year-to-date results are right on target with both the company's and analysts' earnings projections. For the quarter, revenue gains were realized in substantially all areas of the business. The integration of the new manufacturing facilities is on schedule and we plan to being production on several of Aloette's products in the third quarter."

"We are also pleased to report that we have broken ground for a $1.7 million building that will house our corporate headquarters. This new facility will enable us to consolidate our present executive offices."

Aloette Cosmetics, a franchisor and direct marketer of skin care products and cosmetics, is headquartered in Malvern. As of June 30, the company's products were being sold by more than 100 franchises worldwide.

BRISTOL, VA (JULY 26) PR NEWSWIRE - Charter Federal (NASDAQ: CHFD) today announced that it has filed a lawsuit in the Circuit Court for the City of Roanoke, Virginia seeking to recover approximately $2,000,000 which it alleges was embezzled by a former employee.

Earlier in July, Charter Federal announced that it had uncovered the scheme, which involved accounts at its Jefferson Street office in Roanoke. E.L. Byington, Jr., Charter Federal's Chairman and Chief Executive Officer, said that the lawsuit is an outgrowth of its ongoing investigation of the embezzlement. He assured depositors that their funds were secure and all account discrepancies would be fully investigated. The pending lawsuit would have no affect on Charter Federal's depositors, according to Mr. Byington.

Charter Federal, which began operation in 1920, is a federally-chartered stock Savings Bank headquartered in Bristol, Virginia, with 34 branch offices throughout Southwest and Southside Virginia and East Tennessee.

WATERBURY, CT. (JULY 26) PR NEWSWIRE - Webster Financial Corporation

(NASDAQ: WBST), holding company for First Federal Savings and Loan Association of Waterbury, has elected Lee A. Gagnon executive vice president and chief operating officer of Webster and First Federal, and elected John V. Brennan senior vice president and chief financial officer of Webster and First Federal, according to James C. Smith, president and chief executive officer.

Gagnon joined First Federal in 1983 as senior vice president, treasurer and chief financial officer. In 1986, he was promoted to executive vice president and chief financial officer. He assumed these positions with Webster when the holding company was formed upon First Federal's conversion from a mutual association to a stock association in 1986. Gagnon was named corporate secretary of Webster and First Federal in 1987 and continues to serve in that capacity for both companies.

Brennan joined First Federal in 1986 as senior vice president and treasurer, and assumed that position with Webster when the holding company was formed. Brennan continues to serve as treasurer of both companies.

Gagnon and Brennan are both certified public accountants, and are members of the Connecticut Society of CPAs and the American Institute of CPAs. Gagnon is a director of the Connecticut Valley Chapter of the Financial Executives Institute. Brennan is president of the Financial Managers' Society of Connecticut.

#90207p9135 07/26/1990 ~PR Newswire

JERICHO, NY (JULY 26) PR NEWSWIRE - Metro Bancshares Inc. (NASDAQ: MTBS), holding company for Bayside Federal Savings Bank, today reported net income of $1,425,000, or $0.60 per share, for the third quarter of fiscal 1990, ended June 30. This represents a 2.4 percent increase over the $1,392,000, or $0.59 per share, the company earned for the third quarter of fiscal 1989.

Net income for the nine months ended June 30, 1990, was $4,264,000, or $1.80 per share, a 1.6 percent decrease in net income from the $4,332,000 earned in the first nine months of fiscal 1989. The per- share figure for the earlier nine-month period is not meaningful since Metro Bancshares converted to stock form on Nov. 10, 1988.

David G. Herold, president and chief executive officer, indicated that the comparison of current performance to last year's figures has been affected by an increase in the provision for possible loan losses and a recovery of accrued taxes in the current year, and a number of one-time transactions that occurred in the second quarter of fiscal 1989. The recovery of taxes

in the current period amounted to $750,000. This was a result of management's re-evaluation of current tax estimates in light of the resolution of open tax issues, and a reversal of prior years' overaccruals. Exclusive of these items, net income increased by $234,000, or 16.8 percent, for the current quarter and $740,000, or 18.5 percent, for the first nine months of fiscal 1990 over the comparable figures for fiscal 1989.

Net interest income before provision for possible loan losses was $6,004,000 for the third quarter and $17,453,000 for the first nine months of fiscal 1990. This represents 6.7 percent and 9.1 percent increases, respectively, over the year-ago periods. Metro Bancshares' net yield on interest earning assets was 3.15 percent for the current quarter and 3.04 percent for the first nine months of fiscal 1990 compared with 2.98 percent for the third quarter and 2.90 percent for the first nine months of fiscal 1989.

"We are pleased with the company's ability to maintain a consistent core earnings performance in light of the continued weakness in the real estate market and our efforts to build the non-specific reserve for possible loan losses," stated Herold.

On this latter point, Herold indicated that the company introduced a plan to build its nonspecific reserve for possible loan losses in the second quarter of fiscal 1989. Since this effort began, the reserve has been built to $2,677,000, or .43 percent, of total loans (net of discounts), including a $1.2 million provision in the current quarter. "An increase in non-performing loans and real estate owned from .37 percent of total assets for the third quarter of last year to 1.30 percent for the current quarter and the prospect of continued deterioration in the Northeast real estate market may necessitate that we continue to build this reserve in future quarters," stated Herold.

On July 25, 1990, the board of directors of Metro Bancshares declared a regular $.10 a share dividend payable on Aug. 16, 1990, to shareholders of record as of Aug. 6.

Total assets were $792.7 million at June 30, 1990, while net loans receivable were $617 million and deposits amounted to $646 million. Stockholders' equity was $53.7 million at the end of the recent quarter.

Metro Bancshares Inc. is the holding company for Bayside Federal Savings Bank, which conducts retail banking activities through 10 offices located in Queens County, Nassau County and Manhattan.

RANCHO DOMINGUEZ, CA (JULY 26) PR NEWSWIRE - The first 1991 Toyota Celica GT Convertibles rolled off the line at ASC Inc.

Initially, the 1991 Celica GT Convertibles will be sold only in the United States. Beginning in August, Toyota Motor Sales (TMS), U.S.A., Inc. will export the 1991 convertibles to Japan and in September, export the vehicles to Europe.

Since 1984, ASC has been modifying specially prepared Celicas shipped from Japan to the U.S. The 1991 model marks the first left- hand drive convertibles to be modified for the European market, specifically West Germany, Belgium and Switzerland. TMS began exporting right-hand-drive Celica Convertibles to Japan in 1987.

"There is an increasing worldwide demand for convertibles," said TMS President Yuki Togo. "The Celica Convertible has proven to be extremely popular. We're confident that the new generation Celica will be even more successful."

The 1991 Celica GT Convertible, a member of the completely redesigned for 1990 Celica family, has an electronically fuel- injected, 2.2-liter, twin-cam, four-valve-per-cylinder engine producing 130 horsepower and 140 ft.-lbs. of torque, giving excellent around-town acceleration.

The U.S. version of the GT Convertible comes loaded with unique standard features including: power Cambria cloth convertible top with headliner, power rear quarter windows, fold-down one-piece rear seat with three-point rear seat belts and driver's side airbag located in the steering wheel. Celica retains the tilt steering column feature, unusual in an airbag equipped car.

Toyota plans to sell 1,000 to 2,000 Celica Convertibles in the U.S. in 1990 and 6,000 to 7,000 units in 1991.

Base price of the 1991 Celica GT Convertible will begin at $19,228.

NEWPORT BEACH, CA (JULY 26) PR NEWSWIRE - EIP Microwave Inc. (NASDAQ: EIPM) reported net sales for the third quarter ended June 30, 1990, of $2,926,000, a 21 percent decrease from the same period last year. Net income of $13,000 ($.01 per share) was earned for the quarter, as compared to $429,000 earned during the same period of the previous year. The decrease was attributed primarily to a decline in defense related business.

Incoming orders for the third quarter were $2,140,000, a 19 percent decrease from the same period a year ago.

Net sales for the nine months ended June 30, 1990, were $9,169,000, a 10 percent decrease from the previous year. Net income for the nine months was $234,000 ($.11 per share), a decrease of 51 percent from the $478,000 ($.22 per share) earned during the first nine months of fiscal 1989.

The prior year's nine months results include a pre-tax charge to operations of $1,050,000 resulting from the write-down of certain assets associated with the company's realignment of technical, financial and management resources. The prior six month's results also reflect the cumulative effect of adopting the new accounting standard on income taxes of $748,000, or $.34 per share.

The company believes that the decline in defense-related spending will continue to depress revenue levels. At the same time, the company expects to continue to invest heavily in new product development to provide future growth. As a result, the company expects to record a net loss for the fourth fiscal quarter of 1990.

WOODLAND HILLS, Calif. (JULY 26) PR NEWSWIRE - Perceptronics Inc. (NASDAQ: PERC) announced today that it is on the winning Loral Corp. team for the U.S. Air Force's new SOF ATS Program (Special Operations Forces Aircrew Training System). The initial award to Loral on the multi-year program is for $71.5 million.

The SOF ATS training program, inlcuding options, will provide aircrew training and mission rehearsal capability for up to seven different Special Operations Aircraft. Perceptronics will participate in the development and production of simulator systems and training courseware.

"Perceptronics is proud to be a member of this outstanding team," said Dr. Gershon Weltman, the company's chief executive officer. "This is an important program for the Air Force, and for Perceptronics. Although it is too early to say exactly how much the SOF ATS program will add to the company's revenues, it has the potential of being a major contributor for many years to come."

Perceptronics is engaged in research and system development -- primarily for the Department of Defense -- and in the manufacture and marketing of low-cost, intelligent computer-based systems for training, simulation and decision support.

DALLAS (JULY 26) PR NEWSWIRE - International Broadcast Systems, Ltd. (IBS) (NASDAQ: IBTVA) announced today the acquisition of the international rights for the feature film "Keys to Freedom", starring Jane Seymour, Omar Sharif, Denholm Elliot, Jim Youngs, and David Warner.

"Keys to Freedom" is directed by Steve Feke ("When A Stranger Calls," "Hawaii Five-O," "Kojak") and produced by Eduardo Rossoff ("Adventures Of The Sacred Mountain," "Chanel Solitaire," "The Falling," and "The Kid

Brother"). French composer Francis Lai, best known for his Oscar winning score for "Love Story," combines western and oriental instruments to achieve the mysterious feeling of the Orient in the "Keys to Freedom" soundtrack.

Set against the turmoil of Hong Kong in transition, "Keys to Freedom" is a mystery "noir" with strong elements of romance, adventure and international intrique in which the highest levels of Hong Kong society become entangled with an underground "people smuggling" scheme and a forbidden love affair.

"While IBS has consistently developed one of the fastest growing international distribution catalogs in recent years, the acquisition of "Keys to Freedom" will dramatically enhance the scope of our international broadcast and home video licensing operations. The international premiere of "Keys to Freedom" this fall at MIPCOM in Cannes, France, will represent a meaningful step forward in our ongoing quest to acquire and distribute increasingly significant entertainment properties," stated IBS' Chairman and CEO, Earl L. Jones Jr.

With offices in Dallas, Los Angeles, Paris, Santiago, and Washington, IBS distributes television programming in more than 125 countries. Additionally the firm secures airtime and sponsorships internationally and provides broadcast management and consulting services to television stations and program producers both domestically and abroad. The company's Class A Common Stock trades under the NASDAQ symbol "IBTVA."

PHILADELPHIA (JULY 26) PR NEWSWIRE - CIGNA Corp. (NYSE: CI) announced today that it is no longer considering the possible sale of its Individual Financial Services Division (IFSD).

IFSD markets individual life and disability insurance, investment products and financial planning to small business owners, higher income individuals and corporations. The division had 1989 revenues of more than $600 million and net income of $61 million.

In announcing the decision today, CIGNA Chairman and Chief Executive Officer Wilson H. Taylor said, "Over the past 18 months, there has been significant interest in the purchase of the division. Several offers from qualified buyers were received and considered. None, however, matched the value to CIGNA of retaining IFSD.

"The outlook for the life and disability business has improved as a result

of both changes in the external environment, which favor well- capitalized companies, and a series of steps taken within the organization to improve its operations. The division produced strong results in 1989, with a return on equity of over 15 percent, and we believe their 1990 performance suggests continued good results in the future," Taylor added.

Taylor also noted that the decision to retain the division would not affect reported financial results nor the company's current program to repurchase CIGNA's common shares as stock market conditions permit.

The CIGNA companies provide insurance, health care, employee benefits, pension and investment management, and related financial services to businesses and individuals worldwide.

HOUSTON (JULY 26) PR NEWSWIRE - American General Corporation (NYSE: AGC) announced that its board of directors today declared a quarterly dividend

of $.80 per common share, payable Sept. 1, 1990 to holders of record as of Aug. 7, 1990. This represents a common dividend payout of 82 percent of operating earnings and 48 percent of net income for the second quarter.

The indicated annual dividend rate of $3.20 is a continuation of the rate that was announced at the May 2, 1990 annual shareholders' meeting in conjunction with the decision to offer the company for sale in its entirety. As stated at that time, the indicated annual dividend rate was more than doubled so as to give American General shareholders an additional return while they wait for the sale process to be completed.

When American General released second quarter earnings on July 19, 1990, the company stated that the sale process is proceeding according to its expectations with strong interest expressed by both domestic and international prospective buyers.

American General is an insurance and financial services organization with assets of $34 billion and total equity of $4.5 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada. The company groups its operating subsidiaries into three business segments: insurance-home service; insurance-special markets; and finance/real estate. American General common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

#90207p9160 07/26/1990 ~PR Newswire

WASHINGTON (JULY 26) PR NEWSWIRE - International Association of Machinists and Aerospace Workers Vice President John Peterpaul released the following statement on the continuing investigation of Eastern Air Lines and indictments already returned against the carrier:

The IAM is pleased that a federal grand jury comprised of average American men and women has now acted when other federal regulatory and investigative agencies failed to do so. The criminal indictments returned represent a good start and vindicate the IAM and striking employees of Eastern.

We congratulate the striking IAM members who initiated the investigation because it was they who persistently tried to bring the criminal safety violations to the federal government's attention for nearly two years. And it was the testimony of many IAM members before the federal grand jury in Brooklyn, New York, that helped finally bring some of the airline pirates before the bar of justice.

U.S. Attorney (Andrew J.) Maloney has reported that the Eastern investigation is continuing and that also encourages those who want to see all of the Eastern culprits brought to justice. No indictments have yet been brought against Frank Lorenzo, chairman of Eastern's parent company, although most of the violations cited in the indictment happened on his watch. Nor have any charges been brought against (former) Eastern President Phil Bakes.

As yet, no indictments have been brought against Joseph Leonard, the carrier's number two executive.

Despite assurances by Mr. (Martin) Shugrue that, 'Eastern is now safe to fly,' Mr. Leonard is still on the job at Eastern. This is the same Mr. Leonard who was in overall charge of maintenance during the period of the charges covered by the indictment. Mr. Leonard's continued influence combined with the mostly inexperienced strikebreakers operating as airline mechanics continues to create an uncertain situation at Eastern.

Finally, -- as with the Federal Aviation Administration, Congress and with the federal grand jury -- the IAM and its members look forward to giving testimony at any federal court trials that may follow these indictments.

LONDON, (JULY 26) PR NEWSWIRE - Burmah Castrol plc. (NASDAQ: BURMY) announced today that it has acquired the leading Spanish printing inks distributor, Fragival, for a consideration in excess of 350 million pesetas (2 million pounds sterling). Burmah Castrol's subsidiary Sericol is the world leader in screen printing inks, and the acquisition of Fragival, formerly its distributor in Spain, gives it direct access to this high-growth market.

Fragival has an excellent record of growth in both profit and turnover. The market leader in screen-making products and inks in Spain, Fragival follows Sericol's successful strategy of sales through a regional distribution network, and currently has depots in Barcelona, Madrid and Seville.

The director of Burmah Castrol's chemicals group, John Griffiths, said, "Fragival is a very attractive acquisition for Burmah. The Spanish market for screen inks and screen-making products is growing strongly and Fragival is already a market leader. I am confident that with the new management team, strengthened sales and service staff and the extension of its depot network, Fragival will prove an important addition to Sericol's fast-expanding European network."

Burmah Castrol is a leading international marketer of specialized oil and chemical products, whose post-tax profit in 1989 was 96.5 million ($159.2 million) on turnover of 1.5 billion ($2.5 billion) Sericol, which is part of Burmah Castrol's chemicals group, is a recognized world leader in the development and manufacture of screen printing inks and screen-making products. It has manufacturing plants in the U.K., U.S. and France, with sales and distribution subsidiaries in West Germany and Switzerland. Twice winner of the Queen's Award for Export Achievement, Sericol has recently received the Queen's Award for Technological Achievement for its Dirasol 900 Series of photostencil emulsions.

SAN FRANCISCO (JULY 26) PR NEWSWIRE - First Nationwide Financial Corp. a wholly owned subsidiary of Ford Motor Co., today announced record second quarter earnings of $41.3 million for 1990, compared with $3.5 million for the same period in 1989.

For the six months ended June 30, 1990, the company earned $77.2 million, compared with $8.4 million a year earlier. The company attributed its first half earnings gains primarily to higher net interest margins and to operating cost improvements.

"Our progress continues to be encouraging," said Robert E. Lackovic, chairman of the board and chief executive officer. "We believe that providing core deposit, transaction and home mortgage services to customers is a prudent and profitable strategy and the foundation for our long-term business success."

Assets were $29.1 billion as of June 30, 1990, compared with $34 billion a year ago. The reduction in assets primarily reflects the sale of certain real estate loans and properties and the sale or transfer of certain other assets such as TranSouth Financial Corp.

In addition to First Nationwide Bank, First Nationwide Financial Corp. operates three other thrift subsidiaries: Columbia Savings, Denver; Pathway Financial F.A., Chicago and Cardinal Federal Savings Bank, Cleveland. These First Nationwide Financial subsidiaries meet all federal capital requirements.

Together, First Nationwide Financial subsidiaries operate 282 retail branches in 12 states and 34 loan offices in 9 states. First Nationwide is part of the Ford Financial services Group.

#90207p9168 07/26/1990 ~PR Newswire

TINTON FALLS, NJ (JULY 26) PR NEWSWIRE - Keptel, Inc. (NASDAQ: KPTL), today confirmed its preliminary announcement released on June 29 that the company would experience a loss for the quarter ended June 30, 1990. The loss for the period amounted to $225,000 or 5 cents per common share on revenues of $11,424,000.

As previously announced, despite the presence of long-term purchase authorization agreements, several Bell telephone companies reduced their shipment requests during the quarter, slowing revenues. Additionally, the company's largest CATV customer temporarily suspended shipments pending the outcome of federal legislation which would re-regulate the cable TV industry. These two factors, coupled with start-up costs associated with the new Southwest operation and an improved but still weak showing from Comfab Technologies, depressed the quarter.

While some of these factors will continue to impact the company during the fourth quarter, the company does expect a return to profitability for the upcoming period.

Richard K. Laird, president and chief executive officer, stated, "Looking to the future, we are very optimistic about several events now unfolding. First, our Bell Telephone Company customers have approved several new Keptel products for use, sales of which are expected to begin this fall. These new product approvals reflect a nationwide telephone company commitment to expand deployment of interface and test products like those manufactured by Keptel. Our clear leadership in this field positions us well for continued growth as these new markets further develop. Also, the company recently signed an agreement to sell a product line not suited to

its current direction. This essentially break-even transaction will generate cash flow of $1.3 million, which will be applied to further reduce debt.

"Secondly, the performance of our October 1989 Comfab Technologies acquisition is improving. The subsidiary's overhead has now been successfully integrated into Keptel's, its order backlog has grown and, most importantly, four new 'sponsored' products designed since the acquisition are nearing completion. With these new products and Comfab's leaner structure, we expect this acquisition to begin contributing to the company's earnings in the coming new year and, beyond, to provide Keptel with a valuable presence in telephone company switching centers, an area of significant opportunity brought about by the breakup of AT&T.

"Thirdly, the company's voice and data connection products are growing now as a result of the successful introduction of the new modular Epitome line and, finally, our plans to replace various subcontractors around the world with our own facilities in El Paso, Texas, and Juarez, Mexico, are moving on schedule and should be operational late this summer. These facilities will not only reduce our present costs but in addition provide capacity for future growth."

Laird further stated, "Overall, the fundamentals of our company are strong and our future bright with new opportunities brought about as a result of the breakup of AT&T. Keptel's mechanical and electronic technologies together with our now well-established customer presence positions us particularly well for the growth and change still occurring in these post-divestiture telecom markets."

Keptel, Inc., designs, manufactures and markets a diversified range of telecommunication and CATV test equipment, as well as a full range of voice and data connection products.

SAN ANTONIO, TX (JULY 26) PR NEWSWIRE - The board of directors of Valero Energy Corporation (NYSE: VLO) today declared a regular quarterly cash dividend of $.07 per share on the company's common stock. The dividend is payable Sept. 10, 1990, to holders of record at the close of business Aug. 6, 1990.

The board also declared a regular quarterly cash dividend of $.86 per share for its depositary preferred shares, 1983 Series. Each depositary preferred share represents 1/12th share of the company's $68.80 Series B cumulative preferred stock. The dividend is payable Sept. 1, 1990, to holders of record at the close of business Aug. 10, 1990.

Valero Energy is involved primarily in specialized refining of high-sulfur atmospheric residual oil into premium products, such as unleaded gasoline, through its specialized refinery in Corpus Christi, Texas, and in the marketing of those products. In addition, a wholly owned subsidiary of Valero is general partner of and has an approximate 49 percent interest in Valero Natural Gas Partners, L.P., which owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas to markets throughout Texas and the United States, provides third party gas transportation services, owns 11 natural gas processing facilities and markets natural gas liquids.

JOHNSTOWN, PA (JULY 26) PR NEWSWIRE - The momentum generated by a strong first quarter continued through the second quarter ended June 30, 1990, producing outstanding results for BT Financial Corp.'s (NASDAQ: BTFC) first half of the year, it was announced today.

Consolidated net income for the first six months of 1990 was $3,496,000, an increase of 40.51 percent compared with the $2,488,000 earned in the same period last year. During the second quarter of 1990, earnings rose 57.36 percent to $1,775,000 from $1,128,000 for the previous year. Net income per share increased from $.81 to $1.15 or 41.98 percent for the six months and from $.37 to $.59 or 59.46 percent for the second quarter.

The earnings gain for the first six months resulted from continued growth in net interest income, higher non-interest income and effective control of non-interest expenses. Another factor was the reduction to net income of $352,000 in 1989 due to BT Financial Corp.'s management's decision to absorb the expense of the Pennsylvania Bank Shares Tax imposed by Act 21 in the second quarter of 1989.

The per share data reported for the second quarter and for the six months partially reflects the effect of the decrease in the weighted average number of shares outstanding as a result of BT Financial Corp.'s plan to repurchase up to 100,000 shares of common stock from time to time in the open market at prevailing prices. For the three-month period ended June 30 1990, the weighted average shares outstanding decreased 61,608 shares to 3,025,880 and for the six months decreased 45,797 shares to 3,041,691.

BT Financial Corp.'s newest affiliate, BT Management Trust Co., a Pennsylvania state-chartered trust company, began serving the trust and investment management needs of all affiliate trust department customers on May 1. This new affiliate was formed to address the dramatic changes taking place within the industry. Today's financial marketplace is beseiged with non-banks providing financial products and services in direct competition with banks. BT Financial Corp. believes the trust company is a formidable competitor in providing innovative trust and investment management services in their market area. The growth of trust assets and corresponding increase in net income of this new affiliate has been strong.

During the second quarter, a number of notable events took place. The conversion to new banking application software is on schedule and completion is anticipated during the third quarter. To provide modern, up-to-date customer banking services, Laurel and Fayette banks have begun construction of new branch offices to be located at Route 286, White Township, Indiana, Pa.; and Route 21, South Union Township, Uniontown, Pa. Several enhancements also were made to all affiliate product lines in keeping with BT Financial Corp.'s commitment to deliver a complete range

of useful, competitively priced financial services to their market area.

The passage of the new Pennsylvania Anti-Takeover Statute, Act 36, of April 27, 1990, amends the Pennsylvania Business Corporation Law in regard to corporate takeovers. The new legislation is unique in the sense that it provides existing Pennsylvania corporations with the ability to opt out of the coverage by means of taking action through bylaw amendments on or before July 26, 1990.

On July 25, 1990, the board of directors of BT Financial Corp. adopted amendments to the corporation's bylaws to exempt their corporation from the "control-share" as well as the "disgorgement of profits" provisions of the new law. The control-shares provision would deny voting rights to any group or individual that attempts for the first time to purchase 20 percent or more of the corporation's stock. The disgorgement provision permits a Pennsylvania corporation, under certain conditions, to recover any profits realized by a group or individual on stock that would be categorized as control shares. BT Financial Corp.'s board of directors concluded these two provisions might unfairly deprive their shareholders of their legitimate right to vote and profit from investment in BT Financial Corp.

After careful consideration, the board took no action on another provision relating to the board's fiduciary duties. Thus, by not rejecting the fiduciary duty provision, the board is clearly reflecting its commitment to all shareholders, employees, customers and others having an interest in the success of BT Financial Corp.

On July 25, 1990, the board of directors of BT Financial Corp., in conjunction with the enhanced earnings generated by the corporation, increased the cash dividend to $.22 per share to shareholders of record on Aug. 6, 1990, payable Sept. 1, 1990.

BT Financial Corp. is a bank holding company with assets of $800 million, headquartered in Johnstown, Pa. Banking affiliates include Johnstown Bank and Trust Co., Johnstown, Pa.; Laurel Bank, Ebensburg, Pa.; and Fayette Bank and Trust Co., Uniontown, Pa. Together, they comprise a total of 41 offices serving Cambria, Somerset, Bedford, Blair, Indiana, Westmoreland and Fayette counties. BT Financial Corp.'s other affiliates are BT Management Trust Co., a Pennsylvania state-chartered trust company and Bedford Associates Inc., a real estate company.

PARIS (JULY 26) PR NEWSWIRE - Compagnie de Saint-Gobain today announced that its wholly owned subsidiary, SG Acquisition Corp., has extended the expiration date of its $90 per share cash tender offer for all the outstanding shares of common stock of Norton Company (NYSE: NRT). The tender offer and withdrawal rights are now scheduled to expire at 5:00 p.m., New York City time, on Wednesday, Aug. 8, 1990.

As previously announced, the staff of the Committee on Foreign Investment in the United States (CFIUS) has been conducting an investigation under the Exon-Florio Amendment to the Defense Production Act of the transactions contemplated by the merger agreement among Saint-Gobain, SG Acquisition and Norton. By law, CFIUS must have completed its investigation under the Exon-Florio Amendment by July 23, 1990 and the President must make any decision to take action under the agreement by Aug. 7, 1990.

The Exon-Florio Amendment authorizes the President of the United States to investigate a proposed foreign acquisition of a U.S. business to determine the effects on national security.

SG Acquisition Corp. has been informed by the depositary that as of the close of business on July 25, 1990, approximately 10,063,962 shares of common stock of Norton Company had been tendered to SG Acquisition Corp. These shares represent approximately 48.10 percent of Norton Company's outstanding common shares.

ROCKY MOUNT, NC (JULY 26) PR NEWSWIRE - Pioneer Bancorp, Inc. (NASDAQ: PSBN), headquartered in Rocky Mount, North Carolina, announces the results of its operations for the quarter ended June 30, 1990 and the first nine months of its fiscal year ending September 30, 1990. Net income for the quarter was $159,985, or $.09 per share, based upon weighted shares outstanding of 1,741,421, compared to net income of $419,022 or $.23 per share, based upon weighted average shares outstanding of 1,779,213, earned in the third quarter of fiscal year 1989. Net loss for the first nine months was $9,338 or $.01 per share, based upon weighted shares outstanding of 1,741,421 compared to net income of $779,955 or $.43 per share based upon weighted average shares outstanding of 1,801,659 earned

in the first nine months of fiscal year 1989.

Theo H. Pitt, Jr. Chairman and Chief Executive Officer, stated, "We are pleased, as anticipated, that the Bank returned to profitability in the third quarter. This was achieved even though the Bank established additional reserves for losses on loans and real estate owned of $823,559 during the quarter. These additional reserves were established as a part of the Bank's continuing evaluation of its problem assets, which continue to be affected by a depressed real estate market in North Carolina."

The corporation's savings and loan subsidiary, Pioneer Savings Bank, Inc., currently has assets in excess of $570 million and twenty-five banking offices in eastern North Carolina.

PENNSAUKEN, NJ (JULY 26) PR NEWSWIRE - MEDIQ Inc. (AMEX: MED) and NutraMax Products Inc. (OTC) announced today that they have completed the previously announced merger of Aid-Pack Inc., a wholly owned subsidiary of MEDIQ, and NutraMax.

As a result of the merger, MEDIQ owns 81.7 percent of the combined companies which will do business as NutraMax Products Inc. The shares of NutraMax will continue to be traded over-the-counter.

Aid-Pack, based in Gloucester, Mass., manufactures and distributes feminine hygiene and personal care products. For the nine months ended June 30, 1990, Aid-Pack's sales were $11,039,000, compared to $10,180,000 for the nine months ended June 30, 1989. NutraMax was a development stage company, engaged in the distribution and marketing of health and beauty-aid products which are distributed to drug, food and mass retail outlets throughout the United States and Japan.

MEDIQ Inc., whose shares (MED and MED.Pr) and debentures (MED.C) are traded on the American Stock Exchange, provides products and services to hospitals, nursing homes, health care professionals and consumers through its subsidiaries. MEDIQ's businesses include diagnostic imaging and testing; maintenance of diagnostic equipment, pharmaceutical packaging; manufacture and distribution of personal care products; hospital and health care management and consulting; equipmental rental; health care facility planning, design and project management; management and ownership of psychiatric units; the manufacture and distribution of eyeglass frames; and financial services.

#90207p9191 07/26/1990 ~PR Newswire

CHICAGO (JULY 26) PR NEWSWIRE - Amoco Chemical Company announced today it will expand the capacity of its olefins production facility at its Chocolate Bayou plant near Alvin, Texas.

Scheduled for completion in early 1994, the expansion will increase annual capacity for ethylene by about 600 million pounds and propylene capacity by about 200 million pounds. Current capacity is 2.4 billion pounds and 800 million pounds, respectively.

"Expansion of this facility reconfirms Amoco's commitment to the growing needs of our customers," said William E. Gerwing, Amoco Chemical's vice president and general manager, industrial chemicals. "This expansion will allow Amoco to maintain its strong position in the U.S. Gulf Coast merchant ethylene market."

The cost of the expansion, including additional transportation and storage facilities outside the Chocolate Bayou plant, is more than $200 million. In March, Amoco announced it would construct a $90 million world-scale polypropylene unit at the same facility.

Gerwing said the increased propylene capacity will be used as feedstock for the new polypropylene unit.

The expansion will use Stone and Webster Engineering Corporation's advanced recovery system technology. The technology offers more capacity than conventional expansion methods and uses less energy.

"We have been operating a commercial olefins production facility in

Chocolate Bayou since 1975," said Gerwing. "This expansion shows our confidence in the ethylene business and our desire to satisfy our customer base." Ethylene is a chemical intermediate used in the production of a variety of polymers and other chemical products.

Amoco Chemical is the worldwide chemical manufacturing and marketing subsidiary of Amoco Corporation (NYSE: AN).

BLOOMFIELD, CT (JULY 26) PR NEWSWIRE - Kaman Sciences Corp. today announced it has received a contract from the U.S. Army to develop and manufacture new technology reactive armor.

The $780,000 award by the Army, Picatinny Arsenal, N.J., covers production and delivery of several hundred side and turret reactive armor "cassettes" for the Bradley Fighting Vehicle by December, 1990. These cassettes will be used for testing and evaluation of an "insensitive" reactive armor concept developed by Kaman Sciences and SNPE of Paris. Kaman and SNPE have formed a joint venture company, Advanced Energetic Materials Corp. of America (AEMC), to further develop products and systems based on insensitive explosives technology.

The U.S. Army plan calls for testing reactive armor systems from various competitors followed by qualification testing. Production contracts, based on the outcome, will be designed to retrofit the Bradley inventory.

The Kaman-produced reactive armor cassettes -- various materials including the insensitive explosive placed inside box-like structures -- under this contract, are based on joint venture technology developed with SNPE. SNPE has developed proprietary energetic materials, a new generation of insensitive explosives. These materials do not act like normal high explosives and provide a high level of safety during handling and operating conditions. Kaman provides scientific research, aerospace materials expertise, and weapons systems engineering and integration.

Testing of the Kaman/SNPE reactive armor technology has indicated that anti-tank munitions can be defeated without rear armor effects or sympathetic detonation of adjacent cassettes.

Kaman Sciences Corp., based in Colorado Springs, Colo., is a wholly owned subsidiary of Kaman Corp. (NASDAQ: KAMNA). Kaman Sciences is active in a wide range of scientific and advanced technology programs, from computer software to space initiatives and emerging defense systems.

Kaman Corp. is a highly diversified Fortune 500 company with business activities in defense, industrial and commercial markets. The company had revenues of more than $800 million in 1989.

PITTSBURGH (JULY 26) PR NEWSWIRE - Mitsubishi Corp. today announced that it will contribute $500,000 to the University of Pittsburgh's Joseph M. Katz Graduate School of Business to establish the Mitsubishi Corporation Doctoral Fellowship Program in International Management.

Mitsubishi Corp., a major worldwide Japanese trading firm, joined the Pittsburgh corporate community earlier this year when it took a majority equity position in Aristech Chemical Corp. through a management-led buyout. Aristech Chairman Thomas Marshall, who in June was named the Katz School's Distinguished Alumnus for 1990, spearheaded the senior management acquisition.

The Mitsubishi Corporation Doctoral Fellowship Program is designed to further internationalize the Katz School curriculum by increasing student awareness of the intricacies of the international marketplace. Doctoral students chosen for the fellowship will focus their studies on international management issues.

In presenting the contribution, Nobuaki Iwai, managing director of chemicals for Mitsubishi Corp., said: "The Katz School understands that the days of geographic isolation in business and trade are past. It is well on its way toward instilling in its students -- the business leaders of tomorrow -- the global vision they must have for ensuring worldwide economic stability and prosperity. The Mitsubishi Corporation Fellowship in International Management will complement and strengthen this commitment. We are honored to be participating in this important endeavor."

H.J. Zoffer, dean of the Katz School, said: "This significant support by the Mitsubishi Corp. will accelerate the internationalization process which has characterized the Katz School's initiatives over the past few years. It will join the corporation with the school in a partnership to emphasize the global responsibilities of future managers and provide a dramatic way for the Mitsubishi corporation to reflect its commitment to the western Pennsylvania region."

Aristech's Marshall commented that to be successful in the years ahead, companies must become increasingly competitive internationally. "Toward that end," he said, "colleges and universities must be equipped to prepare

students to manage and function in a global environment. This contribution by Mitsubishi Corp. to one of the top business schools in the United States will have a substantial positive impact on further developing the globalization of American business and education."

LINCOLN, RI (JULY 26) PR NEWSWIRE - A.T. Cross Company (AMEX: ATXA), manufacturer of fine writing instruments, today announced that second quarter 1990 sales were $53.2 million, a decline of 2.2 percent from the second quarter of 1989. Net income declined 11.1 percent to $6.5 million, or 38 cents per share. For the first six months, sales were $102.0 million, down 5.2 percent from 1989. Net income was $10.2 million, down 23.8 percent from the first half of 1989, resulting in earnings per share of 60 cents.

In the second quarter, total writing instrument sales were down 2.3 percent with leather and gift products sales declining 1.7 percent. For the first half of 1990, sales of writing instruments were $87.2 million, essentially flat with last year. Foreign sales growth of writing instruments continued, but domestic sales were approximately 7 percent below the first half of 1989. Sales of the leather and gift products segment were $14.9 million, a decrease of 25.5 percent from a year ago. Mark Cross retail store sales increased over a year ago, while sales of Manetti-Farrow declined significantly.

LONDON (JULY 26) PR NEWSWIRE - British Telecom (NYSE: BTY) Chairman Iain Vallance today highlighted some of the key issues that must be addressed in the forthcoming review of liberalization.

Speaking at British Telecom's annual general meeting in Nottingham, Vallance said: "In essence, British Telecom and the government start from the same position. We both know that free vigorous competition is the best way for customers to get real value for money.

"To achieve this there are a number of issues that will have to be addressed. One of the most important is to tackle the fundamental imbalance in British Telecom's pricing structure. Customers who make a lot of telephone calls subsidize those who make less frequent use of the phone.

"For historical reasons, what we charge for renting a line falls well short of the cost of providing and maintaining that line. And this shortfall has to be recovered from the relatively high margin we make on calls, particularly long-distance and international calls.

"That means that because our prices for calls are higher than they should be, competitors can undercut us, particularly in providing services to

companies and individuals who make a lot of calls.

"Since we have to provide a vast number of unprofitable lines to smaller users, we are unable to respond in pricing terms. So there is substitution rather than genuine competition.

"At the other end of the scale -- the residential area which receives the benefit of the cross-subsidy -- there is little or no incentive for competitors to enter the market."

Vallance said that the company had discussed the issue with the government and the Office of Telecommunications. He believed they understood that fair competition could not take place without correcting this distortion in the pricing structure.

He added: "If that inconsistency is properly and sensitively handled in the forthcoming government review, then there are good prospects of genuine competition in the 1990s in all markets."

Vallance stressed that reciprocity, with North America and Europe in particular, was an area that the government must address.

"Many North American and European companies have protected monopolies in their own countries. But British companies do not have equal access to those overseas telecommunications markets," he added.

Vallance said that the government's intention when the company was privatized in 1984 was to relax regulation as competition increased. "We believe strongly," he said, "that a reduction in regulation is in the best interests of our customers overall and of our shareholders."

#90207p9201 07/26/1990 ~PR Newswire

OIL CITY, PA (JULY 26) PR NEWSWIRE - Quaker State Corporation (NYSE: KSF) reported increased sales and earnings for the second quarter and first half of 1990, compared to the same periods of 1989, it was announced today.

At its monthly meeting, the board of directors voted a regular, quarterly dividend of 20 cents per share, payable on Sept. 14 to stockholders of record on Aug. 15, 1990.

For the second quarter, net income was $8,495,000 (31 cents per share) on sales and operating revenues of $222,768,000. This compares to net income of $7,206,000 (27 cents per share) and sales and operating revenues of $211,779,000 in the second quarter a year ago.

During the first six months, Quaker State registered sales of $431,718,000 and net income of $10,821,000 (40 cents per share) compared to $406,672,000 and $7,786,000 (29 cents per share) a year ago.

Operating profit in the second quarter was $15,961,000, compared to $15,490,000 in the second quarter of 1989. Unusual items impacted profits during the second quarter of both years. In 1990, the company reported profits of $5,398,000 (13 cents per share after tax) as a result of a gain on the sale of the McKean Refinery and Emlenton Wax Plant, including LIFO profits of $2.3 million from the sale of inventories to the new owners of the plants, Petrowax PA Inc. In 1989, the company reported an unusual gain of $9,707,000 (25 cents per share after tax) to account for settlement of a Utah coal contract.

The company's petroleum segment reported improved profits in the second quarter. Operating profit of the core petroleum business rose to $7,180,000, up from $3,706,000 in the second quarter a year ago. This includes $3 million of additional LIFO inventory profits; however, these were totally offset by operating losses incurred during the phasedown of production at the McKean and Emlenton plants prior to the sale and by the writedown of excess chemical product inventories.

Fast lube profits also increased, to $2,117,000 in 1990 from $699,000 in the second quarter of 1989. The increase in profits reflect improved fast lube pricing and margins, and successful cost containment efforts throughout the organization.

The improved results also reflect reduced operating losses at The Valley Camp Coal Company which amounted to $934,000 in the second quarter of 1990 compared to a loss of $2,332,000 in the year-ago quarter. The 1990 loss follows a profitable first quarter and was caused by severe operating conditions at Helen Mine which halted production in late May and June. Helen Mine has now resumed shipments and expects to satisfy its contract requirements.

Operating profits of the Heritage Insurance Group declined from $1,365,000 in the second quarter of 1989 to $336,000 this year as a result of increased claims experience in certain markets and a decline in credit life and accident insurance sales caused by the downturn in new car sales. Demand for the company's extended service warranty contracts remained strong.

Other company operations reported modest operating profit declines. Profits of Truck-Lite Company were $1,327,000 in the second quarter compared to $1,609,000 a year earlier.

As a result of the plant sale and inventory reduction, Quaker State

Corporation reduced its debt during the first half of 1990 from $102.2 million at year end to $71.3 million at June 30. Consequently, the company's debt to capital ratio has declined from 25 percent at year end to 18.9 percent at midyear, and its debt to equity ratio is 23.3 percent, down from 33.3 percent at year end.

"The second quarter demonstrates the earnings potential of the business mix of Quaker State," said Vice Chairman and Chief Executive Officer Jack W. Corn. "By streamlining our operations and adhering to a fair pricing regimen, we are beginning to experience improved earnings in the core motor oil business. Our fast lube profits also rose because of effective cost controls and selective price increases."

Mr. Corn said that despite the second quarter loss in coal and lower profits at Heritage and Truck-Lite, "We expect our subsidiaries will continue to be significant profit contributors to Quaker State in 1990." He noted that the prospects for Valley Camp are brightened by return to production at Helen Mine, increased tonnages being mined at Utah, and the reopening of Shrewsbury Mine in July with initial shipments scheduled at an annual rate of 490,000 tons.

Quaker State is principally a producer and marketer of branded motor oils and lubricants and a marketer of other products and services in the automotive aftermarket. Subsidiaries produce and/or market coal, insurance safety lighting equipment for cars and trucks, and fast lube services.

BALTIMORE (JULY 26) PR NEWSWIRE - Crown Central Petroleum Corp. (AMEX:

CNP.A) announced today that the company earned $15.2 million ($1.54 per share) in net income for the second quarter of 1990 on revenues of $492 million.

This compares to net income of $6.3 million ($.62 per share) on revenues of $303 million in the second quarter of 1989, and to net income of $1.1 million on revenues of $458 million in the first quarter of 1990. For the first six months of 1990, net income was $16.3 million on revenues of $950 million compared to net income of $9.1 million on revenues of $588 million for the same period in 1989. The increase in revenues for 1990 principally reflects the acquisition of the La Gloria Oil and Gas Co. in October 1989.

Henry A. Rosenberg Jr., chairman, said, "The substantial improvement in net income over the first quarter was largely the result of stronger refining margins and increased demand for gasoline during the second quarter. Crown's average per-barrel cost for crude and feedstocks decreased 11 percent compared to the first quarter while a slight increase in gasoline prices was offset by lower prices for other products. Both our Houston and Tyler, Texas, refineries operated near capacity during the quarter."

Rosenberg noted that operating costs in the second quarter included approximately $3.7 million related to non-productive assets, environmental matters, convenience store closings, and self-insured casualties. On July 3, 1990, a fire occurred at the company's Houston refinery. Damage was confined to the crude unit which returned to service on July 26 and is expected to operate at reduced charge rates until early August when all repair work should be completed and operations return to normal. The refinery continued production during this period, but at reduced rates.

#90207p9208 07/26/1990 ~PR Newswire

UPPER SADDLE RIVER, N.J. (JULY 26) PR NEWSWIRE - Western Union Corporation (NYSE: WU) announced today that the amended registration statement for its recently revised exchange offer, pursuant to which the company will issue new notes and common shares in exchange for up to $530 million of its presently outstanding 19-1/4 percent senior secured notes and 16 percent notes, has been declared effective by the Securities and Exchange Commission.

The exchange offer is a key component of Western Union's recapitalization plan. That plan also includes a proposed reclassification of the company's Class A and Class B preferred shares into common shares.

The company has extended the period of its exchange offer, which had been scheduled to expire on Aug. 9, to 12:00 midnight, New York City time, on Wednesday, Aug. 15, 1990. Preliminary figures indicate that, as of 12:00 noon on July 25, 1990, $13,991,000 aggregate principal amount of Western Union's 19-1/4 percent notes and $805,000 aggregate principal amount of its 16 percent Notes had been tendered in the exchange offer and not withdrawn (including securities as to which delivery has been guaranteed).

The company also stated that in view of the time that will be required to prepare and distribute a revised proxy statement-prospectus to securityholders, its 1990 Shareholders' Meeting, which is presently scheduled for July 31, will be adjourned to Aug. 14. The proposed equity reclassification is the principal item to be voted on at the meeting. A Western Union spokesman said that the shareholders' meeting will be convened on July 31; however, management will propose an immediate adjournment to Aug. 14 without any business being conducted.

COLUMBIA, MD (JULY 26) PR NEWSWIRE - General Physics Corporation announced the appointment of Kirtland C. Gardner as president and chief executive officer of the corporation.

Gardner had been vice president of operations for National Patent

Development Corporation (AMEX: NPD) , the parent company of General Physics. Prior to his work with National Patent, Gardner had a 32 year career with Corning, Inc., including assignment as president of Steuben Glass, and was president and chief executive officer of Hunter Environmental Services, Inc. Gardner brings extensive management and business operations experience to General Physics.

With 1989 sales of $135 million, General Physics Corporation is a leading supplier of technical support services for the electric utility, automotive, and defense industries. The company was recently awarded major contracts for support of activities at the U.S. Department of Energy facilities. General Physics acquired an analytical laboratory in 1988, and has been expanding its capabilities in site remediation and environmental engineering services.

"General Physics is a great company with quality people and an excellent reputation," said Gardner. "I am extremely pleased to have been named president of this fine organization, and I look forward to its continued growth and profitability."

National Patent, 91 percent owner of General Physics, indicated that this change in management of the company will bring the depth of management experience that will enable General Physics to reach its full potential.

WELLESLEY, MA (JULY 26) PR NEWSWIRE - EG&G, Inc. (NYSE: EGG) announced that its subsidiary, EG&G Management Systems, Inc. of Albuquerque, N.M., has been awarded a $28 million Operation and Maintenance Support Contract for the U.S. Air Force Radar Target Scatter (RATSCAT) facility at White Sands Missile Range, N.M. The contract, which extends over three years, commences Oct. 1, 1990.

RATSCAT is an Air Force test facility whose major objectives are to accurately measure and report on radar target signatures, electronic system tests, and antenna radiation patterns for Department of Defense and government-sponsored programs.

"RATSCAT has long been recognized as a critical national asset that plays an important role in the development and improvement of weapons systems," noted Clark Hampton, president of EG&G Management Systems, Inc. A Technical Advisory Panel will offer a new dimension to this contract. Its members have broad experience in all aspects of range instrumentation and engineering support and will be available as needed to support the

customer in this vital program.

EG&G, Inc., an international Fortune 300 company, manufactures scientific instruments and electronic, optical and mechanical components. The company also offers security engineering services, airport security screening systems, and automotive testing services. EG&G also provides systems engineering, custom equipment, and test-site and management operating support to many agencies and laboratories of government.

RICHMOND, VA (JULY 26) PR NEWSWIRE - The board of directors of Ethyl Corporation (NYSE: EY) today declared a regular quarterly dividend of 15 cents a share on the common stock of the corporation.

The board also declared a regular quarterly dividend of $1.50 a share on Ethyl's cumulative preferred, 6 percent Series A, stock.

Both dividends are payable October 1 to shareholders of record September 14.

Ethyl's directors also declared a regular dividend of 60 cents a share on the cumulative second preferred, $2.40 convertible Series A, stock, payable October 1 to shareholders of record September 14. However, Ethyl's directors voted to call the $2.40 preferred stock for redemption on September 21 at $75 a share. The October 1 dividend will be paid in addition to the redemption price. Each share of the $2.40 preferred stock is subject through September 14 to conversion into 21.98 shares of Ethyl common stock.

The company said it called the $2.40 preferred stock in view of the limited number of shares outstanding and the New York Stock Exchange's decision on June 12 to cease trading in the shares because the number outstanding fell below the Exchange's minimum requirements.

#90207p9225 07/26/1990 ~PR Newswire

NORTH BRUNSWICK, NJ (JULY 26) PR NEWSWIRE - Guest Supply, Inc. (NASDAQ: GEST) announced today that sales for the third quarter ended June 30, 1990 were $19,496,000, versus $19,653,000 in the comparable period in 1989.

Net income for the quarter was $172,000 or $0.04 per share compared to a net loss of $349,000 or $0.09 per share in the third quarter last year.

Commenting on the results, Clifford W. Stanley, president of Guest Supply, said, "We are pleased with the third quarter results and feel the return to profitability is a major milestone for the company. Sales growth for the quarter was 12.3 percent if sales from discontinued operations are eliminated from both periods. Discontinued operations now include the Kitchen Equipment Division of Breckenridge-Remy which was divested on March 1 of this year. The increase in revenue is on plan and further indicates that we can sustain growth through our direct sales and distribution network. The improvement in net income in principally a result of the sales volume in the core business reaching a level to cover the additional fixed costs associated with the expansion of the distribution system. In addition, new equipment has improved efficiencies at our manufacturing facility in Rahway, N.J.

"We anticipate that the fourth quarter will demonstrate continued improvement in profitability."

Guest Supply is the leading manufacturer and marketer of toiletries, personal care products, and other amenities, as well as housekeeping and accessory products, to the lodging industry in the United States.

Weighted average number of shares outstanding	2,405,000	1,356,099
Net income per share based upon current weighted average number of shares outstanding	.51	.30

	Six Months	
	1990	1989
Sales	$27,636,000	$15,081,000
Net income	1,697,000	1,067,000
Net income per share	.71	.73
Weighted average number of shares outstanding	2,405,000	1,461,840
Net income per share based upon current weighted average number of shares outstanding	.71	.44

Record sales for the second quarter ending June 30, 1990 were $16,781,000 compared to a like period of 1989 of $9,215,000 on an increase of $7,566,000 or 82 percent. Record income for the second quarter of 1990 was $1,220,000 compared to a like period of 1989 of $711,000 an increase of $509,000 or 71 percent.

For the six months ending June 30, 1990, record sales were $27,636,000 compared with a like period of $15,081,000 in 1989 an increase of 83

percent. Net income for the six months ended June 30, 1990 was $1,697,000 compared with a like period of 1989 of $1,068,000 an increase of 59 percent.

During the month of June, Rexhall shipped 170 Class A Motorhomes consisting of 133 Airexs, 33 Visions and four Limiteds, a record of $6,400,000 in sales. The Vision plant made a small profit in June 1990 by producing two Visions per day.

Rexhall is now No. 1 in that State of Nevada on Sales of Class A Motorhomes through April 1990, according to William J. Rex, chairman, chief executive officer, president and majority shareholder of Rexhall.

Rexhall also announced that it had received from the attorneys for Thor Industries Inc., a Rexhall competitor, a copy of a complaint in which the attorneys stated that Thor and a subsidiary, Airstream Inc., intend to file in the United States District Court for the Central District of California against Herbert F. Boeckman II, Rexhall Industries Inc. and Mr. Rex.

Against Boeckman, the complaint alleges breach of a noncompetition agreement and obligation of good faith and fair dealing arising from the stock sale agreement relating to the sale by Boeckman of his stock in Establishment Industries Inc. to Thor in 1985. Against Rexhall and Mr. Rex, who owned no stock or other interest in Establishment and were not parties to the stock sales agreement and related non-competition agreement with Thor, the complaint alleges interference with Boeckman's obligations under, and inducing breach of, the stock sale agreement.

In the same complaint, Airstream alleges that Rexhall's use of "AIREX" in connection with a line of Rexhall's motorhomes infringes upon Airstream's claimed trademarks, "AIRSTREAM" and "AIRSTREAM EXCELLA," and alleges claims against Rexhall for trademark infringement, unfair competition and injury to Airstream's business reputation.

The complaint seeks, among other things, damages from the defendants estimated in excess of $10 million, including unspecified punitive damages and treble damages, an injunction against Rexhall's use of AIREX and an order canceling Rexhall's Federal trademark registration for AIREX.

DALLAS (JULY 26) PR NEWSWIRE - Vinland Property Trust (NASDAQ: VIPTS)

today announced operating results for the second quarter ended May 31, 1990.

For the three months ended May 31, 1990, the trust recorded net income of $1.3 million, or 22 cents per share, on revenues of $4.5 million, compared with net loss of $1.0 million, or 18 cents per share, on revenues of $1.8 million in the second quarter of the prior year.

For the six months ended May 31, 1990,the trust recorded net income of $861,000, or 15 cents per share, on revenues of $6.6 million, compared with net loss of $2.2 million, or 38 cents per share, on revenues of $3.2 million in the first half of 1989.

Vinland recognized a previously deferred gain of $3.1 million during the second quarter. This resulted from the settlement of a dispute concerning the trust's notes receivable and notes payable on Tahoe Club/Tahoe III and Tahoe Oaks apartments. Without giving effect to this gain, the trust recorded a net loss of $2.2 million, or 38 cents per share, for the six months ended May 31, 1990. As a result of the settlement, Vinland's total assets declined from $45.2 million at November 30, 1989, to $20 million at May 31, 1990.

Vinland's financial condition continued to worsen during the second quarter. Its balance of cash and cash equivalents at May 31, 1990, was $306,000, compared with $880,000 at Nov. 30, 1989. As a result of the Tahoe settlement Vinland incurred a federal tax liability of $1.5 million.

Vinland Property Trust is a combination mortgage and equity real estate investment trust which operates primarily in Texas and Oklahoma.

WASHINGTON (JULY 26) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced that O. Gene Gabbard, chairman and chief executive officer of Telecom USA, will become executive vice president and chief financial officer of MCI.

The appointment will become effective following the completion of a pending merger of the two companies.

MCI, the second largest long distance company in the country, and Telecom USA, the industry's fourth largest firm, announced a merger agreement this past April. It has been approved by the MCI board of directors and the shareholders of Telecom USA and is awaiting final clearances by the appropriate state and federal regulatory bodies.

Gabbard has been chairman and chief executive officer of the Atlanta-based Telecom USA since its formation through the merger of his former company, SouthernNet, and the Teleconnect Company, of Cedar Rapids, Iowa, in 1988. Under his leadership, Telecom USA has specialized in providing service to business in the mid-sized markets and led research and development efforts to produce new technology. Gabbard, himself, is credited with more than 20 patents.

Prior to founding SouthernNet in 1983, Gabbard was a founder and president of Digital Communications Corporation and vice president of M/A-Com, a major provider of microwave components and assemblies, fiber optic systems and equipment for microwave radio, satellite communications, CATV and data communications.

As an engineer and manager for the Communications Satellite Corporation from 1965 to 1971, he oversaw the design and development of digital satellite equipment and served on the technical committees of INTELSAT, the international satellite organization.

Gabbard is a graduate of the University of Kentucky with a bachelor's degree in electrical engineering and holds a master's degree in engineering from the University of Pennsylvania.

SAN DIEGO (JULY 26) PR NEWSWIRE - First National Corp. (AMEX: FN), parent company of First National Bank, has declared a 10 cent cash dividend on its common stock for shareholders of record as of Aug. 10, 1990.

This marks the sixth consecutive semi-annual cash dividend declared by the company. Dividends will be paid on or about Aug. 24, 1990.

"We're pleased to announce this cash dividend after posting record second quarter earnings," said Malin Burnham, chairman of the corporation. "The recent stock market activity has affected even healthy publicly held companies, but we continue to operate profitably and maintain asset quality."

First National Corp. has 3,164,510 shares of common stock issued and outstanding.

First National Bank is the second largest independent bank headquartered in San Diego with seven banking offices and three loan production offices in Southern California and one mortgage loan production office in Nevada.

CHICAGO (JULY 26) PR NEWSWIRE - Weyerhaeuser Co. (NYSE: WY), the Tacoma, Wash.-based forest products corporation, has filed a copyright infringement suit on behalf of its Innovis Interactive Technologies division that claims a New York wood treatment company has violated the copyright of Innovis' proprietary computer system for designing backyard decks.

Innovis Interactive Technologies successfully introduced the Weyerhaeuser DesignCenter(TM) product to home center stores and lumberyards last year. The copyrighted visual display in the interactive kiosk allows store personnel and customers to easily custom design home improvement projects.

Recently Osmose Wood Preserving of Buffalo, N.Y. began displaying a deck design system that Weyerhaeuser alleges has a visual display and user interface that is substantially similar to that of the Innovis system.

In a suit filed in the United States District Court in Chicago, Weyerhaeuser seeks to bar Osmose from selling or leasing its product, and asks for monetary damages and all profits realized by the infringing deck design system.

Innovis Interactive Technologies President Mark R. Lembersky says his Tacoma-based company's pioneering interactive tool for the home improvement industry will be vigorously protected. "Our copyright and the system itself represent a significant investment for our company and an unmatched standard for retail applications of sophisticated visual design technology."

The suit by Weyerhaeuser on behalf of Innovis comes nearly one year after Lembersky accepted the Computerworld Smithsonian Award for Innovative Use of Information Technology for his development of the DesignCenter(TM) product with Innovis co-founder Uli Chi. The company, which makes a variety of sophisticated visualization tools for non- computer professionals, was nominated for the award by Lotus Chairman Jim Manzie.

CALGARY, ALBERTA (JULY 26) PR NEWSWIRE - Canadian Occidental Petroleum Ltd. (AMEX, Toronto: CXY) reports net income of $16.5 million and earnings per common share of 25 cents for the six months ended June 30, 1990 as compared to net income of $20.1 million and earnings per common share of 30 cents for the corresponding period of 1989. Net sales for the six months ended June 30, 1990 were $259.8 million as compared to $282.2 million for 1989.

Net income for the second quarter of 1990 was $7.3 million as compared to $11.0 million for 1989. Earnings per common share were 11 cents on net sales of $125.0 million for the three months ended June 30, 1990 compared to 16 cents on net sales of $142.3 million for the corresponding period of 1989.

Funds flow from operations before exploration expense was $72.8 million for the six months ended June 30, 1990, as compared to $103.6 million reported for the corresponding period of 1989. For the three months ended June 30, 1990 and 1989 funds flow from operations amounted to $23.4 million and $52.2 million respectively. Profits and funds flow in the second quarter of 1990 were adversely affected by low oil and gas prices, reduced production volumes and a high Canadian dollar.

Total operating profits for the six month period ended June 30, 1990 were $41.8 million as compared to $53.5 million for the corresponding period of 1989. Operating profits for the three months ended June 30, 1990, were $23.2 million as compared to $29.3 million for the corresponding three months of 1989.

In the Oil and Gas division operating profits were $28.0 million for the six months ended June 30, 1990 compared with $38.4 million for the corresponding period for 1989. In the United States, lower natural gas sales volumes are the result of maintenance workovers and replacement well drilling in the offshore Gulf Coast South Marsh Island field. This work

is expected to be completed in the fourth quarter of 1990.

The board of directors has declared a quarterly dividend of 10 cents per common share payable Oct. 1, 1990, to shareholders of record on Sept. 5, 1990.

#90207p9246 07/26/1990 ~PR Newswire

STURBRIDGE, MA. (JULY 26) PR NEWSWIRE - SpecTran Corporation (NASDAQ: SPTR) today reported a continuation of profitable results for its second quarter and first half ended June 30, 1990.

Revenues for the second quarter of 1990 increased 15.8 percent to $2,176,234 compared with revenues of $1,879,200 for the second quarter of 1989. Net income for the 1990 second quarter of $118,403 (3 cents per share) compared with a net loss of $237,365 (5 cents per share) for the same period in 1989.

Revenues for the first half of 1990 increased 21.4 percent to $4,249,588 compared with revenues of $3,501,294 for the first half of 1989. Net income for the 1990 first half of $154,630 (3 cents per share) compared with a net loss of $380,304 (8 cents per share) in the 1989 first half.

Commenting on the results, SpecTran's president and chief executive officer, Raymond E. Jaeger, said, "The company has sustained profitable results each quarter since returning to profitability in last year's fourth quarter. Higher production levels in 1990 made possible by improved market demand for our products and capacity expansion implemented during 1989 have lowered unit production costs resulting in a higher gross profit margin in 1990. The improved results are attributable to both the revenue growth and the higher margin on sales.

"During this year's June quarter the company paid its total commitment of $300,000 to the class action settlement fund. Largely as a result of this payment, cash flow from operations for the first half of 1990 was negative by $90,739. Our goal remains to achieve positive cash flow from operations in 1990. The provision charged against earnings last year was sufficient to cover the payment to the settlement fund and the legal fees incurred this year in connection with the suit. We do not expect any additional charges against earnings this year in connection with either the suit or the settlement."

SpecTran Corporation develops, manufactures and markets glass optical fibers.

BOSTON (JULY 26) PR NEWSWIRE - Bank of Boston Corporation (NYSE: BKB) reported today net income of $4 million for the quarter ended June 30, 1990. This compares with net income of $98 million reported for the same quarter a year ago. Net income for the first half of 1990 was $47 million compared with $187 million for the same period in 1989.

During the quarter, total nonaccrual assets and other real estate owned (OREO) declined to $1,957 million at June 30 from $1,981 million at March 31. The corporation recorded a $125 million provision for credit losses in the quarter, bringing the total to $250 million for the first half of 1990. Compared with last year's provisions of $36 million in the second quarter and $72 million for the first half, this represents increases of $89 million and $178 million, respectively. During the second quarter, the corporation charged off $200 million of loans in 1990 and $88 million in 1989.

Consolidated net interest revenue, on a fully taxable equivalent basis, was $246 million for the second quarter of 1990, compared with $304 million for the same period in 1989.

Noninterest expense was $316 million in the second quarter, compared with $298 million in 1989. Noninterest expense for the six-month period in 1990 was $642 million, compared with $595 million in 1989. Employee costs increased $2 million in the quarterly comparison and $9 million in the year-to-date comparison. Employee costs included the effect of a $5 million reduction in estimated obligations for unfunded employee benefit plans during 1990's second quarter. Professional fees increased by $16 million in the quarterly comparison and $24 million in the six-month comparison. Costs associated with OREO were $10 million in the quarter and $24 million in the six months, increases of $5 million and $12 million respectively. Asset quality

The reserve for possible credit losses at June 30, 1990, was $892 million or 3.91 percent of outstanding loans and leases, compared with $967

million or 4.00 percent at March 31, 1990, and $645 million or 2.41 percent at June 30, 1989. The reserve for possible credit losses was 73 percent of nonaccrual loans at June 30, 1990; 75 percent at March 31, 1990 and 53 percent at June 30, 1989.

Bank of Boston Corporation, with assets of $37 billion at June 30, 1990, is a New England-based superregional bank holding company with both national and international operations. Its major banking subsidiaries are The First National Bank of Boston, with headquarters in Massachusetts; Casco Northern Bank, N.A., in Maine; Bank of Boston Connecticut; Rhode Island Hospital Trust National Bank; and Bank of Vermont.

NEWARK, NJ (JULY 26) PR NEWSWIRE - Continuing with its international route expansion plans from Newark International Airport, Continental Airlines today filed an application with the U.S. Department of Transportation to fly non-stop flights from here to Madrid.

The announcement comes on the heels of Continental's recent filing of applications for non-stop service from Newark to Moscow, Berlin, Rome and Milan.

Currently no other carrier services any of these cities -- including Madrid -- from Newark.

"With the impending growth of the European economic community, Continental is committed to laying the groundwork for our expansion into those key markets over the next several years," said Richard Lisser, city vice president of the airline in Newark, "Madrid is expected to be one of these key cities and the ability to service this market from Newark will assist the regional business community in reaching companies in Spain."

Under terms of the application, Continental is requesting one daily non-stop flight beginning in April of 1992. The airline has selected DC-10-30s as the aircraft it will use.

Continental currently offers a wide range of international service at Newark, including non-stop flights to London, Paris, Mexico City, and points throughout the Caribbean. The growth of Continental's international routes and its partnership with SAS Airlines, has made Newark an international gateway for the entire nation. Offering easier and quicker access than Kennedy Airport, Newark is quickly becoming the airport of choice for business and leisure travelers in the New York metropolitan area.

Continental Airlines is Newark International Airport's largest carrier, moving nearly 10 million passengers through Terminal C on its 303 daily jet and commuter flights. The company employs more than 6,000 workers in New Jersey and 37,000 system wide. Continental currently flies to 64 destinations from Newark.

#90207p9257 07/26/1990 ~PR Newswire

HEWLETT, N.Y. (JULY 26) PR NEWSWIRE - Anchor Savings Bank FSB (NASDAQ: ABKR) today reported net income before the payment or accumulation of preferred stock dividends of $40.9 million or $2.15 per common share for the three months ended June 30, 1990. The net loss before preferred stock dividends was $26.9 million, or $1.75 per common share for the year-ago fourth quarter.

For the fiscal year ended June 30, 1990, Anchor recorded a net loss of $148.1 million before the payment or accumulation of preferred stock dividends of $13 million as compared to a net loss of $23.1 million before preferred stock dividends of $14.3 million for the prior fiscal year. This amounted to a net loss per common share of $9.22 for fiscal 1990 as compared to a loss of $2.14 per common share for fiscal 1989. The fiscal 1990 loss was attributable to a $175 million write-off of supervisory goodwill in the third quarter.

James M. Large, Jr., chairman and chief executive officer, stated, "Both the quarterly and annual results reflect a continuing improvement in Anchor's operating performance. Excluding $45.7 million of one-time pre-tax gains on the sale of assets associated with the implementation of Anchor's capital plan and an additional $3.8 million provision for credit losses, net income for the quarter amounted to $1.9 million. This was an improvement from the $3 million core loss reported last quarter, the $7.3 million loss reported in the second quarter and the $12.3 million loss reported in the first quarter of the year."

He also indicated that the year has been quite satisfying in many other ways. Consumer deposits have grown 8.7 percent, expenses have been reduced significantly, interest rate sensitivity has been sharply reduced (the one-year negative gap is now under 4 percent), and most importantly, the quality of Anchor's loans remains high.

During the fourth quarter, Anchor continued the implementation of its capital plan and certain of these activities resulted in a significant one-time increase in earnings. During the quarter, Anchor sold $1.5 billion in mortgage servicing rights which resulted in a net pre-tax gain of $10 million. In addition, certain deeply discounted fixed rate commercial and residential mortgage loans acquired in past supervisory mergers were sold resulting in a gain of $32.6 million. A $3.1 million gain was also generated by the purchase of an annuity to satisfy Anchor's pension liability to retired employees. Large commented, "The asset sales contemplated in Anchor's capital plan have been virtually completed. We have now focused our energies on branch sales and the conversion of the cumulative preferred stock to an instrument that will count as tangible capital. We recently announced the sale of $400 million in Georgia deposits and have reached some common ground in negotiating the preferred stock with the FDIC. Anchor has been advised that this may require the formation of a holding company. This could result in substantial negative adjustments, the magnitude of which cannot be determined at this time."

At June 30, 1990, Anchor's tangible capital was a negative $150.8 million as compared with a deficit of $201.8 million at March 31, 1990. Anchor is comfortably in compliance with the required June 30, 1990, capital levels as outlined in the capital plan. If current negotiations with the FDIC result in a conversion of the $157 million of cumulative preferred stock held by the FSLIC Resolution Fund to an instrument which can be counted as core capital, Anchor will have regained a positive tangible capital position.

Anchor Savings Bank is among the 25 largest U.S. thrifts. It operates 122 branches in four market areas: 62 in metropolitan New York/New Jersey, 18 in upstate New York, 24 in Georgia and 18 in Florida. Anchor recently announced the sale of the deposits in 18 branches in Georgia to Trust

Company of Georgia. Two other branches in Georgia have also been sold and Anchor expects that it will exit the state in accordance with its capital plan in fiscal 1991.

PITTSBURGH (JULY 26) PR NEWSWIRE - Grant Street National Bank (in Liquidation) reported today that collections on assets during the three months ended June 30 were $90.7 million and exceeded the adjusted cost basis of the assets liquidated by $15.0 million.

In addition, as a result of a periodic asset re-evaluation, net unrealized gains of $9.2 million were recorded during the quarter. After financing costs, expenses, taxes and dividends accrued on the senior preferred stock net assets allocable to shareholders' equity rose $5.7 million. Shareholders' equity was $37.3 million at quarter end.

William B. Eagleson Jr., chairman, president and chief executive officer, said that second quarter collections included $56 million from liquidation of two of Grant Street's largest remaining assets. He noted that of the $639 million of assets originally acquired, only about $120 million remains to be liquidated.

Grant Street announced in June that full provision had been made for its remaining publicly held debt and that retirement of the senior preferred stock had begun.

INDIANAPOLIS, (JULY 26) PR NEWSWIRE - It was announced today by Chairman and CEO William E. Bindley that the board of directors of Bindley Western Industries Inc. (NASDAQ-NMS: BIND) declared a cash dividend of 1-1/2 cents per share payable Sept. 5, 1990, to shareholders of record Aug. 10, 1990. The declaration was made at the regular quarterly meeting of the board, which was held July 26, 1990.

In commenting on its first-ever cash dividend, Bindley indicated the board felt comfortable that the restructuring to a full line, full- service wholesaler that began in 1987 has been substantially completed with positive results and that future prospects for the company appeared favorable. The cash dividend is further evidence of the company's commitment to enhance shareholder value, he concluded.

Bindley Western with 1989 sales of $1.6 billion, is one of the largest drug wholesalers in the United States and specializes in the distribution of ethical pharmaceuticals and related products. The firm serves customers in 39 states through distribution centers in Atlanta, Ga.; Brockton, Mass.; Charlotte, N.C.; Dallas, Texas; Houston, Texas; Indianapolis, Ind.; North Hollywood, Calif.; Orlando, Fla.; Phoenix, Ariz.; and Stamford, Conn.

#90207p9263 07/26/1990 ~PR Newswire

PHILADELPHIA (JULY 26) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) (Conrail) has agreed with the State of Indiana to put up for sale Conrail's Shelbyville Line between Shelbyville, Ind., and Cincinnati, Ohio.

At the request of Indiana Gov. Evan Bayh, Conrail met with Indiana state officials early this year to seek an alternative to the abandonment and dismantlement of the 58.5-mile segment of this line between Shelbyville and Thatcher, Ind. Abandonment and dismantlement was authorized by the Interstate Commerce Commission in 1982. Since then, the line has remained intact because of an agreement among Conrail, the State, and an association of local shippers. That agreement expired in April 1990.

As a result of discussions with Indiana officials, Conrail has agreed to offer for sale the 81-mile portion of the line from Shelbyville through Thatcher to Cincinnati and provide access to connections with other railroads at Indianapolis and Cincinnati. The sale will be to a financially viable short line railroad and designed to protect the interests of Conrail's employees and customers.

Working with state officials from Indiana and Ohio, Conrail has met with six qualified short line railroads that have existing operations in the two states. Three of these railroads submitted bids: Central Railroad of Indianapolis, Indiana and Ohio Railway, and Indiana Hi-Rail Corp.

Conrail said it expects to select a purchaser late this year and close the sale by early 1991.

CONTACT: Phil Schermerhorn of Indiana DOT, 317-232-5518, or Robert L. Libkind or David Neurohr, 215-977-4594, both of Conrail

COLUMBUS, Ind. (JULY 26) PR NEWSWIRE - Arvin Industries (NYSE: ARV) announced today that it has entered into a joint venture agreement with Kayaba Industry Co., Ltd., Japan's leading ride control company. The agreement establishes a joint approach to the European original equipment ride control market through A.P. Amortiguadores, S.A. (APA), a leading European OE supplier of which Arvin owns 75 percent and Kayaba owns 25 percent. APA, located in Pamplona, Spain, had 1989 sales of approximately $100 million to customers, including Ford (Europe and U.S.), Renault and Volkswagon (SEAT). Kayaba has also extended the term of its existing technical assistance agreement with APA.

In making the announcement, James K. Baker, Arvin chairman and CEO, said, "This agreement commemorates nearly a year of close cooperation between Arvin and Kayaba in managing our jointly held company. During this period

our great respect for Kayaba has been confirmed. Kayaba is an excellent partner in all respects. Their dedication to the highest technical quality and customer service standards is unsurpassed. We are most optimistic about the prospects for APA in the European market and equally excited about the formalization of our partnership with Kayaba.

"Arvin's strategy is to become a leading supplier of auto parts to the global market. This partnership between the best of Japan and the best of North America working from the solid foundation built by APA over the years will give the European market technology, quality and service heretofore unknown."

Arvin Industries, Inc., an Indiana corporation, is a global company whose products are sold in more than 100 countries in North and South America, the European Common Market, the Pacific Rim and the Third World.

#90207p9266 07/26/1990 ~PR Newswire

SYRACUSE, NY (JULY 26) PR NEWSWIRE - Niagara Mohawk Power Corp. (NYSE: NMK) today reported second quarter earnings of $24.9 million or 18 cents per share, compared with $22.5 million or 17 cents per share for the second quarter of 1989.

For the year ended June 30, 1990 earnings were $129.1 million or 95 cents per share. For the 12-month period one year ago, earnings were $106.7 million or 79 cents per share.

Earnings for the quarter and year ended June 30, 1990 were higher as a result of the August 1989 regulatory agreement that permits recovery of replacement power costs incurred because of the Nine Mile Unit One outage. Earnings for the quarter and 12 months ended June 30, 1989 were reduced by approximately $20 million or 10 cents per share and $41 million or 20 cents per share, respectively, of Unit One replacement power costs not recovered from ratepayers.

Earnings for the year ended June 30, 1990 were also higher because of expense deferrals provided under the agreement. Included in earnings for the 12-month period ended June 30, 1990 is $37 million or 18 cents per share of these expense deferrals.

Total electric sales increased 2.2 percent for the second quarter of 1990, while sales to ultimate customers decreased 0.3 percent, compared with the second quarter of 1989. For the 12 months ended June 30, 1990, total electric sales increased 1.9 percent and electric sales to ultimate

customers increased 0.9 percent, compared with the same period last year.

Electric revenues for the quarter increased 5.1 percent from $597.6 million to $628.3 million. For the 12 months ended June 30, 1990, electric revenues were $2,538.4 million, a 7.1 percent increase over the previous 12-month period. Revenue increases in the quarter and 12-month periods are due in part to the recovery of replacement power costs associated with the Nine Mile Unit One outage and increased sales.

Total gas delivered decreased 2.9 percent for the quarter primarily due to warmer weather conditions. For the 12-month period, total gas delivered increased 2.6 percent.

#90207p9267 07/26/1990 ~PR Newswire

INDIANAPOLIS, IN (JULY 26) PR NEWSWIRE - Bindley Western Industries Inc. (NASDAQ: BIND) announced today that both sales and earnings for the second quarter ending June 30, 1990 continued at a record pace and were the best ever recorded for any quarter in its history.

Sales of $483 million were 29 percent ahead of the $374 million recorded in 1989. Earnings increased 73 percent to $1.6 million or $.27 per share on a primary basis, from $1.0 million or $.17 per share in the 1989 quarter. Fully diluted earnings per share amounted to $.24 in 1990 against $.17 in 1989.

For the six-month period, sales increased 24 percent to $916 million while earnings increased 76 percent to $3.4 million. Primary earnings per share increased to $.52 from $.31 in 1989 while fully diluted earnings per share amounted to $.47 against $.31 in 1989.

In commenting on the record performance for the quarter, Chairman and CEO William E. Bindley indicated the strong performance came from all areas of the company's business. Specifically, the addition of a large volume chain warehouse customer in May helped contribute to a 21 percent increase in actual gross margin to $12.1 million in the quarter, compared to $10.0 million in 1989. Gross margin as a percent of sales, though, declined slightly from 2.66 percent in 1989 to 2.50 percent in 1990 because of this increased chain warehouse business. Contributing further to the favorable results was the continued decline in general and administrative expenses as a percent of sales from 1.40 percent in 1989 to 1.29 percent in 1990.

In discussing plans for the balance of the year, Bindley indicated the move to the new 50,000-square-foot southern California facility and the

doubling of space in the Charlotte distribution center should be complete by the end of the third quarter. With the restructuring program substantially completed, he indicated the company would be accelerating its review of acquisition, expansion and new financing opportunities.

Bindley Western with 1989 sales of $1.6 billion, is one of the largest drug wholesalers in the United States and specializes in the distribution of ethical pharmaceuticals and related products. The firm serves customers in 39 states through distribution centers in Atlanta; Brockton, Mass.; Charlotte, N.C., Dallas; Houston; Indianapolis; North Hollywood, Calif.; Orlando, Fla.; Phoenix, Ariz., and Stamford, Conn.

WINDER, GA. (JULY 26) PR NEWSWIRE - First Federal Savings Bank of Georgia (NASDAQ-NMS: FSBG) has announced a net loss of $509,000 or $0.53 per share

unaudited for the three months ended June 30.

Chairman and Chief Executive Officer Jerry H. Lassiter said re-classification of three previously healthy loan relationships to non-earning status was the reason for the loss, resulting from a soft real estate market. He added: "We've responded by assigning all problem loans to our work-out team and strengthened our promotion and lending policies to attract new high quality business. The process will take time. But given our positive net worth, our location in the fast-growing Athens corridor, and our ability to service as well as to originate loans, we'll be well positioned to benefit from a future economic recovery."

Lassiter also announced that David R. Carr Jr. and Larry R. Cole were elected as directors at the company's annual meeting of shareholders today and that John D. Deal, Lassiter and W. Quentin Randolph were re-elected. Carr, Cole, Deal and Lassiter will serve for a three-year term, and Randolph will serve for a one-year term prior to his retirement.

First Federal Savings Bank of Georgia is a federal capital stock savings bank with banking and mortgage origination offices located in Barrow, Clarke, Gwinnett, Jackson and Walton counties in north Georgia.

SAN JOSE, CA (JULY 26) PR NEWSWIRE - Pharos AB announced today that it has completed its purchase of Spectra-Physics, the world's leading producer of lasers, laser systems and chromatography instrumentation, from CIBA-GEIGY. Terms of the purchase were not disclosed.

"We are delighted to have completed the purchase of Spectra-Physics," said Lawrence C. Karlson, chairman of Pharos. "In the ten weeks since we agreed to buy the company, we have continued to review its operations and have confirmed our original excitement about the purchase. The Spectra-Physics operating units are all strong niche businesses which we intend to build as complements to our existing high-technology operations.

Pharos, based in Stockholm, Sweden, is a group of high-technology companies specializing in the manufacture of state-of-the-art industrial products for niche markets throughout the world. These include laser, infrared, electro-optical, process control, fine mechanics and microwave businesses. With the addition of Spectra-Physics, Pharos will have a number of distinct niche-oriented high-tech businesses, most of which occupy leading positions in their respective markets. The two companies

together had sales of approximately $560 million in 1989.

Pharos and CIBA-GEIGY had announced the signing of a definitive agreement on May 15, 1990.

BOSTON, (JULY 26) PR NEWSWIRE - Beginning Monday, July 30, Eaton Vance Prime Rate Reserves, a continuously offered, closed-end fund investing primarily in senior, fully secured floating-rate loan interests, will accept investments from new and current shareholders.

Prime Rate Reserves was closed to new investments in November 1989 to allow management to invest the $1.7 billion in assets raised after the fund was first offered in July.

"We're reopening Prime Rate Reserves because the fund is now fully invested in loan interests," said James B. Hawkes, the fund's president. "As the percent of assets invested in loans has increased, the fund's effective yield has also risen, reaching 10.00 percent in May and 10.03 percent in June, compared to an average current prime rate of 10.00 percent for leading U.S. banks. It is expected that July's effective yield will also slightly exceed the prime rate.

"The fund will remain open as long as its rate of growth allows it to continue paying shareholders an effective yield approximately equal to the prime rate," Hawkes said.

Investors in the fund have also enjoyed a stable $10 net asset value per share since the fund began operations in 1989.

Eaton Vance Prime Rate Reserves is offered through securities dealers. The fund's investment advisor is Eaton Vance Management of Boston, a subsidiary of Eaton Vance Corp. (NASDAQ: EAVN).

PHILADELPHIA (JULY 26) PR NEWSWIRE - Telephone subscribers who want the convenience of a home intercom system no longer have to go out and buy one.

A new optional IQ service from Bell of Pennsylvania lets subscribers dial their home extensions and use the phone as an intercom.

Called Home Intercom, the new service will permit users to ring other extensions sharing the same telephone number by dialing their own number on a touch-tone or rotary equipped phone. When a Home Intercom call is activated, each extension rings with a distinctive ringing pattern, turning a single phone line into an intercom system.

The new service will provide an economical, virtually maintenance- free intercom system for customers in large homes, for those with young children, or for households with members that have limited mobility, such as elderly and disabled people.

The new service costs $2.25 a month. A variation of Home Intercom is also available. Intercom Extra, which will cost $6.50 a month, uses different ringing patterns to signal individual extensions. Users dial a code for an individual extension rather than the whole phone number. Outside calls can also be transferred to other extensions. Finally, Intercom Extra provides Three-Way Calling, which allows the customer to add a second outside call to a call in progress.

The Public Utility Commission has approved Bell of Pennsylvania's request to introduce Home Intercom and Intercom Extra. The services are being made available to customers as facilities permit and will be offered to the majority of Bell of Pennsylvania's customers by the end of the year.

To find out if Home Intercom and Intercom Extra is available in a particular area, customers can call their local business office.

BETHESDA, MD (JULY 26) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has received a contract valued at approximately $300 million to design and develop a new jet engine thrust reverser for Pratt & Whitney and to produce 200 units.

Thrust reversers redirect the flow of jet engine exhaust to assist aircraft braking action after landing.

The new thrust reversers will be designed and produced for Pratt & Whitney's PW4168 turbofan engine by Martin Marietta Aero & Naval Systems at Baltimore. The contract includes a design and development phase and a 200-unit production order. Actual production will begin in 1993. The contract also includes provisions for follow-on production of up to 300 additional thrust reversers.

"This program broadens our business base with the addition of a major new customer in the expanding commercial aerospace market," said Martin M. Koshar, president of Aero & Naval Systems. The new contract will require a gradual increase in engineering and production positions at the Baltimore facility, with the exact number dependent upon production schedules.

The PW4168 will be the most powerful model in Pratt & Whitney's advanced PW4000 engine family when it enters service on Airbus Industries' A330 wide-body twinjet. The 68,000-pound-thrust engine is scheduled for certification in 1992 and entry into service on the A330 in 1994.

Pratt & Whitney, an operating unit of United Technologies Corporation (NYSE: UTX), is a world leader in the design, production, marketing, and support of commercial and military aircraft engines. It is based in East Hartford, Conn.

DURHAM, NC (JULY 26) PR NEWSWIRE - At the annual stockholders' meeting held today, Liggett Group Inc. (NYSE: LIG) stockholders approved changing the Company's name to Brooke Group Ltd. The new New York Stock Exchange ticker symbol will be BGL commencing Monday, July 30, 1990.

Last month, the Company restructured its organization by separating its business into two separate subsidiary corporations, Liggett & Myers Tobacco Company and Impel Marketing Inc. The company also announced that Liggett & Myers Tobacco Company will be renamed Liggett Group Inc. effective July 27, 1990. According to Bennett S. LeBow, Chairman, President and Chief Executive Officer, these changes are in keeping with the Company's plan to diversify.

In addition to the reelection of Mr. LeBow and Clarence W. Spangle to the board today, four new directors were elected. They are: Richard S. Ressler, Vice President of the Company and Executive Vice President of Brooke Management Inc; Michael Rosenbaum, Vice President of the Company and Senior Vice President of Brooke Management Inc; Jean E. Sharpe, Vice President and Secretary of the Company and Vice President and General Counsel of Brooke Management Inc.; and Steven J. Green, Chief Executive Officer of Samsonite Corp.

At the board of directors meeting following the annual meeting, the board declared a quarterly cash dividend of $0.14 per share, payable on August 14, 1990 to record holders of the Company's common stock on August 6, 1990.

#90207p9298 07/26/1990 ~PR Newswire

MINNEAPOLIS, (JULY 26) PR NEWSWIRE - Michael Foods (NASDAQ: MIKL) today announced record earnings for the second quarter ended June 30, 1990. Earnings were $4.8 million, or $.43 per share, as compared to $2.3 million or $.20 per share for 1989's second quarter. This represented a 108-percent increase in net earnings. Sales rose 101 percent to $120.0 million from $59.6 million in the previous year's second quarter.

Earnings for the first six months of 1990 rose 95 percent to $9.4 million, or $.85, per share from $4.9 million, or $.43 per share. First-half sales increased 105 percent to $232.5 million from $113.2 million in 1989's first six months. Financial results for 1990's second quarter and first six months reflect the consolidation of results from the Milton G. Waldbaum Company beginning Jan. 1, 1990. Effective March 1, 1990, Michael Foods acquired the 50 percent of Waldbaum it did not previously own. Half of Waldbaum's earnings were deducted as minority interest in the months of January and February. Pro forma sales for last year's second quarter and first half would have been $90.6 million and $178.0 million, respectively,

if Waldbaum had been wholly owned in those periods.

In commenting on the results, Chief Executive Officer Richard G. Olson said, "All four divisions contributed to our strong sales and earnings performance in the second quarter. We experienced very strong sales growth throughout the first half. This performance was the result of volume increases, which also gave us excellent earnings gains.

"We were pleased with the strong earnings of our egg division during the quarter, which was a period of relatively low egg prices. Our position as a low cost producer of eggs and the on-going change in our product mix toward value-added products are lessening the sensitivity this division has to egg prices. We have also seen progress with our aseptic egg product -- Easy Eggs(TM). The product was profitable for the quarter."

Olson also commented that "We have seen good demand for our refrigerated potato products. Sales in this important product category are up substantially from a year ago and have been exceeding our expectations."

Michael Foods also announced that its board of directors declared a regular quarterly cash dividend of $.05 per share. The dividend is payable Aug. 20, 1990, to shareholders of record as of Aug. 6, 1990.

Michael Foods is a diversified food processor and distributor with particular interests in eggs and egg products, refrigerator case products, frozen and refrigerated potato products, and dairy products, including ultrapasteurized ice milk mix, milk and specialty products. Subsidiaries include Crystal Foods, Inc.; Northern Star Company; Kohler Mix Specialties Inc.; the Milton G. Waldbaum Company; Morning Glory Eggs, Inc.; Wisco Farm Cooperative; Farm Fresh Foods, Inc.; Drallos Potato Co., Inc.; Country Queen, Inc.; and Reddi Egg America, Inc.

WHITE PLAINS, NY (JULY 26) PR NEWSWIRE - Eastchester Financial Corporation (NASDAQ: ECFC) holding company for Eastchester Savings Bank today reported a net loss of $1,198,000 or 31 cents per share for the quarter ended June 30, 1990. These results compare with net income of $1,514,000 or 39 cents per share for the second quarter of 1989. In addition, the company has announced that it has restated its first quarter earnings by $239,000 to adjust for an error in the first quarter financial

statements. The restated first quarter financials indicated net income of $964,000, earnings per share of 25 cents, total assets of $533.7 million and shareholders' equity of $78.9 million.

For the first half of 1990, the company had a net loss of $234,000 or 6 cents per share, compared to net income of $3.0 million for the six months ended June 30, 1989, which includes the results of the company and the bank prior to the bank's conversion from a mutual to stock ownership in April 1989.

The loss for the second quarter reflects a loan loss provision of $2.6 million. This quarterly provision increased the allowance for possible credit losses from $2.0 million at March 31, 1990 to $4.6 million at June 30, 1990. Non-performing assets rose from $12.0 million at March 31, 1990 to $20.5 million at June 30, 1990. Net interest income of $3.8 million for the three months ended June 30, 1990 compared with $4.9 million for the comparable period last year reflecting increased interest expense relating to higher interest rates in 1990 and, to a lesser extent, lost interest and a reversal of interest on non-performing assets.

"The increase in non-performing assets, primarily in the construction and land loan portfolios, is attributable to the continued downturn in the local economy, especially the real estate market," said Malcolm J. Delaney president and chief executive officer. "The bank is making every effort to bring resolution to these non-performing loans," Delaney said.

Total other expenses were $3.2 million in the second quarter of 1990 versus $2.3 million in the 1989 second quarter. The increase over last year related to higher professional fees and salary and benefit expenses of $330,000 and $200,000, respectively, as well as a corresponding increase in general and administrative fees primarily related to being a public company. At June 30, 1990, total assets were $530.6 million, net loans were $334.0 million and deposits were $439.7 million. Shareholders' equity of $77.7 million was equivalent to 14.65 percent of total assets and $19.99 per share.

As previously announced, Eastchester has entered into a definitive agreement under which Eastchester will merge with a subsidiary of North Fork Bancorporation, for a purchase price of $20 per Eastchester share. Expenses relating to this proposed merger of approximately $240,000 have been included in the second quarter financial results.

Eastchester Financial Corporation is the holding company for Eastchester Savings Bank. Eastchester Savings is a New York State chartered, FDIC-insured savings bank, serving the communities of Mount Vernon, Fleetwood, Pelham, Eastchester, and Larchmont in Westchester and Central Nyack, New City, Suffern, and Valley Cottage in Rockland.

SAN RAFAEL, CA (JULY 26) PR NEWSWIRE - Fair, Isaac and Co. Inc. (NASDAQ: FICI) reported net income of $558,000 (10 cents per share) for its third fiscal quarter ended June 30, 1990, a gain of 45 percent over the $384,000 (7 cents per share) earned in the same period a year ago. Revenues of $6.6 million for the three months ended June 30 were up 16 percent relative to the $5.7 million recorded in last year's third quarter.

Recovering from a first quarter deficit of $404,000 (7 cents per share), the company posted earnings of $577,000 (10 cents per share) for the nine-month period. This compares with net income of $1,237,000 (22 cents per share) for the first nine months of fiscal 1989. Revenues of $18.0 million for the year to date were up 9 percent.

Operating income of $529,000 for the latest three months was more than

double the $232,000 Fair, Isaac earned in the same period a year ago. President and Chairman William R. Fair said the gain reflected improvements in expense control and manufacturing productivity, as well as "steadily icreasing market acceptance of the company's Adaptive Control account management products and services."

Established in 1956, Fair, Isaac is a pioneer and world leader in the development of rule-based control systems, products, and services for the retail credit industry. It also produces control systems for utilities and insurance underwriters. Fiscal 1989 revenues were $23.2 million.

PORTLAND, ORE. (JULY 26) PR NEWSWIRE - Oregon Steel Mills Inc. (NYSE: OS) at its board of directors' meeting today, declared a two for one stock split to be paid on Oct. 11 to shareholders of record on Sept. 27. The split will be effected by paying to each shareholder of stock a special dividend of one share of company common stock for each share of common stock held by the holder. The stock split is subject to stockholder approval of an amendment to the company's Restated Certificate of

Incorporation which would increase the authorized number of shares of common stock from 14 million to 30 million. A special stockholders meeting will be held on Sept. 27 in Portland to vote on the amendment. The shareholders of record date for this special meeting of stockholders is Aug. 24.

The board of directors also declared a quarterly cash dividend of 20 cents per share to be paid Aug. 31 to shareholders of record Aug. 8.

Oregon Steel Mills is a producer of steel plate and large-diameter steel pipe with facilities in Portland, Ore., Napa and Fontana, Calif.

NEW YORK (JULY 26) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced that it's Philadelphia office has started construction of the 40-story Commerce Square Phase II building complex in downtown Philadelphia. This will be the seventh project handled by Turner for Maguire Thomas Partners and one of two contracts secured from this client in as many months.

The one million square-foot office building will be a mirror image of the existing Commerce Square Phae I building, which was also built by Turner. Scheduled for completion in July 1992, the new facility was designed by the architectural firm of Pei, Cobb, Freed along with Ballinger, a Philadelphia-based firm.

In Santa Monica, Calif., Turner's Los Angeles office will handle construction of the Ocean Hotel for Maguire Thomas Partners. The 173-room facility, designed by Charles Moore with Langdon Wilson acting as executive architect, is scheduled for completion in October of 1992.

"Turner's success is based on repeat business from satisfied clients. In fact in 1989, more than 70 percent of our contracts were secured from repeat clients," said Turner president, Harold J. Parmelee. "I am very pleased about our continued association with Maguire Thomas Partners."

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest builder of commercial, industrial, hospital and healthcare, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

During 1989, The Turner Corporation completed $3.6 billion of construction.

#90207p9315 07/26/1990 ~PR Newswire

SEATTLE (JULY 26) PR NEWSWIRE - Sales of $13.404 billion and net earnings of $689 million or $1.99 per share for the first half of 1990 were reported by Frank Shrontz, Boeing (NYSE: BA) chairman and chief executive officer. First half 1989 sales were $9.073 billion and net earnings, before restatement for the effect of adopting a change in accounting for income taxes, were $356 million, or $1.03 per share. Including the restatement, first half 1989 earnings were $654 million, or $1.89 per share.

Sales for the second quarter of 1990 were $6.969 billion with earnings of $387 million, or $1.12 per share, compared with 1989 sales of $5.072 billion, with earnings of $195 million, or 57 cents per share. The 1989 data has also been restated for the 1990 three-for-two stock split.

The increase in net earnings for the second quarter and the first half of 1990 compared to the same periods of 1989, excluding the 1989 restatement for the accounting change, is primarily due to higher commercial transport sales volume and operating margin. The above items were partially offset by a higher effective federal income tax rate.

Shrontz again stated that the technical, cost and schedule problems on certain U.S. Government developmental and production programs have not been fully resolved. Although progress has been made, the impact of these operational problems, continued cost-share (principally related to the Advanced Tactical Fighter) and defense budgetary pressures will result in a significant 1990 operating loss for the company's defense and space business.

Accomplishments during the first half of 1990 include recovering pre-strike production rates and then increasing rates on the 737, 757 and 767 jet transport programs; certification and delivery of the 737-500 jet transport; ratification of a new labor contract with de Havilland's hourly and general office bargaining units; completion of airworthiness testing of the United Kingdom's first E-3 AWACS; and the first test flights of the Airborne Optical Adjunct's integrated system and the MH-47E Special Operations Forces helicopter prototype.

Key challenges for the remainder of 1990 in the commercial transport business include maintaining schedule and cost control at the higher jet transport production rates and obtaining firm orders from key customer airlines for the proposed 777 twinjet. In the defense and space business, increased emphasis will continue to be placed on streamlining operations

to lower costs and improve productivity. The consolidation of all military and space divisions into the Defense & Space Group is expected to provide better management focus and a more efficient use of resources.

CROMWELL, CT (JULY 26) PR NEWSWIRE - Ripley Company Inc. (NASDAQ: RIPY) announced today that its board of directors is considering a merger of Ripley with Ripley Acquisition Corporation (the buyer), a wholly owned subsidiary of Capewell Components Company L.P., at a price of $4.15 per share, to be paid in cash on consummation of the merger to Ripley stockholders other than the buyer.

Dale Wolfe, president of Ripley, stated that the company understands that Capewell and the buyer have reached agreement in principle with certain of the company's larger shareholders, including the estate of Mary Rudolph and a related trust, to purchase an aggregate of approximately 58 percent

of the issued and outstanding shares of the company. The Rudolph estate's ability to sell its shares is conditioned on receiving probate court approval. Wolfe stated that if approved, the company would enter into a merger agreement with the buyer simultaneously with the purchase of these shares by the buyer.

The completion of the merger would be subject to the satisfaction of a number of conditions, included the approval of the merger by the holders of two-thirds of the company's outstanding shares.

Ripley Company, Inc., founded in 1936, manufactures cable preparation tools, blowers and specialized small part and assembly tooling systems. Its products are marketed directly by company sales staff, by distributors and by manufacturer's representatives to electrical transmission and distribution companies, CATV industries and to original equipment manufacturers.

#90207p9329 07/26/1990 ~PR Newswire

FOSTER CITY, CA (JULY 26) PR NEWSWIRE - Applied Biosystems Inc. (ABI) (NASDAQ: ABIO) today reported results for fiscal year 1990 which ended June 29. Sales for the year were $158.9 million and net income was $6.1 million ($.43 per share). As expected, the company reported a loss in

the fourth quarter.

For the year, fiscal 1990 sales were $158.9 million compared to $158.1 million in fiscal 1989. Sales would have increased by an additional $4.0 million (2.5 percent) had last year's foreign exchange rates been in effect during fiscal 1990. In addition to unfavorable currency exchange rates, fiscal 1990 sales were adversely impacted by delays and reductions in government funding throughout the world, softness in the analytical instrumentation market, and lower shipments from backlog than in the previous fiscal year. Fiscal 1990 operating income of $8.2 million, or 5.1 percent of sales, compares with $31.6 million, or 20.0 percent of sales in fiscal 1989. Net income was $6.1 million, or $0.43 per share in fiscal 1990, versus $19.3 million, or $1.38 per share, in fiscal 1989. Earnings per share and net income have been favorably impacted in fiscal 1990 by a tax rate of 10.0 percent compared to 39.1 percent in fiscal 1989.

The change in operating income is due to lower gross margins and higher operating expenses, primarily in R&D and selling, than in the previous fiscal year on approximately the same sales level. Gross margins have been adversely affected by a shift in sales volume from higher margin products and markets to lower margin products and markets, additional investments made in the manufacturing and service functions, and unfavorable impacts of foreign exchange rates. Also continuing factors contributing to margin pressures have been increased competition in selected markets, price pressure as a result of a tight funding environment and the softness in the analytical instrumentation market. As a result, gross margins as a percent of sales was 45 percent in the fourth quarter and 50 percent for fiscal 1990, compared to 61 percent in the fourth quarter and 60 percent for fiscal 1989.

For the fourth quarter, sales of $38.7 million in fiscal 1990 were down slightly from $39.6 million in the previous fiscal year. An operating loss of $1.7 million for the fourth quarter compares to operating income of $6.6 million in fiscal 1989. A net loss of $0.7 million, or 5 cents per share, compares to net income of $4.2 million, or 30 cents per share, in the prior year. Earnings per share and net income were favorably impacted by a fourth quarter adjustment to reduce the tax rate from an estimate of 25 percent for the first three quarters to the full year rate of 10 percent.

As of June 29, 1990, cash and equivalents were $19.5 million, up from $14.7 million in March 1990, and down from $30.7 million in June of 1989. During fiscal 1990, investments were made in facilities in the United States, United Kingdom, and Japan.

Applied Biosystems Inc. is a leading supplier of systems and services for life science research and related applications.

#90207p9330 07/26/1990 ~PR Newswire

SEATTLE, (JULY 26) PR NEWSWIRE - Westmark International Inc. (NASDAQ: WMRK) today reported a 32 percert increase in net income for the second quarter of 1990.

Westmark reported net income of $5.3 million, or 49 cents per share, compared with $4 million, or 39 cents per share, for the second quarter of 1989. Net income benefitted from a 16 percent increase in revenues, improved product gross margins and a lower effective tax rate.

Revenues for the second quarter reached a record level of $126.1 million. Ultrasound revenues grew by 14 percent to $76 million and patient monitoring revenues grew by 18 percent to $50.1 million compared with the prior year's quarter. Revenues for both the domestic and international divisions of ATL and SpaceLabs grew during the quarter compared with both the second quarter of 1989 and the first quarter of 1990.

During the second quarter, the company commenced deliveries to customers of several important new products, including the Ultramark(R) 7, a cost-effective color Doppler system for the cardiologist's office; the Ultramark 4 Plus, which introduced additional curved array technology and improved image quality; PCMS digital telemetry, a system to monitor ambulatory patients within the hospital; and PC Express, a modular portable patient monitor.

Net income for the first six months of 1990 increased by 45 percent to $10.8 million, or $1.02 per share, compared with $7.5 million, or 73 cents per share, in the first six months of 1989.

The company said that its estimated range for 1990 net income is $2.20 to $2.50 per share compared with the previously estimated range of $2.50 to $2.75 per share and $1.91 reported for the prior year 1989. This estimate reflects primarily projected revenues that are lower than previously forecast for the second half of 1990 in the company's domestic markets. Estimated net income for the third quarter is in the range of 40 cents to 55 cents per share.

R&D expenses for the quarter were increased by 33 percent to $14.3 million and for the first six months by 28 percent to $27.2 million compared with the similar periods of 1989. R&D expenses for the second quarter totalled 11.3 percent of revenues compared with 9.8 percent in the prior year. Higher R&D spending as a percent of revenues decreased net income in the second quarter by $1.1 million, or 11 cents per share, and in the first six months by $1.6 million, or 15 cents per share. The company expects

R&D expenses will be approximately 11 percent of revenues for the full year compared with 9.8 percent in 1989.

Dennis C. Fill, chairman and chief executive officer of Westmark International, said, "Investment in our accelerated product development programs will continue. We expect to have significant product introductions over the next several quarters that will advance the clinical utility and cost-effectiveness of our product lines, open new markets for our products, and yield attractive returns for the company and our shareholders."

The company also announced that its board of directors had authorized management to repurchase up to 500,000 shares of its common stock from time to time in the open market, subject to certain conditions and limitations. Thc company believes that the repurchase of Westmark stock represents an attractive use of the company's funds.

Westmark, with headquarters in Seattle, is a worldwide developer, manufacturer and distributor of diagnostic ultrasound systems and electronic patient monitoring and clinical information systems through its subsidiaries: Advanced Technology Laboratories Inc. in Bothell, Wash., and SpaceLabs Inc. in Redmond, Wash.

Westmark's common stock is quoted on the NASDAQ National Market System under the symbol WMRK.

BEAUMONT, TX (JULY 26) PR NEWSWIRE - Gulf States Utilities Co. (NYSE: GSU) today reported an unaudited loss of $1.17 per share of common stock for the second quarter of 1990, which includes an after-tax charge to earnings of $1.25 per share reflecting an agreement in principle for the settlement of litigation with the Southern Co.

Excluding this nonrecurring charge, earnings for the quarter would have been eight cents per share. The company incurred a 12 cents per share loss for the second quarter of 1989. Increased kilowatt-hour sales, reduced costs associated with a purchased power buyback agreement, and reduced interest charges contributed to the improved performance. Second quarter 1990 kilowatt-hour sales were 7.2 billion, six percent more than the 6.8 billion kilowatt-hours sold in the second quarter of 1989. Sales increased because of the hotter than normal weather experienced during May and June, in addition to a slight increase in the number of customers.

The agreement in principle, announced on June 25, will end a long-standing contract dispute involving power purchases from the subsidiaries of the Southern Co. A mutually acceptable final settlement document must still be prepared and the necessary approvals must be received from the boards of directors of each company, various regulatory agencies, the court that has jurisdiction over the dispute and others. The after-tax charge of $135 million was based on the company's best estimates of the costs of the agreement.

Major elements of the agreement include:

-- When the necessary approvals are received, Gulf States will provide the Southern Co. with about $7 million in cash plus $68 million in an escrow account established by the federal court while the contract suit was being litigated.

-- The Southern Co. will receive a $160 million non-interest bearing

promissory note from GSU that will be payable on Jan. 1, 1993.

-- GSU will issue six million shares of common stock to the Southern Co., which will be entitled to exercise its voting rights as a stockholder only in very limited circumstances.

-- On Jan. 1, 1993, GSU may be required to make a cash payment to the Southern Co. based on the performance of GSU common stock.

-- Payments on the note and amounts based on the performance of GSU common stock, if any, may be deferred and will accrue interest after Jan. 1, 1993, if Gulf States has not been able to resume common stock dividend payments by that time and does not have cash available above an agreed minimum balance. In any event, full payment would be due Jan. 1, 1999.

ENGLEWOOD, CO (JULY 26) PR NEWSWIRE - The shareholders of Jones Spacelink Ltd. (NASDAQ: SPLKA) today elected seven directors at the company's 1989 annual meeting of shareholders in Englewood.

Directors elected were Glenn R. Jones, chairman of the board and chief executive officer; Gregory J. Liptak, president; Carl E. Vogel, group vice president; Kevin P. Coyle, treasurer; Timothy J. Burke, vice president/taxation, Jones Intercable Inc., an affiliated company; J. Rodney Dyer, president of Rod Dyer Group Inc.; and Richard Henderson, president and chief executive officer of HSC Inc.

The shareholders also ratified the appointment of Arthur Andersen & Co. Certified Public Accountants, as independent auditors for the company for the fiscal year ended May 31, 1990.

Richard Henderson was elected a director on Jones Spacelink in June 1990. He serves as president and chief executive officer of HSC Inc. a holding company with interests in real estate, industrial loans and an automobile dealership. Henderson served as a state senator in Hawaii from 1970 to 1978 and again from 1980 to 1987 as minority leader.

Jones Spacelink is a publicly-held subsidiary of Jones International Ltd.

#90207p9343 07/26/1990 ~PR Newswire

SAN DIEGO (JULY 26) PR NEWSWIRE - Supplementing its announcement of July 17, Great American Bank, a Federal Savings Bank (NYSE: GTA) today reported a net loss for the second quarter of 1990 of $107.9 million or $4.49 per share fully diluted. This compared to a net loss of $1.2 million or $0.05 per share fully diluted for the quarter ended March 31, 1990 and a net loss of $10.0 million or $0.42 per fully diluted share for the quarter ended June 30, 1989.

As announced on July 17, Great American recorded provisions for loan and foreclosed real estate losses totalling $136 million and reported a $40 million loss on real estate operations for the quarter ended June 30, 1990. These amounts, net of the related tax benefit, accounted for $105 million of the second quarter net loss.

At June 30, 1990, shareholders' equity was $265.7 million or 1.73 percent of Great American's total assets of $15.4 billion. This compared to shareholders' equity at March 31, 1990 of $372.5 million or 2.41 percent of $15.4 billion in assets and $373.5 million or 2.35 percent of $15.9 billion in assets at Dec. 31, 1989.

Revenues for the quarter ended June 30, 1990 were $325.2 million, compared to $419.3 million for the same period in 1989. This decrease was primarily attributable to a $37 million decrease in interest income due to a reduction of earning assets and a $62 million decrease in income from real estate operations. Fee income for the second quarter of 1990 improved to $7.6 million, compared to $7.3 million for the second quarter of 1989.

Great American recorded net interest income before provisions for loan losses of $53.1 million during the second quarter of 1990, compared to $59.6 million recorded during the same period of 1989.

Although Great American is continuing to emphasize single-family and retail consumer lending, during the second quarter Great American discontinued originations of nonresidential real estate loans, as well as other types of income property, tract construction and wholesale consumer loans, due to its capital levels and other considerations. This contributed to a reduction in loan originations for the second quarter of 1990 to $591 million, compared to $1.2 billion originated for the quarter ended June 30, 1989. Of the total loans originated during the second quarter, 87 percent were secured by single-family residences. At June 30, 1990, Great American's net loan portfolio was $10.4 billion, compared to $10.7 billion at March 31, 1990 and $10.8 billion at Dec. 31, 1989.

Great American, established in 1885, is a regional savings bank which at June 30, 1990 had 212 retail branches primarily in California, Arizona and Washington and 16 mortgage origination offices. At June 30, Great American was the nation's eighth largest savings institution, based on

consolidated assets of $15.4 billion.

#90207p9344 07/26/1990 ~PR Newswire

BURBANK, CA (JULY 26) PR NEWSWIRE - The Walt Disney Company (NYSE: DIS) today reported record-level revenues and income for both the third quarter and nine-month periods ended June 30, 1990. These results were the highest for any comparable period in the company's history.

For the third quarter, revenues rose to $1,539,477,000 a 32 percent increase from $1,167,606,000 for the comparable prior-year period. Net income increased 23 percent to $238,446,000 or $1.75 per share, compared to $193,295,000 or $1.40 per share reported a year ago.

For the nine-month period, revenues climbed to $4,131,423,000, a 27 percent increase from $3,249,053,000 for the comparable prior-year period. Net income increased 21 percent to $591,343,000 or $4.29 per share, compared to $490,602,000 or $3.56 per share reported a year ago.

Operating income climbed 18 percent to $407,810,000 compared to $345,785,000 for the quarter and 20 percent to $1,028,504,000 from $855,886,000 for the nine-month period.

In a joint statement, Michael D. Eisner, chairman and chief executive officer, and Frank G. Wells, president and chief operating officer, said Disney's record performance for the quarter and nine months was achieved by contributions from each of Disney's business segments: Theme Parks and Resorts, Filmed Entertainment and Consumer Products.

Revenues for Theme Parks and Resorts rose 18 percent to $858,057,000 for the quarter compared to $727,880,000 in the prior year. Operating income increased 14 percent to $288,505,000 compared to $252,312,000 a year ago. For the nine-month period, revenues rose 20 percent to $2,187,781,000 from $1,819,589,000 and operating income increased 19 percent to $647,012,000 compared to $544,473,000 a year ago.

Record total attendance at Disney theme parks, combined with higher per capita guest spending, expanded resort operations and benefit from the company's 49 percent investment in Euro Disneyland SCA were factors in the increased operating results for the quarter and nine-month periods.

Revenues for Filmed Entertainment rose 57 percent to $555,970,000 for the quarter compared to $354,499,000 in the prior year. Operating income

increased 35 percent for the quarter to $73,323,000 compared to $54,495,000 a year ago. For the nine-month period, revenues rose 36 percent to $1,528,323,000 from $1,125,430,000 and operating income increased 22 percent to $208,354,000 from $170,651,000.

Revenues for Consumer Products rose 47 percent to $125,450,000 for the quarter compared to $85,227,000 in the prior year. Operating income increased 18 percent for the quarter to $45,982,000 compared to $38,978,000 in the prior year. For the nine-month period, revenues rose 37 percent to $415,319,000 from $304,034,000 and operating income increased 23 percent to $173,138,000 from $140,762,000.

Increased domestic and international merchandise licensing, including Dick Tracy items, the success of "The Little Mermaid" sound track and computer software licensing, and European publishing activities contributed to the results for the quarter and nine-month periods.

NEW YORK (JULY 26) PR NEWSWIRE - The Prospect Group, Inc. (NASDAQ: PROSZ) today announced it will begin distribution of its assets in August in accordance with the shareholder-approved Plan of Complete Liquidation and Dissolution.

In addition, the company said that the common stock of Illinois Central Corporation that now trades in tandem with Prospect stock will be unstapled and will trade independently on the NASDAQ National Market System starting Aug. 21. The record date for the unstapling was set for the close of business on Aug. 2 by the Illinois Central board of directors.

The Prospect board of directors, which met today, set the dates to effect the distributions and approved the distribution plan presented by management. The board set the close of business on Aug. 2 as the record date; Aug. 20 for the mailing of stock certificates to Prospect shareholders; and Aug. 21 as the ex-dividend date upon which the distributed shares will begin to trade independently.

The distribution plan, which is subject to minor changes, calls for Prospect shareholders to receive the following securities:

1. Illinois Central Corporation, 3,482,565 shares in a ratio of approximately one Illinois Central share for 6.7 shares of Prospect held. Illinois Central is the holding company for a 2,900-mile freight railroad headquartered in Chicago and serving shippers from the Great Lakes to the Gulf of Mexico.

2. The Forschner Group, Inc., 2,253,510 shares in a ratio of approximately one share of Forschner for 10.3 shares of Prospect. Forschner, based in Shelton, Conn., is the exclusive U.S. marketer of Victorinox Swiss Army Knives and other Swiss Army Brand and cutlery products.

3. Sylvan Foods Holding, Inc., 2,728,269 shares in a ratio of approximately one share of Sylvan for 8.5 Prospect shares. Such shares include shares to be received in exchange for Prospect's preferred stock holding. Sylvan, the nation's third largest mushroom producer and a leading producer of mushroom spawn, is located in Worthington, Pa.

In addition to the above stock distributions, a total of $11.6 million in cash will be distributed on the basis of $0.50 for each Prospect share. Prospect's remaining cash of approximately $25 million and certain miscellaneous assets would be retained for the foreseeable future.

#90207p9349 07/26/1990 ~PR Newswire

SAN FRANCISCO, (JULY 26) PR NEWSWIRE - BEI Electronics Inc. (NASDAQ: BEII), a San Francisco based diversified technology company, achieved increased sales and earnings for the first nine months of fiscal year 1990 ended June 30, Peter G. Paraskos, president and chief executive officer, announced today.

For the first nine months of fiscal year 1990 sales were $59,149,000, a 19.4 percent increase from the $49,551,000 posted in the prior year. Net income was $4,875,000, up 6.8 percent from the $4,565,000 reported for the same period of fiscal 1989. Earnings per share, with approximately 2 million additional shares outstanding, were 71 cents as compared to 94 cents reported for the first nine months of fiscal 1989.

Third quarter sales were $20,870,000, up 13.7 percent from the $18,349,000 reported in the prior year. Net income was $1,327,000 compared to $1,795,000 posted in the third quarter of fiscal 1989. Earnings per share, with a 40 percent increase in the number of shares outstanding, were 20 cents as compared to 38 cents in the same period of fiscal 1989.

"Operating income for the third quarter was adversely impacted by a $757,000 before tax impact of restructuring costs in the Motion Systems Co. related to the discontinuation of certain unprofitable business units, the elimination of redundant manufacturing capacity and the consolidation of operations with the encoder business recently acquired from Litton Industries," Paraskos said.

"Sales and earnings in the third quarter were also hurt by shipment delays experienced by BEI Defense Systems Co. on its HYDRA-70 rocket motors due to technical and financial problems of suppliers whom the company is required to use," he stated. "The Defense Systems Co.," Paraskos added, "is working diligently with current and alternative suppliers to correct these problems.

"The results for the first nine months reflect increased sales of BEI Motion Systems Co. industrial optical encoders as well as of products it acquired from the purchase of the encoder business from Litton in March," he said.

BEI Electronics designs, manufactures and markets electronics, ordnance, motion control systems and components, precision accelerometers, rate sensors and inertial measurement systems for use in military, commercial, industrial and aerospace applications. The company has major operations in California, Arkansas, Texas and Massachusetts.

WARREN, OHIO (JULY 26) PR NEWSWIRE - CSC Industries, Inc. reported its financial results for the second quarter of 1990 today. Net sales of $56,964,000 increased 34 percent from last year's level of $42,487,000. For the six months ended June 30, 1990, net sales were $106,778,000, or 15 percent higher than the 1989 first half sales of $93,018,000.

For the second quarter a net loss of $5,738,000, or $0.66 per share, was reported as compared to last year's net income of $2,232,000, or $0.26 per share. The net income last year included an extraordinary gain of $8,240,000 on the restructuring of the $20,000,000 note due to Copperweld Corporation (NYSE: COS).

For the first half of 1990, a net loss of $11,049,000, or $1.28 per share, was reported as compared to a net loss of $963,000, or $0.11 per share, reported for the first six months of 1989. The six- month 1989 period also included the $8,240,000 extraordinary gain.

Lawrence Weeks, president and chief executive officer, said, "The goal of recapturing CSC's historic market share has now been achieved. The volume of shipments in the second quarter was the highest in over two years. The challenge ahead of us will be to continue to reduce our manufacturing cost through productivity and increased yields, and to improve our revenues through selective price increases."

#90207p9359 07/26/1990 ~PR Newswire

HOUSTON (JULY 26) PR NEWSWIRE - The Coastal Corp. announced today its subsidiary, ANR Production Co., is purchasing additional interests in 374 producing oil and gas wells and a natural gas processing plant in the Altamont/Bluebell field in Duchesne and Uintah counties in Utah.

Completion of the transaction will increase ANR Production Co.'s average working interest in the 374 wells from 28 percent to 42 percent and its ownership interest in the Altamont Gas Processing Plant from 52.71 percent to 78.45 percent.

The company's net production from the 374 wells will increase from approximately 2,400 barrels to 3,600 barrels of oil a day and from 7.2 million to 10.8 million cubic feet of natural gas a day.

ANR Production Co. also serves as the operator for 154 of the wells and for the Altamont plant which has the capacity to process 40 million cubic feet of gas a day.

Facilities of the Altamont gas plant, which produces propane, butane and natural gasoline, include a 330-mile gas gathering system with four compressor stations and 18 compressor units.

In addition to the producing wells, ANR Production said it is currently drilling the sixth well of an infill development program in the field that eventually could include 42 drilling locations.

The Coastal Corp. is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

#90207p9361 07/26/1990 ~PR Newswire

CHARLESTON, WV (JULY 26) PR NEWSWIRE - Eagle Bancorp, Inc., (NASDAQ: EBCI) the parent company of First Empire Federal Savings and Loan Association, today reported net earnings of $437,000 for the second quarter of 1990 as compared to $346,000 for the second quarter of 1989. This represents a 26.3 percent increase in net income over the previous year's second quarter. Net income for the first six months was $1,585,000 compared to $681,000 for the same period in 1989. First quarter 1990 net income included $719,000 or $.56 per share net of tax, of tax refunds and interest thereon resulting from the out of court settlement of litigation with the Internal Revenue Service regarding losses on reciprocal loan sales and income received from early withdrawal penalties on certificates of deposits. Earnings per share for the second quarter and year to date in 1990 amounted to $.34 and $1.24 per share, respectively, compared to $.27 and $.53 per share for the same period in 1989.

Stockholders' equity increased from $29.4 million to $30.7 million from December 31, 1989 to June 30, 1990. On July 17, 1990 the Board of Directors authorized the payment of a $.09 per share regular quarterly dividend on August 10, 1990 to stockholders of record on July 27, 1990. This is the eighth consecutive dividend since the Company went public in July 1988.

Loan originations tapered off to $8.2 million for the second quarter compared to $12.3 million for the similar period in 1989. The decrease in originations is a direct result of a slower local housing market, which is reflective of the national trend. The Company is continuing to maintain and improve its local market share and to adhere to strict quality origination standards.

Average net interest spread was 2.73 percent for the quarter ended June 30 1990 compared to 2.79 percent for the quarter ended June 30, 1989, while the average net interest margin decreased to 3.96 percent compared to 4.03 percent for the quarter ended June 30, 1989.

Mr. J. Christopher Thomas, President and Chief Operating Officer, stated, "The second quarter earnings increase of 26 percent from the same period in 1989 demonstrates the effect of our strategy in past years to emphasize mortgage loan originations that feature adjustable rates. The yield on our portfolio is increasing while at the same time our cost of funds is starting to stabilize."

First Empire Federal Savings and Loan Association operates ten offices in southern West Virginia. Eagle Bancorp, Inc. is traded on the NASDAQ SYSTEM (SYMBOL EBCI).

KANSAS CITY, MO (JULY 26) PR NEWSWIRE - USAir and the Chamber of Commerce of Greater Kansas City today jointly announced the relocation of the airline's Rocky Mountain Regional Sales Office from Phoenix, Ariz., to Kansas City.

At the same time, USAir announced the appointment of James K. Glasheen as regional sales director for the Rocky Mountain Region. Glasheen will be responsible for the activities of USAir district sales managers in Kansas City; Denver; Albuquerque, N.M.; San Louis; Las Vegas, Nev.; Tuscon, Ariz.; Phoenix; Wichita, Kan.; Houston; San Antonio, Texas; Dallas/Fort

Worth; and Minneapolis/St. Paul.

"In addition to being a more central location from which to direct the activities of our Rocky Mountain Region staff, Kansas City is itself a dynamic growth area for USAir," said Brian M. Dwyer, USAir vice president sales and advertising.

Dwyer noted that in the past two years, USAir has increased its schedules from six to 27 daily jet departures at Kansas City International Airport. Most recent expansion was the July 1 introduction of two daily roundtrips between Kansas City and St. Louis.

H. Marshall Chatfield, chairman of the board of the Chamber of Commerce of Greater Kansas City, said: "Over the past year, the chamber has worked closely with USAir, which has steadily increased its KCI service. We are extremely pleased that USAir will locate its regional sales headquarters in Kansas City because this demonstrates their commitment to developing a major presence here. This is a significant announcement."

Kansas City Mayor Richard L. Berkley said: "It is really great news that USAir is moving its Rocky Mountain Region Sales Office from Phoenix to Kansas City. This clearly means that USAir intends to increase its presence in Kansas City, and I am confident that we can look forward to more activity at KCI in the future."

Under current schedules, the airline provides non-stop service between Kansas City and its hubs at Baltimore, Charlotte, N.C., Pittsburgh, Indianapolis, and Philadelphia, where passengers can connect to dozens of other USAir flights to cities throughout the United States, Great Britain, Europe, the Caribbean, Bermuda and Canada.

In addition USAir operates non-stop service between Kansas City and Los Angeles, New York City, Orlando, Fla., St. Louis, San Francisco, San Diego Seattle and Washington.

HOUSTON (JULY 26) PR NEWSWIRE - Regal International Inc. (NYSE: RGL), on July 24, 1990, was notified that an Involuntary Petition in Bankruptcy under Chapter 11 of the Bankruptcy Code had been filed in the United States Bankruptcy Court for the District of Delaware. The petition was filed by nine noteholders who in the aggregate own $885,000 in promissory notes which are in default. Management believes that these petitioning noteholders are affiliated with or controlled by Regal directors

Beinhocker and Plunkett who have previously announced their intent to gain control of Regal, replace management, and consummate the acquisition of certain mining properties.

Regal plans to vigorously contest the involuntary bankruptcy proceedings and the right of the petitioning noteholders to commence these proceedings.

Regal International Inc. is primarily engaged in the manufacture and sale of rubber products for marine and oilfield applications

CLEVELAND (JULY 26) PR NEWSWIRE - Charles A. Bittenbender, 40, has been elected Vice President, General Counsel and Secretary of NACCO Industries, Inc. (NYSE: NC). He succeeds Thomas A. Koza, who recently transferred to the Company's North American Coal subsidiary in Dallas where he is Vice President-Law and Administration.

Bittenbender joins NACCO from G. D. Searle & Co., where he was Deputy General Counsel of the Chicago-based pharmaceutical company. Prior to his service with Searle, he was an associate in the Cleveland office of Jones, Day, Reavis & Pogue, a prominent law firm. Bittenbender also was employed by The Ohio Bell Telephone Company in Cleveland in several managerial positions before seeking a career in law.

Bittenbender earned his B. A. degree at Claremont Men's College, Claremont California, in 1971. In 1979, he received his J. D. degree from Cleveland-Marshall College of Law, Cleveland State University, where he was editor-in-chief of the Cleveland State Law Review.

Bittenbender is married, and he and his wife have two sons. They will make their home in the Cleveland area in the near future.

#90207p9374 07/26/1990 ~PR Newswire

MINNEAPOLIS, (JULY 26) PR NEWSWIRE - North Star Universal Inc. (NASDAQ: NSRU) today announced results for the second-quarter and six-month periods ended June 30, 1990. For the quarter, income from continuing operations increased 466 percent to $1,335,000, or 13 cents per share, compared to $236,000, or 1 cent per share, reported last year. Net income reached $1,332,000, or 13 cents per share, compared to a net loss of ($1,563,000)

or (17) cents per share reported last year. Second-quarter revenues increased 90 percent to $151.0 million from $79.7 million in 1989.

For the six-month period, income from continuing operations grew more than 200 percent to $2,321,000, or 22 cents per share, compared to $769,000, or 6 cents per share, reported last year. Net income increased to $2,419,000, or 23 cents per share, from a loss of ($1,291,000), or (15) cents per share last year. Second-quarter and six-month net income for 1989 includes charges related to the disposition of the company's curbside recycling operations. First-half revenues increased 90 percent to $291.8 million from $153.3 million in the previous year.

In commenting on the results, president and chief executive officer, Miles Efron, said, "We are very pleased with the contribution we're getting from both our food and non-food businesses. Our results for the first half were positively affected by record earnings at Michael Foods, Inc., our majority-owned food processing and distribution company, which experienced strong sales and earning growth in all its divisions."

Efron went on to say, "North Star's non-food businesses generated dramatic and profitable growth during the second quarter of 1990. Revenues increased 54 percent and operating profits rose 74 percent. Revenues at the company's computer products and services group increased 79 percent to $16.1 million for the quarter, with an overall improvement in operating margins. FORTIS, the Company's rehabilitative services group, was profitable in the second quarter and first half of 1990.

"We are pleased with North Star's performance through the first half of 1990, and our continuing efforts to build shareholder value."

North Star Universal Inc. owns and supervises the management of businesses engaged in computer cabling and related services, health care services, and other industries. As a parent company, North Star Universal provides resources for the companies' development and growth. North Star Universal also owns a 53.8 percent majority interest in Michael Foods Inc. (NASDAQ: MIKL).

DETROIT (JULY 26) PR NEWSWIRE - Comerica Bank-Texas, in a transaction assisted by the Federal Deposit Insurance Corporation (FDIC), has acquired the deposits and some of the loans of Continental Bank of Dallas. Comerica has the option to purchase additional loans from Continental's portfolio.

Continental has deposits of approximately $124 million and operates two branches, one at 6260 East Mockingbird Lane and the other in the Wynnewood Shopping Center on Illinois. The bank was closed by banking regulators Thursday afternoon and its two branches will reopen Friday morning as two of 16 branches operated by Comerica Bank-Texas.

"With the Continental acquisition, Comerica Bank-Texas now has assets of over $1 billion," said Comerica Bank-Texas President and Chief Executive Officer Charles L. Gummer. This is the eighth expansion in less than two years for Comerica Bank-Texas, a wholly owned affiliate of Michigan-based Comerica Incorporated (OTC: CMCA).

CHICAGO, (JULY 26) PR NEWSWIRE - Illinois Central Corporation announced today that its common stock will begin to trade independently on Aug. 21 on the NASDAQ National Market System.

Currently, the company has two series of common stock issued and

outstanding. The Series A common stock, 11.1 million shares, has been trading in tandem with the stock of the Prospect Group, Inc. (NASDAQ: PROSZ) since January, when Prospect distributed the shares to its shareholders. The Series B common stock, 7.7 million shares, is not traded.

The Illinois Central board of directors also announced today that the company has exchanged all issued and outstanding shares of its Series A and Series B preferred stock plus accumulated but unpaid dividends thereon for approximately 4.9 million shares of Series B common stock. The board authorized the unstapling of the Series A common stock from Prospect's stock, and the conversion of all shares of Series A and Series B common stock to a single voting class of common stock. These separate actions will result in 23.7 million shares of common stock of the company being issued and outstanding when independent trading begins.

The exchange of preferred stock for common stock eliminates preferred stock dividend requirements and increases the equity of Illinois Central.

In a separate announcement, Prospect stated that it would distribute the shares of common stock it received in the preferred stock exchange to its shareholders pro rata. Aug. 2 has been established as the record date for the issuance and distribution of common stock.

Illinois Central Corporation is a holding company with a subsidiary which operates a 2,900-mile freight railroad serving the central part of the nation between the Great Lakes and the Gulf of Mexico.

DENVER (JULY 26) PR NEWSWIRE - Western Capital Investment Corp. (WCIC) (NASDAQ: WECA) announced today that it will report an estimated loss of $29 million for the quarter ended June 30, 1990. Final results for the quarter will be released shortly.

This loss is due to write downs of development and investment real estate held in the company's real estate development subsidiary, and additional loss reserves to assist in more aggressively marketing real estate owned in a still depressed Colorado commercial real estate economy.

Despite these aggressive actions, Bank Western, WCIC's financial subsidiary, still maintains regulatory capital well in excess of current requirements.

In addition to Bank Western, Western Capital is the parent holding company

to Teton National Insurance Co., Field Real Estate Co., Western Insurance Service Inc., Field Mortgage Co., and Institutional Investors Corp.

DETROIT (JULY 26) PR NEWSWIRE - Programmed to unlock additional 1990 new car sales traffic, the Metro Detroit Ford Dealers launched an incentive campaign this week that will continue through tonight and next Monday and Tuesday, July 30 and 31 only.

Dealers mailed 400,000 keys to specific customers within zip codes of each Ford dealer market area with instructions to stop by, try the key in the designated display lock and win one of 31 new Ford Escorts, or, if the key doesn't fit, second chances at Caribbean cruises.

More than 800 people visited one dealer in just a short four-hour span, and if traffic is any indication of interest in new cars and winning a prize, this marketing promotion may be just the key to increase sales. Two cars have already been awarded, and there are 29 to go.

Advice for fortune seekers ... if you've received a key, don't lose it. You may be the winner of a new 1990 Ford Escort.

#90207p9408 07/26/1990 ~PR Newswire

CLARENDON HILLS, IL (JULY 26) PR NEWSWIRE - MAF Bancorp, Inc. (NASDAQ-NMS: MAFB), the holding company of Mid America Federal Savings Bank, today reported that earnings for the fourth quarter ended June 30, 1990, increased 8 percent from their level of the same period a year ago. For the 1990 fourth quarter, net income was $1.91 million, or $.54 per share, compared to $1.76 million for the 1989 fourth quarter. Earnings per share for the prior-year period is not meaningful because the bank did not complete its conversion from mutual to stock form of ownership until January 1990.

The improvement in fourth-quarter earnings resulted principally from an increase in servicing and other product fee income, offset in part by a small percentage decline in net interest income and an unrealized loss recognized on an investment security held for sale. The improvement in servicing fee income, which totalled $845,000 in the current quarter compared to $520,000 in the fiscal 1989 fourth quarter, reflects the continued growth in the bank's portfolio of loans serviced for others, a consistent component of Mid America's core earnings. Loans serviced for others increased from $729 million at June 30, 1989, to $869.5 million at June 30, 1990. Other non-interest income also increased, due in part to fee increases on customer products and services which were implemented during the current quarter.

Net interest income after provision for loan losses for the 1990 fourth quarter declined to $6.9 million compared to $7.3 million for the year-earlier period. The decline was generally attributable to a decline in the average yield on interest earning assets offset in part by a decline in the bank's average cost of funds. Although down from the prior year, net interest income for the current quarter was consistent with the fiscal 1990 third quarter level and up by 9.7 percent and 7 percent from the fiscal 1990 first- and second-quarter levels, respectively.

Income from real estate operations remained relatively stable at $958,000 in the fiscal 1990 fourth quarter compared to $1 million in the year-earlier period. The sale of an 80-acre unimproved parcel of land in Naperville, Ill., generated a $530,000 pre-tax gain during the current-year quarter. In addition, the bank disposed of a $2 million commercial parcel of real estate owned during the current-year quarter at a pre-tax gain of $140,000 included in other income.

Net income for the fiscal year ended June 30, 1990, was $5 million, or $1.44 per share, compared to $8.6 million for the prior fiscal year. Earnings per share for fiscal 1989 is not meaningful because the bank's conversion was not completed until fiscal 1990. The decline in annual earnings resulted primarily from various non-recurring factors affecting non-interest income in both the prior year and the current year. The

prior-year results include a $2.5 million gain on the sale of a shopping center held for investment while the current year reflects $2 million in losses on investment securities which were offset in part by a $946,000 gain on the sale of the bank's credit card portfolio. Despite the securities losses reflected in the fiscal 1990 results, asset quality continues to be very good. The ratio of non-performing assets to total assets was .73 percent as of June 30, 1990.

Net interest income after provision for loan losses totalled $26.6 million for fiscal 1990 compared with $26.7 million in the year-earlier period. This stability was due to an improvement in net average interest earning assets as a result of the stock conversion proceeds, offset by the absence of risk-controlled arbitrage activity as compared to the substantial level of this activity in 1989. Non interest expense increased only 1.6 percent for fiscal 1990 due to a significant decrease in data processing costs.

At June 30, 1990, the company had total assets of $1.60 billion, up from $1.54 billion at fiscal year ended June 30, 1989. Deposits increased to $1.21 billion at June 30, 1990, from $1.16 billion at year end 1989. Stockholders' equity, all of which is tangible capital, improved to $54.4 million at June 30, 1990, from $25 million at June 30, 1989. The company's book value per share was $15.43 at June 30, 1990.

Mid America Federal Savings Bank is a federally chartered stock savings bank. The bank operates a network of 13 retail banking offices primarily in the western suburbs of Chicago.

MIAMI (JULY 26) PR NEWSWIRE - Captain Tom Cooper, president of the Eastern Pilots Association, reacted angrily today to the attempt of the Air Line Pilots Association to use the indictment of Eastern Airline officials for ALPA's own selfish purposes in its labor dispute with Eastern. Cooper said that the ALPA attempt is "outrageous." He said, "there are numerous references to Eastern's pilots in ALPA's press release. In fact, the overwhelming majority of flying Eastern pilots are not members of ALPA. Certainly these pilots condemn any safety violation that may have occurred and would never condone any act compromising flight safety. However, they would never stoop to use or misrepresent such allegations to further their own personal interests."

Captain Cooper emphasized that "contrary to the implications of ALPA's press release, Eastern is today the safest airline the nation." He also said, "we, the flying pilots of Eastern Air Lines, are extremely comfortable that the aircraft we fly daily are superbly maintained to the highest standards of the industry, and those persons entrusted with the

maintenance of these aircraft are continuously scrutinized under the watchful eye of all pertinent governmental agencies as well as Eastern's internal quality control departments. Eastern operates not only in strict compliance with all federal rules and regulations, but far exceeds those minimum standards which other airlines use as guidelines."

Captain Cooper concluded that "it is a shame that ALPA would disgrace the piloting profession by scare tactics aimed at the flying public, especially, in light of ALPA's past actions to minimize or conceal safety problems at ALPA-dominated carriers."

SEATTLE (JULY 26) PR NEWSWIRE - Airborne Freight Corp. (NYSE: ABF), which operates under the trade name Airborne Express, announced today that it priced an offering of 2.5 million shares of its common stock at $24.75 per share. The offering was underwritten by a syndicate led by Goldman, Sachs & Co. Airborne Express has also granted a 30-day option to the underwriters to purchase up to an additional 375,000 shares solely to cover over-allotments.

Net proceeds to Airborne Express from the sale of approximately $59.3 million will be used to reduce outstanding indebtedness in order to enhance the company's flexibility to finance anticipated capital expenditures.

Airborne Express is the nation's fastest growing air express company. Airborne primarily services corporate America through the delivery of time-sensitive documents, letters, small packages and heavy freight to more than 45,000 communities and 183 countries worldwide.

DALLAS (JULY 26) PR NEWSWIRE - InterVoice (NASDAQ: INTV) announced today the addition of three key members to management to position itself for future growth. David Brandenburg was appointed chief operating officer and a member of the executive committee of InterVoice, responsible for day-to-day operations of the company. Donald Crosbie, vice president of marketing at InterVoice, was promoted to senior vice president reporting to Brandenburg. Gordon Givens, director, customer services, was promoted to vice president, customer services. The executive committee, in announcing these promotions, pointed out that these appointments arise

from significant market, product and strategic alliance partnerships that have established the company on a fast growth track and will prepare for the future opportunities.

The executive committee stated, "David Brandenburg's business management and engineering experience together with the leadership and experience of Michael Tessarowicz, chairman; Daniel Hammond, chief executive officer; and Allen Fleener, president, combine to create the foundation to grow the company in new markets and products. Don Crosbie's proven leadership as vice president of marketing provides added strength to the office of the chief operating officer. The customer services department in large measure is responsible for the company's representation for system performance and customer satisfaction. Gordon Givens' promotion to vice president recognizes the InterVoice commitment to its customers. These added executives enhance the company's focus on technology leadership and strategic alliance for market expansion through the RobotOperator systems automation of telephone operator functions. InterVoice recently announced new products that are strategically positioned to exploit the economic benefits available to our customers through digital network services."

Brandenburg has served on the board of InterVoice for the past year. He holds an MSEE degree from Southern Methodist University and previously held positions of president of Entre Dallas, and division manager of Electrospace Systems Inc. in Richardson, Texas.

Crosbie has been the company's marketing officer since 1984 and holds a Bachelor of Commerce degree from the University of Wellington, New Zealand. He was also appointed assistant secretary for the board of directors.

Givens joined InterVoice in 1987 as director, customer services. He holds a Bachelor of Science degree from the University of Texas at Arlington, Texas.

InterVoice Inc., a Dallas-based voice response company, designs, manufactures, sells and services voice automation systems.

#90207p9432 07/26/1990 ~PR Newswire

TULSA, OK (JULY 26) - MPSI Systems Inc. (NASDAQ:MPSG) reported today net income of $511,000 or 6 cents per share on revenues of $14,447,000 for the third quarter ended June 30, 1990, compared with net income of $8,000 or $.00 per share on revenues of $12,397,000 for the same period a year ago. Operating profits were posted for the third quarter of fiscal 1990 by both

MPSI Inc. and Execucom Systems Corp., the major operating subsidiaries of the parent company.

Net income was $1,085,000 or 13 cents per share on revenues of $41,510,000 for the nine months ended June 30, 1990 which compares favorably with a net loss of $3,604,000 or 43 cents per share on revenues of $36,492,000 for the nine months ended June 30, 1989.

According to Ronald G. Harper, MPSI chairman, the increased revenues and profitability in fiscal 1990 over 1989 are primarily attributable to increased sales of MPSI's market studies at improved margins.

Harper also pointed out that in fiscal 1989 earnings were negatively impacted by certain nonrecurring costs for asset write- downs, computer migration costs and reorganization expenses totaling approximately $2.4 million, or 28 cents per share, after taxes were provided. It has not been necessary to make similar provisions in the current fiscal year.

	For the Quarter Ended June 30,	
	1990	1989
Revenues	$14,447,000	$12,397,000
Net Income	$ 511,000	$ 8,000
Earnings Per Common Share	$ .06	$ .00
Average Common Shares Outstanding	8,493,180	8,492,849
	For the Nine Months Ended June 30,	
	1990	1989
Revenues	$41,510,000	$36,492,000
Net Income (Loss)	$ 1,085,000	$(3,604,000)
Earnings (Loss) Per Common Share	$ .13	$ (.43)(i)
Average Common Shares Outstanding	8,559,894	8,486,349

(i) Includes write-down of assets, accrual of costs associated with the migration of its systems from a mainframe to a workstation computer environment and nonrecurring reorganization and restructuring expenses totaling $2.4 million after taxes, or $28 per share.

CLEVELAND (JULY 26) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) said today that it has offered 9,500,000 shares, or 52.8 percent, of the common stock of its subsidiary, Banner Aerospace, Inc., in an initial public offering at a price to the public of $14.00 per share. The offer is expected to be completed on Aug. 2, 1990. The sale will result in a pre-tax gain in excess of $60 million to Banner Industries, after related expenses, which will be recognized in the quarter ended Sept. 30, 1990.

As previously announced, Banner Industries is also considering the sale of its wastewater treatment group, consisting primarily of Envirex, and is continuing to negotiate the sale of the aircraft tire retreading and distribution operations of Thompson Aircraft Tire Corporation. A Banner spokesman said that the offering will strengthen Banner's financial position by providing approximately $133 million gross proceeds and a reduction in debt of approximately $75 million from the deconsolidation of Banner Aerospace. These proceeds, together with the company's current cash and investments of approximately $90 million will be used for general corporate purposes, including the repurchase of debt at attractive returns and for acquisitions, a Banner Industries spokesman said. The company's remaining 47.2 percent interest in Banner Aerospace, Inc., will be accounted for using the equity method of accounting. At the initial public offering price, the company's remaining investment of approximately $50 million in Banner Aerospace, Inc. has a market value of $120 million.

Banner Aerospace is a leading distributor of a broad range of new and overhauled replacement parts in the aviation aftermarket. Banner Aerospace's products include fasteners, avionics, electrical and airframe parts as well as bearings and other aerospace-related products. Banner Aerospace's largest operating subsidiary is Burbank Aircraft Supply, Inc. which ranks as one of the world's largest distributors of fasteners and other hardware to the commercial aviation industry.

On a pro forma basis, Banner Aerospace had net income of $12,698,000, or 71 cents per share, on sales of $172,435,000 for the nine months ended March 31, 1990.

Banner Aerospace common stock is listed on the New York Stock Exchange under the symbol BAR.

Samuel J. Krasney is chairman and chief executive officer of Banner Aerospace which is headquartered in Cleveland.

The offering is being managed by Salomon Brothers Inc., Merrill Lynch Capital Markets and Bear, Stearns & Co., Inc. A portion of the shares were sold outside of the United States.

#90207p9436 07/26/1990 ~PR Newswire

UNIONDALE, NY (JULY 26) PR NEWSWIRE - Seaman Furniture Company, Inc., which is privately held, stated that its annual report for the year ended April 30, 1990, is being mailed tomorrow to the holders of its 12 percent junior subordinated notes due 1999 and filed with the United States Trust

Company of New York, as trustee.

For the fourth quarter, net sales were approximately $69.8 million and operating income was approximately $2.2 million, as compared to net sales of approximately $77.4 million and operating income of approximately $5.9 million for the fourth quarter of the prior year. The net loss was approximately $1.4 million after income taxes, interest expense, and amortization of intangibles for the 1990 fourth quarter, compared to a $7.4 million loss for the 1989 fourth quarter.

For the year, net sales were approximately $259 million and operating income was approximately $10.8 million, as compared to net sales of approximately $271.2 million and operating income of approximately $23 million for the same period in the prior year. The decline in sales and operating income from last year reflects primarily the slowdown of the furniture retail market which began in 1989 and continued through 1990. The slowdown is directly related to the drop in housing construction and an economic recession in the Northeast.

As previously reported in November 1989, Seaman's implemented a financial restructuring and in accordance with generally accepted accounting principles wrote off $200 million in goodwill related to its going private in 1988. The company realized a gain of approximately $32.4 million from the settlement of the debt in connection with the restructuring, which partially offset the goodwill write off. As a result of those non-recurring, non cash charges, Seaman's incurred a net loss for the year of approximately $184.7 million after income tax benefits, interest expense and amortization of intangibles.

Seaman's restructuring has significantly strengthened the company's balance sheet. At the year ended April 30, 1990, Seaman's had $59 million in cash on its balance sheet versus $7 million a year ago. With its strong cash position, the company is aggressively pursuing opportunities to increase its already strong market position.

Since the restructuring, Seaman's has made significant progress in its expansion program. A new store was opened in June in Orange, Connecticut and early performance indicates that its first year sales will exceed management's expectations. Leases have also been signed for four new stores in Middletown and Poughkeepsie, N.Y., and Enfield and Wethersfield, Conn. The company is also in the process of finalizing a lease for an additional store location in Langhorne, Pa.

Seaman's is the largest furniture retailer in the Northeast, operating 33 furniture stores in New York, New Jersey, Pennsylvania and Connecticut.

HOUSTON (JULY 26) PR NEWSWIRE - Enterra Corp. (NYSE: EN) today announced net income of $3,296,000, or 21 cents per share, for the second quarter ended June 30, 1990, compared with a loss of $222,000, or 2 cents per share, for the same period in 1989. For the six months ended June 30, 1990, Enterra had net income of $5,042,000, or 35 cents per share, compared with a loss of $1,383,000, or 13 cents per share, for the same 1989 period.

Sales and revenues for the 1990 second quarter were $32,556,000 vs. the $22,737,000 recorded for the same period last year. For the six month periods, sales and revenues totalled $62,934,000 in 1990 compared to $44,148,000 in 1989.

Thomas S. McIntosh, president and chief executive officer, noted, "The pipeline equipment segment improved dramatically during the second quarter with revenues almost doubling to $13.4 million. While a substantial portion of the increase over the first quarter was due to recent acquisitions, we are also experiencing a great deal of strength in our core business within that segment. The oilfield services and equipment business was down somewhat from the first quarter of 1990 due to the scheduled completion of a number of critical service wells during that period. We are optimistic that the remainder of 1990 will demonstrate even further improvement in both segments over the first half."

Enterra provides specialized services and products for drilling and servicing onshore and offshore oil and gas wells, both within the United States and in foreign countries, and designs, manufactures, sells and rents specialized equipment used in the pipeline construction industry.

CHICAGO (JULY 26) PR NEWSWIRE - FCC National Bank, a wholly owned subsidiary of First Chicago Corp., announced the public offering of $700 million of certificates backed by credit card receivables through a management group of First Chicago Capital Markets Inc., Salomon Brothers Inc. and The First Boston Corp. This offering represents a $200 million increase from the $500 million filing earlier this week with the Securities and Exchange Commission.

The certificates represent an undivided interest in the assets of the First Chicago Master Trust II and constitute the second offering from this

newly created Master Trust.

The certificates are priced at 100 percent, plus accrued interest from Aug. 1, 1990, with the coupon set at 8-7/8 percent.

Net proceeds of approximately $700 million from the sale of the certificates, exclusive of accrued interest, will be paid to FCC National Bank. The bank intends to use the proceeds for general corporate purposes.

SAN JOSE, CA (JULY 26) PR NEWSWIRE - EIP Microwave Inc. (NASDAQ: EIPM) has purchased from Cushman Electronics Inc., the assets and rights to manufacture the Cushman 24A and 80B products. The 24A is a frequency selective level meter used in field testing of analog microwave links. The 80B is an automatic PCM fault locating test set used in testing PCM carrier span lines. This strategic acquisition strengthens EIP's position in the communications test market and enhances EIP's communications product offerings.

EIP Microwave Inc. designs, manufactures and markets test and measurement equipment, primarily for the defense electronics and telecommunications markets. Principal customers include telephone companies, utilities, military and government agencies, military subcontractors, and research and development organizations. EIP's manufacturing facilities are located in San Jose with corporate offices in Newport Beach, Calif. The company's common stock is traded over the counter on the NASDAQ National Market System using the symbol "EIPM."

The 24A is priced at $5,995 and the 80B at $5,700. Delivery is 12 weeks A.R.O. For further information, please contact the Sales/Marketing Department, EIP Microwave Inc., 2731 N. First St., San Jose, Calif. 95134. Telephone: 408-433-5900, Fax: 408-434-0258.

#90207u0016 07/26/1990 ~United Press International

MEXICO CITY (JULY 26) UPI - Citicorp-Citibank chairman John Reed warned Wednesday that the world could face a capital shortage in the near future because of unpredictable changes in the global economy.

''It is a complicated world, a world that is going to be short of capital '' said Reed, addressing members of the American Chamber of Commerce of Mexico.

Reed said recent changes around the world, especially in Eastern Europe, have made the world economy very different than it would have been possible to think of a year ago.

''The collage of interest is dramatically different ... It is difficult to predict what is going to happen,'' Reed said.

Reed, who held closed-door talks with Mexican President Carlos Salinas de Gortari Tuesday, also predicted the U.S.-Mexican free trade zone currently being negotiated between the neighboring nations would be successful.

''I do believe that there will be a free trade zone with the United States '' Reed said. ''We are bulilding a global community and Mexico has defined itself as being part of that community.''

When asked about future U.S.-Mexican economic relations, Reed said, ''There will be an increased linkage. Both economies will be better ... but both will lose a little bit of freedom.''

The United States and Mexico, its third largest trading partner, have agreed to begin a series of negotiations next year to hammer out a free trade agreement.

Reed lauded liberal economic reforms launched by Salinas' predecessor

Miguel de la Madrid, and the current president's commitment to continue those policies.

De la Madrid, whose six year term ended Dec. 1, 1988, pushed through wide-ranging reforms, seeking to lessen the state's role in the economy, to provide incentives for the private sector and to increase non-petroleum exports as well as lowering subsidies on many consumer goods.

Salinas de Gortari has accelerated the process since taking office Dec. 1, 1988.

''Mexico has been blessed with good governments,'' Reed said, adding that Mexico remains an attractive market for foreign investors.

''I believe that foreign investment will come ... Multinational investors are increasingly seeing Mexico as an attractive market,'' Reed said. ''The Mexican government has a clear view of where it is going and my impression is that it will be successful.''

Reed also said Mexico will not need to renegotiate its foreign debt in the near future.

''There would not be a necesscity to renegotiate the debt,'' Reed said, adding that the Mexican government would be able to balance its account by selling state-run companies, including the phone company, and by privatizing banks.

In February, Mexican government and representatives of private foreign banks signed a landmark debt accord that reduced Mexico's medium-term commercial foreign debt by $7 billion and saves the country $1.6 billion a year in interest payments.

The debt reduction agreement, assembled under the plan drawn up by U.S. Treasury Secretary Nicholas Brady, is the first major agreement under the Brady Plan.

The accord also guaranteed Mexico about $1.5 billion in annual new loans during 1990-92.

Mexico's total foreign debt is currently estimated at about $95 billion.

#90207u0070 07/26/1990 ~United Press International

BAKERSFIELD, CA (JULY 25) UPI - National League umpire Bob Engel, a veteran of 25 years, resigned Wednesday after pleading no contest to charges he shoplifted several boxes of baseball cards from a local store.

Engel, 56, tearfully read a prepared statement in his hometown, saying he was depressed over family problems and had ''conducted myself in ways I could not control or understand.''

Earlier in the day, Engel pleaded no contest to two misdemeanor charges stemming from the theft of baseball cards in April. He was placed on three years probation, given 40 hours of community service and will continue the counseling he has been undergoing since his arrest.

Engel, who is married with two children, apologized for what he called ''conduct that defies all logic.''

''I became withdrawn, I was depressed, I experienced anxiety and vertigo attacks,'' he said. ''I now realize that for the past several years it was as if I were two different people, running along a tightrope going faster and faster, knowing I was going to fall, just not knowing when.

''Because I love baseball, I would never intentionally do anything to harm or taint the game. If I have unintentionly done so, I apologize to the fans of baseball, the players, the managers, and in particular, my fellow umpires.

''Now that a great burden has been lifted from my shoulders, I plan on working ... extra hard to regain your confidence as well as my own dignity and self respect.''

Gordon Verrell, national president of the Baseball Writers Association of America, said at Dodger Stadium, ''Bob Engel was an outstanding umpire, and you hate to see anyone end his career this way. I knew him well as a personal friend, and speaking for the writers, we wish him well.''

#90207u0099 07/26/1990 ~United Press International

SEATTLE (JULY 25) UPI - A scathing review by Todd Day's college coach inspired a sterling performance at both ends of the court by the Arkansas junior Wednesday night.

Day provided the early spark with 11 first-half points as the United States used an aggressive, full-court defense to rout Italy 113-76 and move into the semifinals of the Goodwill Games.

''My coach (Nolan Richardson) was in the stands (Tuesday) night and he told me my defense stinks,'' Day said. ''So I wanted to show him and everybody else that I could play defense.''

U.S. Coach Mike Krzyzewski then called on Day to start and defend Italy star Antonello Riva, and told his team it would be on the attack from the

opening tip.

''Most players on this team play full-court defense,'' Day said. ''So when coach told us, you could see eyes light up. Everybody knew they'd be in the game, and when your backs are to the wall, you always play hard.''

The U.S. team, beaten 92-85 Tuesday night by the Soviet Union, had to win in order to advance against Brazil in one of Friday night's semifinals. The Soviets meet Yugoslavia in the other.

It was evident early that this would be a different night for the United States than when they met the Soviet team. The 6-foot-8 Day gave the team a taller first five, and they came out with a full-court, harassing, trash-talking defense that flustered Italy.

Riva, who had scored 63 points in two previous games, finished with 21 but hit only 6 of 16 shots and got an earful from Day when he tried to intimidate the Arkansas junior.

''We got pressured from the first second and we did not handle it well,'' said Italy Coach Alessandro Gamba. ''Our players are not used to this kind of basketball. We had a lot of problems to solve during the game.''

Italy never got a grip on those problems. The U.S. team jumped ahead 17-2, and Italy didn't get closer than 11 the rest of the half and no closer than 21 the rest of the game.

Kenny Anderson led the U.S. scoring with 19 points but had plenty of help. Day finished with 15, Doug Smith 14, Billy Owens 12, Alonzo Mourning 11 with nine rebounds and five blocks, and Lee Mayberry added 10.

The United States also snapped their three-point shooting slump. They made eight, five more than in their previous two games. They shot 57 percent from the field and 78 percent from the line.

''We reacted in a positive manner to the defeat,'' said Krzyzewski. ''We realized we were in a tournament, that last night's game wasn't for the championship. Now four teams are 0-0.''

-30- 2770

#90207u0102 07/26/1990 ~United Press International

ANCHORAGE, AK (JULY 25) UPI - Four Western states and a Canadian province Wednesday vowed to mount a joint effort to prevent oil spills, regulate the oil industry and prepare to fight spills together anywhere along the West Coast.

The unprecedented western coastal alliance was designed to bring extra

clout to struggles in Congress and in various state capitals as well as in Canada to protect the environment against oil shipping accidents, according to representatives from California, Oregon, Washington, Alaska and British Columbia.

The States-British Columbia Oil Spill Task Force held a news conference following a two-day session in Alaska, site of the nation's worst tanker spill, last year's 11-million-gallon Exxon Valdez spill.

''What we're doing here is adding a new dimension to the concept that if something happens on the West Coast we're all involved,'' said Michael Kahoe of the California Environmental Affairs Agency.

''We're here to ensure that spills are kept to a minimum and if there are such spills that we're going to cooperate,'' said Richard Dalon, deputy minister of the environment for the Canadian province of British Columbia.

''I don't think you can underestimate the importance of the fact that we have five different jurisdictions coming together,'' said Christine Gregoire of the Washington Department of Ecology, who said the task force would lobby in all jurisdictions.

Gregoire said trans-boundary drills would be held in which state and federal agencies and the oil industry would cooperate in responding to a mock spill.

''A number of members of the industry have taken fairly significant steps'' toward preventing spills, said Fred Hansen, director of the Oregon Department of Environmental Quality, but he said, ''We believe the risks are great enough that additional steps need to be taken.''

Hansen said that ''the ability to respond to a spill can never be sufficient and can never clean up all of the oil that's spilled or prevent the damage. Consequently, prevention is the number one priority of all of us.''

But Dennis Kelso, who as Alaska commissioner of environmental conservation has spent the last 16 months overseeing the Exxon spill cleanup, said, ''We have to have both the strong prevention priority and a strong spill response preparedness priority.''

Many of the task force's 45 recommendations are not new and call for such things double hulled tankers, spill prevention and response plans, government oversight and various legal sanctions.

But the group also wants tug escorts for tankers, comprehensive vessel traffic systems including speed limits and tracking, towing systems on tankers, new mariner and terminal worker training programs with

certifications, regular vessel inspections, involvement of citizen groups, as and even wildlife rescue training.

#90207u0109 07/26/1990 ~United Press International

CAMBRIDGE, MA (JULY 25) UPI - Harvard University archaeologists in Israel have unearthed a unique 3,500-year-old idol made partly of silver, the school said Wednesday.

The 4 1/2-inch-long, 4 1/4-inch-high calf - found in what is believed to be a temple in the ancient city of Ashkelon, north of Gaza - is the oldest figurine discovered so far to be mentioned in the Old Testament and the history of Canaan, the announcement said.

The figurine is also the first to be found intact inside a shrine and the first such object made partly of a precious metal, the school said.

''It is a very exciting and unexpected find,'' said Harvard Professor Lawrence Stager, director of the unversity's Semitic Museum and leader of the archaeological team.

''It was encased in a pottery shrine the size of a football. We looked inside and there was this marvelously cast figure made of silver, bronze, and copper. It was astoundingly well preserved. The shrine was in one room of a building that we believe was part of a temple,'' Stager said.

''The discovery shows that, by the 16th century B.C., a commonly used symbol was already in place,'' he said.

''Tracing the continuity of the symbol and seeing how it was used by different people at different times provides valuable knowledge about the history and development of religion,'' Stager added.

Scholars are at odds over whether the symbols of calves and young bulls were worshipped by themselves, or adorned other symbols of worship.

The city of Ashkelon, destroyed by the Egyptians around 1550 B.C., may have been in existence for 2,000 years with a population approaching 20,000, Stager said.

#90207u0134 07/26/1990 ~United Press International

ALBANY, NY (JULY 26) UPI - The vendors may not be shouting, ''Heeeyy, get yer cold sauvignon blanc here,'' but New York baseball stadiums will be allowed to sell wine next summer, thanks to a bill signed by Gov. Mario Cuomo.

The new law, signed Wednesday, allows ballparks, racetracks and stadiums that sell beer to sell ''wine products,'' which mostly means wine coolers.

The bill's sponsor, Assemblyman Vincent Graber, said he introduced the law in response to growing demand for the bubbly wine beverage at Buffalo's Pilot Field, which hopes to land a major league baseball team when the National League expands in 1993.

The field is home to the triple-A Buffalo Bisons of the American Association.

Graber said the demand for coolers seems to come from younger fans.

''I'm 59 years old. I myself wouldn't be ordering a wine cooler,'' he said.

#90207u0169 07/26/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 26) UPI - After failing another fuel leak, the space shuttle Atlantis will return to its hangar for repairs and be replaced with the shuttle Columbia, which will blast off on a scientific mission in early September, officials said.

Under the new plan, Atlantis's launch on a four-day military flight will be delayed until after the shuttle Discovery's takeoff Oct. 5 on a high-priority flight to ferry the Ulysses solar probe into space.

The Columbia and its seven-man crew instead will be launched first in early September on a 10-day astronomy mission, more than three months behind schedule.

In addition, processing schedules make it virtually impossible for NASA to launch more than three shuttles during the remainder of this year.

The second of NASA's so-called ''great observatories,'' the Gamma Ray Observatory, which was scheduled to fly aboard Atlantis in November, will likely now be delayed until next March.

The new shuttle schedule was announced Wednesday after Atlantis failed another test of its leaking fuel system.

''Basically we concluded today that we did not fix it (the leak), which did not surprise us, and we also concluded that we do not fully understand what we're looking at there and therefore we have decided to roll this stack back,'' said William Lenoir, NASA's associate administrator of space flight, during a news conference at NASA headquarters in Washington.

NASA's three space shuttles were grounded when leaks of dangerous hydrogen fuel were detected on Columbia and then Atlantis, which was being prepared for launch on a secret military mission earlier this month.

The grounding came just after a defect was discovered in the Hubble Space Telescope and contributed to an ongoing storm of criticism of the space agency that has been fueled by problems with the proposed space station designs.

NASA managers had hoped tightening bolts last week around a flange near a 17-inch-wide fitting where Atlantis connects to an external fuel tank would stop the leak and allow the shuttle to take off around Aug. 11.

But signs of leakage showed up again Wednesday during a fueling test that began at the Kennedy Space Center at 7:40 a.m. The test was marred when a large plastic ''baggie'' used to trap escaping hydrogen broke.

Lenoir said he was not surprised that Atlantis leaked again because he did not expect the tightening of shuttle's bolts would fix the problem. But he believed officials would find the source of the problem and fix it and that further fuel line problems would not surface in Columbia.

''We have no reason to suspect we have any funnies or anticipate anything out of the ordinary,'' he said.

Columbia was outfitted earlier this month with a new fuel line taken from the new shuttle Endeavour. Lenoir said officials would probabaly to perform a tanking test on Columbia to make sure the new fitting does not leak.

Exhaustive testing at the Kennedy Space Center and at a laboratory in California ultimately traced Columbia's problem to trouble with seals around drive shafts used to move giant valves inside the 17-inch disconnect assembly.

''We have every reason to believe that we have no more problems ahead of us ... We're optimistic that we understand where we're going and will proceed down that road,'' he said.

Columbia was grounded May 29, six hours before its scheduled liftoff, when sensors detected hydrogen gas spewing into its engine compartment. Columbia then was hauled off the launch pad and replaced with Atlantis, which originally was scheduled for a mid-July launch.

But during a fueling test at the launch pad, a small leak was detected. While the leak initially appeared similar to Columbia's, subsequent tests traced the problem to the area of the 17-inch flange.

MONROVIA, Liberia (JULY 26) UPI - Rival rebel forces trying to oust the beleaguered government of President Samuel Doe tightened their grip on the capital amid speculation the rebellion could reach a head Thursday, Liberia's independence day.

Rebels waded across a swamp to launch an attack Wednesday on Monrovia's Spriggs-Payne airfield, the Liberian capital's last remaining link with the outside world.

Diplomats reported heavy fighting in the eastern part of the city, where troops loyal to rebel leader Charles Taylor have resumed their offensive to oust Doe.

Insurgents commanded by another rebel leader, Prince Johnson, have taken all of the city's northern Bushrod Island, where they control the port and oil depots.

With Taylor's troops attacking from the east and Johnson's from the north, the city apeared to be caught in a vice which could clamp shut on Thursday to mark Liberia's independence day, annually observed on July 26.

Diplomats said Taylor's forces had surrounded and effectively neutralized Doe's troops barricaded inside the radio and television stations east of the city, but did not attack them, apparently in order to spare the facilities.

They said Taylor's fighters staged the assualt on Spriggs-Payne airfield, which until Tuesday was still being used by small planes to evacuate people. The guerrillas weeks ago occupied Robertsfield International Airport, the nation's main air gateway.

Government troops counterattacked Wednesday morning across two bridges which converge at the southern tip of Bushrod island, but were repulsed under heavy rebel fire, seemingly from Johnson's forces.

One squad of government soldiers was seen crawling across one of the bridges but was pinned down under the heaviest gunfire yet heard in the battle for the city.

Some soldiers lay motionless as though dead or injured, while others ran back to the safety of the government positions.

Shells were seen exploding on the other bridge, hitting a government jeep which was trying to lead an attack from that side.

The wreckage of the jeep remained immobilized in the middle of the bridge.

The government, firing from the city center, shelled rebel positions on the far side of the bridges, some rounds falling close to the city's main oil storage depot, which is in rebel hands.

Rebels on Tuesday had crossed a swamp to form on Bushrod Island a bridgehead near the city's telephone exchange. But government troops advanced Wednesday and forced a guerrilla retreat.

Acting Information Minister Paul Allen Wie during an impromptu news conference at the Hilltop Ducor Hotel - with gunfire echoing all around - said Doe remains as defiant as ever and has no intention of resigning.

''The president thinks it is worth dying for his country,'' Wie said.

He distributed a news release quoting Doe as saying a sudden resignation would lead to greater anarchy and ethnic tragedy in Liberia.

Referring to a call for his resignation sent by the black caucus in the U.S. congress, Doe said: ''I cannot heed the advice ... to quit the leadership of Liberia because it would introduce a dangerous precedent of outrageous rebellion and instability into the West African region.''

Doe met on Tuesday with U.S. Ambassador Peter de Vos, and gave him an assurance that Liberian government charges during the past few days would not lead to an outright break in relations.

But the government repeated its accusation that the United States is actively aiding the rebel side.

Wie told reporters that the Liberian people are disappointed by the United States.

Doe on Friday expelled the Chief of the U.S. military mission to Liberia, Col. David Staley, after accusing him of actively supporting Taylor.

The government on Tuesday accused the United States of launching an attack on Doe's presidential mansion from a submarine, a charge immediately denied by Washington.

Witnesses reported the assault came from a rebel gunboat offshore. Troops at the fortified mansion returned the fire, and later announced that five civilians were killed on a nearby main road.

Monrovians pressed on with their desperate search for food and water in a city where all shops are shut and basic utilities have been closed for more than a month.

About 5,000 people were jammed into a U.S.-owned fuel storage depot near the U.S. Embassy in the exclusive Mamba Point district, seeking haven from attacks by soldiers who go on looting sprees and killing rampages.

Sixteen ambassadors met the acting foreign minister on Wednesday to complain about being harassed by troops at checkpoints throughout the city.

WASHINGTON (JULY 26) UPI - Sen. David Durenberger, R-Minn., denounced by the Senate for ''reprehensible'' and unethical conduct relating to his personal finances, apologized for his actions, saying he was ''deeply sorry.''

In a speech on the Senate floor, Durenberger vowed to ''work even harder than I already have to bring about solutions to our national challenges, by bringing to the Senate the best ideas my state - and my experience - can produce.''

''To my colleagues here, who know me and work with me, I would just say how deeply sorry I am for the painful ... experience we've just been through, and for the extra burden my misconduct has placed on each of you

'' Durenberger said.

The 96-0 Senate vote supported the unanimous resolution passed one week ago by the Senate Ethics Committee that recommended the punishment for evading limits on outside income and other violations.

Denunciation is the toughest sanction - short of outright expulsion - that a senator can receive for wrongdoing.

Durenberger, senator since 1978, and Sen. Rudy Boschwitz, his Republican colleague from Minnesota, both voted ''present.'' Sens. Tom Harkin, D-Iowa and Brock Adams, D-Wash., did not vote.

In its resolution, the committee said Durenberger used a book deal with a Minneapolis publisher and other financial maneuvers to avoid Senate rules limiting outside income. The scheming - involving more than $100,000 - was ''reprehensible and has brought the Senate into dishonor and disrepute,'' the panel said.

It concluded that Durenberger ''knowingly and willingly'' engaged in conduct that was ''in violation of the statutes, rules and Senate standards and acceptable norms of ethical conduct.''

In addition to denunciation, the committee recommended Senate Republicans take additional disciplinary action against Durenberger and ordered the third-term senator to reimburse $29,000 plus interest to the Senate and pay $95,000 to charities with which he has no affiliation.

Sen. Howell Heflin, D-Ala., chairman of the Ethics Committee, said in presenting the panel's findings to the Senate that there was ''convincing evidence that Senator Durenberger knowingly and willfully engaged in a pattern of unethical misconduct which violated statutes, rules and standards of conduct applicable to members of the United States Senate.''

''It is this evidence of knowledge and intent which has brought us here today and which has obliged each member of the committee to conclude that Senator Durenberger must be denounced and that he must disgorge himself of money unjustly and unlawfully obtained,'' Heflin said.

Durenberger, 55, has maintained his misconduct was unintentional and urged committee members in a July 12 letter to issue a milder punishment of reprimand, which requires no formal action by the Senate.

''The (investigative) process has been a sanction in itself'' and has had a ''devastating effect on my life and career,'' Durenberger said in the letter.

Despite Durenberger's apologies and plea for leniency, the six-member

ethics panel - three Democrats and three Republicans - followed the recommendation of Special Counsel Robert Bennett, who said during a public hearing last month that Durenberger's actions were not inadvertent and were ''clearly and unequivocally unethical.''

A 15-month Ethics Committee investigation revealed that Durenberger received some $100,000 in outside income in 1985 and 1986 through an agreement with Piranha Press, which published the senator's two books on health and defense and foreign policy.

The arrangement allowed Durenberger, who is paid $98,500 yearly as a senator, to sidestep supplemental income limits by claiming speeches were ''book promotions'' and having the money paid to Piranha Press, which then turned it over to Durenberger.

Senators were allowed to keep a maximum of $22,000 for speaking fees in 1985 and $30,000 in 1986.

The committee also found several other violations, including: Durenberger improperly accepted limousine service for personal use; transferred funds to his campaign committee through Piranha Press; and failed to report on financial disclosure forms reimbursement for travel expenses stemming from the book deal.

MONTREAL (JULY 26) UPI - Authorities expect to file murder and weapons charges against Mohawk Indians involved in a 2-week-old land dispute that has left one police officer dead, a Quebec police spokesman said.

Police spokesman Michel Martin said Wednesday that police would give prosecutors information relating to the two-week standoff at the Kanesatake and Kahnawake reserves near Montreal and recommend that hundreds of charges be brought against the Indians.

Prosecutors will review the information and then instruct police what charges to formally file, Martin said. He said the charges would include murder and illegal possession of banned weapons.

Martin's statements came after Mohawk supporters accused police of violating Indian human rights at the two reserves.

A Quebec police officer was killed in an abortive police raid on the Mohawk barricades at Kanesatake July 11, but police said after the incident they could not determine whether he was felled by a Mohawk or police bullet.

The Indians erected the roadblock four months ago to cut access to a community golf course expansion site they say is on their ancestral lands.

Heavily-armed Mohawks beefed up defenses at the barricades after the raid. Police have cordoned off the Kanesatake reserve and the adjacent village of Oka, Quebec, which is near the U.S. border.

Mohawks at the nearby Kahnawake reserve are blocking a main route to Montreal in sympathy with the Kanesatake Mohawk land claims.

Many of the Mohawk warriors guarding the barricade at Kanesatake - and at the secondary standoff site nearby - are heavily armed members of the Warriors Society from the troubled St. Regis Indian reserve that straddles the U.S.-Canadian border near Massena, N.Y.

A senior Canadian official Tuesday called the Warriors criminals who are holding reserve residents hostage, a charge denied by Mohawk spokesmen. The St. Regis Mohawk Warriors sided with pro-gambling forces when pro- and anti-gambling factions clashed in May, leaving two dead.

The Quebec Human Rights Commission Tuesday accused Quebec police of violating human rights by blocking deliveries of food and medicine at the Kanesatake reserve.

The Commission leveled the accusations late Tuesday after investigating conditions at Oka and the reserve, 25 miles west of Montreal.

''We conclude that fundamental and judicial rights, the right to non-discrimination and non-harassment because of race, are seriously threatened,'' the commission said in a statement.

The commission said investigators found Quebec police also detained people without good reason, including one who required medical attention and another bringing in medication, and harassed native Indians or people who appear to be aboriginals.

The commission has no authority over the police but it urged Quebec Minister of Public Security Sam Elkas to ensure that police allow free access for people leaving and entering the barricades without harassment and a free flow of supplies.

Negotiations aimed at ending the standoffs stalled last week and since then the Mohawks and the provincial government have merely traded proposals.

The provincial government says it will resume negotiations only outside the barricades and it is being selective about who can join the Mohawk negotiating team. The Mohawks rejected the conditions.

The federal government has repeatedly refused demands by the two sides, as well as human rights and church bodies, that it get involved in the negotiations. On Wednesday, federal officials repeated earlier statements that they are close to buying the disputed Kanesatake lands for the Mohawks.

Meanwhile in British Columbia on Wednesday, an Indian band held up a provincial railway from running passenger and freight lines to Seton Portage, a small town 138 miles north of Vancouver.

The Seton Indians, who want the provincial government to recognize native and claims, began the B.C. Rail blockade at 11 a.m. EDT. The situation was still not solved late Wednesday, but provincial government officials have said they are considering the situation.

(JULY 26) UPI - SPORTS TRANSACTIONS

BASEBALL

New York (AL) - Placed first baseman Don Mattingly on 15-day disabled list.

St. Louis - Waived pitcher Ricky Horton; recalled pitcher Ken Hill from

Louisville of the American Association.

BASKETBALL

New Jersey - Signed forward Jud Buechler to a multi-year contract.

COLLEGE

Duquesne - Appointed Lorri Lankiewicz assistant athletic trainer.

FOOTBALL

Chicago - Signed draft picks, defensive tackle Fred Washington and linebacker Ron Cox.

Detroit - Signed quarterback Bob Gagliano to a one-year contract.

Kansas City - Placed safety Deron Cherry and linebacker Angelo Snipes on physically unable to perform list; placed cornerback Albert Lewis on reserve-did not report list.

New Orleans - Signed linebacker Rickey Jackson.

Pittsburgh - Free agent wide receiver Ray Roundtree announced his retirement.

San Francisco - Signed running back Dexter Carter, their first-round draft pick, to a four-year contract.

HOCKEY

Detroit - Signed Doug MacLean to a two-year contract as assistant coach and named Phil Myre as the team's goaltender consultant.

Minnesota - Howard Baldwin resigned as president; majority owner Norman Green will take on additional responsibilities of president and chief executive officer; confirmed signing of left wing Brian Propp.

NY Islanders - Signed right winger Mick Vukota to a multi-year contract.

SOCCER

Major Indoor Soccer League - Voted to change its name to the Major Soccer League.

#90207u0377 07/26/1990 ~United Press International
(JULY 26) UPI - The New York Mets climbed to within a half-game of Pittsburgh in the NL East because they barely held onto a nine-run lead while the Pirates blew leads in the ninth and 10th innings.

The Mets survived a six-run Philadelphia ninth for a 10-9 victory Wednesday night, while the Montreal Expos scored four in the 10th for an 8-7 victory over the first-place Pirates.

''If you let a ballgame like that get away, that's one of the worst losses of the year,'' Mets outfielder Darryl Strawberry said. ''They came back and scored some runs in the ninth. They got hit after hit. It was a little scary. But the most important thing was that we came out on top.''

Strawberry blasted a two-run home run to give the Mets a 9-0 lead in the sixth.

The Phillies struck for seven straight singles and six runs in the bottom of the ninth. Relievers Wally Whitehurst and Julio Machado were roughed up for five runs to bring Philadelphia within 10-8. John Franco relieved Machado and after walking pinch hitter John Kruk to load the bases, got Lenny Dykstra to hit into a double play and score the final run. Tom Herr lined out to short to end the game and preserve the victory for Sid Fernandez, 7-6, who gave up six hits and two runs in seven innings while striking out nine and walking four.

''It wasn't pretty but I got it done,'' said Franco, who earned his 23rd save of the season. ''I figured Lenny would jump on the first pitch so I tried to pitch him in. He hit it right to Keith (Miller) and they turned a nice doubleplay. I like to go after Herr with changeups and he hit it right at (shortstop Mario Diaz).''

Trailing 3-0 in the fifth, the Pirates came back to tie the score in the ninth and take a 4-3 lead before the Expos scored to send the game into extra innings.

Pittsburgh rallied to a 7-4 advantage in the 10th. After Montreal pulled to within 7-5 on an Andres Galarraga RBI single, Marquis Grissom belted

his first homer of the year, a three-run shot, to make a winner of Bill Sampen, 8-2.

''I wasn't trying for a home run,'' Grissom said. ''I just wanted to get the ball in play with a good pitch. I was thinking hit the ball hard and drive a man in. It was the biggest hit of my career.''

''That was one of the (strangest) three innings I have ever seen,'' Montreal Manager Buck Owens said. ''Neither bullpen could get anybody out. We were the luckier of the two clubs tonight. I am glad we stuck around and saw this one.''

In other NL games, Houston slammed Atlanta 5-1, San Diego edged Cincinnati 2-1 in the first game, San Diego pummeled Cincinnati 10-4 in the second, St. Louis blanked Chicago 9-0 and San Francisco pounded Los Angeles 9-2.

In the American League it was: Detroit 4, Baltimore 3; Boston 2, Milwaukee 0; Cleveland 6, Chicago 1; Oakland 13, California 3; Kansas City 6, Toronto 1; Minnesota 6, Seattle 0 and Texas 9, New York 7.

-- AROUND THE NL --

Astros 5, Braves 1

At Atlanta, Danny Darwin threw a five-hitter and Eric Yelding went 4-for-4 with two RBI to help Houston snap an Atlanta four-game winning streak. Darwin, 5-1, matched a career high 10 strikeouts to win his fourth straight and improve to 6-0 lifetime against the Braves. Atlanta rookie Steve Avery, 1-5, allowed nine hits over six innings, walking two and striking out three.

Padres 2, Reds 1, 1st game
Padres 10, Reds 4, 2nd game

At San Diego, Mike Pagliarulo collected five RBI and Tony Gwynn stroked four hits to pace a 20-hit attack in the nightcap to complete a sweep of the twi-night double-header. In the opener, Ed Whitson scattered six hits over 7 1-3 innings and Joe Clark smacked an RBI double to lead the Padres to a 2-1 triumph. In the second game, Calvin Schiraldi, 3-2, pitched six innings, yielding five hits and two runs. Loser Rick Mahler, 4-4, surrendered 12 hits and eight runs in four innings.

Cardinals 9, Cubs 0

At St. Louis, John Tudor pitched a five-hit shutout and had a three-run double during an eight-run first inning to lead the Cardinals. Tudor, 9-3, earned his first complete shutout since June 23, 1988 and went 2-for-4 with three RBI. St. Louis roughed up Chicago starter Mike Harkey, 8-5, for

eight runs and seven hits.

Giants 7, Dodgers 2

At Los Angeles, Matt Williams hit a three-run homer in the first inning to help San Francisco snap a six-game losing streak. Scott Garrelts, 8-7, pitched seven shutout innings before tiring in the eighth allowing two runs on eight hits while walking two and striking out one. Mike Morgan, 8-9, lasted 5 1-3 innings, surrendering six runs on seven hits and striking out three.

-30- 4879

#90207u0387 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - A defense witness gave Mayor Marion Barry a temporary boost when he said he saw no drugs on a 1986 Virgin Islands boat trip, but quickly brought up another of the mayor's alleged vices, sex, as his reason.

Albert Benjamin, who accompanied the mayor on the boat trip, contradicted testimony of a key prosecution witness when he said Wednesday he saw no drug use on the boat.

But when asked by prosecutors why, he joined the list of witnesses who described the mayor's sexual activity, saying Barry was with key prosecution witness Rasheeda Moore on top of the cabin, and she was ''overexposed.

Benjamin, a Virgin Islands native, said he was ''uncomfortable'' and ''angry'' because Barry, who is married, was ''making advances to her and she was accepting them.'' Benjamin said he was ''ashamed'' and looked the other way.

Moore, a former model, testified she was Barry's lover for two years and shared cocaine with him more than 100 times. She lured Barry to the Vista Hotel where he was videotaped smoking crack Jan. 18 in an FBI sting operation.

Benjamin was called by Barry's lawyers to dispute the account of government witness Charles Lewis, who testified he, Barry and others used powder cocaine in a bathroom on the boat and openly smoked marijuana served by a crew member on a dessert tray.

Lewis, a convicted cocaine dealer, is the government's main witness for seven of the 14 counts against Barry, including all three felony perjury charges.

Benjamin testified he has known Lewis for eight years and was present on

the boat trip with Lewis, Barry and others in June 1986. He said he saw no drug use on the boat and never knew Lewis to use drugs.

Another witness also said marijuana was used on the cruise.

Outside court, speculation continued over whether Barry would take the witness stand in his own defense. His lawyer, R. Kenneth Mundy, said the decision would be announced Thursday morning.

But evidence, including a statement Mundy made to the judge during a bench conference, seemed to point to the mayor staying off the stand.

''I consider it right now unlikely that we will call Mr. Barry, but that is not something we have finally concluded,'' Mundy told U.S. District Judge Thomas Penfield Jackson.

Washington television station WJLA, quoting a source on the defense team, said a ''fairly firm decision'' had been made that Barry would not testify.

Mundy also said he could complete his case Thursday. Prosecutors said they want to call two or three witnesses for their rebuttal, which could be completed in a day. Closing arguments would follow and then the jury would begin deliberations.

In testimony Wednesday, Benjamin said he was interviewed by federal agents four times. Defense attorney Robert Mance asked Benjamin if FBI agents ''attempted to pressure you to change your original testimony?''

''Yes,'' Benjamin said.

''And what did they try to get you to change?'' Mance asked.

''They kind of kept driving home the point that I had to know, I had to see, I had to be aware of (drug use),'' said Benjamin, who claimed one agent ''crowded down on me. He was right down on top of me.''

Benjamin said that, after an interview at FBI headquarters in Washington, he told the agent, ''Mister, you pushed your luck too far. It was too much pressure.''

Under cross-examination, Benjamin conceded he was never asked to invent any stories and felt the FBI thought he was lying and simply wanted him to tell the truth.

Benjamin's wife, Carmen Benjamin, testified she also never saw drugs or smelled marijuana on the outing.

Mundy told Judge Jackson he wanted to call a medical expert to testify that

the long-term use of narcotics can damage a person's memory, testimony he said could discredit claims by witnesses who said they shared cocaine with Barry.

Jackson said he would rule Thursday on whether the witness would be admitted to testify.

Barry, 54, is charged with three felony counts of perjury and 11 misdemeanor counts of cocaine possession and conspiracy to possess cocaine. If convicted on all counts, he could be sentenced to 26 years in prison and fined $1.85 million.

WASHINGTON (JULY 26) UPI - While a superior court judge in New Hampshire, Supreme Court nominee David Souter wrote a letter on behalf of the court urging the state Legislature not to enact a bill that would have forced the judges ''to make make fundamental moral decisions'' on abortions for pregnant minors.

A leading abortion rights advocate in the state, who solicited the letter, said the correspondence ''has been a critical part of preventing passage of parental consent legislation'' in New Hampshire for the last nine years The Washington Post reported Thursday.

After being contacted by state Rep. Elizabeth Hager, the abortion-rights supporter, Souter wrote the May 13, 1981, letter on behalf of the judges of the New Hampshire Superior Court.

The letter, while specifically neutral on the question of parental consent asked that the judges not be placed in the position of applying their own views to such cases.

Judicial involvement would have been necessary in order for a parental consent law to pass constitutional muster.

The Supreme Court had ruled that any law requiring a minor to receive permission from her parents to have an abortion had to give her the alternative of obtaining permission from a judge.

Hager said Souter's letter opposing the ''judicial bypass'' option ''has been very influential'' in helping to kill efforts to pass a parental consent law, which is favored by abortion opponents.

But Hager said ''the tone of the letter clearly indicates his purpose was to defend the judicial system against the bypass, and not take a stand against legislation.''

The Post said a White House spokeswoman refused to comment on the letter.

With abortion a central focus of the debate over President Bush's choice to succeed retired Justice William Brennan, Souter's letter seems certain to draw close scrutiny.

Both sides of the abortion debate have been studying Souter's record to determine his stance on the issue.

Senate confirmation hearings will likely begin in September.

While the letter may have been useful to abortion-rights supporters, it also reflected a view of the role of judges that is in line with the philosophy of Bush and his predecessor, Ronald Reagan.

Writing to Rep. Roma Spaulding, who chaired the New Hampshire House committee considering the parental consent proposal, Souter said the legislation would ''leave it to individual justices of this court to make fundamental moral decisions about the interests of other people without any standards to guide the individual judge'' and based on ''only the individual judge's principles and predilections.''

Souter said the proposed bill ''would force the Superior Court to engage in just such acts of unfettered personal choice'' and urged the Legislature not to enact any parental consent bill that involved ''the exercise of judicial choice.''

The letter made no reference to the Supreme Court's earlier rulings, in which the justices said parents may not exercise ''an absolute, and possibly arbitrary, veto'' over their daughter's abortion decisions.

KEMAH, TX (JULY 26) UPI - Ship traffic was running normally Thursday in the Houston Ship Channel after being held up for nearly 24 hours by a tugboat that sank, spilling an undetermined amount of diesel fuel.

''We have no problem with traffic,'' said Seaman Dennis Felton at the Coast Guard station in Galveston. ''It's all moving, no problem at all.''

The channel reopened at 11:30 p.m. Wednesday and ships were told to ''slow bell,'' or follow a speed restriction, Felton said.

The Irene Frazier sank at 12:01 a.m. Wednesday, and became completely submerged except about 3 feet of its antenna that remained above the water's surface, Coast Guard Lt. Cmdr. Frank Whipple said.

Crews brought the tug to the surface late Wednesday and moved it to the west side of the channel and out of the way of traffic, Felton said.

Whipple said there were about 12,000 gallons of diesel fuel aboard the Irene Frazier when it began to sink.

How much fuel spilled was not known, Felton said.

The Coast Guard has begun an investigation into the incident.

''Our preliminary information indicates there may have been a deck hatch open that allowed water to enter the boat,'' Whipple said, adding another nearby boat removed the crew of four. No injuries were reported.

#90207u0402 07/26/1990 ~United Press International

(JULY 26) UPI - On a night when 43-year-old Nolan Ryan fell short in his try to win his 300th game, 37-year-old George Brett hit for the cycle for just the second time in his 17-year career.

While Ryan's effort was an uncharacteristic struggle in a successful season, Brett Wednesday night showed he has snapped one of the worst slumps of his career.

''I never struggled like I did for the first two-and-a-half months in the season,'' Brett said. ''Earlier in the season I wasn't giving my share. I was struggling and felt that they could give me my release and I'd go home.''

Luckily for Kansas City, ''home'' for Brett is still Royals Stadium.

Brett, one of the major leagues' hottest hitters, lifted the Royals to a 6-1 victory over the Toronto Blue Jays Wendesday night.

''Now I'm getting back into the swing of things, including talking to the media,'' he said.

On Tuesday, Brett cracked a game-winning two-run homer in the 13th inning against Toronto. He had little to say.

''I'd like to chat,'' said Brett Tuesday, ''I haven't had many home runs in the top of the 13th but I have to meet some people''.

When one reporter continued to asked why Brett has been having so much success lately, he readily confessed: ''Cold ones ... I'm having fun and lots of cold ones.''

Brett extended his hitting streak to 15 games Wednesday with a first-inning single. He tripled in the third, doubled in the fifth and completed his night by belting a homer in the seventh. Brett last hit for the cycle in a 16-inning game on May 28, 1979 against Baltimore.

Brett's homer to complete the cycle in the sixth, put the Royals ahead 6-0. It was Brett's sixth homer of the season and second in two days against the Blue Jays. He was 4-for-5 on the night, running his average since the All-Star break to .467 and his lifetime mark against Toronto to .337.

''He's just a great player,'' Blue Jays Manager Cito Gaston said. ''He might come along and do it again tomorrow night.

At Arlington, Texas, Ryan failed in his bid for his 300th win, but his Texas Rangers pulled out a 9-7 victory over the New York Yankees on Rafael Palmeiro's two-run homer in the 11th inning. Ryan left the game after eight innings trailing 7-4, but averted the loss when Texas scored three in the ninth.

''Obviously I'm disappointed not to win with all the attention being focused on me,'' Ryan said. ''It was my worst performance since coming off the disabled list.

''I really didn't have command of my fastball. Even though I was ahead in the count, I made location mistakes on the home runs and some of the other hits that hurt me.''

Julio Franco grounded a one-out single off Mark Leiter, who lost his first major-league decision. Palemeiro then lined a 2-0 pitch over the right-field fence to end a three-hour, 56-minute game. Palmeiro's 11th homer made a winner of Kenny Rogers, 4-5, who pitched three innings of one-hit relief, striking out six.

Elsewhere in the AL, Detroit stopped Baltimore 4-3, Boston blanked Milwaukee 2-0, Cleveland ripped Chicago 6-1, Oakland buried California 13-3, and Minnesota pummelled Seattle 6-0.

In the National League it was: Houston 5, Atlanta 1; San Diego 2, Cincinnati 1, 1st game and San Diego 10, Cincinnati 4, 2nd game; Montreal 8, Pittburgh 7, 10 innings; New York 10, Philadelphia 9; St. Louis 9, Chicago 0; and Los Angeles 7, San Francisco 2.

-- AROUND THE AL --

Red Sox 2, Brewers 0

At Milwaukee, Roger Clemens pitched a three-hitter for his first shutout of the season and Carlos Quintana hit a two-run home run to help snap Boston's four-game losing streak. Clemens, 13-5, struck out nine and walked one for his first victory since June 28. Milwaukee starter Chris Bosio, 4-8, has just one win in his last 14 starts.

Tigers 4, Orioles 3

At Detroit, Larry Sheets hit a two-run shot in the eighth inning - his second homer in two games - to lift the Tigers. Mike Henneman improved to 6-6 and Bob Milacki fell to 4-7.

Indians 6, White Sox 1

At Chicago, Dion James hit a two-run triple and Bud Black hurled a three-hitter to to lead the Indians. Black, 9-5, pitched his fourth complete game of the season. He struck out eight and walked two. Eric King 8-3, is winless in his last five starts.

Athletics 13, Angels 3

At Oakland, Calif., Jose Canseco blasted two homers and tied a career-high with six RBI to hand California their fourth straight loss. Canseco is 16-for-29 (.552) with 7 homers and 15 RBI in his last eight games. Curt Young, 6-4, scattered four hits over 5 2-3 for the victory, striking out six and walking three. Bert Blyleven fell to 8-6.

Twins 6, Mariners 0

At Minneapolis, Kevin Tapani and John Candelaria combined on a five-hit shutout and Gary Gaetti drove in three runs to lead the Twins. Tapani, 10-5, allowed five hits in 7 2-3 innings. Candelaria retired the final four batters for his fourth save. Randy Johnson, 9-6, lost despite striking out 10 in seven innings.

#90207u0409 07/26/1990 ~United Press International

LONG BEACH, Calif. (JULY 26) UPI - Capt. Joseph Hazelwood, skipper of the supertanker that created the worst oil spill in U.S. history, has had his seaman's license suspended for nine months, but his lawyers say the proceeding has laid to rest allegations that he was drunk on duty.

A Coast Guard administrative judge said Hazelwood's suspension would be followed by 12 months of probation. The actions came Wednesday following a daylong hearing at which Hazelwood could have lost his license forever.

Retired Coast Guard Capt. Harry Gardner admonished Hazelwood, captain of

the ill-fated Exxon Valdez when it went aground March 24, 1989 and dumped 11 million gallons of oil into Alaska's Prince William Sound, for going to his cabin before the supertanker was out of danger.

''Captain, your duty was to stay on the bridge until your craft was safe '' Gardner said.

Hazelwood, 43, pleaded no contest - which carries the legal weight of a guilty plea but without the admission of guilt - to charges that he drank alcohol within four hours of performing his duties and that he left the bridge of the tanker before it completed manuevers he had ordered to avoid icebergs.

A charge that he turned control of the ship over to an unqualified third mate was dropped, as was what may have been the most important charge - that he had a blood-alcohol level higher than the Coast Guard limit of 0.04 percent.

Hazelwood's lawyers, Michael Chalos and Thomas Russo, said the Coast Guard decided to drop the inebriation charge in closed-door bargaining sessions at which documents came to light that appear to show the blood-alcohol test was either improperly done or altered by a laboratory in Sacramento.

He said the Coast Guard, the state of Alaska and the National Transportation and Safety Board all knew about the possibly altered blood test taken shortly after the grounding of his ship.

Chalos said the documents show there were differences in the way various agencies described the vials of Hazelwood's blood sample, indicating the blood that tested over the legal limit may not have been his.

''The state of Alaska knew they had a bogus test and covered it up,'' said Chalos. ''The NTSB knew they had a bogus test.''

Had the documents been produced before's Hazelwood's criminal trial, the lawyers said, the case against him as a ''drunken sea captain'' would have crumbled.

Chalos predicted the information would have an effect on Hazelwood's appeal in Alaska, where he was convicted in a criminal trial of negligent discharge of oil, but acquitted of three more serious charges, including reckless endangerment and operating the tanker while intoxicated.

''We're getting into the element where it looks like Capt. Hazelwood was framed,'' Chalos said.

The spill, which blackened more than 1,000 miles of the environmentally sensitive Alaska coastline, was the worst environmental disaster ever in

the nation. It is still being cleaned up, at a cost of billions of dollars.

Chalos said Hazelwood pleaded no contest to the remaining Coast Guard charges because he wanted to accept responsibility and avoid a protracted hearing.

''He wants the Coast Guard and the people of America to know he accepts his responsibility,'' Chalos said during a break in the hearing.

''(Hazelwood) has suffered enough. He wants to do what he knows best - that is captain a ship. He wants to go back to sea ...''

Hazelwood, hurrying to an elevator after the hearing, said only, ''I'm glad this portion is over.''

But like any mariner, the Huntington, N.Y., skipper, who was fired by Exxon after the disaster, needs a Coast Guard license to go to sea.

Chalos said the hearing vindicated Hazelwood, who before the spill was considered one of Exxon's top skippers, as a competent ship's master.

''I think any employer looking at it objectively would hire him back,'' Chalos said.

''What we had here was not a drunken sailor. Alcohol played no role in the grounding. What we have here is human error,'' Chalos said.

With a mate on the bridge after Hazelwood went below to do paperwork, the 987-foot Exxon Valdez, loaded with 53 million gallons of Alaska crude bound for Long Beach, Calif., smashed into the rocks of Bligh Reef and tore open at 12:04 a.m. on March 24, 1989.

Along with fouling more than 1,000 miles of scenic Alaska coastline, the gooey, black oil killed tens of thousands of birds and animals, devastated the commercial fishing season and polluted the pristine wilderness.

As a result of his criminal negligence conviction, Hazelwood was sentenced to spend 1,000 hours helping clean up the mess, but his sentence was put on hold while he appealed.

#90207u0418 07/26/1990 ~United Press International

HAVANA, Cuba (JULY 26) UPI - Cubans celebrate the 37th anniversary Thursday of the launch of the revolution that ousted dictator Fulgencio Batista and brought Fidel Castro to power.

For Cubans, July 26, 1953, when Castro's forces attacked the Moncada

military barracks, marks the definitive start of the armed fight against Batista, which culminated in Batista's fall in January 1959.

Cuban authorities said more than 200 foreign correspondents were on the Caribbean island for the celebrations, which will include conferences by Communist Party leaders, gymnastics performances and a series of musical and other cultural events.

The official Cuban news agency Prensa Latina said Castro will give a speech in the capital Thursday.

Foreign Press Director Hector Argiles was quoted by Prensa Latina as saying there will be more foreign journalists at this year's celebrations than in any previous year.

Castro's armed revolt against the Batista dictatorship in 1953 was crushed and Castro retired to the east of the island to rebuild his forces with the help of Argentine revolutionary Ernesto ''Che'' Guevara.

The United States withdrew support from Batista in 1958, and Batista fled to the Dominican Republic Jan. 1, 1959.

Once in power, Castro infuriated the U.S. government by confiscating American investments in banks and industry and by seizing large U.S. landholdings, which he turned into Socialist-style, state-owned farms.

This year's celebration comes at a critical time for Castro's revolution, which has been buoyed by some $5 billion a year in Soviet aid and preferential trade treatment for Cuban products under a bartering system with East bloc countries.

On Wednesday, Soviet leader Mikhail Gorbachev told Third World nations that the days of massive subsidies in the name of fraternal socialism are coming to an end, and that the Soviet Union will observe the same terms of trade with all partners - communist or capitalist, friend or former foe.

Castro has held out against making political changes in his one-party communist state, but has shown signs of economic flexibility, including moves for private Spanish investors to build hotels on the island.

In recent public statements, Castro has warned of an impending economic crisis, referring to a ''special period'' to defend socialism, to which he continues to swear adherence.

#90207u0477 07/26/1990 ~United Press International

SAN DIEGO (JULY 26) UPI - Roseanne Barr, star of the TV show bearing her

name, was booed lustily while ''singing'' the national anthem before a game between the Cincinnati Reds and the San Diego Padres.

The crowd was obviously upset Wednesday night with what was part of ''Working Woman's Night,''and she was further booed as she walked off the field after spitting on the ground following her performance.

The heavyweight Barr, wearing a man's white shirt and black pants, screeched her way through the ''Star Spangled Banner,'' and the effect was magnified by the usual time lag between the singer and the public address system.

Tom Werner, the co-creator and executive producer of her show and the Cosby Show, and one of the new owners of the Padres, was at the ballgame but would not speak to reporters. Barr's husband, Tom Arnold, was also at the park, where the Padres won both ends of a doubleheader against Cincinnati.

Ron Seaver, the Padres' director of promotions, issued a statement saying:

''The Padres understand that many people were concerned about Roseanne Barr's rendition of the national anthem. She was doing the best she could under the circumstances of the audio delay and she certainly meant no disrespect to the national anthem.''

San Diego is a military town with thousands of active and retired Navy personnel, and the Padres' switchboard received over 100 calls protesting her performance. Among the descriptions of her rendition were ''disgusting '' ''criminal,'' and ''horrendous.''

''In my own opinion, I thought it was a disgrace,'' said Padres right fielder Tony Gwynn. ''I had a feeling something like this could happen. I can't lie. I was laughing with everybody else. She was so off.''

Barr and her husband ''mooned'' a crowd during the first game of last year's World Series in Oakland.

#90207u0479 07/26/1990 ~United Press International

NEW YORK (JULY 26) UPI - A Hunter College dormitory security guard who ''got wind'' of a petition drive to oust him early Thursday stabbed and seriously wounded a student involved in the effort, police said.

Stewart Weiser, 20, who lives on the eighth floor of Hunter's dorm in Manhattan, was knifed in the upper left chest at 12:30 a.m., said a Sgt. Mary Wrensen, a police spokeswoman.

He was in serious condition at Bellevue Hospital.

Another student, whose name was not immediately released, broke his ankle during the altercation between Weiser and the enraged guard, an employee of the private security firm, Bell Security Inc., Wrensen said.

''Weiser had earlier presented the company with a petition to oust this security guard due to some problems the students had had with him,'' Wrensen said. ''The guard got wind of this, and confronted the student.''

The nature of the problems with the guard was not known.

Wrensen said the ''verbal altercation'' quickly escalated to violence, with the guard ''chasing and cornering'' Weiser, and then stabbing him.

The guard, identified as Gurrier Vladymir, 18, of Queens, was charged with attempted murder, assault, and criminal possession of a weapon.

#90207u0482 07/26/1990 ~United Press International

(JULY 26) UPI - Flood waters surged toward record levels Thursday in Iowa closing highways and soaking farms, while rivers overflowing their banks in Nebraska forced the evacuation of residents of a senior citizens home.

Heavy rains sent the Nishnabotna River in southwestern Iowa more than 4 1/2 feet above the flood stage of 18 feet at the town of Randolph and more than 10 feet above flood stage in Hamburg, just north of the Missouri border.

The National Weather Service said water would rise to record levels during the day, 6 feet above flood stage in Randolph and 14 feet above flood stage in Hamburg. Nearby Walnut Creek was also overflowing its banks early Thursday.

Flooding was expected on highways 184 and 275 as well as extensive flooding on farm and other low-lying land.

Local officials said 16 families were evacuated and civil defense and Red Cross workers were out with extra sheriff's deputies to deal with damage from heavy rains, which were expected to continue for several days.

Floods also hit Nebraska, where parts of the city of Aurora were flooded and authorities were forced to evacuate some residents of the Crossroads Court elderly care home.

Most of the residents were able to walk but some had to use wheelchairs, said Fire Chief Greg Nielson. Two of the buildings flooded and high water

threatened the others, he said. Nobody was injured, he said.

Interstate 80 and U.S. 6 outside of Lincoln, Neb., were flooded and raging waters swept several motorists off roads and forced others to swim from their vehicles on flooded city roads in Lincoln, a spokesman for the Lancaster County Sheriff's Department said.

Salt Creek outside of Lincoln was nearly 3 feet above flood stage and was expected to crest 5 feet above flood stage.

Up to 7 inches of rain fell late Wednesday and early Thursday in and around Savannah, Ga., where several houses were flooded and low-lying areas and underpasses in downtown were under water.

A flood warning was posted for the Rio Grande near Presidio in southwestern Texas and into Big Bend National Park as high waters blocked park roads.

The precipitation that has persisted over the Northwest and the northern Rockies the past few days has moved east except for Montana.

Idaho had windstorm conditions Wednesday night with Pocatello, in the south, reporting a 38 mph wind gust with reduced visibility caused by blowing dust. Similar conditions were reported in northwest Utah, with strong northwest winds gusting at 40-50 mph Wednesday night, forecasters said.

Scattered thundershowers fell Thursday across most of the South. Early morning temperatures ranged from 73 in Atlanta to 77 in Charleston, S.C., 78 in Jacksonville, Fla., and 81 in Miami.

In the Caribbean, Tropical Storm Arthur lashed Grenada and Tobago with high winds and rains Wednesday and then neared hurricane strength as it moved on a course for the Greater Antilles, hurricane forecasters said.

A tropical storm watch was issued for the southern coasts of Puerto Rico and Hispaniola. Forecasters at the National Hurricane Center said Arthur's path would be difficult to project for the next day or so.

#90207u0498 07/26/1990 ~United Press International

PHNOM PEHN, Cambodia (JULY 26) UPI - Cambodia turned over to a U.S. military delegation Thursday six sets of remains believed to be Americans missing since the Vietnam War.

The remains, released after the signing of the first formal agreement between the United States and the government installed in Cambodia by a

Vietnamese invasion in 1978, were loaded aboard an Air Force C-141 cargo jet for transport to a U.S. army laboratory in Hawaii where experts will attempt to identify them.

''The U.S. government appreciates the support of the Phnom Penh humanitarian endeavor and, if successful, will help alleviate the continued uncertainty of the families of missing Americans,'' said Lt. Col. Thomas Boyd, a U.S. military spokesman.

He said the first repatriation from Cambodia ''will be followed, we hope, by further contacts.'' But he said no definite agreement had been made.

The six remains were blessed by six chanting Buddhist monks who sprinkled water on the aluminum caskets before they were loaded through the wide rear cargo doors of the huge jet as the 16-member repatriation team stood at attention and saluted.

On the tarmac behind the American military jet were two lines of Soviet-built troop transport helicopters in camouflage paint for the ongoing conflict against a partly U.S.-supplied resistance coalition.

The repatriation of the remains - the first to be returned from Cambodia since the U.S.-backed government fell in 1975 - follows a change in U.S. policy that ends U.S. backing for the resistance coalition's hold on Cambodia's seat at the United Nations.

Senior U.S. officials said they were considering political talks with the Phnom Penh government but would continue to provide aid to the two non-communist factions in the resistance coalition.

The change in policy is meant to prevent the third resistance group, the Khmer Rouge, from regaining power, U.S. Secretary of State James Baker said last week.

Lt. Col. Joe Harvey, the leader of the delegation, signed a one-page agreement between the two governments on the repatriation of remains.

Cambodian Deputy Foreign Minister Sok An said that neither the agreement nor the two days of discussions between U.S. and Cambodian officials concerned political matters, but that his government welcomed the change in U.S. policy.

The repatriated remains were among 28 such sets examined by U.S. forensic experts. Two of the those selected for further examination were found in remote areas along the Vietnamese-Cambodian border - possibly American pilots lost during the bombing of the Ho Chi Mihn trail that brought supplies through Laos and Cambodia from north to south Vietnam.

Cambodian officials said the other four remains were from a mass grave that contained thousands of people executed by the Khmer Rouge from 1975 to 1979. These remains were among eight identified by Vietnamese experts as those of caucasians, apparently prisoners captured either during the war or in the three years of Khmer Rough rule.

Boyd told reporters that several sets of military identification tags included with the remains did not belong to any of the 2,300 Americans still missing in Southeast Asia. He said they may have been lost by American GIs or may have been faked.

Many faked identification tags have turned up in Vietnam where people believe they will get a reward for turning them in.

He said the United States would consider repayment of expenses the Cambodian government had incurred in the search for remains, but did not know whether the question had been discussed.

#90207u0526 07/26/1990 ~United Press International

PLYMOUTH, MA (JULY 26) UPI - The Nuclear Regulatory Commission staff used an inaccurate and biased review of the Pilgrim nuclear power plant's emergency plans in recommending the reactor be restarted, the agency's top internal investigator charged.

A 10-month internal investigation found that NRC technical staff members' review of emergency plans for the Plymouth facility was ''neither balanced nor thorough,'' the NRC's inspector general, David C. Williams, said in a report released Wednesday.

Critics of the nuclear industry say the highly critical report by the NRC's criminal investigations arm casts doubt on the agency's decisions concerning Pilgrim and other reactors.

Pilgrim was shut down in April 1986 for a variety of management and safety problems. The reactor remained closed down for 2 1/2 years, but was allowed to restart in December 1988 after the NRC deemed questions over emergency planning issues had been resolved.

NRC investigators said much of the data used for staff reviews came not from local public safety officials but from Boston Edison Co., which owns the 670-megawatt facility.

''In light of Boston Edison Co.'s vested interest in restarting Pilgrim, Boston Edison Co. was not the best source for the NRC staff to rely on,'' the report said.

The inspector general also charged that some information the NRC staff gave commissioners was inaccurate. For instance, NRC officials incorrectly told commissioners that local communities had completed nearly all their emergency procedures, the report said.

The report fueled the anger of nuclear foes.

''What this report says is the NRC decision to restart Pilgrim was not based on fact,'' said Mary Ott of Citizens Urging Responsible Energy. ''We believe that the plant should be immediately shut down until they further investigate our concerns.''

''This calls into question the integrity of the entire NRC process'' at Pilgrim and other plants, said Peter Agnes Jr., Gov. Michael Dukakis's top adviser on nuclear power matters.

''Even the most conscientious NRC commissioner can't do his job if he's not getting the straight facts,'' Agnes said.

NRC Chairman Kenneth Carr said he considering whether to take action.

''I have directed the executive director for operations to provide a recommendation to the commission of actions that should be taken as a result of the inspector general's report,'' Carr said. ''We will continue to follow the matter closely.''

Officials at Boston Edison said they had not yet received a copy of the report. ''As usual, the allegations are against the NRC and not against us '' said plant spokeswoman Elaine Robinson.

NRC staff members defended their review in a written response. The staff members said while much of their information came from Pilgrim's owners, the federal agency's standard procedure and plant owners ''are fully cognizant of the criminal nature of providing false information to the NRC.''

#90207u0548 07/26/1990 ~United Press International

DOUGLASVILLE, GA (JULY 26) UPI - Burt Jordan says his wife is welcome to return home, even though she is charged with hiring a hitman to kill him and her alleged lover's wife.

''She just got an obsession and didn't know how to deal with it,'' Jordan, 43, an insurance adjuster, said Wednesday.

The Georgia Bureau of Investigation said Barbara Garrett Jordan has been freed on $30,000 bond after being charged with conspiracy to commit murder

and is staying with relatives.

But Jordan said all is forgiven.

''She's welcome to come back home,'' he said. ''She has to be sick, and she needs help.''

The woman was arrested Friday after she met with a GBI agent she allegedly believed was a hitman she was hiring for $8,000, authorities said.

GBI spokesman John Bankhead said the wife wanted the hitman to kill her husband and the wife of her alleged lover at separate times.

Bankhead said the woman told the supposed hitman that a divorce would be ''too tough'' on her three children but she told him not to make the hit until she and her husband returned from a Florida vacation with the children.

''She wanted the husband to have a last trip with the kids. She didn't want to get in the way of that,'' said Bankhead.

Douglas County sheriff's Maj. Phil Miller said a friend of the woman tipped police to the alleged plot.

Bankhead said the agent, posing as a hitman, met with the woman last Thursday and was offered $500, a handgun and bullets to commit the killings.

He said she agreed to pay an additional $6,000 for her husband's killing and $1,500 for killing the wife of her alleged lover. The ''hitman'' was told to wait three or four months before killing the woman, Bankhead said.

Bankhead did not identify the alleged lover but said he was not a suspect in the case.

#90207u0685 07/26/1990 ~United Press International

MIAMI (JULY 26) UPI - Manuel Noriega's lawyers told a federal judge they were unable to get any money from their client's frozen bank accounts in Europe and cannot proceed with the former Panamanian leader's defense.

At the same time, the U.S. branches of three European banks refused to respond to subpoenas seeking information about the accounts, the defense attorneys said.

In a letter filed under seal in federal court, attorney Frank Rubino said federal prosecutors have been slow in helping Noriega's defense team gain

access to 27 bank accounts in Europe, The Miami Herald reported Thursday.

Rubino refused to make the letter public but acknowledged meeting recently for three hours with prosecutors to discuss the government's efforts.

Noriega is charged with protecting Colombian drug shipments bound for the United States between 1981 and 1986. Fifteen other defendants were also charged in an indictment returned in February 1988.

At the urging of U.S. District Judge William Hoeveler, the government agreed last month to help the defense unfreeze $4 million to $6 million in various European banks so Noriega could pay his lawyers. Rubino predicted that money would start to flow in two weeks, but that has not happened.

''We haven't received a penny,'' he said Wednesday. ''Obviously we haven't been able to proceed with his defense.''

Rubino said he thinks $11 million was withdrawn from three of the European banks but doesn't know by whom. He identified the banks as Union Bank of Zurich, Switzerland; the Deutsch-Suedamerikanische Bank AG of Hamburg, West Germany, and Credit Lyonnaise of Marseille, France.

Rubino said managers at the three banks were uncooperative so he delivered subpoenas to the New York branch of the French bank and to the Miami branches of the German and Swiss banks.

All three refused to provide any information about current balances, the names of account holders and whether any money has been withdrawn.

The French bank moved to quash its subpoena in court, saying it was delivered to the wrong place. Credit Lyonnaise said its New York branch does not maintain records concerning accounts in Marseille, nor does it control any accounts outside the United States.

The Swiss bank said it could not make any disclosures without the authorization of the account holder. Its attorney, John Dickey, told Rubino that if Noriega wants any information, he should direct the person in control of the acount to request a release of documents.

The German bank did not respond to its subpoena, which expired Monday.

No hearing has been scheduled on the matter. Diane Cossin, a spokeswoman for the U.S. Attorney's office in Miami, refused comment.

CHTAURA, LEBANON (JULY 26) UPI - A speeding fuel truck accidentally

slammed into the front of a hotel in a Syrian-policed town and exploded into flames, killing at least eight people and injuring 22, most of them hotel guests, officials and reports said Thursday.

The blast late Wednesday at the Kassouf Hotel in the town of Chtaura, 22 miles east of Beirut, started a fire that engulfed and gutted the six-story building, the officials said.

Lebanese firemen and fire brigades rushed to the scene from Damascus, Syria, and struggled through the night to put out the blaze at the hotel and nearby smaller buildings, the officials said.

Officials said eight people were killed and 22 others were wounded in the fiery blast. Four of the dead, including the Syrian truck driver, were burned beyond recognition, the officials said.

The Christian-operated Voice of Lebanon radio station put the death toll at 45. Most of the dead were residents of the hotel, the radio said.

Twenty nearby tin-roofed shacks inhabited by poor Bedouins were incinerated, the officials said.

Security sources said the tanker's brakes failed as it was traveling along the town's main road, causing it to collide with other vehicles and slam into the hotel's gate before blowing up. Several cars were destroyed by the blast that echoed across Lebanon's eastern Bekaa valley.

Syrian troops and intelligence units immediately cordoned off the scene of the blast and started immediate investigations and interrogations.

Damascus, which has deployed 35,000 troops in Lebanon sice 1976, has main security and intelligence headquarters in the market town, located on the Beirut-Damascus highway.

The war-torn country, which traditionally has been plagued by car bombs, was hit by six bomb blasts earlier this year. At least two people were killed and some 40 others were wounded in the explosions.

#90207u0740 07/26/1990 ~United Press International

ULAN BATOR, MONGOLIA (JULY 26) UPI - The opposition rally began promptly, an hour after its scheduled start. A middle-aged woman on a muddy street corner addressed the audience, all moving carefully around evidence that a flock of sheep had held the ground earlier.

The crowd consisted of 12 adults, three of them campaign workers, and two dozen jabbering children who cheerfully took and then ripped apart

leaflets picturing Genghis Khan. After five minutes of political talk, the gloomy skies opened up with cold rain.

Wet and tired, the campaign workers gave up and lugged their portable loudspeaker and gas generator onto a public bus.

This is campaigning Mongolian-style, a fashion now about a month old as the country's political forces rush toward Sunday, the first free election in Mongolian history after centuries of warlord rule and seven decades under the communist People's Revolutionary Party.

The voting is for the national parliament, but the politicking is as far from the world of high-paid consultants, glittering rallies and precision campaigning as Ulan Bator - a city where cows wander on the lawns of government buildings - is from Washington.

Take the headquarters of the Party for National Progress - a trio of round felt tents called gers, or yurts, plunked in the middle of an office district. Party leaders welcome visitors on colorful carpets, keep campaign funds in a creaking safe and, next ger down, a party activist also sells tents.

Other opposition parties, with little experience and still less funding, are similarly organized. Rallies - actually meetings of from five to 100 people - start late or not at all. And the gatherings often shift location as often as the nomadic herdsmen who roam the plains of the country wedged between the Soviet Union and China.

One party promised dozens of Buddhist monks to bless its rally, but after two hours the gathering was still without a prayer. Candidates often show up late because they must ride the public bus, unless they can hop a ride with some of the nearly 100 foreign reporters who have invaded Mongolia for the election.

The disorganization has produced some memorable coverage. One intrepid journalist team drove around for hours with a man they thought was a non-English-speaking Mongolian guide looking for a candidate. They finally gave up, learning the next day he was actually the non-English speaking candidate.

What reigns is democratic confusion. The last few months of opening and reform have produced five opposition parties, including a ''Greens'' environmental group and a dizzying array of associations representing everyone from Buddhist monks to the unemployed.

There is no lack of local color. Appearing at rallies and on television are Mongolians in traditional colorful tunics and hats, Buddhist monks in orange robes and caps, and folk-rock bands playing Western music -

including one group that impersonates the Beatles.

Even the National Election Commission's titular chairman is a celebrity - the only Mongolian to have flown in space, as a Soviet cosmonaut.

Despite the government's long experience with politics, one-party rule for 69 years seems to have left it groping as well. The ruling Communists have only a few signs up around Ulan Bator, including one huge maroon and white board that pictures Lenin and extols the party as ''leader of the popular masses.''

After last Sunday's primary, the election commission could tell immediately that among the 799 candidates left were 51 cattle breeders, 12 workers, five monks and two students - but not which party had gotten the most.

One foreigner asked the commission if he could photograph the tally board in the election center. Officials at the center said they didn't have one, but it was a good suggestion.

''Our country is so small,'' noted Baidaza Khurmetbek, vice-chairman of the election commission, in an interview. ''So there are bound to be some problems.''

The campaign itself is something of a ''yurt to yurt'' stumping trip as candidates go from tent to tent, even in the city suburbs.

The new freedoms have also spawned some lively opposition newspapers, including political cartoons and attempts to tie the current Communist leadership to the hated dictators of the past.

Mongolians appear to understand it. But when a foreigner asked a local translator to explain one of the cartoons, he thought for a moment and said, ''it's too complicated.''

WASHINGTON (JULY 26) UPI - Initial claims for state unemployment insurance benefits totaled 358,000 for the week ending July 14, a decrease of 3,000 from the previous week, the Labor Department said Thursday.

The statistics are adjusted for seasonal factors.

The revised figure for the previous week was unchanged at 361,000 initial claims, according to the weekly report compiled by the department's Employment and Training Administration.

#90207u0812 07/26/1990 ~United Press International

GENEVA (JULY 26) UPI - OPEC oil ministers reached an early consensus on raising production ceilings at their mid-year conference Thursday in the wake of Iraq's threats against its quota-cheating Persian Gulf neighbors.

The first formal plenary session began at 11 a.m. with oil ministers Issam Abdul Al-Chalabi of Iraq and Salim Al-Ameeri of Kuwait sitting next to each other because of the alphabetic seating arrangement.

After the two-hour session, Sadek Boussena, the Algerian oil minister and current OPEC president, told reporters, ''It seems there is a consensus on production but not yet on prices.''

The OPEC meeting convened as tensions in the Persian Gulf decreased with Iraq's pledge to not use force against Kuwait in advance of a weekend meeting between the oil-producing giants.

In the dispute, which flared last week, Iraq verbally assaulted Kuwait as well as the UAE and sent troops to the Kuwaiti border. The United States countered with a minor military exercise in the region. The Iraqi threats extracted promises by Kuwait and the UAE to honor their official output quotas.

Boussena of Algeria indicated a possible quick full accord and thus a short mid-year OPEC conference by saying bilateral consultations would occupy the rest of the day with a second full plenary on Friday.

Traditionally, the 13 OPEC ministers meet all together only at the start of a conference and then again at the end to endorse agreements reached in private bargaining in small groups in sealed-off upper floor hotel suites.

''There will now be bilaterals until tomorrow when we will meet again down here,'' Boussena said.

''We are agreed that the price should go higher, above the current $18 a barrel,'' he said. ''Everyone is accepting (the idea of) a higher price,'' but there were still differences over the actual amount.

Iranian Oil Minister Gholamreza Aghazadeh told reporters that he thought it ''highly likely'' the price would be set at a compromise $21 a barrel because $20 could be too low in view of the U.S. dollar's decline.

Other ministers reported wide agreement on a $2 increase to a $20-a-barrel reference price - based on a ''basket'' of seven crude oils. The Iraqi and Libyan ministers, however, said they wanted $25 - considered by others to be unrealistically high.

A large number of ministers and their top aides said the consensus on production was on raising the current OPEC ceiling of 22.1 million barrels a day to 22.5 million barrels.

''There will definitely be a consensus on an agreement valid for all 13 members,'' Al-Chalabi of Iraq told reporters as he took his seat at the conference table.

Kuwait's Al-Ameeri, asked about fixing a $20 average reference price for OPEC crude oils, said, ''It's possible. It's very likely. We'll go along with any agreement that comes out of this meeting.''

Delegates said a unanimous agreement is essential to restore discipline in the organization after OPEC members lost between $5 billion and $7 billion in oil revenues since March as a result of price drops partly caused by overproduction.

Iraq, Iran and Saudi Arabia have made it clear they will no longer tolerate overproduction by Kuwait and the United Arab Emirates.

Quota-cheating, principally by Kuwait and the UAE, until recently meant total OPEC production was as much as 1.5 million barrels a day above the official combined ceiling.

That in turn pushed the average price for OPEC oil - based on what the market is ready to pay for the seven main crudes pumped by members - to as low as $14.

Oil-dependent Iraq is, trying to revive an economy ravaged by nearly eight years of war with Iran.

(JULY 26) UPI - Stock prices on the Tokyo Stock Exchange plunged Thursday as a tax-evasion scandal involving major brokerages compounded investor gloom over interest rates.

The blue-chip Nikkei Average of 225-share selected issues, which slipped a mere 1.19 points Wednesday, tumbled 331.52 points, or 1 percent, to 31,369.75.

The broader-based Tokyo Stock Exchange Price Index of all major shares, which gained 2.72 points Wednesday, fell 26.11 points to 2,281.20.

Trading activity continued to be slow, as an estimated 330 million shares changed hands, down from the 353 million shares Wednesday.

Declines hammered advances 622 to 295, while 205 issues remained unchanged.

Elsewhere in Asia, stock prices also fell 1 percent in thin trading on the Hong Kong Stock Exchange as the market looked for a new stimulus. Activity was concentrated in secondary issues.

The closely watched Hang Seng Index, which climbed 24.67 points Wednesday, dropped by 36.95 points to 3,483.59.

Among the narrower indexes, industrials lost 40.46 points, financials dropped 25.44, utilities fell 19.30 and properties plunged 76.92 points.

Volume was fairly light, as an estimated 2.03 billion shares changed hands down from 2.47 billion shares on Wednesday.

In Singapore, stock prices closed lower in fairly active trading on the Singapore Stock Exchange amid profit taking seen throughout the day.

The key Straits Times Industrial Index, which gained 7.18 points Wednesday dipped 3.16 points to 1,558.08. The narrower All Singapore Index dipped 0.10 points to 444.37.

An estimated 78.2 million shares chnaged hands, compared with 82.4 million shares Wednesday.

In Australia stocks closed slightly lower in active trading on the Sydney sharemarket despite a strong rally in gold mining issues.

#90207u0906 07/26/1990 ~United Press International

ULAN BATOR, MONGOLIA (JULY 26) UPI - The Soviet Union has accelerated the pace of the withdrawal of its armed forces from Mongolia and already has pulled out 80 percent of the troops based there, Mongolian army officials said Thursday.

Foreign diplomats in Ulan Bator said they were unable to confirm the speeding up of the Soviet pullout but said it appeared to be proceeding at least as planned and reflected Moscow's reform bent and its improved relations with China.

Mongolia is wedged between the Soviet Union to the north and China to the south.

The officials, general staff officers from the Mongolian People's Army, spoke at a news briefing organized by the government, which is showing off its own version of glasnost during this week's runup to the first free election in Mongolian history on Sunday.

The army officials gave no figures on the number of Soviet troops involved. Western diplomats estimate the Soviets based about 75,000 soldiers in Mongolia before the withdrawal began last year.

Under an agreement between the Soviet Union and Mongolia reached in March, all Soviet forces are to be out of the country by 1992, with base units leaving next year and support units the following year.

Col. D. Dorgodorj, first deputy chief of the Mongolian army general staff, said the Soviets had already fulfilled withdrawal targets for 1990 and that other forces, including a motorized infantry unit and an air defense group, had pulled out ahead of schedule.

''Some units due to leave in 1991 are leaving this year,'' he said. ''As of today, about 80 percent of Soviet military units stationed in Mongolia have left already.''

He said Soviet military construction brigades slated to leave in 1991 would also leave this year, noting ''since we have reached agreement on a complete withdrawal, the Soviet side is taking back its units as quickly as possible.''

Mongolia, long a Soviet satellite, was viewed for decades by Moscow as a strategic buffer with China, especially following the Sino-Soviet split in the early 1960s that led to clashes along northern sectors of the Chinese-Soviet border in the late 1960s.

Tensions have eased, however, since the mid-1980s and Moscow and Beijing normalized relations last year. Chinese and Soviet officials have been conducting regular negotiations on confidence-building measures and troops reductions along the border.

The Mongolian army officials said the Soviets, in leaving, have turned over hundreds of facilities, including housing and hospitals.

They also said the Mongolian army has itself demobilized more than 20,000 troops during the past two years, but declined to give figures on the armyis current strength.

CHARLOTTE, NC (JULY 26) UPI - A family watched everything they owned go up in flames because a glitch in the 911 emergency system's computer sent firefighters to the wrong place.

Charlotte police officer Robert Seabrooks was on duty when fire, believed started by a child playing with matches, was detected in a closet at his home on Ridge Road. His wife, Laura, their four children and two other youngsters were home at the time.

Laura Seabrooks dialed 911. A computer at the other end flashed up the words ''Ridge Road'' and indicated the nearest fire station was in Matthews, about 10 miles from the Seabrooks' home.

What the computer did not indicate was that there are two Ridge Roads - one in Matthews and one near the Mallard Creek-Derita community where the Seabrooks lived.

The dispatcher sent firefighters to the wrong location.

When firefighters did not arrive at the Seabrooks' home, a neighbor dialed 911. This time the computer indicated the Mallard Creek and Derita fire departments should respond.

By that time the Seabrooks' home was nothing but ashes.

''I'm very happy my wife and kids are okay,'' Seabrooks said Wednesday night, ''but I'm disgusted about the 911 problem.''

The fire was not the worst of it.

Seabrooks learned that his home insurance had lapsed five days earlier because a bill wasn't paid. And his ''fireproof'' safe inside the house had melted, burning $485.

That was when he began to weep.

''There would have been a lot less damage if we could have gotten the first call,'' said Assistant Fire Chief Bill Cochran.

#90207u0938 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - If Judge David Souter takes his seat on the Supreme Court he may have an opportunity in the high court's next term to provide the most sought-after answer to a major question surrounding his nomination - where he stands on abortion.

A group of 112 members of Congress said Thursday they are asking the Supreme Court to rule that regulations prohibiting family planning clinics for the poor from abortion counseling are unconstitutional.

The lawmakers said they will file a friend-of-the-court brief in what is likely to be one of the Supreme Court's pivotal abortion and free speech rulings in the term that begins in October.

In May, the Court announced that it will review a November 1989 ruling by a federal appeals court in New York that upheld the so-called gag rules that bar family planning clinics receiving federal funds from any counseling about abortion or providing abortion referral information.

Souter, who Bush named Monday as his choice to fill the Supreme Court seat vacated by the resignation of Justice William Brennan, has left only hints of his stand on abortions and there is no guarantee he will reveal his position during his Senate confirmation hearings expected to begin in September.

''We must send a clear message to the Supreme Court Justices, new and old alike, that women will not stand idly by while politicians attempt to get involved in their most personal and private decisions,'' said Rep. Nita Lowey, D-N.Y., one of the coordinators of the congressional brief.

''If Title X clinics are to provide quality health care, they must be absolutely free to inform women of all their legal medical options and provide referrals to facilities where those procedures can be obtained,'' she said.

The federal government has been providing money for family planning programs for the poor, known as the Title X program, since 1970. It bars money ''in programs where abortion is is a method of family planning.''

Currently, the government spends less than $150 million annually on Title X and the funds go to some 3,900 clinics serving about 5 million poor women.

In 1988, in a major victory for opponents of legal abortion, President Reagan issued regulations forbidding employees in the subsidized clinics from even talking about abortion with their patients.

The Reagan rules were challenged in the courts the same day they were issued and because they have been tied up in litigation have been implemented only in a few places.

While the New York appeals court has upheld the rules, the U.S. Court of Appeals for the 1st Circuit, in Boston, has declared them unconstitutional as has a U.S. district court in Colorado.

Lowey said the congressional brief will support the arguments of the Boston and Colorado courts.

Earlier this month, Reps. John Porter, R-Ill., and Ron Wyden, D-Ore., introduced legislation that would amend the Title X program regulations to allow clinics to counsel women regarding all legal options ''for the management of an unintended pregnancy,'' including ''termination of the pregnancy'' and allow clinic doctors to refer her to abortion providers upon request.

#90207u0955 07/26/1990 ~United Press International

GENEVA (JULY 26) UPI - Time is too short for a "fully settled" package covering global trading rules to be agreed upon by this December's deadline in the troubled Uruguay Round trade liberalization talks, the head of the General Agreement on Tariffs and Trade said Thursday.

Arthur Dunkel, GATT's director general, blamed both a lack of new instructions from governments to their trade negotiators and "hide-and-seek" tactics for the meager progress made in outstanding Uruguay Round issues.

Dunkel, summing up a four-day meeting called to assess the status of the Uruguay Round, said it "may not be realistic" to expect that all these issues will be resolved in the next 4 1/2 months.

Begun in 1986, the Uruguay Round is scheduled to end Dec. 4 in Brussels, Belgium, when trade ministers from the 105 participating countries will convene. "It is clear that we are collectively behind schedule," Dunkel said.

Short of a "fully settled" package, the only other available option to Uruguay Round participants is "to reduce to the barest minimum the number of policy decisions to be taken at Brussels," he said.

Reports made this week by the 15 different negotiating groups on Uruguay Round trading sectors were mainly "a compendium of positions rather than draft agreements," Dunkel said.

Dunkel blamed the lag in progress on two factors, the first of which was "the absence of new instructions from a number of capitals in key areas on the adjustment of positions that are needed to reconcile divergent interests." "The second is the phenomenon of linkages within and among subjects," the GATT chief said.

"Linkages can and should be used positively to push the whole process

forward.But, unfortunately, up until now, they have been used negatively, with negotiators largely playing hide-and-seek with each other and not revealing their hand."

The United States and the European Community are deadlocked over free trade reforms in agriculture. Washington has said it would reject any Uruguay Round package that excludes a phasing out of EC farm export subsidies. The EC, for its part, links less protectionism in textiles and clothing to similar measures in other trading sectors.

Developing countries at this week's meeting were sharply critical toward theindustrialized nations, blaming them in general for the stall in negotiations and in particular for a lack of progress on improving market access for the developing nations's tropical and textile products.

Also this week, Dunkel laid out a negotiating timetable to try and achieve as complete a package as possible by Dec. 4. The 15 permanent negotiating groups, he said, should meet from the last week of August to the first week of October.

Governments should then send senior officials having decision-making authority to Geneva to draw up final texts by Nov. 23, so that ministers have time to study agreements and outstanding political issues before the concluding Brussels meeting, according to Dunkel's timetable.

#90207u1012 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The nation's 43 million disabled ''can now pass through once closed doors into a bright new era of equality,'' President Bush said Thursday as he signed landmark civil rights legislation for the handicapped.

The South Lawn signing ceremony had a festive atmosphere, as 2,000 people representing major disability groups witnessed the end of their long battle to prohibit discrimination against those with physical and mental disabilities.

''Three weeks ago we celebrated our nation's Independence Day, and today we are here to rejoice in and celebrate another independence day, one that is long overdue,'' Bush said. ''With today's signing of the landmark legislation, Americans with Disabilities Act, every man, woman and child with a disability can now pass through once closed doors into a bright new era of equality, independence and freedom.''

Bush noted that last year, the world's foremost symbol of exclusion - Berlin Wall - came down and now, so too, the ''shameful wall of exclusion'' for the disabled.

''Now I am signing legislation that takes a sledgehammer to another wall, one that has for too many generations separated Americans with disabilities from the freedom they could glimpse but not grasp. And once again we rejoice as this barrier falls, proclaiming together we will not accept, we will not excuse, we will not tolerate discrimination in America.''

Bush addressed the business community, which has been concerned about the associated costs. Bush said this ''flexible'' law will provide them with a new pool of eager, loyal and competent employees.

Under the bill, the disabled cannot be discriminated against in employment and must have ready access to ''public accommodations,'' such as theaters, restaurants and stores.

Also, buses and trains will have to be equipped for use by the handicapped and special telephone services will have to be installed for the hearing- and speech-impaired.

The employment provisions will become effective in two years for employers with more than 25 workers. Two years later, employers with 15 or more workers will be subject to the law.

The public accommodations provisions take effect in 18 months. There is a phase-in schedule for the transportation requirements and within one year, the Federal Communications Commission must issue regulations setting guidelines for the telecommunications services.

Gene Hohl of Hampton, Va., said the bill means something very personal to her.

''It's given back the rights I lost 20 years ago when I had to use a wheelchair. I'll be a human again,'' she said.

Brian Atwell of Hays, Kansas, said he has been denied access to buildings and jobs because he is wheelchair-bound.

''About four years ago, when I got out of college, I experienced attitudinal barriers. Now that will be over,'' he said.

OSHKOSH, WI (JULY 26) UPI - Five people were killed in two different crashes while they were enroute to the The Experimental Aircraft Association's 38th annual Fly-in and Convention, authorities said.

Two people were killed when their plane plunged into Lake Winnebago near Oshkosh Wednesday night while on a holding pattern to land at the convention, which opens for a seven-day run Friday.

Three Washington state residents were killed in Wyoming Wednesday when their custom-built four-seat aircraft crashed.

The Winnebago County Sheriff's Department said names of the two victims of the Wisconsin crash were withheld until relatives were notified.

''He was in a traffic pattern for a landing at the time the mishap occurred,'' said John Lewkowicz, an air traffic controller from Ann Arbor, Mich., who was working at the Wittman Field control tower at the time of the crash.

''We have no idea what occurred,'' he said. Lewkowicz said the pilot was given landing instructions and made no emergency response before the plane plunged into the lake.

The victims in the Wyoming crash were employees of Wheeler Technology of Gig Harbor, Wash., and were flying in a factory demonstrator built from a kit produced by Wheeler for display at the convention.

FAA spokesman Dick Meyer in Seattle said witnesses told officials in Linch Wyo., they saw the small plane ''nosedive into the ground.''

David Gustafson, president of Communication Resources, a public relations firm in Milwaukee that represents Wheeler Technology, said the plane had close to 200 hours flying time with no problems.

Meantime, air traffic began picking up Thursday at Whittman Field, which becomes the world's busiest airport during the fly-in. Officials at the tower said 40 extra air traffic controllers were brought in from other states to help handle the traffic flow this year.

The annual convention is expected to draw more than 800,000 visitors from around the world and features air shows, exhibits, seminars and a broad spectrum of aircraft ranging from the Concorde to the Stealth fighter.

About 5,000 planes shad arrived by Thursday morning and Whittman Field will be closed once parking space for 15,000 planes is filled. Incoming convention aircraft then will be diverted to other Wisconsin airports.

SEOUL, SOUTH KOREA (JULY 26) UPI - South and North Korea prepared Thursday for unprecedented talks between their prime ministers, but a trip to Seoul by North Korean officials failed to materialize because of a procedural dispute.

As the accord on the prime ministers talks was being formalized, five Northern officials accompanied by a 10-member press corps arrived at Panmunjom, where the Korean war truce was signed, to cross into South Korea for a meeting with dissidents in Seoul.

The North Koreans were to join members of the dissident group National Democratic Alliance of Korea to prepare for a rally at the truce village to mark the 45th anniversary of the end of Japanese colonial rule.

But as they crossed the border, a dispute developed between Seoul government officials and the dissident organization over where the

visiting North Koreans should stay.

The government offered the plush Intercontinental Hotel but the dissidents insisted on the smaller Christian Academy House.

The North Koreans refused to cross the border, saying that they will follow their host - the alliance - and not the South Korean government. Although the dissident group accepted the government suggestion, the North Korean visitors said they will not stay at the Intercontinental.

As a result, the preparatory meeting for the proposed rally failed to materialize on schedule Thursday.

National Unification Minister Hong Sung-chul held a news conference and deplored that North Korea went back on an agreement accepting the hotel for the meeting and accommodation.

''We recommended Intercontinental because communications can be arranged easily and security can be better assured at the hotel,'' Hong said. ''They accepted the place at first and then refused. This leads us to doubt if they are really interested in organizing the rally. If they abide by the agreement, our doors are fully open.''

The Seoul government, approving the meeting, said all Koreans who wish to take part in the rally should be allowed to do so. North Korea has indicated it wants only Southern dissidents to attend the gathering.

Earlier Thursday, officials of the two sides met at Panmunjom, and signed a final accord on the prime ministers' talks to start in September.

According to the agreement, the first round of talks will be held in Seoul Sept. 4-7, to be followed by another in the North Korean capital of Pyongyang Oct. 16-19. Dates for subsequent sessions will be set later.

Under the agreement, the rivals are expected to work toward ending military and political confrontation and realizing many-sided exchanges and cooperation between the two halves of the divided peninsula.

The Koreas have yet to sign a peace treaty on the 1950-53 Korean War.

Attending the talks will be a seven-member delegation from each side, led by Prime Minister Kang Young-hoon for the South and Yon Hyong-muk for the North and including Cabinet-level officials and up to two military chiefs.

Each delegation will be accompanied on its cross-border trips by 33 support personnel and a 50-member press corps. Each meeting will last for four days in principle, which may be changed by mutual agreement.

The delegations may travel either by airplane, car or train. Each side will provide its own aircraft in case of air travel. Cars and trains will be provided by the other side.

The agreement provided that the press corps should be ''accurate and fair'' in reporting to help restore mutual trust and promote national reconciliation.

Each side will provide communications facilities to the other not only for official business but also for news reporting including telecast relays.

The agreement was finalized and signed after almost 1 1/2 years of difficult negotiations.

There are other channels of South-North Korea dialogue which are currently idle, including talks to set up a full inter-Korea parliamentary conference, talks between business experts, and talks to help separated family members.

#90207u1099 07/26/1990 ~United Press International
JAKARTA, INDONESIA (JULY 26) UPI - Washington's policy shift on Cambodia evoked hardy support Thursday from Australia while Japan's decision to oppose the exclusion of the Khmer Rouge from the peace process heartened Southeast Asian foreign ministers.

With Secretary of State James Baker expected to face a grilling from the skeptical members of the Association of Southeast Asian Nations Friday, Australian Minister of Foreign Affairs Gareth Evans proclaimed his backing.

The U.S. move was ''a very positive and constructive thing to happen,'' Evans said. ''It may indeed help us by loosening up the atmosphere a little.''

Baker last week announced the U.S. decision to withdraw diplomatic recognition of the Cambodia guerrilla coalition at the United Nations, and to open a direct dialogue with Vietnam.

The move has overshadowed two days of talks between foreign ministers from Indonesia, Singapore, Malaysia, the Philippines, Thailand and Brunei.

Western observers said the about-face would take top priority during the sessions between the ministers and Baker, along with ASEAN's other dialogue partners, including Japan, Canada, the European Community and New Zealand. All except Japan have endorsed Baker's move.

Baker, who arrived at the Halim military airport Thursday night, played

down Asean's criticism of his Cambodia policy while enroute. ''The U.S. and Asean goals and objectives are the same as when we met last year,'' he said.

He mentioned the full withdrawal of Vietnamese troops from Cambodia, a negotiated settlement and a prevention of a Khmer Rouge return to power.

While Hanoi insists all troops were pulled out last September, the resistance claims many remain.

Washington's refusal to agree to the forced repatriation of unwanted Vietnamese boat people has also angered ASEAN ministers, threatening to resort to pushoffs if the United States does not alter its stance or provide holding centers.

ASEAN countries, the United States and Vietnam are among the signatories to the U.N.-sponsored Comprehensive Plan of Action adopted in Geneva last year. First-stop asylum countries agreed to provide shelter for the refugees now numbering 150,000 awaiting resettlement in the West.

The ministers warned the survival of the plan hinges on their demand for mandatory repatriation of those screened out as economic migrants, not genuine refugees. The Bush administration opposes forced repatriation on humanitarian grounds.

Baker said the United States remains opposed to forced repatriation but has met its commitments to the plan by providing resettlement opportunities and funding.

Evans, meanwhile, was effusive in his support of the U.S. change on Cambodia.

''We welcome in particular the opening of a direct dialogue with Vietnam.

''It signals that the U.S. is prepared, finally, with the legacy of the Vietnam War behind it, to actively search for a kind of relationship and a kind of solution that are going to be necessary'' to settle the 11-year-old conflict.

In a joint communique, the ASEAN countries proposed the U.N. seat currently held by the coalition's two non-communist factions and the Khmer Rouge be expanded to include the Hanoi-backed government in Phnom Penh as well.

They said Washington's approach would ''set back the search for a comprehensive political solution.''

Participants said they understood the Bush administration faced congressional and domestic revulsion over support for the Khmer Rouge,

blamed for the deaths of more than 1 million Cambodians from 1975 to 1979, when the Vietnamese drove the regime out.

Armed by China, the Khmer Rouge is the most powerful of the resistance factions fighting the Hanoi-backed Cambodian government. Their battlefield activity has escalated since the change in the U.S. stance.

State Department officials said Baker will try to head off confrontations with ASEAN by stressing the administration is still determined to provide assistance to the two non-communist factions headed by Prince Norodom Sihanouk and former Prime Minister Son Sann.

Japan's Foreign Minister Taro Nakayama said he is opposed to excluding the Khmer Rouge from the peace process and will urge China to use its influence for peaceful purposes.

#90207u1128 07/26/1990 ~United Press International

BONN, WEST GERMANY (JULY 26) UPI - The first convoy of about 80 trucks removing U.S. chemical weapons from West Germany arrived under heavy guard at a U.S. Army depot in the Rhineland Thursday en route to destruction in the Pacific.

The 4-mile-long convoy carrying 15 tons of deadly nerve gas crawled 30 miles from an Army chemical depot at Clausen along closed, guarded freeways for 2 1/2 hours before reaching the U.S. Army base at Miseau, near Kaiserslautern.

The weapons will remain at Miseau until shipped out of the country by rail and sea.

West German radio interviewed Germans living along the convoy route who said they were happy that the weapons were being taken away but were also concerned about a possible accident during the operation.

''I think it all went a bit fast. Of course I'm for the removal but I'm skeptical whether the preparations were sufficient,'' one woman said as the convoy passed near her home.

But the mayor of Landstuhl, a small town next to the highway used by the convoy, told reporters the public had been well informed about the convoy shipment.

''I'm not scared because security is very tight and we know all the details,'' he said on a radio broadcast.

The United States agreed to remove the chemical weapons from West Germany

at the 1986 economic summit in Tokyo. The weapons had been stored in Clausen for almost 30 years.

The West German Defense Ministry said that U.S. and West German military officials prepared for the operation for three years and practiced the convoy routine 12 times.

More than 1,200 policemen and 200 U.S and West German military personnel guarded the route, which was sealed off to regular traffic.

Officials said all military and civilian planes were banned from flying over the territory used by the convoy.

But U.S. Air Force officials said Thursday that U.S. military planes were taking off and landing at the Ramstein Air Rorce base, about 10 miles away.

''I'm sitting here right near the runway and I heard planes taking off,'' a Ramstein official said.

West German officials said the planes did not violate the restricted air space near the convoy but the Air Force should have kept the craft on the ground on the first day of the maneuver.

''It shows a lack of - shall we say - sensitivity on the U.S. military's part,'' a West German Army spokesman said.

An Air Force spokesman at Ramstein denied F-16 fighter aircraft could have endangered the convoy. But over the past years, several low-flying military planes have crashed, spurring an intense debate over the banning of such flights in densely populated West Germany.

A total of 102,000 artillery shells containing the highly poisonous nerve gases are scheduled to be moved out of Germany within the next 30 days.

Seven trains will carry the weapons from Miseau to the North Sea port of Nordenham on the west side of Weser River estuary. Two special ships will then take it to eventual destruction on a Pacific atoll.

Removing the 400 tons of chemical weapons in West Germany is expected to cost an estimated $46 million.

#90207u1155 07/26/1990 ~United Press International

PHILADELPHIA (JULY 26) UPI - General Electric Co. Thursday was fined $10 million for defrauding the federal government on a contract to supply mobile combat computer systems and agreed to pay $20 million to settle other civil matters.

One of two officials convicted in the scheme, Gerald Leo, 52, of Norristown, was sentenced to 10 months in prison for his role in covering up the scheme. Sentencing proceedings were continuing for the other official, James Badolato, 42, of Springfield.

The $10 million fine imposed on the nation's fifth largest defense contractor was the second largest ever for a defense contractor. The fine was agreed to by both GE and the Justice Department and then submitted to U.S. District Judge Lowell Reed Jr. for his approval. The government initially had sought a $25 million fine.

GE also agreed to pay $6.1 million in fines and $2.2 million in restitution to settle a civil case related to the criminal case involving the computer fraud.

GE also will pay the government $11.7 million to close a number of contracting issues from the 1980s that were not the subject of litigation but that were under discussion with government officials.

As part of the agreement, GE waived its right to appeal its conviction for overcharging the Army $15 million on a contract to build mobile computer systems designed to process data for battlefield operations.

The government had charged GE with failing to report cost savings it achieved on the $244.9 million contract.

GE, its King of Prussia subsidiary, Management and Technical Services Co., and two former officials were convicted in February after a 14-week trial and nine days of jury deliberations of defrauding the government of up to $8 million on the computer contract.

In a prepared statement, GE said the corporation agreed to the fines and restitution for several reasons.

''GE's liability is based on the guilt of the two MATSCO contract administration employees and although GE believed the individuals were innocent, a jury found otherwise. Also, an appeal if successful, would likely lead only to a retrial and substantial additional expenditure of legal fees,'' GE said.

GE could have been barred from accepting government contracts for up to three years.

Leo, a MATSCO officer, was convicted of four counts of mail fraud and covering up the crime. He was acquitted on racketeering charges.

Leo was freed on bail and was ordered to report to prison Aug. 27.

In imposing the sentence on Leo, Judge Reed said: ''He has not fully accepted his actions and his conduct. I encourage you to accept that conduct.''

Badolato, another MATSCO manager from Springfield, was convicted of covering up the crime but was acquitted of all fraud charges and racketeering counts.

GE was convicted of four counts of fraud and 282 counts of making false claims.

Prosecutors had argued that between 1982 to 1985 the defendants renegotiated with subcontractors to lower prices on components of the mobile computer centers but none of the savings was passed on to the Defense Department.

GE had argued that federal guidelines for the no-bid contract were vague and open to interpretation whether the company was required to report those savings after the contract was agreed upon.

In 1985 GE paid a $1 million fine after admitting its employees overcharged the Air Force by $800,000 on a contract involving the Minuteman nuclear missle system.

#90207u1188 07/26/1990 ~United Press International

CAIRO, EGYPT (JULY 26) UPI - Iraq has scored a initial political victory in a dispute over oil production with its Persian Gulf neighbor Kuwait.

As tensions in the region eased with Iraq's pledge to not use force against Kuwait, rapid progress was reported at a crucial OPEC conference in Geneva Thursday to prevent quota cheating by setting a higher production ceiling.

Analysts said Iraq strengthened its position within the 13-member OPEC cartel, gaining the support of pivotal members Iran and Saudi Arabia in its drive to discipline Kuwait and the UAE, which Iraq has accused of sabotaging oil prices by dumping oil on world markets and weakening the Iraqi economy.

In the dispute, which flared last week, Iraq verbally assaulted Kuwait as well as the UAE and sent troops to the Kuwaiti border. The United States countered with a minor military exercise in the region. The Iraqi threats extracted promises by Kuwait and the UAE to honor their output quotas.

On the eve of the OPEC conference, Iraq and Kuwait announced they will meet to thrash out their differences. Thursday, Cairo Radio reported the

two sides will meet Sunday in Saudi Arabia's Red Sea port of Jeddah.

Regional analysts said Iraq appears to have scored an initial victory by making Kuwait accept bilateral talks.

''Kuwait initially called for talks with Iraq to be held in the presence of moderate Arab states such as Egypt and Saudi Arabia,'' said a regional analyst based in Cairo. ''But Iraq appears to have scored a political victory... Now it will face Kuwait alone and press home its demands without opposition.''

Iraqi newspapers, which attacked Kuwaiti ministers earlier this week, did not mention the oil and border dispute in their news pages Thursday.

Kuwait also remained silent on the dispute.

Egyptian President Hosni Mubarak, who visited both Iraq and Kuwait to mediate in the quarrel, said Wednesday Iraqi leader Saddam Hussein had assured him Baghdad had no intention of using military force against Kuwait.

Mubarak said Saddam ''assured me he has not stationed any troops on the Kuwaiti border, and that the small number of troops there formed a permanent garrison stationed in the region'' before the latest dispute erupted.

The denial by Saddam came after Western diplomats in Baghdad said Iraq had been staging military maneuvers along its border with Kuwait and The Washington Post reported Iraq had massed some 30,000 troops along the border.

Iraq, calling U.S. Navy maneuvers in the Persian Gulf an ''imperialist plot,'' summoned the American ambassador in Baghdad Wednesday to demand removal of U.S. ships.

The state-run radio, monitored in Cairo, said Saddam received the U.S. envoy, but gave few details of the talks except to say they took place in the presence of Iraqi Foreign Minister Tareq Aziz.

It was the first time in recent memory Iraq's leader had summoned a U.S. ambassador, and analysts said the move reflected the seriousness with which Iraq viewed its position.

U.S. diplomats in the Gulf said they did not expect the Bush administration to announce any naval pullout from the Persian Gulf region, which contains 70 percent of the world's oil reserves.

They said that, just as in the eight-year Iran-Iraq war - suspended two

years ago under a U.N.-brokered cease-fire, Washington's priority would be to ensure the free flow of oil through the strategic waterway.

The dispute erupted last week when oil-dependent Iraq, trying to revive an economy ravaged by nearly eight years of war with Iran, accused Kuwait and the UAE of dumping oil on world markets and forcing crude prices down.

Cash-strapped Iraq, straining to service its huge war debt estimated at between $40 billion and $70 billion, has also asked Kuwait for compensation of some $2.4 billion after accusing the emirate of illegally drilling in an Iraqi oil well. Kuwait has denied the charge.

In Geneva, OPEC oil ministers reached early consensus on raising production ceilings and agreed on the need to raise prices at their mid-year conference, and officials indicated a possible quick full accord.

Officials said the ministers agreed that total production should be raised from 22.1 to 22.5 million barrels a day so that the United Arab Emirates quota can be increased from 1.1 to 1.5 million barrels a day.

The ministers said there was also agreement to hike target prices for OPEC oil at least $2 above the present reference price of $18 a barrel - a target price based on a mix of seven crude oils, but they continued to seek accord on the exact level of the increase, with several delegations agreeing to a price of $20 a barrel, while Iraq, Libya and Iran sought higher prices.

#90207u1192 07/26/1990 ~United Press International

TAMPA, FL (JULY 26) UPI - A judge Thursday dismissed a juror who telephoned purported Colombian drug smugglers during deliberations in a money-laundering trial involving Manuel Noriega's personal banker and others.

U.S. District Judge William T. Hodges ordered the remaining 11 jurors back to deliberations, ending speculation that the dismissed juror's action would force the court to abort the marathon trial of the former Panamanian strongman's banker, a Colombian businessman and four other bankers.

Hodges ordered the proceedings to continue after meeting privately with prosecutors and defense attorneys. Jurors entered their fourth day of deliberations Thursday.

Using an address book seized from one of the defendants, one of the 12 jurors telephoned members of the Medellin drug cartel in Colombia and then shared what was discovered with another juror, The Tampa Tribune reported Thursday.

It took a week to select the jury, six months to present the evidence and two weeks for attorneys to summarize their cases in the complicated money-laundering case involving bankers with the Luxembourg-based Bank of Credit and Commerce International.

Hodges met privately with prosecutors and defense attorneys twice Wednesday to discuss the situation. Jurors, who have not been sequestered, were sent home shortly after reporting for their fourth day of deliberations.

Attorneys declined to say what was discussed in the closed-door meetings.

The numbers apparently dialed by the juror came from an address book taken from Colombian Rudolf Armbrecht's briefcase when he was arrested in a Miami motel in October 1988, the paper reported.

Prosecutors introduced the book as evidence and testimony indicated the telephone numbers belonged to members of Colombia's Medellin cartel.

The Tribune reported the juror told at least one colleague about the telephone calls, which angered another member of the panel. The offended juror told a relative, who in turn told the FBI.

If both sides agree, deliberations can continue with 11 jurors. Two alternate jurors were dismissed last week when lawyers concluded their final arguments and deliberations began.

The defendants are Ian Howard and Sibte Hassan of BCCI's Paris branch; Noriega banker Amjad Awan; Akbar A. Bilgrami of BCCI's Miami branch; Syed Aftab Hussain, who worked in Panama; and Armbrecht, an aircraft broker.

The bankers were arrested Oct. 6, 1988, at a bogus bachelor party staged by the U.S. Customs Service to lure the bankers to Tampa.

They are accused in a $32 million money-laundering scheme staged by customs agents during a two-year sting operation.

Two BCCI subsidiaries pleaded guilty in January and forfeited $15 million to the government, more than triple the previous largest penalty ever assessed against a bank.

#90207u1202 07/26/1990 ~United Press International

MOSCOW (JULY 26) UPI - President Mikhail Gorbachev said Thursday the Soviet Union needs immediate financial aid from the West to salvage his economic reforms.

Gorbachev bared the dire straits of the Soviet economy at a joint news conference with visiting Italian Prime Minister Giulio Andreotti.

''In these two years - I would say very difficult and crucial years - we need this help,'' Gorbachev said. ''And we need it, of course, within the present year.''

Gorbachev said aid from the West would give him room to maneuver as he tries to move the economy from a centralized administrative system to a market-based distribution of goods.

''We will act during this period to unleash economic initiative, create an environment for entrepreneurship and organize cooperation between Western firms and those of ours that work for the market,'' Gorbachev said.

Since the introduction of five-year plans in 1928, industrial ministries have run the Soviet economy, distributing both resources and goods through administrative commands rather than a Western-style market regulated by uncontrolled prices.

Andreotti indicated that Italy, the Soviet Union's fifth-largest trading partner, is willing to grant credits to Moscow but gave no figure.

Andreotti, whose visit was arranged just 10 days before his arrival Wednesday evening, came to Moscow both as leader of the Italian government and as head of the Common Market under the rotating six-month EC presidency.

Gorbachev, breaking with past Soviet fears about foreign indebtedness, said his huge nation can easily manage repayments of any forthcoming aid.

''We are not the sort of country that cannot bear up under, say, 20 billion or 40 billion (dollars of debt) if countries dozens of times smaller bear up under 20 billion, 30 billion or 40 billion,'' he said.

Gorbachev was apparently proposing a large increase of the Soviet Union's current foreign debt of $54 billion, contradicting Soviet economic planners who have long scorned as irresponsible the so-called ''Polish variant'' of amassing an immense debt.

Gorbachev accompanied his plea for help with assurances that all foreign aid would be repaid, and that the Soviet Union understands it must restructure its crippled economy alone.

''Of course, this is not a gift,'' Gorbachev said. ''We must return all this. Our people would not accept any other condition. It would insult them.''

His remark may have indicated pique at a recent statement by Japanese Foreign Minister Nakayama Taro, who said that giving Moscow money now is like ''tossing it down a ditch.''

Among the major industrialized nations, the United States, Japan and Canada oppose massive aid to the Soviet Union on the grounds that it would be largely wasted before a market economy is more firmly rooted. West Germany and France support such assistance, saying it could help Gorbachev's reforms succeed.

The issue of aid to Moscow dominated the meeting of the seven leading industrial powers in Houston earlier this month, when West German Chancellor Helmut Kohl and French President Francois Mitterrand failed to persuade the group to endorse such help.

Although Gorbachev's glasnost and pro-democracy policies have transformed the political and cultural landscape of the Soviet Union, all his efforts at revamping the country's economy have sputtered.

Gorbachev's premier, Nikolai Ryzhkov, is currently preparing his third economic-reform plan since December in the struggle to lay the basis for an economy based on market forces.

Western financial help, Gorbachev said, would ease the transition, especially in helping enterprises over the tough spots in learning how to produce for discriminating consumers.

''How the market will function, especially enterprises that make goods, is very significant, and in these conditions, the financial aid that we are counting on will give us the possibility of ... using those capabilities that already exist,'' he said.

NEW YORK (JULY 26) UPI - Latest metal market prices as quoted Thursday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 135.70 c-lb.

Lead, common, U.S. primary producers 50.00-52.00 c-lb.; U.S. non-primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.05-$4.50 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $117.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $482.00-$484.00; dealer-approx., $465.00-$470.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $102.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 286.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-87.75 c-lb.

JAKARTA, Indonesia (JULY 26) UPI - Southeast Asian nations, increasingly jittery as global developments entice Western investors, are shedding their initial trepidations and eying favorably a giant Asia-Pacific economic grouping.

Concerns over the European Community's evolution into a single market in 1992, the proliferation of trading blocs and the lure of Eastern European countries have sparked unprecedented excitement over the creation of the Asia-Pacific Economic Cooperation forum, or APEC.

With the next two-day organizational meeting of representatives from 12 countries set to begin in Singapore Monday, leaders who were admittedly skeptical when Australia unveiled the plan a year ago are now effusive in their praise.

Foreign ministers from the Association of Southeast Asian Nations, currently in Jakarta for the annual meeting, will meet in Singapore with their counterparts from the United States, Japan, Australia, New Zealand, South Korea and Canada to take the next steps in forming a mechanism to coordinate cooperation and push for free trade.

''We should actively contribute in developing APEC into an outward-looking mutually beneficial forum,'' said President Suharto of Indonesia.

His enthusiasm was a sharp contrast to the country's earlier stance, regarding APEC as a loose and exploratory process and fearful the six-nation ASEAN's significance could be diminished by the new organization.

''It is inevitable that the momentous changes now permeating throughout the world scene will, sooner rather than later, make their impact felt on ASEAN's immediate environment,'' said Indonesian Foreign Minister Ali Alatas.

He urged the other ASEAN members - from Malaysia, Thailand, the Philippines, Brunei and Singapore - to enhance the grouping's ''collective ability to utilize the opportunity and overcome the challenges inherent in the evolving situation.''

APEC, the result of an initiative by Australian Prime Minister Bob Hawke for greater economic cooperation among nations of the fast-growing Asia-Pacific region, has been enthusiastically endorsed by the United States, Japan and the other Western partners. An inaugural meeting was held in Canberra.

U.S. Secretary of State James Baker and Canadian Secretary of State Joe Clark have endorsed Australia's plan and note that Pacific Rim cooperation is an idea whose time has come.

''The center of global economic activity is shifting towards the Pacific, and it is shifting fast,'' said Clark. He predicted the area by the end of the century will contain 60 percent of the world's population, 40 percent

of global consumption and an even larger share of production.

Hailing APEC as an important milestone, Clark said: ''The world has a tremendous investment in the growing prosperity of Asia, and it is only prudent that we make every effort to secure that prosperity.''

Singapore has been ASEAN's most enthusiastic backer of APEC from the start and officials hope delegates will make concrete decisions on the critical issue of what institutional form the fledgling organization will take and whether China, Taiwan and Hong Kong will be allowed to join.

Trade, tourism, industry and human-resources development are also expected to be discussed. APEC countries earlier this month agreed to set up a network of facilities to train experts in industrial technology, business administration and economic development.

APEC will demonstrate to the world that there is a commitment among the Asia-Pacific countries to get together to talk about common problems, Singapore advocates said.

''At the time when developments in Europe are taking the central place on the world's stage, APEC can prove a useful extra incentive for the United States, Japan and other major powers to strengthen their ties with ASEAN '' said Wong Kan Seng, Singapore's Minister for Foreign Affairs.

''We must endeavor to establish and maintain the widest possible network of international contacts,'' Wong said. ''Our future depends on attracting the positive engagement of great powers in the region rather than chasing them away.''

Malaysia, once skeptical of APEC, is now the most articulate regarding the mounting scramble for foreign dollars and the escalating threats of protectionism.

''Western Europe, which has been an important trading and development partner for ASEAN, is beginning to divert a lot of attention and resources to assist the new democracies in Eastern Europe,'' said Foreign Minister Abu Hassan Omar.

''We must take steps to ensure that the economically beneficial relationship we have with the countries of Western Europe do not suffer any depreciation as a result of the new preoccupations they have with their eastern neighbors.''

Abu Hassan said the emergence of the European single market and the concentration on Eastern Europe all have the potential of creating an inward-looking European region.

Thai Foreign Minister Siddhi Savetsila sees APEC as the Asia-Pacific's response to the economic changes enveloping the world. ''We must not fail to recognize that in this new environment, competitiveness and efficiency are the key prerequisites to any nation's continued well-being and prosperity,'' he said.

Instead of dwelling on the ominous threats in the competition for overseas funds, an optimistic Siddhi said: ''Ahead of us lies bright prospects for economic progress and cooperation.''

#90207u1237 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - Silent invaders from Soviet Central Asia have landed in the United States, quietly taking Lake Erie and Lake St. Clair, with advance patrols sighted as far west as Green Bay, Wis.

Slow to respond, the United States is just beginning to fight back, but the invaders are multiplying and establishing new fronts in their campaign to dominate North America. The country has no ''Star Wars'' defense against them.

The invaders are the small and ugly zebra mussels that are native to the Black, Caspian and Azov seas, located on the Soviet Union's southern belly and are believed to have first landed in the United States four years ago.

The mollusks are believed to have been carried to the United States in ballast water from Europe and escaped as larvae when the bilge water was discharged into Lake St. Clair or the St. Clair River near Detroit.

The Senate approved Wednesday night a farm bill amendment introduced by Sen. Daniel Moynihan, D-N.Y., that would provide $20 million over five years to the Agriculture Department and the Army Corps of Engineers to develop techniques and design standards to eradicate and control the effects of the mollusk in the nation's farm irrigation systems.

The Senate Enviroment and Public Works Committee, in its report on the Water Resources Development Act, said zebra mussels are now well established in Lake St. Clair and Lake Erie, have been found in the Niagara River and in Lake Ontario and reported in the St. Lawrence Seaway.

There are also reports, according to the committee, of isolated mussels having been sighted on a navigation buoy in Green Bay in the spring of 1989.

According to Moynihan, leader of the fight against the zebra mussel, the current infestation is just the beginning.

''The zebra mussel is here to stay,'' Moynihan says. ''It cannot be quarantined or eradicated. Within 20 years it will have spread through the entire surface water system of North America.''

He said the Fish and Wildlife Service estimates that the zebra mussel will cost $5 billion over 10 years in enviromental and economic losses, and he warned, ''As the mussel moves throughout the surface water system of our nation, this figure surely will rise dramatically.''

Moynihan's amendment provides the first money authorized by the Senate to combat the zebra mussel invasion.

Sen. Patrick Leahy, D-Vt., chairman of the Senate Agriculture Committee, held up a fist-size clump of the tiny shellfish and said they could only be described as ''pretty gross'' and ''not a happy sight to see.''

Leahy, handling the amendment for Moynihan, said the mollusks are rapidly clogging water intake pipes, irrigation pipes, utility intakes, fouling ship hulls and causing other problems.

''It multiplies very rapidly,'' Leahy said. ''It is the rabbit of mussels as to its proclivity to procreate. These little rascals are getting on everything.''

Moynihan, in a statement he submitted, quotes Soviet researchers who said when the zebra mussels establish themselves in in a closed irrigation network they reduce flow through the pipes, resulting in inadequate watering of crops, a reduction in yield, and increased expenditure of electricity.

''The shells of the mollusks that die in the pipes are carried into the filters of the sprinklers, which they clog and put out of action,'' he said.

The money authorized in the farm bill is only one assault on the zebra mussel being made by Moynihan.

The Water Resources Development Act, on which the Senate is expected to act soon, includes $12.5 million over five years for development of safeguards against zebra mussels at public facilities such as water intakes and $25 million to help states control infestations at public facilities.

Moynihan also won approval for $6 million in a State Department authorization bill, although that legislation appears blocked by budget restraints, and has introduced a resolution, calling for negotiations with Canada to establish a joint program under the Great Lakes Fisheries Commission.

The Congressional Research Service said the mollusks could spread through waterways across much of the country. It said the immediate threat is that they will move through the Erie Canal into the Hudson River and the Finger Lakes of New York state.

The upper Great Lakes are also in danger with some experts predicting that Lake Huron and Lake Ontario will be colonized extensively this year, while others believe Lake Superior is too cold and lacks the needed calcium for the mollusks to thrive.

PARIS (JULY 26) UPI - A group of Jewish youths wearing yarmulkes was assaulted in the Paris Opera district early Thursday by a ''commando'' group wielding baseball bats, police said.

At least one was seriously injured and two were taken to a local hospital.

The attack took place shortly before 1 a.m. in front of Le Grand Cafe in the Opera district, an area frequented by tourists at night.

With dozens of onlookers watching, the assailants, with close-cropped hair went after a Volkswagen Golf parked near the cafe with the Jewish youths sitting inside. They broke the windshield and then attacked the occupants, authorities said.

The attackers fled, threatening passers-by with the bats.

Police said two persons were being questioned in the incident.

#90207u1279 07/26/1990 ~United Press International

MIAMI (JULY 26) UPI - Tropical Storm Arthur lost much of its punch overnight and early Thursday and shifted to a more westerly track, decreasing the threat to the island of Hispaniola, hurricane forecasters said.

Although a tropical storm watch remained in effect for the southern coast of Hispaniola, the island shared by the Dominican Republic and Haiti, forecasters said the storm would likely pass to the south.

''The current forecast track would take the storm just south of Haiti and toward Jamaica and Cuba,'' said Jack Beven, a meteorologist at the National Hurricane Center. ''The threat to Hispaniola has decreased somewhat from yesterday and this morning.''

Beven said Arthur's maximum sustained winds dropped to about 50 mph from their earlier peak of about 70 mph after the storm encountered an upper level trough of low pressure air over the Caribbean.

''This caused the upper level winds of the storm to turn to a westerly direction, while the lower level winds turned to an easterly direction,'' Beven said. ''It's what we call sheering. The lower half of the storm was going in the opposite direction from the upper portion of the storm.''

Beven said some further weakening was expected over the next 24 hours.

At noon EDT, Arthur was centered near latitude 15.3 north and longitude 69 west, or about 230 miles south southeast of Santo Domingo in the Dominican Republic. The storm was moving west northwest at about 20 mph, and forecasters said that motion was expected to continue Thursday.

Tropical storm force winds extended outward about 70 miles.

Earlier, Arthur had appeared on track for a rendezvouz with Hispaniola. The storm's sustained winds built quickly Wednesday, until they reached 70 mph, just 4 mph shy of hurricane strength.

On Thursday, forecasters discontinued a tropical storm watch in effect for the southern coast of Puerto Rico, and said Arthur's shift in direction lessened the threat to Hispaniola.

Arthur, the first named storm of the 1990 Atlantic-Caribbean hurricane season, formed as a tropical depression in the Atlantic July 15 and grew to tropical storm strength Tuesday.

It dumped heavy rains on Tobago and Grenada Wednesday, then turned on a more northwesterly course as it moved over the open Caribbean.

Forecasters at the hurricane center were also tracking a strong tropical wave about 900 miles east of the Lesser Antilles Thursday and said it showed some potential for development during the next day or two.

It was moving west at 15 mph.

The Atlantic-Caribbean hurricane season runs from June 1 to Nov. 30.

#90207u1302 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - Sixty-six senators from both parties have written President Bush urging him to take tougher action to prevent the genocidal Khmer Rouge from returing to power in Cambodia, it was announced Thursday.

The letter was released as Secretary of State James Baker went to Indonesia to face members of the Association of Southeast Asian Nations Friday who have criticized a recent U.S. policy shift intended to block the Khmer Rouge.

Baker said last week the United States would withdraw recognition of the Cambodia guerrilla coalition at the United Nations until the Khmer Rouge withdraws, and would open a direct dialogue with Vietnam on Cambodia.

The Khmer Rouge killed at least 1 million Cambodians in the mid-1970s before they were overthrown by Vietnam in 1979, and the United States subsequently backed a rebel coalition comprising the Khmer Rouge and two less militarily powerful groups known as the non-communist resistance.

Vietnam withdrew its troops last year, and since then the Khmer Rouge has been reported to be advancing against the government installed by Vietnam, leading to fears it could return to power.

The letter commends the U.S. policy shift but calls on the Bush administration to say it ''will not support a negotiated solution that would give the Khmer Rouge a role in Cambodia's future or increase the likelihood of a Khmer Rouge military victory.''

The senators, 53 Democrats and 13 Republicans, also called on the administration to hold talks with the Cambodian government and send it developmental aid and to press for the earliest possible elections in Cambodia rather than emphasizing an interim power-sharing arrangement.

''We believe that the Khmer Rouge represents an unacceptable threat to the people of Cambodia and that American policy should be based, first and foremost, upon preventing the return of the Khmer Rouge,'' they wrote.

''After 20 years of turmoil and tragedy the people of Cambodia deserve an opportunity to determine their future free of fear of the Khmer Rouge.''

In addition, the letter reminds the administration that it is against the law for U.S. aid to the non-communist resistance to be used in any way that helps the Khmer Rouge militarily.

There have been reports that the non-communist resistance is cooperating militarily with the Khmer Rouge, but the administration denies that there

is any consistent pattern of cooperation.

#90207u1305 07/26/1990 ~United Press International

GALVESTON, TX (JULY 26) UPI - Authorities arrested two shrimpers off Galveston late Wednesday for failing to use turtle excluder devices and seized what was believed to be turtle meat from a shrimping boat off Freeport.

The National Marine Fisheries Service was testing the meat Thursday to determine what kind it is, said a U.S. Coast Guard spokesman who added that the operator of the boat was questioned and released pending the test results.

Another dead loggerhead turtle was found on west Galveston Island Wednesday, National Marine Fisheries Service spokesman Neal Baxter said. Of the 35 dead sea turtles found on the Texas coast in recent weeks, 18 are Kemp's ridleys and 15 are loggerheads. Three were unidentifiable because of decomposition, Baxter said.

Texas A&M scientists are trying to determine what killed the turtles. Authorities have said they expect to be unable to determine whether any of the turtles died in shrimping nets.

Herman Williams Jr., 35, of Galliano, La., was arrested early Wednesday for failing to use the turtle excluder devices or TEDs with a shrimping net. He appeared before a Corpus Christi magistrate and was released on a $10,000 personal recognizance bond.

Williams, captain of the shrimp boat Gulf Star, was picked up by the Brownsville-based Coast Guard cutter Point Noel. U.S. Attorney Leslie Banks of Houston said Williams was picked up after his vessel was spotted off Port Aransas dragging nets without TEDs. Banks is prosecuting TEDs violation cases filed since the shrimping season reopened in Texas waters July 8.

The names of the two shrimpers arrested late Wednesday were not released pending their appearance before a federal magistrate, the Coast Guard said. Their nets were seized. If convicted, boat captains face up to six months in federal prison and $25,000 in fines for each TED violation.

#90207u1320 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The lawyer for a husband and wife infected with the AIDS virus and facing felony charges Thursday in Florida for marijuana possession, says he will mount a ''medical necessity'' defense on their

behalf.

''I thought I'd seen it all,'' said lawyer John Daniel, ''but I've seldom been so upset by a case.''

''This young couple, confronting a fatal disease, were arrested and thrown in jail for using the one drug that has medically helped them cope with a terrible illness,'' he said. ''This is an outrageous and barbaric way to treat terminally ill patients.''

The case, being heard in the local court in Panama City, Fla., involves Kenny Jenks, 28, a hemophiliac, who received HIV-contaminated blood in the mid-1980s and infected his wife, Barbara, 24. Both are now HIV-positive.

They were arrested on March 29, 1989, after police found two marijuana plants in their home, and charged with marijuana possession with intent to distribute, a felony.

According to Robert Randall, head of the Alliance for Cannabis Therapeutics and the first American to gain legal access to marijuana based on ''medical necessity,'' the use of the ''medical necessity'' defense in mairjuana cases is rare but increasing.

Daniel said his clients will admit to growing the two marijuana plants but said he will argue ''any sane person in their situation would have broken the law to obtain medical relief from the effects of this dreadful disease.''

Both Jenks have suffered from the so-called ''wasting syndrome'' common among some AIDS patients, according to Randall. At one point, Mrs. Jenks' weight dropped from 155 lbs. to 112 lbs.

''None of the drugs the doctors prescribed helped,'' she said in a statement. ''I was constantly sick and could not eat. I was literally wasting away. Then we discovered marijuana could help.''

The couple said they discovered the use of marijuana at an AIDS patients group meeting when others told them the illegal drug helped control the debilitating nausea and vomiting sometimes caused by the infection and AZT treatments.

''Marijuana helps us tolerate the side effects of our anti-AIDS treatments '' Mrs. Jenks said. ''Without marijuana we were literally starving to death. When we smoke marijuana we can eat.

''I can't begin to tell you how wonderful it is to be able to sit down and eat a meal with your husband,'' she added.

Marijuana's therapeutic role in medicine has been a source of some controversy. Although some research indicates it is useful in the treatment of a variety of diseases such as glaucoma and staving off the side effects of other treatments such as cancer chemotherapy, the government has resisted efforts to reclassify it to make it more readily available for prescription by doctors.

In a case now before the U.S. Court of Appeals in the District of Columbia the Alliance and other marijuana reform groups are suing the Drug Enforcement Administration in an effort to end the medicial prohibition.

The Jenks contacted the Alliance shortly after their arrest and it arranged for Daniel to represent them in their criminal case.

''It is clear Kenny and Barbara Jenks are not major drug dealers,'' Daniel said. ''Instead, they are two desperately ill people struggling to stay alive.

''Marijuana, in effect, is the only drug capable of providing them with medical relief,'' he said.

#90207u1344 07/26/1990 ~United Press International

NEW YORK (JULY 26) UPI - It may not make for the world's catchiest slogan, but Colgate toothpaste has been endorsed by the Soviet Ministry of Health's Central Scientific Research Institute of Stomatology.

That means Colgate will begin affixing the institute's seal of approval, similar to the American Dental Association designation found on many toothpastes in the United States, on packages sold in the USSR, Colgate-Palmolive Co. said Thursday.

Colgate, which sells four out of every ten tubes of toothpaste in the world, is the first brand to receive the Soviet endorsement after clinical testing by the stomatology institute. Stomatology is the branch of medicine dealing with the mouth.

The company believes the seal will help Colgate toothpaste - which costs about one ruble, or $1.60, compared to 60 kopecks, or 96 cents for domestic brands - claim a larger share of the 600 million tubes sold annually in the USSR, said Group Vice President Edgar Field.

The best-selling brands in the Soviet Union currently are domestically produced chalk-based toothpastes that "are of relatively poor quality," he said.

"We are very proud the stomatological institute has determined that our

toothpaste meets all its standards, making Colgate first with Soviet dental professionals," said Field.

Analysts said the Soviet Union is ripe for brand-name consumer products, although many of its citizens still can't afford them, said Doug Lane of Provident National Bank in Philadelphia.

"As their overall economy picks up it can't hurt to be in there, although Colgate's market in the Soviet Union might be a couple of years away," he said. Field declined to be specific about Colgate' current sales in the USSR, but said they totaled in the tens of millions.

Colgate recently signed a letter of agreement to produce toothpaste in the Ukraine, and has been shipping its toothpaste to Soviet consumers through imports from a number of countries.

#90207u1349 07/26/1990 ~United Press International

MANILA, Philippines (JULY 26) UPI - President Corazon Aquino said Thursday communist guerrilla attacks on relief workers violating a rebel-declared cease-fire did not ''augur well'' for a similar truce by the government.

On Wednesday, 17 senators endorsed a resolution calling for a cease-fire between the government and all dissident forces, including communist rebels, Moslem separatists and mutineers.

The senators said such a move would enable government to devote its efforts to rebuilding areas damaged by a massive earthquake on July 16, which left more than 1,609 people dead.

Aquino also said Thursday her government is seeking $500 million in new loans to finance the rebuilding of areas devastated by the earthquake.

But Aquino stood firm on her opposition to calls by lawmakers to a 2 1/2 year suspension in the payment of the nation's $26.1 billion foreign debt. About 40 percent of the annual budget now goes into the debt service.

''We are calling on the international financial community to aid us in these reconstruction efforts,'' Aquino said in a speech before the Manila Overseas Press Club.

Earlier in the day, Aquino said Defense Secretary Fidel Ramos reported during a Cabinet meeting Wednesday that despite the declaration by the communist New Peoples Army it was calling a cease-fire and joining relief operations, the rebels launched several attacks.

Ramos said guerrilla-backed assassins shot and killed three police officers in the capital over the weekend, gunned down a town mayor escorting a relief convoy and sprayed gunfire on helicopters ferrying food and medicines for refugees.

''While we cannot permanently rule out any cease-fire, the past and present indications do not augur well for its prospects,'' said Aquino, who has crushed six coup attempts against her.

On the earthquake relief effort, Ramos said with the clearing of one of three roads to the hard-hit northern mountain resort of Baguio and surrounding towns, efforts were concentrated on areas still inaccessible because of landslides.

He said 31 helicopters were ferrying relief supplies to remote northern villages on Thursday.

Ramos also said the military was investigating reports that two truckloads of relief supplies had disappeared and that some donations were being sold in markets.

#90207u1351 07/26/1990 ~United Press International

DETROIT (JULY 26) UPI - Chrysler Corp. and Italian carmaker Fiat SpA could be getting ready to sign a deal under which Fiat would build Chrysler's Jeeps and minivans to sell in Europe, a report said Thursday.

In return, Chrysler would most likely sell Fiat's subcompact Tipo in the United States, giving it a small car to replace the Omni and Horizon models Chrysler stopped making early this year, the Detroit Free Press said.

However, a spokesman for Fiat in New York played down the report, which stemmed from a financial analyst meeting held by Fiat in Turin, Italy, earlier this week.

"While I cannot comment directly on these rumors, what had been said at that meeting in Turin was basically in line with what had been officially said at the shareholder's meeting earlier about Fiat's sales and earnings " said Gualberto Ranieri of Fiat U.S.A.

Ranieri noted that any talk concerning Chrysler "was not high on the agenda," and that very little was reported about it in the Italian media, which covered the meeting in detail.

Chrysler has also remained mum about any specific plans to forge further links with Fiat, which now has a venture with Chrysler to market its Alfa Romeo cars in North America. But Chrysler Motors President Robert Lutz

confirmed last week Fiat figures prominently in future plans.

Fiat may be interested in building and selling Chrysler's popular minivans to counter French carmaker Renault's Espace minivan, which is the only similar vehicle on the European market. In turn, Chrysler may be seeking a partner to build overseas a small sport utility vehicle code named JJ. An association between Chrysler and Renault to build the JJ in Spain was scrapped last June because it was "economically unattractive," Chrysler said.

But analysts say any further association with Fiat must first require that Chrysler make arrangements with other foreign automakers it is associated with overseas.

Renault still holds the distribution rights to Jeep Vehicles in France, Italy and Spain, and Chrysler recently signed a deal with Steyr-Daimler-Puch to build minivans in Graz, Austria, by early next year for sale in Europe.

Fiat's overall sales are expected to rise 17 percent in 1990 to about $49 billion, vs. $41 billion for 1989, Ranieri said. Its net income is expected to be even with 1989 levels of $2.6 billion. Chrysler is expected to report substantially reduced second-quarter earnings on Tuesday.

#90207u1356 07/26/1990 ~United Press International

UNITED NATIONS (JULY 26) UPI - Representatives from 40 countries will meet in Moscow next month in the first U.N.-organized conference on the impacts of arms reduction on the world's economy, a U.N. official said Thursday.

Yasushi Akashi, U.N. undersecretary-general for disarmament affairs, said the Aug. 13-17 meeting will aim at discussing ways to re-allocate resources within economies that are carrying out arms reduction.

He said governments like the United States, the Soviet Union, Italy, Japan and China will present papers on their experiences on the matter, which has become an international topic in the post-Cold War era.

Soviet Foreign Minister Eduard Shevarnadze will open the conference to be attended by more than 100 representatives of governments, business, industry, labor, and universities.

The conference on "Conversion: Economic adjustments in an Era of Arms Reduction" will also identify ways to train thousands of workers in defense-related industries for other jobs, study the costs of conversion, and the impacts of unemployment in a peace time, Akashi said.

He said there will be "lots of headaches" for many countries to absord workers when they cut defense budgets, reduce military personnel, and close weapon-manufacturing plants.

The United States, which demobilized a total of 2.8 million military personnel after the Vietnam War, has tremendous experiences to share with other nations on the question of conversion, Akashi said.

-30- 1686

#90207u1360 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The Midwest Stock Exchange Inc. has formally proposed that brokers who receive rebates from market makers be forced to pass those profits on to investors, Midwest exchange officials said Thursday.

The Midwest exchange in a formal petition to the Securities and Exchange Commission said its proposal would assure that "brokers would no longer be receiving kickbacks and would not as a result have a direct economic incentive to favor their own interests over their customers."

Christine Sakach, a branch chief in the SEC's Division of Market Regulation, said that this is the first time an exchange has made a proposal regarding the rebate issue, which has been debated for the last several years. "Now that we've got a formal proposal before us, its appropriate for us to take some action on it," Sakach said.

At an SEC hearing Wednesday, Richard Ketchum, the SEC's director of market regulation, said he would ask for a review of the proposal next fall. The proposal addresses a growing practice, in which market makers offer brokers a rebate in return for receiving the brokerage's trading orders. The rebates, according to a Midwest exchange spokesman, usually equal one to two cents per share.

Under the Midwest proposal, dealers who offer rebates would have to include the amount of the rebates in the prices they disseminate to the public and show those amounts as increases or decreases in their quotations. Brokers would have to list the rebates on customer confirmations and, more importantly, pass the rebates on to their customers.

The exchange in its petition also said that the rebate system, left untouched, could lead to monopolistic collusion between large brokers and dealers and "predatory pricing arrangements." Smaller market makers would suffer, with serious consequences for regional brokers attempting to make markets in local issues, the exchange said.

Still, the Midwest limited the scope of its proposal to cash rebates - as opposed to soft dollar transactions - and to brokers and dealers acting as agents for customers.

The National Association of Securities Dealers had earlier proposed that brokers disclose rebates, but the Midwest exchange said that would not suffice. The proposal was spurred, in part, by competition between the Midwest exchange and NASD, whose traders are increasingly making markets in securities listed on the New York and American stock exchanges.

"They (the Midwest exchange) feel payment for order flow is a form of unfair competition for their specialists," Sakach said. She also noted that while the Midwest petition did not apply to over-the-counter stocks, the exchange "would not be disappointed at all to see the commission expand it to OTC securities."

David Mainzer, a spokesman for the Midwest exchange, said his organization was particularly concerned with a NASD brokerage called Bernard L. Madoff Investment Securities Inc in Manhattan.

This brokerage is the primary NASD trader offering rebates in listed securities, and as a result now handles 80 percent of the NASD's daily trading volume in listed securities, according to Mainzer.

#90207u1384 07/26/1990 ~United Press International

BEIJING (JULY 26) UPI - Europe's highest-ranking official to visit China since last year's crackdown on dissent said Thursday he had forged a ''constructive atmosphere'' for resolving lingering Sino-European differences and would urge the easing of some economic sanctions.

But British Foreign Office Minister of State Francis Maude said ''revulsion'' in the West and Hong Kong over the bloodshed last year had not dimmed despite what he called ''encouraging steps'' China had taken to ease repression and rebuild ties.

''We have removed some misunderstandings,'' Maude, 37, told reporters at the conclusion of a three-day Beijing visit, during which he met with Premier Li Peng and other leaders.

''Above all, what we have been able to do is generate a constructive atmosphere in which we can resolve remaining differences between us,'' Maude said.

Maude described his meetings as ''candid yet cordial'' and said they would pave the way for a visit to China by British Foreign Secretary Douglas Hurd, but he said no date for a vist had been set.

Maude was the highest-level European minister to visit China officially since Beijing's crushing of peaceful pro-democracy demonstrations across China in early June 1989.

The brutal suppression of dissent prompted Western governments to impose stiff economic, political and cultural sanctions against Beijing, including bans on ministerial visits and sales of military equipment, and a freeze on government lending.

''The sanctions that were put in place last year were, I believe, justified, but there have been some encouraging steps by the Chinese government in the meantime,'' Maude said, citing the lifting of martial law in Beijing and Tibet and the freeing of dissident physicist Fang Lizhi and hundreds of political prisoners.

''I shall be recommending (to the European Community) that time has come for there to be some further relaxation on concessional finance, on soft loans, to China,'' Maude said.

Maude said he also was pleased by a sharp curbing of Chinese anger over a just-passed British law granting 50,000 Hong Kong Chinese families the right to resettle in Britain.

The Nationality Act, which coincidentally became law Thursday, aims to build confidence in the jittery British colony in advance of its scheduled 1997 takeover by China.

Beijing had angrily denounced legislation proposing the act in April as a violation of the 1984 Sino-British joint declaration on Hong Kong's handover to China, but Maude said the Chinese showed none of their earlier anger in three days of high-level meetings.

''The Chinese side has restated their position, ... but has done so in a relatively muted way, which I think is encouraging,'' Maude told reporters on his final day in Beijing.

Maude said he also reiterated Britain's intention to ask the Chinese for a broadening of Hong Kong's fledgling democracy after scheduled 1991 elections. Such a request likely would require a change in the Chinese-drafted Basic Law, which London approved in February and which Beijing considers immutable.

Maude restated Britain's position that China and the West must finally repair the damage caused by last year's crackdown and concentrate on helping China build its economy.

''Of course we cannot forget what happened but there is a great geal that

has to be done,'' he said. ''It would be greatly irresponsible for us to stand on the sidelines forever wringing our hands and saying it is too difficult to do business.

''We have to get on with it. That's in the interest of the people of China.''

Other issues discussed during Maude's three days of meetings included Sino-British relations, European politics, Cambodia and China's recent warming toward the Nuclear Non-Proliferation Treaty.

''I said we hoped that this would lead to Chinese accession to the treaty '' Maude said. ''China is, after all, one of five acknowledged nuclear weapons powers and it is highly desirable that it should come into the treaty spectrum.''

China detonated its first nuclear device in 1964 but has never signed the Non-Proliferation Treaty.

WASHINGTON (JULY 26) UPI - The Nuclear Regulatory Commission's new plan to deregulate disposal of some low-level nuclear wastes would allow unacceptably high radiation exposures and is ''not protective of public health,'' says an EPA memo released Thursday.

The internal memo, released by a House Interior and Insular Affairs subcommittee, said the NRC's plan to loosen disposal requirements for wastes ''below regulatory concern'' could lead to radioactive contamination of groundwater above Environmental Protection Agency health standards.

The memo noted the NRC estimated its policy could result in radiation doses posing a three in 10,000 risk of cancer to the most exposed individual - well above EPA cancer risk standards for other environmental hazards.

''We believe that this is too high a level for a blanket deregulation criteria, and is not protective of the public health,'' said the memo, prepared earlier this month by EPA staffers for Michael Shapiro, deputy assistant EPA administrator for air and radiation.

The memo also said the NRC policy would allow radiation exposures of up to 10 millirems - more than double the EPA's four-millirem limit for contamination of drinking water. Millirems are a measurement of the health impact of radiation.

Under the deregulation policy announced June 27, the NRC said it would

consider requests from industry and medical facilities to exempt certain low-level radioactive wastes from required disposal in specially designated landfills featuring stringent environmental safeguards.

Exempted wastes could be dumped in ordinary municipal landfills, raising concerns among state and local officials about leakage of radioactive materials into ground water.

Among the items that may qualify for exemption are protective clothing worn by nuclear power plant workers, medical diagnostic equipment and contaminated animal carcasses from laboratories.

NRC officials maintain those wastes generally have such low levels of radiation that they pose only very small cancer risks to the general public and, thus, do not warrant strict - and costly - disposal requirements. They say the risks are less than those posed by getting one chest X-ray.

They also argue the policy is simply a clarification of past NRC practice under which disposal of some items containing small radioactive elements, like home smoke detectors, already have been deregulated.

However, EPA officials appearing before the subcommittee said the NRC policy did not place tight enough limits on the number of wastes that could be deregulated. They said that could result in multiple radiation exposures and high cumulative doses to those living near landfills.

They also said the NRC policy did not contain sufficient safeguards to prevent frivolous uses. For example, NRC documents acknowledge the policy might allow the sale of some slightly radioactive consumer products, such as irradiated jewelry or tainted cosmetics.

If a large enough number of items were deregulated, ''the policy could lead to far greater public exposure than we believe the commission intends '' said Richard Guimond, director of the EPA's Office of Radiation Programs.

Similar objections have been raised by NRC staff and NRC Commissioner James Curtiss, who say the NRC policy would allow cumulative radiation exposures to the public 10 times greater than the dose delivered by all releases to the environment from the nation's 112 operating nuclear power plants.

The critics also said the exposures allowed under the NRC policy are 10 times higher than the cumulative dose limit recommended by the International Atomic Energy Agency.

NRC Chairman Kenneth Carr rejected the allegations that excessive radiation exposures were likely, saying the NRC would carefully limit the number of items deregulated to prevent high cumulative doses.

''In reviewing and approving exemptions, the commission will ensure that the potential exposure from any single (deregulated waste) is small and that the total impact on public health and safety of all (wastes) is acceptably low,'' Carr said.

The EPA's concerns were echoed by state officials, who told the subcommittee the NRC had threatened to override state laws seeking to block the looser disposal requirements allowed under the NRC policy. Maine Minnesota, Vermont, Iowa and Pennsylvania already have taken such legislative action.

The state officials urged Congress to pass legislation giving states clear authority to regulate low-level waste disposal within their borders.

Senate Democratic leader George Mitchell of Maine also submitted written testimony voicing support for greater state rights to limit radiation dangers.

#90207u1391 07/26/1990 ~United Press International

TRENTON, NJ (JULY 26) UPI - The New Jersey Supreme Court handed cigarette manufacturers a major defeat Thursday, ruling that smokers or their survivors can seek damages for injury or death caused by failure to warn of health risks.

With only one partial dissent, the court said that the federal law that has mandated warnings on cigarette packs and advertising since 1966 does not bar such claims. The court also held that a 1987 state law limiting liability suits against makers of inherently dangerous products does not apply retroactively.

The ruling came in a suit by Claire Dewey, a Wyckoff woman whose husband, Wilfred, died of lung cancer in 1982. The defendants include R.J. Reynolds Tobacco Co. and Brown & Williamson Tobacco Corp.

The court's opinion, if it is upheld by the U.S. Supreme Court, could reverse rulings by five federal appeals courts and the Minnesota Supreme Court that the warnings on packages and advertisements preempt such claims.

Richard Daynard, chairman of the Tobacco Products Litigation Project and a professor of law at Northeastern University in Boston, predicted that the New Jersey ruling will survive an appeal. The conservative justices who now hold the majority on the high court are unlikely to rule that the states cannot exercise their police powers against tobacco companies if they choose, he said.

"If the New Jersey Supreme Court is right, then all of the circuit courts that have ruled the other way are wrong," Daynard added. "It puts tobacco litigation back on track. It is the most important positive development in the recent history of tobacco litigation."

The tobacco industry has survived hundreds of smoker death suits in the past 40 years. A federal jury in New Jersey awarded $400,000 in 1988 to Antonio Cipollone, the widower of a lung cancer victim, in a case that cost his lawyers an estimated $3 million and the defendants as much as $50 million, but that decision was reversed by a federal appeals court.

The decision allows Marc Z. Edell, the lawyer representing both Dewey and Cipollone, to argue the "risk-utility theory" - that cigarette makers should be responsible for damages because they knowingly sold a product whose risks outweighed its benefits.

About 60 smoker death suits are now pending around the country, according to Daynard. About 40 have been dismissed or dropped since the Cipollone verdict, which attracted national publicity because of the information on the internal workings of the cigarette industry that was disclosed during the trial.

The tobacco industry, after lobbying heavily against the 1964 Cigarette Act, later argued that the package warnings shielded companies from any additional responsibility for disclosing the risks of smoking. But the New Jersey court disagreed.

"A New Jersey jury could decide that a cigarette manufacturer, rather than an injured party, ought to bear the cost of injuries that could have been prevented with a more detailed warning label than that required under the Cigarette Act," said Justice Robert Clifford, author of the majority opinion.

R.J. Reynolds, a Winston-Salem, N.C., subsidiary of RJR-Nabisco Inc., said in a brief prepared statement that the company is disappointed by the decision.

"Reynolds does not rule out an appeal to the U.S. Supreme Court since the decision is so clearly at odds with the intent of Congress to protect commerce in cigarettes so long as federally mandated warnings are followed " spokesman Jim Fyock said.

Edell said the ruling makes a favorable verdict more likely when Cipollone is retried.

Three of the Supreme Court's seven justices did not sit on the case, being replaced by three state judges. Six members of the court concurred in Clifford's opinion, while a state judge issued his own partial dissent.

WARSAW, Poland (JULY 26) UPI - The Soviet KGB still has agents stationed in Poland but its operation has been curtailed by the Solidarity government, the labor movement newspaper Gazeta Wyborcza said Thursday.

''There is an official representation of KGB,'' the newspaper quoted Interior Minister Krzysztof Kozlowski as telling the Solidarity Parliamentary Caucus on Wednesday.

''The KGB general as the chief with a group other officers are accredited by our ministry,'' Kozlowski said, adding that the secret police are registered at the Soviet Embassy in Warsaw.

Kozlowski said the KGB was omnipresent in the Polish Interior Ministry under Communist rule.

''The cooperation with the KGB was placed deep in the ministry and reached even heads of the departments,'' he said. ''There were permanent advisors, consulting groups and liaison officers.''

''Now it is history,'' said Kozlowski to stress the independence of his ministry from Moscow.

Kozlowski explained Poland is not an exception as regards the control of the ministry by the KGB and said similar structure existed in former Communist Bloc ministries.

He said there are still situations requiring contacts with the KGB such as when the Polish Foreign Ministry and KGB coordinated details on the transit of Soviet Jews via Poland to Israel.

Kozlowski said the current official cooperation with the KGB is not dangerous for Poland.

#90207u1417 07/26/1990 ~United Press International

ORLANDO, Fla. (JULY 26) UPI - Two men were hailed as heroes for pulling a passenger from the wreckage of a burning car Thursday, but they were unable to save the car's driver.

''They saw the fire. That's when they decided to pull them out quick, and the fire got bigger and bigger and bigger. It's incredible to go in there and risk their lives,'' said Florida Highway Patrol Lt. Randy Harper.

Michael Hollis, 23, and Andy Gonzalez, 22, both of Orlando, pulled Georgette Lemieux, 26, of Orlando from the wreckage. She was in serious but stable condition at Orlando Regional Medical Center.

The driver, Lemieux's roommate, was identified as Paula Velasquez, 19.

''They couldn't get her out. She was totally pinned inside. Of course, the fire was to the point now where they had to get out of there,'' Harper said.

The car's gasoline tank was ruptured by the impact. By the time firefighters reached the scene, the passenger compartment was fully engulfed in flames, Harper said.

''They took Georgette out, away from the vehicle. They assumed it was going to blow up at any second. The gas tank caught fire,'' Harper said.

The women were drag racing in a white Mustang convertible when the accident occurred, Harper said. Velasquez changed lanes, clipped the front fender of another car and spun out of control into the utility pole, Harper said.

The Mustang was traveling at least 65 mph in the 45-mph zone, Harper said.

The driver of the car struck by the Mustang, William Baker, 22, of Orlando was unhurt. His car suffered about $3,000 damage, Harper said.

Harper said it appeared Velasquez was killed by the impact.

#90207u1431 07/26/1990 ~United Press International

(JULY 26) UPI - Trucks carrying 15 tons of deadly nerve gas arrived at a U-S army depot in the Rhineland today- beginning the process of removing American chemical weapons from West Germany. The weapons now stored at the U-S army base eventually will be shipped out of West Germay by rail and sea before they are destroyed in the Pacific. The United States agreed to remove the weapons from West Germany at the 1986 economic summit in Tokyo.

OPEC oil ministers have reached an early consensus on raising production ceilings at their mid-year conference in Geneva, Switzerland. After a two-hour plenary session, OPEC's president told reporters- quote- ''It seems there is a consensus on production but NOT yet on prices.'' Officials say the ministers agreed to raise total production from 22-point-one-Million to 22-point-five-Million barrels a day.

Mongolian army officials say the Soviet Union is speeding up its troop withdrawal from the country... and has already pulled out 80 percent of

its armed forces from Mongolia. Mongolia is wedged between the Soviet Union to the north and China to the south... and diplomats say the apparent speedup reflects Moscow's reforms and improved relations with China.

#90207u1434 07/26/1990 ~United Press International

HAVANA, CUBA (JULY 26) UPI - Former Nicaraguan President Daniel Ortega said Thursday elections are not necessary in Cuba and urged the United States to stop pushing Fidel Castro to accept reforms similar to those of Eastern Europe.

Ortega, a longtime ally of Cuba's President Castro, organized and lost free elections in his own country in February, but he said the Cuban situation cannot be compared to that of Nicaragua.

''Cuba chose a different model,'' he told reporters prior to massive celebrations he was to attend to mark the anniversary of the Cuban revolution. ''Cuba's model has given it stability. Why should it adopt another model that could give it instability.

''Holding elections is not going to lead to an economic miracle,'' Ortega said.

His comments come at a crucial time for Castro as he resists pressure from both the West and his own communist allies to initiate democratic and economic reforms that would prevent the Caribbean island nation from further isolation.

Ortega said the Cuban people were no worse off economically than the rest of Latin America and that Castro's hard-line Marxist system was ''an example of social justice.''

''We cannot confuse what is occurring in Eastern Europe with what is occurring in developing countries,'' he said. ''If the United States and other countries sought reforms like those in Cuba it would do no good ... and it would lead to social outbursts.''

Ortega, commenting on U.S. government contentions that Cuba should follow the example of its communist allies, said now that the Soviet threat has diminished, the United States should stop worrying about Cuba and let it determine its own course.

''They can no longer use that argument on Cuba,'' he said.

In what might have been an encouragement to Castro to improve human rights Ortega said, ''We would like all other Latin American countries to have

an army and police that would allow their people to express themselves ... without the fear of being killed.''

#90207u1454 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The American Red Cross announced Thursday it will take corrective steps in response to a government report that found laxity in blood banks' tracking of transfusion-associated AIDS and other diseases.

In a 60-page letter sent to the Food and Drug Administration, the Red Cross outlined how it would improve its methods for receiving, investigating and following up on reports of errors and accidents that come in from its 54 blood-collecting regions.

FDA officials had no immediate comment Thursday on the corrective steps proposed by the Red Cross.

Earlier this month, a preliminary report by an FDA inspector found the government had never been notified of 228 reports of transfusion-associated AIDS reported to the Washington, D.C., region of the Red Cross.

''A preliminary review of these cases has determined that almost all of the transfusions occurred before March 1985, when the testing for the AIDS virus began. From the preliminary review, it also appears that these cases did not result from any erroneous release of blood products,'' the Red Cross said in a statement.

The AIDS-causing human immunodeficiency virus, or HIV, is spread by sexual or blood-to-blood contact, such as receiving a blood transfusion from another person.

A person who underwent a blood transfusion before learning he was HIV-positive is considered a case of transfusion-associated AIDS in the eyes of the FDA, even though the patient may actually have contracted the deadly infection through sexual contact or intravenous drug use. ''No causal link need exist,'' the Red Cross noted.

The Red Cross, which supplies more than half of all blood used in U.S. hospitals, takes the concerns raised by the FDA report ''very seriously'' and will cooperate with government investigators, said Stephen Richards, the group's senior vice president.

But Richards emphasized, ''Nothing in the FDA report or our response alters our conviction that today's blood supply is safer than it has ever been.''

The FDA report also uncovered 380 error and accident reports from various Red Cross blood regions across the country that were never reviewed by the government. FDA officials previously have said it appears that most of those problems involved computer or administrative difficulties.

Red Cross officials said they have assigned additional staff at national headquarters to review such reports more promptly and submit them to the FDA. In addition, the non-profit health group said it is improving its computer system designed to keep track of people who should not donate blood because of their health history or screening test results.

Last week, Roland Ray, who is infected with HIV, filed a class-action suit against the Red Cross, claiming he was infected with the deadly virus by a tranfusion of ''tainted blood'' in August 1984 at Suburban Hospital in Bethesda, Md. The blood was collected by the Washington region of the Red Cross.

In the suit, Ray contends the Red Cross was negligent when it failed to use ''surrogate'' tests to screen out blood from donors with a high likelihood of being infected with AIDS.

Such tests, available for about two years before the full-fledged HIV test looked at whether a donor's immune cells were depressed in a pattern similar to that found in AIDS patients or whether the donor was infected by hepatitis B, which spreads by the same routes as HIV.

#90207u1478 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The indefatigable Sarah McClendon assured well-wishers at a Capitol Hill birthday bash Thursday that ''it isn't hard at all to be 80'' and she has no plans to give up her spot as legendary gadfly in the Washington press corps.

''I'm not quitting because I have a lot of questions I want to ask George Bush,'' McClendon told a packed birthday breakfast celebration thrown by the Texas State Society and the Texas Breakfast Club.

McClendon, who turned 80 July 8, has been peppering presidents, from Franklin Roosevelt to Bush, with questions in her distinctive Texas twang since 1944, largely for Texas papers served by her McClendon News Service.

Bush and his wife, Barbara, were among well wishers who sent congratulatory messages honoring the new octogenarian.

Members of the Texas congressional delegation, many of whom have felt the sharp point of her pen, joined a crowd of 350 in the Cannon House Office Building to toast the reporter.

Rep. Jack Brooks, D-Texas, the 19-term dean of the delegation, lauded McClendon as ''one of my first role models'' because the two worked together as reporters on the Beaumont (Texas) Enterprise some 30 years ago.

One of McClendon's earliest memories of covering Congress, she said, ''Is Lyndon Johnson shaking his finger at me saying 'you retract that story, it's wrong.' And I shook my finger right back and said 'I will not, it's true.' ... One day he loved me and the next day he hated me.''

But pointing to Johnson's record, particularly on civil rights, McClendon said, ''I had great respect and love for Lyndon. I don't care if he did get me fired from four papers.''

Former House Speaker Jim Wright of Texas sent McClendon a birthday limerick:

From Tyler came Sarah McClendon,

To write about Franklin and Lyndon,

Ike, Truman, Kennedy, Nixon and Ford,

Carter and Reagan - now Bush is on board.

On the White House beat, our Sarah's unique.

She knows when to keep quiet and just when to speak;

At questioning sharply, she hasn't a peer;

Her questions are known to strike trembling fear

In the minds of presidents, far and near.

So lift a cup and dry your tears:

Our Sarah will last for 100 years.

She'll outlast all our political careers.

Then, when at last at heaven's gate,

St. Peter sorts through the Fourth Estate,

And others tremble, awaiting their fate...

This red-haired girl from Tylertown

Will rise, her brow knitted in serious frown

And say, without waiting for nod or cue -

''St. Peter, I have a question for you!''

LAKELAND, FL (JULY 26) UPI - Florida citrus commissioners voted to support a change in federal regulations that would allow processors to remove some of the chemicals that make grapefruit juice bitter. "It will create a better grapefruit juice than we have now," said Bob Williard, of Citrus World, a Lake Wales juice processor.

Citrus World has petitioned the Food and Drug Administration, asking that it allow grapefruit juice processors to use a filtration system that extracts bitter chemicals. The government has already given approval for the same process for navel oranges.

Department of Citrus employees had recommended that commission members give the proposal their backing, and on Wednesday they did. However, Commissioner Bill Youngblood cast a dissenting vote, saying Florida producers had worked hard to produce a sweeter-tasting grapefruit, and the process would minimize their achievements.

Bitterness is a problem with early-season fruit. That juice is typically blended with juice from grapefruit harvested later in the season.

NEW YORK (JULY 26) UPI - Norsk Hydro s.a., Norway's largest industrial company, reported second-quarter earnings Thursday of $70.6 million, or 34

cents a share, up from $64.3 million, or 31 cents a share, in the year-ago quarter. Revenues for the quarter were $2.28 billion, down from $2.43 billion in the second quarter of 1989.

For the first six months of the year, earnings were $195 million, or 95 cents a share, down from $249.9 million, or $1.22 a share, in the comparable period of 1989. Revenues for the period were $4.6 billion, down from $4.9 billion.

"Compared to last year's second quarter, this year's result is somewhat better for petrochemicals but weaker for oil and gas and light metals," the giant oil-based company said.

Norsk Hydro attributed the second-quarter decline in revenues to lower oil prices but cited improved operating expenses for the higher profits.

PRAGUE, CZECHOSLOVAKIA (JULY 26) UPI - The nation's top environmental official said Thursday Czechoslovakia will continue to operate a nuclear power plant near Austria despite pressure from its neighbor to shut it down for inspection.

Czechoslovak Environment Minister Josef Vavrousek told reporters that ''while Bohunice is not in an ideal state, its state is not such that it should cease operating.''

''The Czechoslovak government is ready to shut down the station should there be sufficient reasons for doing so,'' Vavrousek said.

Czechoslovakia's immediate environmental priority is to shut its smoke sulfur-belching brown coal power plants in north Bohemia.

Austria has offered Czechoslovakia about a million dollars a day of free electricity if it agreed to close the V1 Jaslovske-Bohunice nuclear power plant in West Slovakia for a five-week inspection.

Czechoslovakia turned that offer down but said Austria could inspect the four-reactor plant near the Austrian border on its own, or join one of three planned inspections - by the Siemens Corp., the International Atomic Energy Agency and the European Community.

The Siemens team is set to begin its inspection of the plant August 7, and the various inspections should end in November. During that time, the plant will continue generating a limited amount of electricity.

Czechsolvakia expects an energy crisis this winter because on Jan. 1, 1991

it will have to begin paying scarce hard currency for Soviet oil deliveries.

The Soviet Union - Czechsolvakia's main oil supplier - cut back oil deliveries to Czechoslovakia last week and forced it to raise prices at the pumps by 50 percent, six months ahead of schedule.

Austria's Parliament has been debating a measure to east Czechoslovakia off its nuclear dependence with money to invest in cleaner sources of energy. But the project is costly and Austria cannot afford to sponsor it alone.

#90207u1541 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The Senate, nearing the end of its work on the five-year farm policy law, voted to rescue the imperiled crop insurance program Thursday by assuring it will stay in operation while it undergoes reform.

The crop insurance program has consumed an average of $500 million in federal subsidies annually in the past decade but farmer enrollment has been lower than hoped. The White House has proposed scrapping it in favor of a standby disaster-relief program.

Senators adopted a plan that calls for more realistic rates for coverage and encourages the administration to take money out of an Agriculture Department agency to cover the cost of the program if funding is a problem.

Action on crop insurance removed one of the final obstacles to Senate passage of the new farm bill. It would freeze crop subsidy rates for the next five years, as well as setting the terms for environmental, export subsidy and research progams.

Overall, the bill would spend about $55 billion on commodity supports over the next five years, or about the same amount as if there were no change in curent law. The administation has warned that billions of dollars more in cuts will be needed but Senate leaders decided to wait until the White House and Congress agree on a package of cuts.

The future of the crop insurance system was thrown into doubt with the White House proposal early this year to terminate the program this fall and replace it with a standby disaster-relief program.

Congress opposes the White House proposal but has been unable to find a way to repair crop insurance that does not have a much higher cost. The House passed an appropriations bill last week that would shut down crop insurance sales Sept. 30.

''Permanent disaster assistance alone will not solve our problems,'' Sen. Kit Bond, R-Mo., said in proposing a set of stop-gap reforms and a ''sunset'' for crop insurance at the end of the 1993 crop year.

However, the Senate voted 55-42 against the sunset. Sen. Kent Conrad, D-N.D., said it would make little sense to begin the job of reform and then dump the program.

''It is important to keep the pressure (on) to reform this whole business '' responded Sen. Richard Lugar, R-Ind. ''It is very important we conclude this business.''

The reforms approved by the Senate would require more realistic rates but limit increases to a maximum of 20 percent a year, force insurance companies to carry more of the risk on policies, require coverage for a crop to be offered throughout a state if it is sold anywhere in the state, set up a program to help insurance companies experiment with ways to offer crop insurance on their own and offer policies in more attractive forms.

Farm-state leaders in the House were considering options for rescuing crop insurance - or at least assuring funding for it - in their version of the farm bill. The House resumes debate on the bill Friday.

(JULY 26) UPI - A wheelchair-bound Virginia woman says a civil rights bill for the disabled signed by President Bush today will make her human again. The landmark legislation prohibits discrimination against people with physical or mental disabilities. It also requires that ''public accommodations'' be made readily accessible to the disabled.

A federal judge in Philadelphia today approved a 10-Million-dollar fine against General Electric for defrauding the governmnt on a contract to make mobile combat computer systems. G-E and the Justice Department agreed on the fine... and G-E also agreed to pay 20-Million-dollars to settle other civil matters.

An attempt to have Massachusetts Democrat Barney Frank expelled from the House failed today. Representatives voted 390-38 against the resolution, failing by a huge margin to reach the two-thirds needed for approval. The House then moved to consider two other possible sanctions against Frank stemming from his relationship with a male prostitute.

Iraq today strengthened its position within the 13-nation OPEC cartel... and in its battle with Persian Gulf neighbor Kuwait. Iraq gained the support of pivotal cartel members Iran and Saudi Arabia by pledging NOT to use force against Kuwait in their dispute over oil production.

The presidents of Czechoslovakia and West Germany withstood heavy criticism today to join Austrian President Waldheim to open the annual Salzburg music festival in Austria. But Czechoslovakia's Vaclav Havel spoke out against anyone who would- quote- ''rewrite one's own biography''- an apparent reference to Waldheim's long-concealed Nazi past.

HAVANA, CUBA (JULY 26) UPI - Thousands of Cubans packed the streets of the capital Thursday to celebrate the 37th anniversary of the launching of the revolution that brought to power the Western Hemisphere's only remaining Communist government.

For Cubans, July 26, 1953, when Fidel Castro's forces attacked the Moncada military barracks, marks the definitive start of the armed fight against Fulgencio Batista, which culminated in the dictator's fall in January 1959.

The annual anniversary celebrations were marked by throngs of people and raucous carnivals, parades and street concerts in an atmosphere reminiscent of Rio del Janeiro's annual Lenten carnival.

The official Cuban news agency Prensa Latina said President Castro would

give a speech in the capital Thursday. It was scheduled around 6 p.m. EDT.

From the government point of view, Thursday's celebrations were tempered by an ongoing crisis of Cuban refugees taking refuge in Western embassies in Havana.

Castro has vowed not to allow any Cuban refugees to flee the country after seeking asylum in Western countries.

Three Cubans who sought asylum in the Swiss Embassy last weekend were released Wednesday, apparently after Swiss officials were given some assurance by the Cuban government that the refugees would not be harmed.

Nonetheless, the government of Castro said in a written statement that the refugees's departure was ''voluntary and unconditional.''

It also said two of the refugees have criminal records.

The departure of the three men from the Swiss Embassy brought down to 22 the number of Cubans seeking asylum in Western embassies in Havana.

A diplomat at the Spanish Embassy told reporters Wednesday that 18 Cubans remained in the embassy, though other Western diplomats have said at least half of those are suspected to be Cuban agents sent by the Interior Ministry to disrupt efforts to grant asylum to the refugees.

Another four Cubans remained housed at the official residence of the Italian ambassador.

The people on the streets of Havana, however, appeared oblivious and they danced and sang to herald the 37th anniversary of Castro's rebellious attack.

Castro's armed revolt against the Batista dictatorship in 1953 was crushed and Castro retired to the east of the island to rebuild his forces with the help of Argentine revolutionary Ernesto ''Che'' Guevara.

In 1958, the United States withdrew support from Batista, and he fled to the Dominican Republic Jan. 1, 1959.

Once in power, Castro infuriated the U.S. government by confiscating American investments in banks and industry and by seizing large U.S. landholdings, which he turned into socialist-style, state-owned farms.

This year's celebration comes at a critical time for Castro's revolution, which has been buoyed by some $5 billion a year in Soviet aid and preferential trade treatment for Cuban products under a bartering system with East bloc countries.

On Wednesday, Soviet leader Mikhail Gorbachev told Third World nations that the days of massive subsidies in the name of fraternal socialism are coming to an end, and that the Soviet Union will observe the same terms of trade with all partners - communist or capitalist, friend or former foe.

Castro has held out against making political changes in his one-party communist state, but has shown signs of economic flexibility, including moves for private Spanish investors to build hotels on the island.

In recent public statements, Castro has warned of an impending economic crisis, referring to a ''special period'' to defend socialism, to which he continues to swear adherence.

There has also been severe friction between Cuba and one of its traditionally closest allies - Spain. Last week, Spain suspended some of its scientific, technical and cultural relations with Cuba in response to the controversy.

#90207u1589 07/26/1990 ~United Press International

SPRING HILL, TN (JULY 26) UPI - General Motors Chairman Roger Smith said he will drive the first Saturn car off the assembly line in a closed ceremony just two days before he retires.

The public and media will be barred Monday from the event because GM wants to keep the Saturn car's looks secret until sales begin this fall, Smith said in Nashville at a meeting of auto analysts. "It's a family affair," Smith told reporters Wednesday. "You'll get your chance."

GM started the Saturn Corp. and built a $2 billion factory at Spring Hill, Tenn., to produce cars to compete with Japanese imports. The Saturn car will be shipped to dealers in Tennessee and on the East Coast and West Coast before going on sale around the country.

"We still don't want the car to be revealed until the fall and the team members wanted it that way too," Saturn spokeswoman Jennifer Schettler said.

Smith said he will drive the first Saturn before the 2,600 Saturn employees, plus GM chairman-elect Robert Stempel, United Auto Workers president Owen Bieber and UAW vice president Stephen Yokich.

GM originally planned the Saturn car to sell for about $6,000 and average 50 miles a gallon. Officials now say it will sell for between $10,000 and $12,000 and average 35 miles a gallon.

"It's changed and gotten better as technology has moved, as the market has moved and as our targets have moved," Smith said. "A lot of people say, 'Well, isn't that terrible that you've had to change things?'

"It's great because you're shooting at a moving target audience, so you always want to keep changing and making things better. I tell you, they've really moved the car in the design, technology and manufacturing.

"We don't have anyplace in General Motors anywhere in the world where are going to build a car the way we build a Saturn," Smith said. "It's such a new technology, and of course, they've had the opportunity to try things out and get out ahead on things. That's why we want to do it."

#90207u1591 07/26/1990 ~United Press International

(JULY 26) UPI - The Salvadoran government and leftist rebels agreed on at least one item in their peace talks in Costa Rica. The sides say they will set up a human rights verification commission that will begin work after a cease-fire accord is reached in El Salvador's 10-year civil war. They hope to have a truce by September.

The Soviet Union's most famous lawyer said today he hopes to use an anti-Semitism trial to expose the growing danger of Russian fascism. The trial in Moscow involves a leader of the reactionary Pamyat society. The human rights attorney says he wants to find out what kind of organization is behind the defendant.

South African President de Klerk today asked for an urgent meeting with African National Congress leader Nelson Mandela. The request comes one day after police detained a high-ranking A-N-C official in a crackdown on activists accused of planning armed rebellion.

A Wisconsin man who adopted a daughter two years ago says he really loves her. He loves so much that he married her yesterday. A judge vacated the adoption order after 45-year-old James Salt and 23-year-old Janett Caylor realized their relationship was more like husband-and-wife than father-and-daughter.

Nike today said it is perfectly willing to talk with Operation PUSH about its record on hiring and aiding minorities. A spokesman says the athletic apparel company's chief executive had an amicable conversation with Jesse Jackson. The Nike president will meet with PUSH leaders in Chicago next week.

#90207u1626 07/26/1990 ~United Press International

ATLANTA (JULY 26) UPI - Federal health officials Thursday said they are investigating the first case in which a dentist with AIDS may have passed the deadly virus on to a patient.

The patient, described only as a young woman, tested positive for the AIDS virus two years after undergoing surgery in which two molars were extracted, the CDC said in its weekly report.

The surgery was conducted by a dentist diagnosed with AIDS three months before the operation and who had not informed his patients that he was infected with the deadly virus, CDC officials said.

The CDC would not reveal location of the case, name of the patient or dentist or the year of the incident.

The American Dental Association said results of the CDC study must be considered with caution.

''Release of this case does not serve the best interests of the public and the profession because it has been incompletely investigated and the findings are not conclusive,'' the ADA said.

The association said it advises dentists with AIDS to ''limit the activities of practice to those areas that do not endanger the patients or members of the dental staff.''

CDC investigators focused on the dental procedure after conducting an exhaustive probe into other ways the patient could have been infected with the AIDS-causing human immunodeficiency virus, or HIV.

''Multiple interviews of the patient and her family and friends by health department staff and review of her medical records did not identify factors that may have potentially placed her at risk for HIV infection,'' the CDC report said. ''The patient reported no history of blood transfusions, intravenous drug use, acupuncture, tattoos, or artificial insemination.''

Researchers also tested HIV strains taken from the patient and the dentist. Although they were not identical, the two strains were as similar genetically as other pairs of strains found in people who had infected each other, the report said.

A third piece of evidence was supplied by research into other blood-borne viruses, such as hepatitis B, which has been shown to be transmitted from dentist to patient under similar circumstances. In some of those cases and the case under investigation, the dentist wore gloves and a mask during the procedure.

In the AIDS case being probed, the patient and doctor also could not recall the dentist shedding any visible blood during the operation.

The CDC doctors stopped short of concluding that the dentist infected his patient, finding only that such transmission could have occurred.

''The possibility that the patient may have been infected through another mode cannot be entirely excluded,'' the report said.

''We know that patients can infect health workers, and we have always assumed that we would see a case where a health-care worker would infect a patient. Whether or not the case we published today is one of them, we're not sure,'' said Dr. Harold Jaffe, author of the study.

However, Jaffe said the possibility that the dentist infected the patient has prompted the CDC to review its recommendations for patient care by health workers infected with HIV.

Currently, the agency recommends health-care workers infected with HIV consider refraining from practice on a case-by-case basis, taking into consideration how they feel and the procedures they perform.

The CDC has no guidelines on whether health care workers with AIDS should tell patients of their condition, Jaffe said.

Earlier this week, a study in the Journal of the American Medical Association showed a Tennessee surgeon who died of AIDS did not appear to have infected any of about 2,000 people whom he operated on while infected.

#90207u1634 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - It has been five years since the $640 toilet seats. Now comes word the Air Force spent $1,868.15 for a toilet cover assembly for a C-5B transport plane.

Congressional staff investigators who discovered the price paid for this and other items said they were able to find similar commercial toilet covers for about $182 - roughly one-tenth of the military's price.

The Air Force confirmed it paid $1.868.15 but denied the part could have been purchased for much less, calling the cost ''reasonable.''

The price was disclosed by Kris Kolesnik, staff investigator for Sen. Charles Grassley, R-Iowa, and staff member Mark Forman of the Joint Economic Committee in an internal memo sent July 23 to Grassley and Sen. William Roth, R-Del.

Grassley and Roth, recalling the 1985 disclosure of the Air Force purchase of $640 toilet ''seats'' for aircraft, are looking into new charges of overpriced parts bought by the Department of Defense.

''D.O.D. recently purchased three lavatory items which appear to be dramatically overpriced: an aircraft toilet cover assembly, a porcelain urinal and a rubber toilet gasket,'' the memo said, citing a government purchase data base.

It said the Navy purchased porcelain urinals for minesweepers for $641.25 - $491 over manufacturer's cost - and the government bought drain valve seals similar to $1 models for $67.50 each.

''The toilet cover assembly, similar to the famous $640 toilet seat, cost the Air Force $1,868.15, according to the database,'' the investigators said in the memo, adding they found a similar, though somewhat smaller one for $182.50.

The Air Force purchased two spare toilet cover assemblies at $1,868.15 each from Weber Aircraft, Fullerton, Calif., in August 1988. There are two toilets on each of the nation's 50 C-5B transport planes, which can carry up to 75 soldiers.

The memo said the Air Force toilet cover assembly, which measures 34 inches by 28 inches, is a steel-reinforced plastic sheet that covers the top of the toilet assembly.

But Phebe Brown, spokeswoman at the Air Force's San Antonio Logistics Center in Texas, said the cover assembly is more complex, containing cutouts for the toilet seat plus piping and electrical and mechanical components that are part of the lavatory holding tank.

''We have contacted commercial airline companies for the price they spend on similar units and we got a real bargain,'' Brown said.

''Boeing said the commercial prices for their units on 707s is a little over $2,000,'' she added, ''and McDonald Douglas said the price for similar units on their DC-10s is over $9,000.

''The cost is high because of a very expensive fabrication process,'' she said.

The Pentagon said its ''should cost'' price estimate was $1,708.82, ''which is within an acceptable range of the actual price paid.''

''When they try to justify these prices, they look foolish in our opinion '' Kolesnik said in a telephone interview Wednesday.

Earlier this year, the Air Force defended its purchase of a pair of specially made pliers for $999.20, marked up by Pratt & Whitney from a base price of $658. Following the public disclosure, Pratt & Whitney voluntarily refunded the mark-up.

Other recent disclosures of highly priced military items included a $117 soap dish assembly cover, a $120.40 cup dispenser and a $421,000 fax machine.

Kolesnik said he and Forman plan to conduct a joint statistical analysis ''of whether parts are overpriced in general'' and ''whether or not things have changed since 1985,'' when the $640 toilet seats became public.

#90207u1644 07/26/1990 ~United Press International

BEAVERTON, OR (JULY 26) UPI - The founder and chairman of Nike Inc. told Jesse Jackson his company will be glad to meet the Operation PUSH civil rights group on its efforts to aid minorities, a spokeswoman said Thursday.

Operation PUSH, or People United to Save Humanity, said Wednesday it would target the athletic shoe industry to hire more minorities and women. Its first target is Nike, the world's largest athletic shoe maker, with sales totaling $2.4 billion last year.

Spokeswoman Liz Dolan said Nike President Richard Donahue will meet in Chicago next week with Operation PUSH national executive director Rev. Tyrone Crider and other of the group's leaders.

Nike founder and chief executive officer Phillip Knight spoke to Jackson by telephone Wednesday in what Dolan said was "actually a very warm conversation." She said Nike officials already planned to be in Chicago for a sporting goods show and that Jackson's group apparently knew that.

"Operation PUSH has asked us for information on our minority hiring policies, our minority philanthropic programs, our business development programs," Dolan said. "We have an excellent record in all those areas, so we happily agreed to provide all those things." "They don't know anything about Nike yet. They certainly haven't made any accusations," she said. "We're happy to oblige."

Dolan said Nike expects Jackson and the others will be impressed by what the company has done, such as its store in the low-income northeast Portland area that devotes all of its profits to neighborhood development efforts.

She said she was not aware of the percentage of minority workers at Nike, but that and other information will be gathered for presentation to

Operation PUSH officials.

PUSH was founded in 1971 with an emphasis on challenging corporate America to develop a better relationship with the African-American community. "We are the margin of profit for the athletic shoe industry," Crider said.

Some black leaders have criticized Nike's efforts to sell their costly Air Jordan and other shoes to low-income, inner-city youths. Nike recently said it would start an effort to help convince youths to stay in school, in part with a new Bo Jackson commercial due to air later this summer.

"We think we would be a good model for other companies," Dolan said. "The athletic shoe business is extremely high profile, and we are No. 1. But it's still such a tiny business when compared to others whose record on minority employment is not as strong."

WASHINGTON (JULY 26) UPI - Resisting emotional pleas to impose stronger sanctions, the House formally reprimanded Rep. Barney Frank, D-Mass., Thursday for his dealings with a male prostitute.

Following more than four hours of public debate colored by charges of gay-bashing and including an apology by Frank for wrongdoing, the House approved the reprimand, as recommended by the ethics committee, on a vote of 408-18.

It earlier rejected moves backed by conservative Republicans to expel or censure Frank, an acknowledged homosexual.

The House first voted 390-38 against a motion to expel Frank, then voted 287-141 against a motion to stiffen the penalty to censure.

''I am here to apologize to my colleagues, to this institution, to those around me,'' Frank said on the House floor.

''These mistakes were mine,'' he added. ''They weren't mistakes of my colleagues or my staff or my family.''

Rep. William Dannemeyer, R-Calif., introduced the explusion resolution that would have made Frank, a leading liberal voice in the House, only the second member kicked out since the Civil War. Rep. Newt Gingrich, R-Ga., the assistant House Republican leader, unsuccessfully sought the censure penalty, saying the action was needed ''to repair the integrity'' of the House.

Reprimand is the least severe discipline that requires action by the full

House, with the punishment constituting the mere passage of the resolution accepting the committee's report.

PARIS (JULY 26) UPI - The agency which oversees trading on the French stock exchange said Thursday it is investigating French financier Bernard Tapie's $387 million acquisition of West German sportswear company Adidas AG for possible insider trading.

The Commission des Operations de Bourse, the French equivalent of the Securities and Exchange Commission, described the inquiry as "routine." But the agency said it was focusing on a purchase of one percent of shares in the holding company Bernard Tapie Finance by Societe de Banque Occidentale from Banque Worms.

In a statement, Banque Worms said the deal was concluded July 6 on the eve of Tapie's dramatic announcement at the end of the World Cup in Rome of his capture of Adidas.

Worms said SDBO, a subsidiary of the state-run Credit Lyonnais, contacted it June 20 and the shares eventually were sold for 138 francs each for a total of nine million Francs. Within ten days shares in BTF had soared to 220 Francs, a 50 percent increase.

The Commission already had suspended for one week quotation of the holding company on the Paris Bourse until Tapie explained the financial backing for the takeover.

Tapie said in a statement that "all shareholders were informed of the Adidas operation" before the public announcement of the acquisition." "They all knew the same thing at the same time, everyone without exception " said the Marseille entrepreneur and soccer magnate.

The Commission des Operations des Bourse introduced tighter controls on insider trading Friday. Societe de Banque Occidentale heads a consortium of four French and four foreign banks financing Tapie's acquisition of Adidas.

The flamboyant financier, who widely is believed to have his eyes on the Presidential Elysee Palace, has said the sports giant - which last year reported losses of $60 million - will have to be restructured if it is to become profitable again.

Tapie said Thursday that directors of Worms and SDBO "spoke together to envisage the exchange of shares for the first time June 15" - five days before the date cited by Worms.

"I know as well that there was a pact between them and each associate of the group had the same information," Tapie said. "It is a little bit too easy, once an operation has worked, to say 'I did not know.'"

WASHINGTON (JULY 26) UPI - Dioxin is less toxic than widely believed, a controversial federal scientist said Thursday, but a congressman accused him of personal ''arrogance'' that undermined the work of three U.S. agencies.

Vernon Houk, assistant surgeon general with the Centers for Disease Control in Atlanta, was summoned before a House Government Operations subcommittee. He was questioned about his claim that dioxin is less toxic than widely believed.

Environmental Protection Agency officials acknowledged some dispute among scientists on a standard for dioxin, but said there is a broad consensus that strict limitations are prudent to protect public health.

Dioxin is a common contaminant produced during the manufacture of various chemicals and the incineration of wastes. But health officials are most concerned about its presence in white paper.

The defoliant Agent Orange contains dioxin. Agent Orange was used during the the Vietnam War and is suspected of causing various cancers and other illnesses,

The EPA has classified dioxin as a ''probable human carcinogen'' that causes birth defects in animals and is presumed to cause cancer in humans.

Dioxin occurs during the bleaching process in the manufacture of paper. Small dioxin residues are present on all white paper, including food containers, ice cream wrappers, milk cartons, toilet paper and food containers.

Paper mills also pump small levels of dioxin into rivers, streams and lakes and scientists are concerned that it concentrates in fish - which are then eaten by humans.

Houk has said that the federal dioxin standard stems from ''chemophobia.'' He said ''we are lucky'' that dioxin is not as dangerous as it was believed in the early 1980s.

But Rep. Ted Weiss, D-N.Y., criticized Houk for advising the state of Georgia to adopt a dioxin standard for water that is 500 times weaker than the current federal guideline.

Weiss also concentrated on the role of Georgia Pacific Paper Co. in

persuading Georgia officials to enact a weaker dioxin water standard. The company has paper mills in Georgia.

''I find disturbing your role in this whole situation,'' Weiss told Houk. ''It seems nothing short of arrogance'' for you to take such a position ''on official government stationary.''

Weiss said that Houk had ''undermined'' the positions of three federal bodies, the EPA.

Houk said he was expressing his personal view.

''I do not agree with you, Mr. Weiss,'' Houk said. ''My position requires me to speak out on scientific issues.''

The EPA has stated that Houk's assumptions ''are scientifically unsound and not protective of public health,'' Weiss noted. The EPA - not the Centers for Disease Control - has jurisdiction over regulating dioxin in the environment.

William Farland, a top EPA scientist, testified that it is difficult to assess the risk from dioxin because it ''produces lots of biological effects.''

''This dioxin issue is a contentious one, even within the scientific community,'' Farland said. ''There is room in this process for valid differences in scientific positions.''

One scientific model for evaluating dioxin risks ''may overstate the risk '' Farland said, but more studies are being done.

Farland said Houk holds a ''valid scientific opinion'' on dioxin, but one that is outside ''the realm of scientific consensus.''

''I don't agree with all of Dr. Houk's opinions on dioxin,'' Farland said, but he is a competent, knowledgeable government scientist.

Another EPA official, Martha Prothro, testified that ''we were disappointed'' that Georgia adopted the weaker standard and the agency is reviewing that state's action.

#90207u1727 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - Gene Hohl and Erica Nash have experienced the ugly face of discrimination - inaccessibility to buildings, snickers, misperceptions that they're stupid - but on Thursday, they felt whole again.

Hohl, Nash and about 2,000 other handicapped advocates joined in celebration as President Bush signed the Americans with Disabilities Act, the broadest expansion of protections to men and women since the Civil Rights Act of 1964.

Bush said the new law ''takes a sledgehammer'' to bias against the physically and mentally disabled in jobs, public places, transportation and telephone services.

''It's given me back the rights I lost 20 years ago when I had to use a wheelchair. I'll be a human again,'' Hohl, of Hampton, Va., said. ''Now, I can't get on a transit system because 90 percent of the buses don't have access. And when I look for a job, I can't even get into the building.''

Nash, of Washington, does not expect to see immediate change, but ''slowly slowly, it will happen.''

''I'll be able to enter a building and not get a grudge but perhaps get a smile and some understanding of my problem,'' said the wheelchair-bound Nash. ''People think people with a disability are not intelligent. They treat us like babies. We'll now have full accessibility and the recognition that we deserve.''

In many places of the country, physical barriers for the handicapped have been removed. The one thing that has been harder to change is society's attitudes toward the handicapped.

''About four years ago, when I got out of college, I experienced attitudinal barriers,'' said Brian Atwell of Hays, Kansas. He said his wheelchair turned off prospective employers. The new law ''will end a lot of discrimination'' and require employers to give him an equal chance to get a job, he said.

Alan Toy, an activist for disabled actors, said he is concerned television and movies primarily hire physically disabled actors for handicapped roles. While that is OK, disabled actors should play other types of roles as well, he said.

''I would like the media to reflect us as part of the mainstream. Can't producers just hire a handicapped actor to play a character and not have the handicap be an integral part of the role?'' said Toy, who played a Vietnam War protester in the Oscar-winning movie, ''Born on the Fourth of July.'' He requires a wheelchair.

Another advocate for disabled actors, Michael Lee Gogin, agreed.

''As people with disabilities become more a part of the mainstream, we

will become more reflective in the media and there will be an increased demand for our services,'' said Gogin, a dwarf.

Adrienne Asch of New York, who is blind, said she has been fortunate to live in New York and New Jersey, which have had state civil rights laws for the disabled.

''I've fought discrimination, but in New York, I've had the tools with which to win,'' she said.

Now 43 million Americans have the tools - a new law - to fight discrimination in the workplace, public places, transportation and telephones.

''This is the beginning,'' said a proud Gwen Hubbard of Syracuse, N.Y., who has cerebal palsy. ''I'm now one of the population not being left out anymore.''

#90207u1740 07/26/1990 ~United Press International

TAMPA, Fla. (JULY 26) UPI - A judge Thursday dismissed a juror who telephoned purported Colombian drug smugglers during deliberations in a money-laundering trial involving Manuel Noriega's personal banker and others.

U.S. District Judge William T. Hodges ordered the remaining 11 jurors back to deliberations, ending speculation that the dismissed juror's action would force the court to abort the marathon trial of the former Panamanian strongman's banker, a Colombian businessman and four other bankers.

Hodges ordered the proceedings to continue after meeting privately with prosecutors and defense attorneys. Jurors entered their fourth day of deliberations Thursday.

Using an address book seized from one of the defendants, one of the 12 jurors telephoned members of the Medellin drug cartel in Colombia and then shared what was discovered with another juror, The Tampa Tribune reported Thursday.

It took a week to select the jury, six months to present the evidence and two weeks for attorneys to summarize their cases in the complicated money-laundering case involving bankers with the Luxembourg-based Bank of Credit and Commerce International.

Hodges met privately with prosecutors and defense attorneys twice Wednesday to discuss the situation. Jurors, who have not been sequestered, were sent home shortly after reporting for their fourth day of

deliberations.

Attorneys declined to say what was discussed in the closed-door meetings.

The numbers apparently dialed by the juror came from an address book taken from Colombian Rudolf Armbrecht's briefcase when he was arrested in a Miami motel in October 1988, the paper reported.

Prosecutors introduced the book as evidence and testimony indicated the telephone numbers belonged to members of Colombia's Medellin cartel.

The Tribune reported the juror told at least one colleague about the telephone calls, which angered another member of the panel. The offended juror told a relative, who in turn told the FBI.

If both sides agree, deliberations can continue with 11 jurors. Two alternate jurors were dismissed last week when lawyers concluded their final arguments and deliberations began.

The defendants are Ian Howard and Sibte Hassan of BCCI's Paris branch; Noriega banker Amjad Awan; Akbar A. Bilgrami of BCCI's Miami branch; Syed Aftab Hussain, who worked in Panama; and Armbrecht, an aircraft broker.

The bankers were arrested Oct. 6, 1988, at a bogus bachelor party staged by the U.S. Customs Service to lure the bankers to Tampa.

They are accused in a $32 million money-laundering scheme staged by customs agents during a two-year sting operation.

Two BCCI subsidiaries pleaded guilty in January and forfeited $15 million to the government, more than triple the previous largest penalty ever assessed against a bank.

#90207u1751 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - Silent invaders from Soviet Central Asia have landed in the United States, quietly taking Lake Erie and Lake St. Clair, with advance patrols sighted as far west as Green Bay, Wis.

Slow to respond, the United States is just beginning to fight back, but the invaders are multiplying and establishing new fronts in their campaign to dominate North America. The country has no ''Star Wars'' defense against them.

The invaders are the small and ugly zebra mussels that are native to the Black, Caspian and Azov seas, located on the Soviet Union's southern belly and are believed to have first landed in the United States four years ago.

The mollusks are believed to have been carried to the United States in ballast water from Europe and escaped as larvae when the bilge water was discharged into Lake St. Clair or the St. Clair River near Detroit.

The Senate approved Wednesday night a farm bill amendment introduced by Sen. Daniel Moynihan, D-N.Y., that would provide $20 million over five years to the Agriculture Department and the Army Corps of Engineers to develop techniques and design standards to eradicate and control the effects of the mollusk in the nation's farm irrigation systems.

The Senate Enviroment and Public Works Committee, in its report on the Water Resources Development Act, said zebra mussels are now well established in Lake St. Clair and Lake Erie, have been found in the Niagara River and in Lake Ontario and reported in the St. Lawrence Seaway.

There are also reports, according to the committee, of isolated mussels having been sighted on a navigation buoy in Green Bay in the spring of 1989.

According to Moynihan, leader of the fight against the zebra mussel, the current infestation is just the beginning.

''The zebra mussel is here to stay,'' Moynihan says. ''It cannot be quarantined or eradicated. Within 20 years it will have spread through the entire surface water system of North America.''

He said the Fish and Wildlife Service estimates that the zebra mussel will cost $5 billion over 10 years in enviromental and economic losses, and he warned, ''As the mussel moves throughout the surface water system of our nation, this figure surely will rise dramatically.''

Moynihan's amendment provides the first money authorized by the Senate to combat the zebra mussel invasion.

Sen. Patrick Leahy, D-Vt., chairman of the Senate Agriculture Committee, held up a fist-size clump of the tiny shellfish and said they could only be described as ''pretty gross'' and ''not a happy sight to see.''

Leahy, handling the amendment for Moynihan, said the mollusks are rapidly clogging water intake pipes, irrigation pipes, utility intakes, fouling ship hulls and causing other problems.

''It multiplies very rapidly,'' Leahy said. ''It is the rabbit of mussels as to its proclivity to procreate. These little rascals are getting on everything.''

Moynihan, in a statement he submitted, quotes Soviet researchers who said

when the zebra mussels establish themselves in in a closed irrigation network they reduce flow through the pipes, resulting in inadequate watering of crops, a reduction in yield, and increased expenditure of electricity.

#90207u1754 07/26/1990 ~United Press International

SPRINGFIELD, Ill. (JULY 26) UPI - A western Indiana farmer and his son were indicted by a federal grand jury for allegedly defrauding the federal Agriculture Department's price support program, U.S. Attorney Bill Roberts said Thursday.

The indictments returned Wednesday in federal court in Springfield, Ill., accused Charles Doubet, 68, and his son Stephen, 36, of conspiracy and making false statements to the USDA to illegally earn an extra $13,491 in price support payments.

The grand jury also indicted a former employee of the Springfield USDA Agricultural Conservation and Stabilization Service office for allegedly falsifying computer records to help her farmer husband qualify for set-aside payments.

The Doubets, of Darlington, Ind. operate six farms, one in Galesburg, Ill. and the rest near Crawfordsville, Ind., said Tonia Milam, a special agent for the USDA.

Under the federal price support program, farmers are paid a yield-based price for every acre they remove from production. Participants in the program can receive a maxiumum payment of $50,000 a farm.

Roberts said the elder Doubet placed several properties in his son's name and the name of a former employee to illegally qualify for $63,491 in payments.

''(Doubet) owned about 85 percent of the land and the son had a marginal interest,'' Roberts said. ''On the documents they filed with the Department of Agriculture they each claimed 50 percent interest, thereby enabling them to avoid the $50,000 limitation.''

If convicted, the Doubets each face a maximum prison term of 10 years and $500,000 in fines.

In the Springfield case, 26-year-old Danita Suhling of Carlinville was accused of altering the ACSC office files to help her husband meet base yield requirements for the USDA set-aside program. Mr. Suhling received more than $2,600 in program payments.

''Mr. Suhling did not have that base yield, so what his wife did was go into the computer to initiate a base yield for her husband to put him in compliance by saying that he had been growing a particular type of crop for at least five years,'' Milam said.

Suhling left her job in December 1988. She could be fined $500,000 and imprisoned for up to 15 years if convicted.

Milam said the indictments are part of a federal effort to reduce agriculture commodity fraud in the Midwest. At least 16 such cases have been prosecuted in central and Southern Illinois in the last 3 1/2 years, she said.

''The farm fraud that we found in the Doubet's case is quite regular. It's the type of situation that we are trying to make some impact on,'' Milam said. ''The type of fraud that we found with Ms. Schuling was rather rare.''

#90207u1776 07/26/1990 ~United Press International

ATLANTA (JULY 26) UPI - The number of asthma cases and the death rate from the poorly understood breathing ailment rose about 30 percent in the

1980s, and perhaps in part because of increased air pollution, the government said Thursday.

The U.S. Centers for Disease Control, reporting on the asthma increase in its Morbidity and Mortality Weekly Report, could only speculate on the reasons, saying air quality, poor health care and exposure to viruses may be factors.

''Asthma is not to be taken lightly,'' said Dr. Jessie Wing, the CDC epidemiologist who authored the report. ''The best way to prevent it is to seek proper medical care after becoming aware of any symptoms.''

Asthma, whose symptoms are sometimes allergy-induced, results from constriction of the bronchial tubes as a result of inflammation.

The study said the death rate from the disease increased an estimated 31 percent between 1980 and 1987, the last year for which figures were available.

In 1980, 2,891 deaths - for a rate of 1.3 per 100,000 people - were attributed to the disease, compared to 4,360 deaths - or 1.7 per 100,000 people - in 1987, the report said.

During the same period, the prevalence of cases increased an estimated 29 percent, from 31.2 cases to 40.1 cases per 1,000 people.

About 9.6 million people suffered from the disease in 1987, the CDC said.

The annual death rate was consistently higher for blacks than for whites during the seven-year period, with cases rising among blacks 44 percent, compared to 36 percent among whites.

People over 65 and women, compared to younger people and men, suffered the highest death rates, the report said.

In March 1989, the federal National Heart, Lung and Blood Institute formed the National Asthma Education Program to develop a campaign to better inform health workers and patients about asthma.

The CDC report included a section of a preliminary report by the newly formed group.

''The findings in this report suggest that to reduce morbidity and preventable mortality associated with asthma, health-care personnel and public health officials must promote timely and aggressive medical treatment and physician-patient co-management. Public health officials should also address issues of smoking, air quality, access to regular health care and education in schools as these impact on asthma.''

KANSAS CITY, Kan. (JULY 26) UPI - The General Motors Corp. Fairfax assembly plant in Kansas City, Kan., will be closed next week to prepare for a model change, idling about 3,350 workers, a plant spokesman said Thursday.

The plant will re-open Aug. 6, when workers begin building the 1991 Pontiac Grand Prix, spokesman Candy Hargrove said. The Grand Prix is produced exclusively at Fairfax.

Workers will return to work gradually the week of Aug. 6, depending on which job they perform. The plant will be fully staffed the week of Aug. 13.

Fairfax was closed for six weeks last summer because a more extensive changeover was required. The plant was retooled to add production of the four-door Grand Prix introduced last fall.

The shutdown is the first at Fairfax since late April, when the plant was closed because of difficulty getting parts.

WASHINGTON (JULY 26) UPI - The Magellan space probe is operating smoothly two weeks before its long-awaited encounter with Venus, officials said Thursday.

The probe is scheduled to go into orbit around Venus on Aug. 10 and undergo 20 days of testing before beginning 243 days of work to map 70 percent to 90 percent of the cloudy planet's hidden surface on Sept. 1.

''The spacecraft is currently working fine. We've had a number of problems ... all of which have been resolved,'' said Anthony Spear of the Jet Propulsion Laboratory in Pasadena, Calif., which is controlling the probe.

''The bottom line is we are go for orbit insertion and the start of mapping,'' he said at a news briefing at NASA headquarters.

The probe will have to fire a rocket to slow down and get into orbit around Venus, Spear said.

''As luck would have it, the Earth-Venus-spacecraft geometry is such that the firing of the ... solid rocket motor will occur behind the planet, with the spacecraft out of touch with Earth,'' he said.

The spacecraft was launched May 4, 1989, by the space shuttle Atlantis to journey to Venus, Earth's closest planetary neighbor.

The goal of the $550 million project is to learn more about the origin and evolution of Venus, in part in the hope of learning more about Earth by determining what turned a near twin of Earth into a hellish inferno.

Venus may have been the victim of conditions similar to the ''greenhouse effect'' that many scientists believe has begun increasing Earth's temperature.

''One of the basic questions is, we have a planet - Venus - almost the same size as Earth, the same composition as Earth, presumably releasing very nearly the same amount of radioactive heat on the interior as Earth does. How does it get rid of that heat?'' said Gordon Pettengill, scientist from Massachusetts Institute of Technology in Cambridge, Mass., involved in the project.

Constructed by Martin Marietta Astronautics Co. of Denver from space parts left over from other planetary exploration projects, the probe is named after the 16th century Portuguese explorer.

Radar data beamed back to the Jet Propulsion Laboratory with Magellan's 12-foot dish antenna will be processed by computers to create images of Venus 10 times better than any previous images.

The craft's high-resolution radar capable of distinguishing objects as small as a football field.

Magellan project scientist R. Stephen Saunders cautioned that while the images will be exciting to scientists but the initial encounter will not be as dramatic as those of previous space probes.

''It's exciting to those of us who have been following this thing for so many years, but it's not the kind of thing that will produce pictures right away,'' he said.

#90207u1840 07/26/1990 ~United Press International
BALTIMORE (JULY 26) UPI - The former president of American Therapeutics Inc. was sentenced Thursday to two years in prison and fined $50,000 for bribing Food and Drug Administration officials to speed marketing approval of generic drugs.

U.S. District Judge John Hargrove ordered the sentence for Raju Vegesna, founder of American Therapeutics Inc. of Bohemia, N.Y., who pleaded guilty in January to two racketeering counts in a plea agreement.

''Your conduct is more reprehensible than that of the others in this case by a wide margin,'' said Hargrove. ''I cannot excuse you because of your (Indian) culture when you knew you were breaking the law.''

Federal prosecutors had asked for a four-year prison term and a $500,000 fine for the crimes, telling Hargrove that Vegesna broke federal law a dozen times - in some instances even after he knew he was being investigated.

His lawyer, Nathan Lewin, appealed to Hargrove for leniency and asked that Vegesna receive no more than 10 months of house arrest. Vegesna, his lawyer said, is an Indian immigrant who has become ''an outcast'' in his community because of the convictions.

Vegesna is one of 13 pharmaceutical company and FDA officials convicted in the 1988 scheme that revealed company payoffs for quick government action on generic drugs applications.

Assistant U.S. Attorney Gary Jordan called Vegesna's case ''the most egregious.''

Jordan alleged that Vegesna made unlawful payments of more than $60,000 to four employees of FDA's Generic Drug Division - Charles Chang, David Brancato, Jan Sturm and Walter Kletch.

Prosecutors also contend that Vegesna tried to thwart a congressional investigation, skimmed hundreds of thousands of dollars in consulting fees from his company and destroyed documents ''to eliminate a paper trail.''

A sentencing memorandum submitted earlier by prosecutors describes American Therapeutics drug applications that ''breezed'' through FDA's approval process, including:

-Maxide, or triamterene-hydrochlorothiazide, was the last of seven applications submitted to FDA for the product, yet it was approved first. It was approved in 182 days while Brancato, the review chemist, took 276 days to review the application that received approval second.

-Chlorazepate dispotassium was submitted 19 days after FDA received the first application for the product, yet American Therapeutics' application was the first approved - 158 days before the first application was approved.

-Trazodene hydrochloride, was submitted 10 months after the first application for the product was filed with the FDA, but was approved 19 days after the first applicant.

Prosecutors said Vegesna's financial statement shows he has hundreds of thousands of dollars and lives in an elegant home on New York's Long Island.

So far, four former generic drug executives, not counting Vegesna, four former FDA officials, one consultant and three companies have been convicted and sentenced. Another former FDA official has been indicted and is awaiting a September trial.

CALGARY (JULY 26) UPI - Alberta and Southern Gas Co. Ltd. expects regulatory approval within days on a revised pricing proposal it reached with western Canadian producers to ship natural gas to California, a spokesman said Thursday.

A&S said it will ask the Alberta Petroleum Marketing Commission for a formal finding of producer support for the deal which covers sales of more than one billion cubic feet of natural gas shipped each day to Pacific Gas & Electric Co. of San Franciso, A&S' parent company.

A&S' pool of some 190 producers approved a new two-tiered pricing proposal in a vote Wednesday, the company said.

Mike Edwards, A&S manager of regulatory affairs, said the company expects to get formal approval for the deal from the Commission within days.

The deal, if approved, would end a dispute with Alberta energy minister Rick Orman, who earlier threatened to impose fines of up to $850,000 a day on gas sales to California if A&S failed to negotiate a new contract with its 190 producers by July 31.

The existing contract between A&S and the producers expired June 30, but was extended one month to allow time to revise its price offer.

An earlier A&S offer which would have reduced revenues for Alberta's gas producers was rejected. The company said the lower offer was a response to pressure from the California Public Utilities Commission to lower consumer costs.

Under the revised one-year deal, effective from August 1 to July 31, 1991, a two-tier pricing structure will be used.

The Tier I price will remain unchanged at $1.90 per million British thermal units (MMBtu) and will be applied to all winter volumes from December to February.

The Tier I price will also be applied to the first 700 million cubic feet (MMcf) a day of sales during the other nine months while the Tier II price at $1.60 per MMBtu, will only be applied to the next 200 MMcf a day of sales in March and November and 350 MMcf a day from April to October.

Any additional volumes would again receive the Tier I price.

The two tiered structure, used as recently as 1987, is expected to result in a weighted average price of about $1.84 per MMBtu over the one-year term.

#90207u1872 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - Women and children increasingly will fall victim to AIDS, with the deadly disease killing about 3 million women and children worldwide in the 1990s, the World Health Organization reported Thursday.

AIDS also will create ''several million'' orphans worldwide, cut the overall life expectancy of children born in some parts of the world by about six years and boost the childhood death rate 30 percent in the 1990s.

''The social, economic and demographic impacts on women and children have until now been largely neglected. Only recently has the growing magnitude of HIV infection to women and children been recognized outside a few geographic areas,'' wrote James Chin of the agency's Global Program on AIDS in the British medical journal The Lancet.

''Whatever the actual numbers are, the HIV infection/AIDS problem in women and children will doubtless become one of the major challenges to public health, health care, and social support systems worldwide,'' he said.

HIV, which stands for human immunodeficiency virus, is the infectious agent that causes acquired immune deficiency syndrome, which destroys the body's ability to fight off infections.

During the 1980s, most AIDS cases have occurred among men, Chin said, and there were only about 500,000 cases of AIDS among women and children worldwide.

But the spread of the deadly virus already has begun to shift, increasingly infecting women and children born to infected women, he said.

In some areas, such as most central African cities and other cities where AIDS is more common, including New York City, AIDS has already become the leading cause of death for women 20 to 40, who normally have a very low death rate, he said.

The new projections, which are ''very conservative,'' are based on previous estimates of the infection rate and spread of the virus and estimates of how long it takes for infected people to develop the disease.

By the end of the 1980s, the agency estimated that 8 million to 10 million

people worldwide were infected with the AIDS virus.

Based on that estimate, the agency calculated that by early 1990, more than 3 million women, most of whom are of childbearing age, were infected with the AIDS virus. About 80 percent of them live in sub-Saharan Africa.

By the end of 1992, about 4 million infants will have been born to HIV-infected women and nearly 1 million are expected to be infected with the virus, Chin said.

''A 10 percent increase in these numbers gives an approximate global estimate of HIV-infected infants,'' he said.

By the end of 1992, Chin estimated there will be more than 600,000 cases of AIDS in women and more than 600,000 cases of AIDS in children in Africa. He said nearly 300,000 AIDS cases among these groups are expected in 1992 alone in Africa.

Chin said AIDS cases worldwide among women and children will total approximately the number in Africa plus 10 percent.

''As for most AIDS patients in Africa, the diagnosis of the disease in women and children in this continent will be followed by death within a year,'' he said.

Because the disease is expected to significantly increase the death rate among women and children during the 1990s, he said ''several million uninfected children will be orphaned because a large proportion of HIV-infected mothers will die of AIDS'' in Africa.

''As with HIV infections and AIDS cases, the global total of uninfected orphans can be estimated by an increase in the projected number in Africa by at least 10 percent,'' Chin said.

#90207u1879 07/26/1990 ~United Press International

NEW YORK (JULY 26) UPI - Federal prosecutors said Thursday they have closed a more than eight-month long investigation into Mayor David Dinkins' sale of cable stock to his son and will not file criminal charges.

In a brief statement, U.S. Attorney Andrew Maloney said the investigation ''has been completed without the filing of criminal charges.''

The results of the investigation were being forwarded to Elkan Abramowitz, a special counsel appointed by the city Department of Investigation to conduct a separate probe into whether Dinkins violated city ethics rules in the stock sale.

Dinkins, who was hounded by allegations about the sale during the mayoral campaign last fall, responded with his own brief statement saying that Maloney's ''conclusion speaks for itself.''

The mayor said he looked forward to a ''speedy resolution'' of the city inquiry. He said he would not comment further until it, too, was completed.

Allegations about the legality of the 1985 sale first exploded during the heat of the mayoral contest last fall against Republican Rudolph Giuliani.

Raised repeatedly by Giuliani in the waning days of the contest, the charges were extremely damaging and were widely seen as being a major factor contributing to the narrowness of Dinkins' victory.

Questions centered on whether Dinkins gave the 588 shares of Inner City Broadcasting Corp. stock to his son, David Jr., through a genuine transaction, how much it was actually worth and whether taxes were fully paid on the deal.

Pressed for documentation of the sale, Dinkins released a handwritten ''Dear Dad'' letter from his son dated in 1985 acknowledging the transaction.

It was widely derided in the press and Giuliani, a former federal prosecutor, claimed it was a fake. But Maloney's office earlier this year said tests to determine the letter's authenticity were inconclusive and could not support Giuliani's charge.

As for the stock's value, Dinkins has maintained he did nothing wrong in transferring ownership of the shares for $58,000 to his son payable by Jan. 1, 1991, even though two years before he had listed the stock's worth as being over $1 million.

Dinkins said the larger figure only represented the stock value if Inner City, a privately held black broadcasting company, was broken up and sold.

#90207u1909 07/26/1990 ~United Press International

DEARBORN, Mich (JULY 26) UPI - Ford Motor Co. said Thursday it has been demonstrating to United Auto Workers bargainers its vehicles in company test track comparisons with other brands, in efforts to convince union officials that high quality translates into job security.

Jack Hall, executive director for labor relations at Ford, said more than two dozen vehicles were driven, including ''transplants,'' or models built in North America by Japanese-owned carmakers.

Ealier this week, UAW bargainers involved in negotiations with General Motors Corp. reviewed current and future products made by that carmaker, but no formal driving comparisons were done.

''The next contract will most probably extend into 1993, so we are showing them what there is out there,'' GM spokesman John Maciarz said.

The UAW, which last week opened talks with Ford, GM and Chrysler Corp., has earmarked job security as its top priority in reaching new agreements to replace existing three-year contracts that expire Sept. 14.

About half a million U.S. auto workers are covered by those pacts.

''Our research shows that quality is the No. 1 factor in buying a new car or truck,'' Hall said, adding the No. 2 automaker was committed to a ''a fairly aggressive'' capital spending program on new products.

Ford's spending during the quarter ended June 30 increased to $1.7 billion up $83 million from the same period one year ago.

Ford reported Thursday a 45 percent plunge in its second quarter profits to $771 million, with company treasurer David N. McCammon saying there was only a 50-50 chance the automaker will be able to pay eligible workers profit sharing this year, depending on its financial performance during the rest of 1990.

Ford paid eligible workers an average $1,025 based on its 1989 U.S. automotive earnings, down from a typical payout of $2,800 the year before.

Ford executives downplayed speculation that the prospect of little or no

profit sharing checks would affect the tenor of this year's labor talks, which Hall characterized as so far being ''serious and cordial.''

''We hope this will help people see how competitive the situation is,'' McCammon said, adding he expects the U.S. vehicle industry as a whole will undergo only a modest strengthening during the second half of 1990.

#90207u1925 07/26/1990 ~United Press International

NEW YORK (JULY 26) UPI - Stock prices closed lower Thursday in moderate trading on the New York Stock Exchange as a late round of selective futures-related selling and a sell off in tobacco stocks hammered prices.

News that the New Jersey Supreme Court handed cigarette manufacturers a major defeat, ruling that smokers or their survivors can seek damages for injury or death caused by failure to warn of health risks, sent major tobacco stocks broadly lower at the close.

The blue-chip Dow Jones industrial average, which added 8.42 points Wednesday, fell 10.15 points to 2,920.79.

Among broader market gauges, the New York Stock Exchange composite index fell 0.55 to 194.55 and Standard & Poor's 500-stock index lost 1.18 to 355.91. The price of an average NYSE share lost ten cents.

Declines outpaced advances 771-698 among the 1,984 issues crossing the NYSE tape. Big Board volume totaled 155,040,000 shares, compared with 163,530,000 shares traded Wednesday.

Analysts noting there were 515 issues that remained unchanged, said it was an indication of some indecisiveness by large institutional investors ahead of Friday's U.S. second-quarter gross national product report.

Traders said the Commerce Department's first estimate of the quarterly data may provide further impetus for interest rates cuts, a key factor on most investors' minds.

"It has certainly been a lot less volatile market today than in any day this week," said Trude Latimer, market analyst with Josephthal & Co. in New York. "The market was more one of individual moves, rather than group moves," she added. "Microsoft made a statement that their profit margins will be squeezed by plant expansion and higher marketing costs as well as the need for additional personnel, while Pepsi-Cola announced a three-for-one split."

Latimer said it will likely be a while before the market returns to its flirtation with the psychologically important 3,000 mark. "We have to get some stability back for the Dow to climb near the 3,000," she said. "We need a market with a narrow range for a few days."

Trading remained sluggish, continuing a pattern of gradually slowing activity that has been in place since the market tumbled 56.44 points on Monday, market watchers noted.

However, analysts said the decline in the Dow was due more to a lack of buying as the market tried to find a range in which to stabilize rather than to aggressive selling. Some program selling, used to profit on price spreads between stocks and stock-index futures, also contributed to the decline, analysts said.

On the earnings front, General Motors and Ford both posted sharp declines in second-quarter profits, blaming chronically high marketing and product costs in the United States, lower vehicle sales worldwide and economic reform actions in Brazil, a key overseas market.

GM, the nation's largest automaker, said second-quarter earnings fell to $1.32 a share from $2.23 a share last year. Market forecasters were expecting the carmaker to report earnings around $1.42 a share for the quarter.

Second-ranked Ford posted a 45.2 percent plunge in second-quarter profits, with net income totaling $770.7 million, or $1.67 a share, down from $1.4 billion, or $3 a share, in the year-ago quarter. GM fell 3/8 to 47 1/4 and Ford lost 3/8 to 41 7/8 on the news.

Elsewhere on the earnings front, Boeing Co. climbed 7/8 to 59 1/8 after reporting its second quarter results climbed sharply.

On the trading floor, Philip Morris, a major Dow component, was the most active issue, plunging 1 3/4 to 47 1/4 on the New Jersey court ruling. Among some of the other tobacco stocks, American Brands tumbled 3 5/8 to

66 1/4 and Loews, the owner of Lorillard, fell 2 1/8 to 105 5/8.

Panhandle Eastern was the second most active issue, unchanged at 17 7/8. Compaq Computer was third, falling 1 1/2 to 57 7/8. Analysts noted that although the company reported a 24-percent rise in second-quarter net earnings, revenue appeared to fall short of expectations.

Among the blue chips, AT&T lost 1/4 to 37 1/8, IBM eased 1 3/4 to 113, General Electric lost 1/4 to 73 1/8, and American Express lost 1/8 to 30.

Prices closed lower in moderate trading on the American Stock Exchange. The Amex Market Value index, which gained 1.44 Wednesday, fell 0.62 points to 356.33. Declines edged out advances 286-279 among the 785 issues traded. The price of an average share eased two cents. Volume totaled 13,100,000 shares, compared with 11,200,000 shares traded Wednesday. Nichols Institute led the Amex issues, adding 5/8 to 17 1/4.

The National Association of Securities Dealers composite index slipped 0.02 to 445.43.

WASHINGTON (JULY 26) UPI - Supreme Court nominee David Souter does not recall a letter he wrote in 1981 opposing legislation in New Hampshire that would have required minors to get permission for an abortion from their parents or a judge, Sen. Arlen Specter, R-Pa., said Thursday.

Specter said Souter told him during a brief meeting that he did not remember the letter, which was obtained by The Washington Post.

A leading abortion rights advocate in New Hampshire, who solicited the letter, said the correspondence has been critical in preventing passage of parental consent legislation in the state for the last nine years.

Souter wrote the letter while he was a Superior Court judge in New Hampshire. He warned that judges would have no legal guidance, only their own values and opinions to guide them when minors sought permission for an abortion without their parents' knowledge.

During a private meeting, Specter, a member of the Senate Judiciary Committee that must consider the nomination, said he and Souter ''talked about the letter a fair amount'' and that Souter was unaware it had appeared in the newspaper.

''He hadn't read the Post and he didn't recall it,'' Specter said.

When asked by reporters if his letter meant he supported the right to

abortion, Souter replied: ''I think you should save any issue of that sort for confirmation hearings, where I'm sure that issue will be addressed.''

Senate Judiciary Committee Chairman Joseph Biden, D-Del., has not set a date for the start of confirmation hearings, but it is likely they will be held in September so that Souter could be confirmed before the Supreme Court session opens on the first Monday in October.

Sen. Strom Thurmond, R-S.C., another member of the Judiciary Committee, met briefly with Bush at the White House to discuss the nomination. White House press secretary Marlin Fitzwater said Thurmond predicted Souter will do ''just fine'' and told Bush no one on the committee had indicated any intent to oppose the nomination.

''He made a very good impression on me but I have a lot more questions to ask him,'' Specter said. He said his next line of questioning would involve Souter's views on Supreme Court precedent and whether he would abide by them.

''I believe ... he has a first rate legal mind,'' Specter said. ''He's a very scholarly man. He knows the cases, he knows the law.''

Souter's views on abortion are critical as abortion advocates fear he may vote with the conservative majority to overturn Roe vs. Wade, which legalized abortion.

Justice William Brennan, a liberal on the court who resigned last week, was a solid believer in a woman's right to an abortion.

The letter he wrote as a state judge is one of the few places Souter has discussed the issue in public.

The letter, while neutral on the issue of parental consent, asked that the parental consent bill, which would have allowed minors to turn to the courts to avoid getting permission from their parents, not be approved.

Souter argued that judges would be put into a difficult position because they would have no law to guide them in making decisions.

Souter said the legislation would ''leave it to individual justices of this court to make fundamental moral decisions about the interests of other people without any standards to guide the individual judge'' and based on ''only the individual judge's principles and predilections.''

Souter met with individual members of the Senate Judiciary Committee for a second day Thursday and appeared before television crews and newspaper photographers who crammed into the lawmakers' offices.

''I haven't had this many photographers since Judge (Robert) Bork was here '' Specter said, referring to the failed nominee.

''Can't you find another precedent?'' Souter quipped.

Earlier in the day, Thurmond handed Souter a miniature copy of the Constitution to which Souter replied, ''This will not be my first reading but I'm grateful.''

#90207u1949 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - A standoff over technical arrangements for bringing food to as many as 1 million people in Ethiopia continued to block the supplies Thursday.

The misunderstanding between U.N. officials and leaders of the Eritrean Peoples Liberation Front means that an international effort - including a joint operation by the United States and the Soviet Union - has not been able to bring the desperately needed food supplies to refugee centers in the northern part of Ethiopia.

The State Department called the EPLF action ''as reckless as it is inexplicable,'' and noted that half the 1 million people facing starvation are Eritreans, who take the side of the EPLF in the long war against the Marxist government of Ethiopia.

The EPLF, according to the State Department, refuses to allow a U.N. team to enter the port of Massawa, which would be the main path for the food supplies. Port facilities were heavily damaged in the battle for the harbor.

But the EPLF, in a statement issued in Ethiopia and in Washington, said it would permit the U.N. assessment team to enter the port, but the U.N. group must be brought in by a boat supplied by the rebel group. The U.N. team wants to bring in its own vessel.

State Department spokesman Richard Boucher, told about the EPLF statement, said that the State Department continues to believe that the rebels are refusing permission for the U.N. team to enter, and he suggested that the EPLF set of conditions is merely a pretext for keeping the international famine relief effort out of the country.

Anthony Williams of Africare, a non-governmental agency involved in the relief effort, said, ''The whole thing is very stupid, but the EPLF suspects that the Ethiopian government will try to infiltrate into their areas, using the food convoys as a cover.''

No government recognizes the EPLF, although it has a representative in Washington who has been in frequent contact with the State Department. The rebels get most of their weapons by capturing them from the Ethiopian army but some Arab nations, led by Saudi Arabia, are believed to supply the EPLF with money and supplies.

However, according to the State Department, ''We have no indication that any country has the ability to force the EPLF to take a given position.''

The standoff has also blocked the departure of about 12,000 Ethiopian Jews who are waiting to emigrate to Israel. The State Department said, ''We are concerned about the status of these people and hope their departure can be accelerated.''

#90207u1953 07/26/1990 ~United Press International

TORONTO (JULY 26) UPI - The head of the Canadian Auto Workers said Thursday the union would strike Chrysler Canada Ltd. if the auto maker tried to opt out of the pattern negotiating process.

Chrysler Corp., the U.S. parent company of Chrysler Canada, told the United Auto Workers last week that it wants to be chosen as the target company to set the pattern for settlements because it has the highest labor costs. If not chosen, Chrysler said it wants to be exempted from pattern bargaining.

Auto workers usually target one of the Big 3 car makers to negotiate a deal that then is used for reaching agreements with the other companies.

Bob White, CAW president, said Chrysler Corp.'s concerns over labor costs in the United States don't apply in Canada.

White said the labor cost difference between Chrysler, Ford Motor Co. of Canada Ltd. and General Motors of Canada Ltd. was a matter of ''cents'' and that ''we will strike Chrysler if the pattern is not accepted.''

Chrysler will have the right to discuss what's in the pattern but the response to any changes will be ''No'', White added.

Ken Francese, Chrysler's vice president of human resources, said while the company was not going in with a set stance against the pattern, ''we are certainly not going to commit to (agreeing to it).''

Francese said Chrysler would like to be the target company, in hopes of setting the negotiating table's agenda.

''This is a very critical time for the motor vehicle industry, and

Chrysler in particular, and the future competitiveness of our company is one the line,'' Francese said.

Chrysler employs 11,300 workers at its Canadian operations in Windsor, Brampton, Bramalea, Etobicoke and Ajax, Ontario.

The company assembles its Caravan, Voyager and Ram minivans and a full-size van in Windsor. The Eagle Premier and Dodge Monaco are assembled in Bramalea and the Waranger YJ Jeeps are assembled in Brampton.

Chrysler Corp. Wednesday announced plans to close its Brampton Jeep plant and transfer production to its Toledo, Ohio facility. Also, the auto maker said it would start production of its new L/H car in Bramalea in the fall of 1992.

The fate of the Eagle and Dodge models has not yet been decided, a Chrysler spokesman said.

Talks also started this week between the CAW and reprentatives from Ford and General Motors. The collective agreements expire Sept. 14.

The CAW is looking for annual percentage wage increases in each year of a three-year deal plus improved cost-of-living allowances and better benefits including family leave and legal services.

Contract talks which began last week in the United States between the UAW and the Big 3 auto makers. The UAW, which has made job security its top priority, represents about half a million U.S. autoworkers.

WASHINGTON (JULY 26) UPI - The Conservative Campaign Fund complained Thursday to the Federal Election Commission that Sen. Jesse Helms, R-N.C., has been the subject of an illegal attack by a homosexual group called The Oral Majority.

The campaign fund's Re-Elect Jesse Helms committee filed the FEC complaint following The Oral Majority's announcement of a boycott of products whose makers have contributed to Helms' campaign or to a library that will bear his name at Wingate College in North Carolina.

''Not only does this boycott appear illegal, I don't see the political sense to it,'' said Peter Flaherty, chairman of the Conservative Campaign Fund.

Helms' Democratic challenger ''Harvey Gantt cannot possibly benefit by an effort to hurt North Carolina's economy,'' Flaherty said.

Gantt has said he does not favor any boycott that targets North Carolina products.

The complaint was based primarily on the statements by Oral Majority director Robert Kunst, of Miami, that the purpose of the boycott is to defeat Helms.

It cited remarks made to United Press International and to conservative

talk show host Cliff Kincaid and broadcast on WNTR-AM in Washington, KNTL-FM in Oklahoma City, and WCNT-AM in Charlotte, N.C.

The primary target of the boycott to date has been Philip Morris USA and its products, including Marlboro cigarettes and Miller beer. Earlier this week, 23 bars in Dallas that cater to homosexuals announced they will no longer stock Miller.

While economic boycotts generally are legal, they become illegal when used to influence a federal election unless they are sponsored by a registered political action committee.

The Conservative Campaign Fund complaint alleges The Oral Majority has not registered as a political action committee and may be illegally using money from Cure AIDS Now, of which Kunst is also director, to bankroll the attacks on Helms. Kunst said none of that is true.

''Cure AIDS Now is not involved with the issue, so the complaint is not justified,'' Kunst said. ''And besides that, I am a majority of one at The Oral Majority and I have not even spent $1,000 to get the word out, so I don't even have to file with the FEC.''

In the Kincaid interview, Kunst said Helms is a menace to society.

''We think he is very dangerous. He is willing to deal with all kind of craziness that is absolutely helping to create a worldwide disaster from AIDS,'' Kunst said. ''I think the innocent people in the state need to wake up and throw the bum out.''

Flaherty acknowledged Kunst has a right to his opinions, so long as he obeys campaign financing laws.

''This boycott is sponsored by extremists,'' Flaherty said. ''Even though they have a right to express this nonsense, they must also obey campaign finance law.''

WASHINGTON (JULY 26) UPI - The State Department issued a warning to U.S. citizens Thursday to avoid travel to parts of India, including Kashmir, because of political unrest and danger of violence.

The travel advisory issued by the bureau of Consular Affairs recommended avoiding travel to the states of Jammu and Kashmir until further notice. Because of threats against Indian Airlines by militant groups, U.S. citizens were advised not to take any flights going to or from Srinagar.

American citizens were also told that they should exercise special caution

in traveling to the state of Punjab because of sporadic incidents of political and criminal violence.

The advisory also told travelers to exercise caution when near the India-Pakistan border because of continuing tensions.

#90207u1992 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The Securities Industry Association said Thursday it had resolved some questions about the Investment Advisers Disclosure and Enforcement Act but congressional staffers said the two sides were deadlocked. The staffers said the deadlock remained over the bill's financial disclosure requirements.

SIA, an industry trade association, has raised four issues in discussing the legislation with staffers reporting to Rep. Rick Boucher, D-Va., who proposed the legislation.

The bill, which would increase regulation of the financial planning and advisory industries, is currently before the House Subcommittee on Telecommunications and Finance, and Boucher's staff would like the bill to reflect valid industry concerns before it moves on to the House Committee on Energy and Commerce.

Art Samansky, an SIA spokesman, said in an interview that "there has been a general agreement on several issues with an ad hoc SIA working group and members of Congressman Boucher's staff."

But Boucher's staff said that any agreement would depend on resolving questions regarding financial disclosure. "I don't think anyone is ready to sign off on the first three until we have the fourth one (settled)," said Larry Clinton, a Boucher staffer.

The bill would require financial advisers and planners to register with the Securities and Exchange Commission and give accurate written information to customers about any commission the financial adviser might receive by selling the customer a financial product. While the SIA reportedly disagrees with the disclosure provisions, the association declined comment on the issue.

Boucher's staff had expected the SIA to deliver this week a new proposal on financial disclosure, but Simanksy said his organization has not made any new proposals in the last few days.

On other issues, however, the talks have yielded better results. For example, Boucher's staff has tentatively agreed to base a private right of action clause in the bill on federal rather than state models, which would give advisers more legal defenses if charged with fraud.

Boucher's staff reports it has also developed a proposal that could allay SIA concerns about arbitration language contained in the bill and has changed the bill's language to ensure that it incorporates exactly the SEC interpretation on exemptions for broker dealers.

#90207u1999 07/26/1990 ~United Press International

NEW YORK (JULY 26) UPI - The dollar slipped against the European currencies Thursday in choppy New York trading ahead of the release of U.S. gross national product figures for the second quarter, but gained on the Japanese yen.

Currency traders said technical factors outweighed the GNP as a consideration in trading, although participants were squaring off their dollar positions in advance of morning release of the key indicator. "People are a little wary ahead of the GNP, but for the most part I think it was technical," said Bank of Tokyo senior dealer John Lyman.

Market play revolved around sales of the Japanese yen for the German mark. "I think what we're seeing is a long move up" by the mark against the yen, said Midland Bank treasury officer Donald Hubbard.

Heavy mark-yen traffic buffeted the dollar, he said, moving it up against the yen but down against mainly mark-linked Europeans.

In late New York dealings the dollar changed hands at 1.6225 marks, off

from 1.6245 Wednesday, and at 150.35 yen, up from 149.80.

Lyman said "a lot of things seem to be ganging up on the yen," noting Japan's heavy reliance on Mideast oil amid a Gulf crisis, the Bank of Japan's failure to follow through on an expected interest-rate hike, and the beginnings of yet another scandal in Tokyo's financial markets.

Market sentiment, meanwhile, is that U.S. interest rates will hold at present levels, at least through the end of the summer.

But, Lyman noted, "the backing and filling we've seen from (Federal Reserve Chairman Alan) Greenspan makes people very wary of taking too large a position one way or another." In recent Congressional testimony, Greenspan gave rather mixed signals as to the Fed's credit stance.

Other New York dollar rates: 1.3775 Swiss francs, down from 1.3795; 5.4350 French francs, off from 5.4450; and 1,188 Italian lire, down from 1,189. The British pound inched up to $1.8140 from $1.8110.

In Europe, the dollar moved lower against most European currencies in quiet trading ahead of the U.S. GNP data, analysts said.

Bluford Putnam of Kleinwort Benson said the most important component of the GNP report would be its deflator, an inflation measure. "If that is above five percent then it may weaken the dollar Friday," he said.

Others said the dollar benefited from Japanese yen troubles. Uncertainty about Japanese interest-rate policy and reports of a scandal over alleged tax evasion by Japanese brokerage firms weakened the unit.

In Frankfurt, the dollar closed slightly higher at 1.6235 marks against 1.6225 Wednesday. But it was down in Zurich at 1.3740 Swiss francs compared to 1.3795.

In London, the pound gained on the dollar as fears Britain may not join the European exchange rate mechanism were dismissed. The pound closed at $1.8115, up from $1.8095 at the previous close.

The U.S. unit fell in Paris, Milan and Brussels, at 5.4405 French francs against 5.4450, 1,188.50 lire compared with 1,188.75 and 33.35 Belgian francs against 33.43 at Wednesday's close.

Earlier in Tokyo, expectations of stable U.S. interest rates and a plunge on the Tokyo stock market pushed the dollar to a two-week high. It finished at 150.11 yen, up nearly 1 yen from 149.13.

In Zurich, gold closed lower at $368.50 an ounce against $372.50, and also was down in London at $368.50 an ounce against $372.50.

Analysts said gold prices stabilized after the recent boost they got from the uneasy situation in the Persian Gulf region.

Republic National Bank in New York closed cash gold at $369 an ounce, off from $371.50 Wednesday. The New York Commodity Exchange settled gold at $369.30 an ounce, off from $372.

Silver was unchanged in Zurich at $4.85 an ounce. It fell in London to $4.86 an ounce compared with $4.87.

Republic closed cash silver at $4.86 an ounce, up from $4.835. Comex silver moved up to $4.85 an ounce from $4.828.

NEW YORK (JULY 26) UPI - NFL Commissioner Paul Tagliabue said Thursday it is ''realistic'' for the league to add two teams by 1993.

''I restated my personal belief that a two-team expansion in 1993 is a realistic objective for the league to pursue and the committee members shared that belief,'' Tagliabue said in a statement. ''With that goal in mind, we realize there is a great amount of work to be done in the months ahead.''

The commissioner's comments accompanied the release of a report by the NFL Realignment and Expansion Committee, a group chaired by Tagliabue.

''We had a preliminary discussion of expansion and realignment, primarily focusing on the latter,'' Tagliabue said.

Two expansion teams would bring the NFL to 30 clubs, the most of any professional sports league in the United States. The NFL last expanded in 1976, when Tampa Bay and Seattle began play.

A decision on further expansion will be made in 1991 or early 1992. St. Louis; Baltimore; Jacksonville, Fla.; Memphis, Tenn., and the Carolinas are leading candidates for teams.

In evaluating candidates, the committee said it will focus solely on a

city's ability to support an NFL team and not on potential ownership. The owners of the new teams will not be determined until after the cities have been chosen.

The owners on the expansion committee are: Tom Benson (New Orleans), Norman Braman (Philadelphia), Hugh Culverhouse (Tampa Bay), Ed DeBartolo, Jr. (San Francisco), Art Modell (Cleveland), Dan Rooney (Pittsburgh) and Jim Finks (New Orleans).

(JULY 26) UPI - The House voted 408-18 today to formally reprimand Massachusetts Democrat Barney Frank for his dealings with a male prostitute. Lawmakers rejected appeals by conservative Republicans to expel or censure Frank, who apologized.

An E-P-A memo released today says deregulation of disposal of some low-level nuclear waste is unsafe. The memo says the Nuclear Regulatory Commission's plan would allow unacceptably high radiation exposures and won't protect the public's health.

Progress is reported today at an OPEC conference in Geneva to prevent oil quota cheating by setting a higher production ceiling. Analysts say Iraq is getting support in its accusations that Kuwait and the United Arab Emirates are dumping crude on world markets.

The American Red Cross sent the government a 60-page letter outlining how it'll improve its blood monitoring process. A government report found Red Cross blood banks were lax in tracking transfusion-associated AIDS and other diseases.

President Bush today held a third straight meeting with budget negotiators seeking to slash the nation's deficit. But Bush's attempt to act as a catalyst in the talks appears to be failing... with the two sides still far apart.

62 senators from both parties have written President Bush urging him to take tougher action to prevent the Khmer Rouge from returning to power in Cambodia. The letter was released today as Secretary of State Baker went to Indonesia to address the issue.

A judge in Tampa, Florida, today dismissed a juror who telephoned alleged Colombian drug smugglers during deliberations in the trial of Manuel Noriega's personal banker. The juror reportedly got the number from an address book seized from a defendant.

A high-ranking British official visiting China says he's forged a ''constructive atmosphere'' for resolving lingering Sino-European differences. The Foreign Office state affairs minister says he'll now urge the easing of some economic sanctions against China.

Poland's interior minister says the Soviet Union still has K-G-B agents stationed in Poland. The minister made his comments in the nation's Solidarity labor movement newspaper, which adds that K-G-B activity has been curtailed by the Solidarity government.

Hurricane forecasters said today the Caribbean island of Hispaniola will likely have a narrow miss with Tropical Storm Arthur. The storm weakened overnight and was expected to pass the island and head for Jamaica and Cuba.

In Iowa, flood waters are surging toward record levels, closing highways and soaking farms. Rivers are also overflowing in Nebraska... and up to seven inches of rain dropped in on Savannah, Georgia.

#90207u2091 07/26/1990 ~United Press International
WASHINGTON (JULY 26) UPI - Democratic leader George Mitchell of Maine rejected the latest Republican proposal for a bipartisan campaign finance reform bill Thursday and said the Senate will fight it out before starting its August vacation.

In back-to-back news conferences, Mitchell and Senate GOP leader Robert Dole of Kansas said the dialogue would continue but months of negotiations have failed to produce an agreement.

The latest offer from Dole, made despite the hesistancy of some Republicans, would ban all contributions from political action committees, put a limit on the use of personal funds, and ban out-of-state contributions of more than $250 from any person.

Dole said the offer was a ''good, solid proposal,'' adding, ''We've taken a giant step toward campaign reform.''

But Mitchell, turning down the proposal, said the ''principle element'' of reform is limits on campaign spending and said the GOP proposal exempts all money raised in the state and all contributions from out of the state of less than $250.

''It is, in fact, no limit at all,'' Mitchell said.

#90207u2109 07/26/1990 ~United Press International
FRESNO (JULY 26) UPI - Because of the skyrocketing costs of toxic waste cleanups, bankers and lenders may soon require they be allowed to enter a farmer's property to make sure he is obeying environmental laws, speakers at a University of California symposium on agricultural lending said Thursday.

Richard Hart, an attorney for the San Francisco-based law firm of Frandzel & Share and an expert on toxics liability, said recent federal court decisions extending liability to lenders could mean banks may have to ''monitor compliance of their borrower with environmental laws.''

He said that may mean banks have to structure loan arrangements giving them the right to enter a farmer's land to see he is properly handling and disposing of pesticides or other farm chemicals.

Hart told more than 50 representatives of California banks and lending institutions attending the seminar that current federal environmental law

usually exempts lenders from liability unless they fail to make ''appropriate inquiry'' about any toxics problems at a site they are finanically involved in.

But he said a May 1990 federal court decision in the 11th Appellate District weakened that exemption and, if upheld, could create new risks for lenders.

That case, known as United States versus Fleet Factors Corp., upheld a lower court ruling that a bank involved in the financing of a bankrupt textile printing plant which created a toxic mess could be held liable it if was determined at trial the bank was sufficiently involved in the plant's operation to make the bank an ''operator'' of the facility under the federal Superfund law known as CERCLA (Comprehensive Environmental Response, Compensation and Liability Act).

Because California farmers can create toxic waste cleanup liability through improper pesticide disposal or operation of toxic evaporation ponds, banks loaning money to the farmers could be ultimately held responsible, Hart said.

Hart said banks nowadays face three risks: credit, collateral and cleanup.

''The credit risk is the risk that the borrower will become financially unable to service its obligations having suffered a catastrophic financial disaster because some property owned or operated by the borrower has been found to be contaminated,'' Hart said, adding, ''a lender can lessen this exposure by staying away from certain types of businesses or businessmen...''

Maurine Padden, legislative analyst for the California Bankers Association which has 400 member banks, said legislation authored by state Sen. Art Torres, D-Los Angeles, should be approved by the Legislature and ''on the governor's desk by the end of August.' She said the Torres bill would give lenders the right to enter a borrower's property to determine if toxics are being properly handled.

She said the legislation would insure the privacy rights of the property owner and require that lenders give advance notice when they planned to enter the property.

Padden also said legislation has also been introduced in Congress, in the wake of the federal appellate court decision, to broaden the protection of lenders facing liability because of toxics problems created by borrowers. She said she was hopeful that legislation would be approved within a year.

WASHINGTON (JULY 26) UPI - In an historical turnaround in the relations between the Kremlin and Western financial institutions, the head of the International Monetary Fund flew to Moscow to discuss the needs of the collapsing Soviet economy, the IMF said Thursday.

In Moscow, President Mikhail Gorbachev said at a news conference that the Soviet Union needs immediate financial aid from the West to salvage his economic reforms.

Michael Camdessus, managing director of the IMF, flew Wednesday night to Moscow and will return to Washington Monday, an IMF official said. He will prepare with the Soviets a framework for a major study commissioned by the Group of Seven industrial democracies.

Faced with urgent requests for help from Moscow, the Houston summit of the G-7 on July 11 instructed the IMF, the World Bank and other multilateral agencies to prepare a review of the Soviet Union's economy and its financial and technical needs.

The G-7 is formed by the United States, Japan, West Germany, Britain, France, Italy, and Canada. The IMF will direct the study and present the results.

The report will include detailed recommendations to the Kremlin on how to proceed with the transition toward a market economy and will serve as a blueprint for Western financial and technical assistance to the Soviets.

According to IMF officials, the Soviet Union has not yet voiced a desire to join the fund or the World Bank.

Camdessus' trip is a victory for the organization that since World War II has been the fortress of orthodox capitalism, earning from the Communists the sobriquet of ''imperialist tool.''

The allies victorious in World War II created the IMF and the World Bank to stabilize and reconstruct the economies devastated by the conflict. Originally, the IMF provided loans to help steady currencies within a fixed-exchange rate system.

When the fixed-rate system was abandoned in the early 1970s and most industrial nations no longer needed the IMF's monetary facilities, its role shifted to that of an intermediary between the Western financial system and developing countries. In the 1980s, it played a central role in managing the debt crisis of Latin American and other nations.

The United States, Japan, Britain and Canada have voiced opposition to immediate and massive aid to the Soviet Union claiming it would be wasted

until a market economy is fully developed. West Germany and France support such assistance saying it could help Gorbachev's reforms.

At the Houston summit, the G-7 agreed on a compromise to allow West Germany to aid the Soviets while the IMF and other organizations prepare their report.

#90207u2143 07/26/1990 ~United Press International

WILMINGTON, Del. (JULY 26) UPI - Despite a 2.8 percent decline in second-quarter earnings from a year ago, analysts said Thursday they believe the DuPont Co. continues to perform well when many of its competitors experienced big drops in earnings.

The Wilmington chemical and fibers giant reported second-quarter net income Wednesday of $694 million, or $1.02 cents a share, down from $714 million, or $1 a share, in the 1989 second-quarter. Company executives said 1990 per-share earnings were up because of a stock buy-back plan in the second half of last year.

A number of industry analysts said Du Pont's performance was better than many of its competitors, including Dow Chemical, of Midland, Mich. Dow saw its second-quarter earnings drop by 50 percent to $364 million.

Other large chemical companies, including another Wilmington firm, Hercules Inc., also reported double-digit percentage declines in earnings.

''The real story is that they keep their heads above water in a flat U.S. economy,'' said Micheal McCabe, a vice president with Merrill Lynch in Wilmington.

McCabe told Thursday's Wilmington News Journal that there are two reasons why Du Pont has weathered the economic downturn. He said Du Pont's management team is doing an excellent job of controlling costs by cutting unprofitable businesses like Orlon fiber products, reducing staff and offering early retirement incentives.

''The key in a dull economy is to be a low-cost producer,'' McCabe said. ''Cost control is the only way to do that and they're doing a fantastic job.''

The second reason is that much of the company's recent growth has been in overseas markets. While U.S. sales of most Du Pont products dropped by 5 percent, sales increased by 6 percent overseas.

The company has announced plans to nearly double its European business by the mid-1990s.

Thom Brown, managing director of the Philadelphia investment firm of Rutherford, Brown & Catherwood Inc., believes Du Pont will have a successful year based on its current strategies.

''I don't think the full-year earnings will be a dramatic improvement from last year ... but the outlook isn't terribly exciting for anyone in that business,'' Brown said.

#90207u2177 07/26/1990 ~United Press International
NEW YORK (JULY 26) UPI - Assets of the nation's 513 money market mutual funds rose by $1.93 billion to $391.84 billion in the week ended Wednesday the Investment Company Institute reported Thursday. Average fund yields declined.

The Washington-based institute said broker-dealer fund assets increased $356.6 million to $160.75 billion, assets of general purpose funds increased $1.21 billion to $135.91 billion and institutional fund assets rose $366 million to $95.18 billion.

''Yields of money market funds continued to slide in a typical lagging reaction to the several-weeks-long decline in yields on direct money market instruments,'' said Jacob Dreyer, vice president and chief economist at the institute.

''Despite this easing in yields,'' Dreyer said, ''money market funds experienced the third consecutive large increase in assets.''

The Investment Company Institute, a national association of the American investment company industry, reports the assets of money market funds to the Federal Reserve Board each week.

The Donoghue Organization, of Holliston, Mass., said average seven-day simple yields were at 7.59 percent, down from 7.66, and 30-day simple yields stood at 7.65 percent, off from 7.66.

The average maturity of fund portfolios was unchanged at 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 5.95 percent, down from 5.97; Super-Now accounts, 4.99 percent, unchanged; six-month certificates of deposit, 7.65 percent, down from 7.68; 1-year CDs, 7.77 percent, down from 7.81; 2 1/2-year CDs, 7.80 percent, down from 7.82; and five-year CDs, 7.88 percent, down from 7.90.

The average rate for a one-year, adjustable-rate mortgage was 8.41 percent down from 8.46.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.62 percent, against 9.65, while the average rate for a 30-year, fixed-rate mortgage was 9.81 percent, down from 9.87.

The average rate for a four-year automobile loan was 12.26 percent, down from 12.28.

#90207u2214 07/26/1990 ~United Press International

NEW YORK (JULY 26) UPI - The Federal Reserve Board said Thursday that the basic U.S. money supply, narrowly defined under the name of M1, fell $2.6 billion in the latest reporting week. The broader aggregates M2 and M3 also eased in the period, the Fed said.

M2 decreased by $0.3 billion and M3 slipped by $6.4 billion.

M1, which is made up of cash, checking accounts and NOW accounts - money that is available for immediate spending - fell to a seasonally adjusted average of $807.9 billion in the week ended July 16 from a revised $810.5 billion the week before.

Over the latest 13 weeks, M1 averaged $807.7 billion, a 2.5 percent rate of increase from the previous 13 weeks, the Fed reported.

The broader measure of money, M2, averaged an estimated $3,273.7 billion in the latest week, down from a revised $3,274.0 billion. M2 includes M1, plus passbook savings, small time deposits, including money market deposit accounts, consumer money market mutual funds and certain other short-term assets.

M3, which includes M2 plus large time deposits, repurchase agreements longer than one day at banks and thrifts, and institutional money market funds, averaged $4,051.6 billion in the latest week, down from a revised $4,058.0 billion, the Fed said.

#90207u2222 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The Federal Communications Commission said Thursday cable television operators should face greater competition, not re-regulation, to ensure fair consumer rates and improved services for millions of viewers.

In a report to Congress, the FCC said it would be a mistake for lawmakers to re-impose strict controls on cable rates, as called for in legislation now under debate on Capitol Hill.

Critics charge the cable industry, since the removal of most rate controls in 1986, have gouged consumers with skyrocketing prices while providing terrible service and inferior programming.

According to a General Accounting Office survey released in June, the average cable subscriber's monthly rate for the lowest priced basic service increased 43 percent to $15.95 from Nov. 30, 1986, to Dec. 31, 1989, including a 10 percent hike in 1989. During that time, the number of basic channels available to subscribers increased from 24 to 31 channels on average.

Alfred Sikes, FCC chairman, acknowledged that many cable companies have grown prosperous as unregulated monopolies. ''Cable operators do not face head-to-head competition in more than a handful of markets,'' he said, adding, ''competitive markets and competitive markets alone will in the final analysis force prices toward true costs.''

Competition to cable could come in the form of second cable systems, direct broadcast satellites and cable services by telephone companies.

''Competition ... is the linchpin for consumers,'' said Sikes. ''Where it exists they can be confident they are getting good value.'' Accordingly, the FCC report proposes the removal of regulatory barriers to multi-channel service competition.

The commission's recommendations against cable re-regulation include encouraging more robust competition in local jurisdictions by forbidding franchising authorities from unreasonably denying competitors a chance to provide services. Such barriers now exist in the form of legal or administrative rules.

The FCC called on Congress to remove legal barriers faced by potential multichannel competitors by prohibiting local governments from regulating installation of satellite dishes and other reception equipment, except in the case of health and safety rules.

It also recommended Congress ensure that potential cable competitors have fair access to programming, and that local franchising authorities have the power to enforce reasonable customer service standards.

#90207u2300 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The probe into the Hubble Space Telescope's defect has focused on the equipment used to test the $1.5 billion observatory's mirrors, which are believed to be shaped slightly incorrectly, officials said Thursday.

A NASA investigative panel met Wednesday and Thursday at Hughes Danbury Optical Systems Inc., in Danbury, Conn., where the telescope's mirrors were made a decade ago when the company was called Perkin-Elmer Corp.

The board collected engineering log books, test results and other documents related to the making of the mirrors and interviewed current and

former employees involved in the design, manufacture and testing of the mirrors, a NASA statement said.

''The individuals interviewed provided a great deal of information about this period in the development of the (telescope),'' the statement said.

In addition, the board toured areas where the mirrors were made ''and tested and viewed the equipment used during these processes - key items ... which have remained intact since they were used for the mirrors,'' the statement said.

''Attention is being focused on the test equipment used during the manufacture and test of the primary and secondary mirrors,'' it said.

''Due to the fact that the equipment is just as it was during the period of manufacture, the board is optimistic that definitive results will be obtained that will identify the source of the error,'' it said.

The telescope's primary mirror is believed to be curved slightly incorrectly, blurring the long-awaited observatory's potentially revolutionary view of the cosmos.

The board ''defined measurements'' to be made of the equipment and discussed how to test the equipment to ''yield informaton with sufficient certainty to be useful in moving the investigation toward some conclusive findings,'' the statement said.

''In upcoming weeks, procedures will be finalized and preparations will be made to test various equipment, tools and reference devices used for the ... mirrors,'' it said.

The board, which is led by Lew Allen of the Jet Propulsion Laboratory in Pasadena, Calif., ''will continue to study the considerable volume of information it gathered during this meeting'' and meet again Aug. 15, it said.

The telescope's flaw will reduce by about half the amount of science the instrument can do, but officials hope to correct the deficiency when one of the observatory's instruments is replaced in about three years.

The defect is one in a spate of problems that has triggered a storm of criticism of the National Aeronautics and Space Administration.

LA PAZ, BOLIVIA (JULY 26) UPI - Judge Luis Terrazas said Thursday he was reading the confession statements of five suspects jailed on charges of

aiding in the murders last year of two U.S. Mormon missionaries.

Terrazas is the fourth judge assigned to the case involving five alleged members of an armed subversive group called Zarate Willka who are accused of murdering two 20-year-old Mormon missionaries from the United States last year.

His predecessors removed themselves from the case, one citing telephone death threats, another saying he believed the case would be thrown out of court for lack of evidence and the last after talking with the defense attorney while taking a statement from one of the accused.

Terrazas said he had until Wednesday, July 31, to finish reading the statements. After that, he has about 20 days to make a decision on the guilt of the five prisoners.

Eight alleged members of Zarate Willka originally were accused in the case but only five have been arrested and jailed, police said.

The missionaries were Jeffrey B. Ball and Todd R. Wilson.

Bolivian national Police Chief Gen. Felipe Carvajal reiterated Thursday his claim that a man killed in a shootout with police last week had been involved in the murder of the two missionaries.

Carvajal said information from the investigation and witness identifications showed both Juan Domingo Peralta, 27, killed by police last Friday, and his older brother Johnny Justino Peralta, still at large, were members of Zarate Willka and had been involved in shooting Ball and Wilson.

Defense lawyer Freddy Panique contends the police killed Juan Domingo by mistake while searching for his brother, who police say is a leader of the armed group.

Zarate Willka staged a failed bombing attack on Secretary of State George Shultz, who was U.S. secretary of state when he visited La Paz in August of 1988. The group also has attacked the U.S. Embassy.

(JULY 26) UPI - A four-hour House debate on what sanction should be imposed against Massachusetts Democrat Barney Frank was punctuated with charges of gay-bashing and an apology from the lawmaker. The House ignored emotional pleas to give Frank a stricter punishment for his dealings with a male prostitute. It instead followed an ethics committee recommendation of a formal reprimand.

The costs of the ethics case against Frank... and a Senate investigation of Minnesota Republican David Durenberger... could go as high as one-Million dollars. More than one year was spent on the probes... which both ended with sanctions... but none as serious as expulsion. Both Frank and Durenberger had defense funds to help them bear the costs of the defense.

The attorney for Marion Barry charges the Washington, D-C, mayor was the target of an F-B-I ''assault force'' that goes after black elected officials. Defense attorney R. Kenneth Mundy says the F-B-I agent who headed the sting that led to Barry's arrest is part of a contingent that travels around the country trying to implement blacks in wrongdoing. The charges were made during a bench conference, but were allowed on public record.

A defense attorney in the gang-rape case involving a jogger in New York's Central Park today tried to show that a police detective put words in the mouth of one of the defendants who confessed a part in the attack. Jurors also were told that the detective is an actor who's appeared in several movies... including one about his role in the Central Park ''preppie murder'' case.

Thousands of Cubans packed the streets of Havana today to celebrate the 37th anniversary of the launching of the island's communist revolution. For Cubans, July 26th, 1953, marks the start of President Fidel Castro's armed fight against dictator Fulgencio Batista , who fell nearly six year later. The celebrations are tempered by 22 Cuban refugees seeking asylum in Western embassies in Havana.

80-year-old Washington reporter Sarah McClendon assured well-wishers at a Capitol Hill birthday bash today that she has NO intention of giving up her post. McClendon has been peppering presidents as far back as Roosevelt with questions for Texas papers served by her McClendon news service. She says she won't quit now because she has a lot of questions to ask George Bush. The president was among the well-wishers who sent McClendon birthday greetings.

#90207u2377 07/26/1990 ~United Press International

LAFAYETTE, Calif. (JULY 26) UPI - Brent Mydland, keyboardist for the Grateful Dead, one of the most enduring rock bands, died Thursday at his home, the band's publicist said. He was 38.

It was not immediately known how Mydland died, but he was pronounced dead at his Contra Costa County home north of San Francisco shortly after 10:30 a.m., authorities said.

''We don't really know how Brent died and, as of now, we believe it was an accidental death,'' said Dennis McNally, publicist for the band. ''All I can say is that we lost a brother and it hurts a lot and we're going to miss him a lot.''

An autopsy was scheduled for Friday, Contra Costa County coroner's officials said.

The band had just returned to its homebase in the San Francisco Bay Area on Tuesday after a successful summer tour.

Mydland was the third keyboardist to play for the popular band, joining the group in 1979. The first two keyboardists also died. Founding member Ron ''Pigpen'' McKernan died of liver disease in 1973, and Keith Godchaux died in a car crash in 1980, one year after leaving the band.

As the newest member of a band that has toured since 1965, it took years for Mydland to step out of the shadows of the rythym section and backup vocals to take a more assertive role in the Grateful Dead's delightful and peculiar brand of improvisational rock 'n' roll.

But as Mydland found his way through the dense, wild and jazz-like jams that are the band's stock and trade, he proved himself as a forceful player equally adept at gentle ballads, stinging blues standards and straight ahead rock.

Mydland first caught the attention of Grateful Dead fans with penetrating, sweeping organ solos, especially during bring-down-the-roof blues songs like ''Littler Red Rooster.''

He was not content with occasional solos, and after learning to plow his piano and organ into extended jams, started taking center stage with his bluesy, wailing voice. On some of his own songs, like ''Blow Away,'' Mydland would sometimes abandon his playing altogether, using his keyboards only to keep his balance as he leaned into the microphone to belt out improvised lyrics, chants and wails.

Born in the heyday of the psychedelic era of the 1960s in San Francisco, the Grateful Dead quickly became popular for its anti-commercial stance and ready willingess to play five-hour concerts. Although rarely producing a major hit single, the band has recorded many albums.

Building an underground reputation by playing regularly and often for free in the early days, the band's concerts became legendary for attracting tens of thousands of fans - known as ''Deadheads'' - from all across the country. The fans would think nothing of camping out for days just to heear a few hours of their music.

Before joining the band, Mydland worked closely as a touring and recording partner with Bob Weir, one of the band's founding members.

Weir and Jerry Garcia, the band's leader, were not immediately available for comment.

Mydland is survived by his wife, Lisa, and his daughters, Jessica and Jennifer.

#90207u2381 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - The House passed a $3.9 billion budget Thursday for the District of Columbia, a bill likely to be vetoed by President Bush over language allowing the use of tax money for abortions.

Before giving final approval, House members also voted to cut funding by $1.6 million in a flap over the University of the District of Columbia's plan to acquire and display an artwork some said is pornographic.

The bill includes language effectively allowing the city of Washington to use locally raised tax dollars for abortions and it allows the use of federal money given to the city for abortions in cases where the life of the mother would be endangered or in cases of quickly reported rape or incest.

Rep. Robert Dornan, R-Calif., an outspoken abortion foe, said White House chief of staff John Sununu told him Thursday afternoon the bill would be vetoed over the abortion matter. A similar spat last year saw the city's budget rejected twice before the language was rewritten to be acceptable to Bush, who opposes use of tax money for abortions.

The bill was approved on a 241-178 vote after members refused, 219-195, to make a 4.4 percent cut in the federal funds portion of the measure. But, by voice vote, they then cut 2 percent off the federal funding in the bill.

The controversial artwork, ''Dinner Party'' by artist Judy Chicago, caused a flap between House liberals and conservatives over both the content and the fact that the University of the District of Columbia plans to spend $1.6 million of its own money to renovate a building to display the work.

The university currently owes its faculty back salary and may have accreditation trouble over the pay issue.

The work, well known within the art world, is a triangular table 40 feet on each side with 39 place settings depicting female genitalia.

Rep. Stan Parris, R-Va., whose district is adjacent to Washington and who serves on the controlling subcommittee, convinced the House on a 297-123 vote to cut $1.6 million in the federal funds going to the university, protesting both the artwork and the financial arrangements under which it is being displayed.

Conservative Rep. Robert Dornan, R-Calif., added, ''It is not art. It is pornography, three-D ceramic pornography.''

Liberal Rep. Ron Dellums, D-Calif., chairman of the District of Columbia Committee, countered, ''I think it is pornography to see nuclear weapons standing erect,'' calling the missiles ''phallic symbols capable of doing nothing but destroying life on this planet.''

The District's non-voting delegate, Democrat Walter Fauntroy, added, ''This (cut) will not prevent the showing of this art.''

Because the city is under the control of Congress, its budget is reviewed and approved by Congress, which then adds a federal contribution to city funds.

After the slight reduction approved by the House, the fiscal 1991 federal contribution amounts to $426.8 million. It is a payment in lieu of taxes made on the premise that federal buildings and parkland use up valuable Washington real estate that otherwise would be on the tax rolls and as compensation for city services provided to the government.

The federal payment five years ago accounted for just over 20 percent of the city's budget, but it has not increased since then and now represents just under 14 percent of the city budget.

Much of the rest of the bill consists of permission for the city to raise some $2.9 billion in taxes, some $353 million in borrowing authority and $52 million in federal money for pension liabilities incurred prior to the city becoming partially autonomous in the 1970s.

#90207u2460 07/26/1990 ~United Press International

NORCROSS, GA (JULY 26) UPI - Jennifer Capriati scored a straight-set victory over Regina Rajchrtova and Zina Garrison teamed with Gigi Fernandez to win the pivotal doubles match Thursday, lifting the United States to a 2-1 victory over Czechoslovakia in the NEC Federation Cup quarterfinals.

The U.S. team, the defending champions in the women's version of the Davis Cup, will face Austria in the semifinals on Saturday.

Czechoslovakia's Jana Novotna set up the deciding doubles match by toppling Garrison 6-3, 6-3 in the No. 1 singles match after Capriati had scored a 6-2, 7-6 (7-4) win over Rajchrtova.

''I'm a competitor,'' said Garrison after she and Fernandez beat Novotna and Rajchrtova 7-6 (10-8), 6-4. ''I like to win no matter how it comes. I'll take 2-1. I felt like I had to redeem myself after the singles loss.''

The Americans benefited from the absence of Helene Sukova from the Czechoslovakian team. Sukova and Novotna are the top doubles team in the world, undefeated this year and needing only a victory at the U.S. Open to complete a Grand Slam.

''I cannot say I missed Helena,'' Novotna said. ''Regina was a great partner. We had a set point and I missed the shot.''

After rallying from a 2-5 first set deficit, the Czechs actually had two set point opportunities, but the Americans saved both and captured the tie-breaker on their fourth set point when Novotna coughed up her only doublefault of the match.

''It's not easy to play a team competition,'' Novotna said. ''Somehow after the first set when we lost in the doubles, I felt very tired - not physically, but mentally from trying to lead the team.''

Novotna, ranked No. 14, attacked the net relentlessly in notching her upset of Garrison, the world No. 5 who is the highest ranked player in the tournament.

The Czech used two service breaks to win the opening set and then held serve to 1-0 in the second before Garrison won three straight games.

But from 1-3 down, Novotna dominated the match, breaking Garrison in the sixth game to even the set at 3-3 and notching the decisive break two games later for a 5-3 lead.

Novotna then served out the match at love, firing consecutive service winners on the last two points.

''I was more upset because I didn't know how I lost,'' said Garrison. ''I would hit a good shot, and Jana would hit one better. She was just everywhere I hit the ball.''

As she did against Sandra Wasserman in the Americans' 3-0 victory over Belgium on Wednesday, Capriati again fought off a stubborn second set challenge from a lower ranked opponent whose playing style is unpredictable.

''He (U.S. coach Marty Riessen) told me this girl gets on streaks,'' Capriati said. ''She'll play really well and then she'll go down.''

Rajchrtova, a 22-year-old whose biggest win is a triumph over Garrison at a clay court tournament in Hilton Head Island, S.C., earlier this year, raised the level of her game in the second set.

Belting winners off either side, Rajchrtova built leads of 3-0 and 5-2 by breaking Capriati's serve twice. But the American rebounded as Rajchrtova's booming winners turned into sloppy errors.

''I just thought, 'I don't won't to play a third set,''' the 14-year-old Floridian said. ''I just wanted to fight hard. I think one point at a time when I try to come back.''

Capriati reeled off four straight games to lead 6-5 before Rajchrtova held serve to force a tie-breaker.

Capriati dominated the tie-breaker with steady groundstrokes, while Rajchrtova repeatedly overhit. The Czech saved one set point at 6-3 in the tie-breaker but then hit a forehand wide to end the 75-minute match.

The third-seeded Austrians got tough singles victories from Barbara Paulus and Judith Wiesner to score a 2-1 win over Great Britain.

Paulus overcame a 4-1 first set deficit to beat Jo Durie 7-6 (7-3), 5-7, 6-4, while Wiesner rallied late for 7-6 (7-4), 2-6, 8-6 win over British No. 1 Sarah Loosemore.

Loosemore, a 19-year-old who upset Rafaella Reggi in Britain's 2-1 win over Italy on Wednesday, missed four set point opportunities in the opening set before losing the tie-breaker.

After coasting through the second set, the British player notched a vital break in the ninth game and came within two points of closing out the match before a volley error and a loose forehand cost her the game.

Wiesner finally won the 2 hour, 10 minute match on her second opportunity when Loosemore sailed a forehand wide.

''It's really just a bit of luck,'' said the 15th ranked Wiesner. ''She missed a volley at 30-love that would have given her three match points. It could have been over there very easily.''

On Friday, second-seeded Spain plays France and the Soviet Union meets the Netherlands in the other quarterfinal matches.

GEORGE AIR FORCE BASE, CA (JULY 26) UPI - Two F-4 Phantom jets crashed Thursday in Death Valley and two of the fliers aboard one of the planes were believed to have been killed, officials said.

Two other crew members aboard the second jet were known to have survived, but their conditions were not immediately known, said Tech. Sgt. Rick Corral, spokesman for George Air Force Base.

A crash recovery team was sent to the scene of the 10:50 a.m. crash in Death Valley National Monument, 8 miles west of the community of Furnace Creek and about 20 miles from the Nevada state line, another base official said.

Details of the crash, the jets' mission and the identities of the crews were not immediately available, Corral said.

George Air Force Base is in San Bernardino County, about 65 miles northeast of downtown Los Angeles.

Ray Roe, a dispatcher with the Sheriff's Department in Inyo County, near the crash site, said two crew members died in the crash. Lt. Michele De Werth, a George spokeswoman, was unable to immediately confirm the deaths.

(JULY 26) UPI - After four hours of emotional debate and pleas today, the House reprimanded Massachusetts Democrat Barney Frank. The reprimand was approved by a vote of 408-18... after lawmakers earlier defeated two moves backed by conservative Republicans to expel or censure Frank. The House Ethics Committee had recommended the reprimand. Frank apologized for his dealings with a homosexual prostitute that led to the action.

Congress is much closer to passing oil spill legislation that will require greater federal and industry efforts at prevention. House and Senate conferees today approved a compromise bill that also assures speedy cleanup and victim compensation. The unanimous committee vote ends seven-months of deliberations... sending the bill back to the House and Senate for final action possibly as early as next week.

President Bush today signed a landmark bill prohibiting discrimination against the handicapped. Bush signed and praised the new law on the White House South Lawn as two-thousand people from groups for the disabled applauded. The president tried to paint a bright picture for the business community... which fears the costs of hiring the handicapped and making the workplace accessible to them. Bush said the law opens up a whole new

pool of workers.

Record company officials say the keyboardist for The Grateful Dead died today. Brent Mydland joined the long-lasting band in 1979... after working as a touring and recording partner for founding member Bob Weir. A publicist for the band's record company... Arista Records... says it is NOT immediately known how or where Mydland died.

-30- 1795

#90207u2493 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - In a big step toward final passage, House and Senate conferees approved a compromise oil spill bill Thursday requiring greater federal and industry efforts to prevent spills and assure speedy cleanup and victim compensation.

More than a year after the disastrous Exxon Valdez spill in Alaska's Prince William Sound, the House-Senate committee ended seven months of deliberations with a unanimous vote, sending the bill back to both houses for final action possibly as early as next week.

Among the conference committee's final actions was the insertion of a provision delaying natural gas exploration off the North Carolina coast until October 1991 at the earliest. Several lawmakers objected to the provision and said it could pose problems for the bill on the House floor.

Sen. Ted Stevens, R-Alaska, also added a poignant finishing touch to the bill, asking that the conference report provide immediate funding for construction of a warning light on Bligh Reef, the rock upon which the Exxon Valdez ran aground.

The compromise bill generally resembles the oil spill measure passed by the House Nov. 8 and similar legislation approved by the Senate Aug. 4.

The oil industry is unhappy with several aspects of the compromise bill, but the measure is expected to win quick approval from Congress and President Bush due to increased public pressure for stronger oil spill laws following a spate of recent spills, including the Mega Borg incident off Texas.

The main thrust of the bill is to set up a $1 billion industry-financed trust fund that could be tapped by the government for emergency cleanup action. The fund is supported by a 5-cent-per-barrel tax on oil.

To assure minimal disruption to affected communities, the fund also could be used for damage payments to fishermen and others who lose their livelihood and cannot get recompense from the spiller within 60 days after an accident. The government would then sue the spiller to recoup the

damage payments.

The bill also would limit the liability of spillers for cleanup costs and damage payments under federal law, with the trust fund available to cover costs above those limits, which range up to $350 million per incident.

The liability limits do not apply to accidents caused by gross negligence or criminal misconduct on the part of tanker or facility operators.

In addition, injured parties can sue for higher compensation under state laws that do not set any ceiling on spiller liability. About 20 states have unlimited liability for oil spills.

Oil industry officials warned states with unlimited liability laws faced a cutoff of oil shipments because few tanker operators would risk a major accident that could bankrupt them.

More broadly, the industry said unlimited liability would drive responsible shippers out of U.S. waters and replace them with fly-by-night foreign-flag tanker operators not covered by U.S. laws.

The bill, mired for years in congressional disputes, was energized by the wreck of supertanker Exxon Valdez on March 24, 1989, which dumped nearly 11 million gallons of crude oil into pristine Prince William Sound. The spill blackened miles of beaches and killed thousands of birds, sea otters and other animals.

Public outrage was heightened by the slow and confused cleanup response by Exxon and oil industry crews. Coast Guard officials said they could not take over the cleanup because they did not have enough money and were uncertain about their authority to intervene.

The compromise bill would directly address that problem by giving the president responsibility for ensuring a quick and effective cleanup, either by ordering the spiller to take action or sending the Coast Guard into action.

Another key provision of the bill requires virtually all oil tankers and barges operating in U.S. waters by the year 2015 to be equipped with double hulls, designed to provide extra protection against spills in the event of groundings or collisions.

Environmentalists contend a double hull could have prevented the Exxon Valdez fiasco, but oil industry officials argue that an additional shell would make a foundering ship take on more water and increase the risk of capsizing.

Other key sections of the bill would:

-Require the Coast Guard to maintain major oil spill cleanup task forces in Mobile, Ala., San Francisco and Elizabeth City, N.C. as well as smaller crews in each of the Coast Guard's 10 districts around the country.

-Call for a review of tanker captains' driver licenses to check for drunk driving violations. This is a direct response to allegations that the captain of the Exxon Valdez had been drinking the night of the accident.

-Provide immunity from legal action to private groups assisting in cleanups. The provision is designed to protect a private spill response organization being set up by the oil industry.

-Requires tanker operators to draw up contingency plans for responding to a spill and assure adequate funding to carry it out.

#90207u2496 07/26/1990 ~United Press International

WASHINGTON (JULY 26) UPI - With budget summit talks foundering, Democratic negotiators said Thursday it was unlikely that a final agreement could be reached and approved by Congress before early October.

The negotiators had been hoping to forge an agreement before Congress takes its August vacation, but the two sides so far have not even reached the stage of trading detailed deficit-reduction proposals.

Democratic negotiators said they would meet with President Bush at the White House Friday to discuss giving up the goal of an August agreement and working through September in hopes of completing action by early October.

Rep. Leon Panetta, D-Calif., chairman of the House Budget Committee, said the ''September scenario'' was more realistic, adding, ''You can't slam dunk this proposal within a matter of a few days.''

For a third straight day, Bush held a morning meeting Thursday at the White House with the top leaders of Congress to assess the status of talks intended to produce a bipartisan deficit-reduction plan and bolster the economy.

In the afternoon, Democrats met separately and turned their attention from devising a budget plan to discussing how long it would take to pass the necessary legislation and get it to the president's desk.

''We're sort of working on this thing backwards,'' said Sen. James Sasser, D-Tenn., chairman of the Senate Budget Committee. ''Our wish is to have an agreement and have it effectuated by the first week of October.''

Sen. Wyche Fowler, D-Ga., representing Senate Democratic leader George Mitchell of Maine in the talks that began in May, said the Democrats believe it would take four to five weeks to get a budget agreement through Congress.

Sasser said Democrats still have not agreed on their own proposal.

''We're not submitting to the press syndrome of putting together a package '' Fowler said with a smile. ''We're reveling in congressional anarchy.''

House Democratic leader Richard Gephardt of Missouri said earlier Republicans and Democrats could have budget plans drafted for comparison by Friday.

By evening, Gephardt said the Democrats had not decided whether to present a plan this week. But he acknowledged that they discussed scheduling Thursday.

Budget director Richard Darman briefed Republicans Wednesday on elements of what could become the administration's opening offer if Democrats come up with a plan. Sen. Robert Packwood, R-Ore., said a key feature of the Darman plan was increased alcohol taxes.

As they have for days, Democratic leaders spoke of incremental progress after meeting with Bush, but offered no details. White House press secretary Marlin Fitzwater said, ''We're a little concerned that we haven't made more progress.''

Budget reform and enforcement mechanisms, key priorities for the White House, were singled out as a particularly difficult sticking point, with Democrats resisting demands for more presidential power over the budget process.

Gephardt said the administration was adamant that any levels of defense spending set in the budget talks for the next five years be locked firmly into place to enable the Pentagon to plan accordingly.

The broad goal of the talks is a $50 billion cut next year, through tax hikes, fees, spending cuts and interest savings, and a $500 billion reduction over five years.

Without action by Oct. 1, the Gramm-Rudman-Hollings balanced-budget law would trigger some $100 billion in across-the-board spending cuts to bring the projected deficit for next year to $64 billion.

#90207u2571 07/26/1990 ~United Press International

LOS ANGELES (JULY 26) UPI - A drug kingpin whose 1988 arrest in Honduras sparked deadly anti-American rioting was convicted of kidnapping but acquitted of murder Thursday in the 1985 torture-slaying of U.S. drug agent Enrique Camarena.

The verdict against Juan Ramon Matta Ballesteros, 45, came on the ninth day of deliberations by a federal jury, which convicted him of three counts of kidnapping and conspiracy to commit violent crimes to further drug trafficking efforts and acquitted him of the single murder count he faced.

After delivering its verdict, U.S. District Judge Edward Rafeedie ordered the jury to resume deliberations on charges against three other defendants.

In early February 1985, a month before he was to be transferred back to the United States, Camarena was snatched off a Guadalajara street and tortured for more than 30 hours at a house before being killed by drug traffickers, apparently in retribution for the DEA's raids on marijuana fields.

Prosecutors presented evidence that hairs found at the house matched Matta's.

During two months of testimony, the jury heard testimony about powerful Mexican drug chieftains who lived in ranch-like homes, were protected by platoons of bodyguards and high-powered weapons arsenals.

The defense presented testimony about alleged CIA links to drug traffickers who ran guns to the Nicaraguan Contras, and asserted that the DEA, bent on avenging Camarena's murder, was overzealous and broke international laws in its pursuit of the suspects.

The prosecution, long a source of friction between Mexico and the United States, was fraught with assertions of widespread corruption in Mexican government and law enforcement in Guadalajara in the mid-1980s.

Camarena was one of four DEA agents who descended into this ''den of wolves'' in Guadalajara in 1983, Assistant U.S. Attorney Manuel Medrano said in his closing arguments.

The agent - considered a ''star'' in the DEA ranks - participated in the raids on the marijuana fields, which cost the drug traffickers more than $5 billion.

His Mexican pilot, Alfredo Zavala, also was kidnapped, tortured and killed. Their mutilated bodies were found a month later in a shallow grave 75 miles southeast of Guadalajara.

A week before Camarena's death, two U.S. tourists, John Walker and Alberto Radelat, were killed at a Guadalajara restaurant after being mistaken for DEA agents when they walked into a dinner party of drug traffickers.

The jury heard chilling tape recordings of parts of Camarena's interrogation in which the agent pleaded in Spanish with the drug traffickers to stop torturing him and begged for medical attention.

Camarena's ribs were broken, his skull fractured in many places and a hole was drilled through his head, apparently with a screwdriver, a doctor testified.

In all, 22 people have been indicted in the United States in connection with the Camarena murder, including three men convicted after a 1988 trial in Los Angeles.

Drug barons Ernesto Fonseca Carrillo, Rafael Caro Quintero and several others were convicted last year in Mexico and sentenced to long prison terms. With those prosecutions, Mexico maintained all those responsible for Camarena's murder had been brought to justice.

#90207u2595 07/26/1990 ~United Press International

PHILADELPHIA (JULY 26) UPI - General Electric Co. was fined $10 million Thursday and two employees were sentenced to prison for defrauding the government out of millions of dollars on an Army contract.

GE, the nation's fifth-largest defense contractor, also agreed to pay $20 million to settle other civil matters and waived its right to appeal the criminal conviction or sentence.

U.S. District Judge Lowell Reed Jr. sentenced Gerald Leo, 52, of Norristown, Pa., to 10 months in prison and fined him $15,000. Leo was convicted of four counts of mail fraud and covering up the crime.

James Badolato, 42, of Springfield, Pa., was sentenced to five months in prison and fined $10,000. Badolato was convicted of covering up the crime.

The executives worked for Management and Technical Services Corp., a King of Prussia, Pa., subsidiary of GE and the subcontractor for a $244.9 million Army contract to build mobile computer systems for battlefield operations.

GE was convicted of four counts of fraud and 282 counts related to making false claims. The government had argued that between 1982 and 1985 the defendants negotiated with their subcontractors for lower prices on some

components but did not pass the savings on to the Defense Department.

GE had argued that federal guidelines for the no-bid contract were vague and open to interpretation whether the company was required to report those savings.

GE and federal prosecutors jointly recommended the fines in briefs submitted to Reed. Reed praised GE's current policy to police its employees, noting that the policy serves as a model for the defense industry, but in accepting the sentencing recommendations, the judge called GE's conduct ''reprehensible.''

''All in all, this is a sad commentary on General Electric,'' he said.

''The criminal conviction of GE and two employees and the company's agreement to pay $30 million in criminal fines and civil damages should send an important message to defense contractors that the United States will use all the weapons in its arsenal to protect the integrity of the defense procurement process,'' acting U.S. Attorney Michael Rotko said.

Lawyers for Leo and Badolato urged that they be sentenced to community service or probation. ''Incarceration in this case is inappropriate,'' said Seymour Toll, Leo's lawyer.

But Reed insisted on prison terms, telling the defendants, ''You have not fully accepted your conduct. I encourage you to accept that conduct. ... The rejection of community service arises out of the conclusion that you are genuinely good people. Rehabilitation beyond jail is not necessary.''

The executives and GE were convicted in February after a 14-week trial. The jury deliberated nine days before deciding the two men saved GE at least $8 million over three years of the contract. Witnesses had testified that the scheme had saved GE $12.8 million.

GE also could be barred from accepting government contracts, but that determination would be up to the Pentagon, prosecutors said.

Rotko said the $10 million GE fine was the largest in a defense pricing case, but only the second largest defense fraud case. The Northrop Corp. was fined $17 million last March in a criminal case involving the safety of some of its products.

(JULY 26) UPI - Two General Electric employees received prison terms and the giant defense contractor was hit with a 10-Million-dollar fine today for defrauding the government. James Badoloto was sentenced to five months

in jail and Gerald Leo got a 10-month prison term in the case. G-E and the two men were convicted of cheating the government out of Millions of dollars by failing to report savings on an Army contract to build mobile computer systems.

East and West German politicians agree on at least one thing about German elections. The lawmakers met in Bonn today where they said rules governing the voting must be confined in an election agreement to be signed before the end of August. Most of the delegates also favor the idea of having elections under the same rules in each country. The issue is already dividing East Germany's fragile coalition government.

The World Health Organizatrion today warned that AIDS will increasingly kill women and children world-wide. WHO estimates that three-Million women and children will died from the disease this decade. AIDS is also expected to create several Million orphans and boost the childhood death rate 30 percent in the 1990's. An agency official wrote in a British medical journal that AIDS in women and children will become one of the major challenges to health care.

The Air Force says two F-4 Phantom jets with two crew members aboard each crashed in Death Valley today, killing the crew aboard one of the planes. A spokesman for George Air Force Base in California says two of the fliers are known to have survived. A crash-recovery team has been dispatched to the scene... 30 miles north of the Death Valley National Monument.

#90207u2658 07/26/1990 ~United Press International

CARSON CITY, Nev. (JULY 27) UPI - The Nevada Gaming Commission Thursday authorized Hilton Hotel Corp. to make a $650 million public offering in liquid yield option notes, with part of the revenue going to pay off existing debt.

Hilton Vice President William Lebo Jr. told the commission the company will realize $270 million from the offering.

Lebo said the offering would permit Hilton, which has full or part interest in 23 hotels and manages 14 others, to pay off some of its debts. He said no decisions have been made on other uses for the money.

Hilton has just completed a hotel-casino in Laughlin. And it has approval from the Reno City Council to build a 15-story hotel tower in the downtown area. However no final decision has been made by Hilton whether to go forward with that project.

The commission actually authorized the sale of up to $1 billion in notes, but a spokesman said it would offer $650 million unless there was greater

public interest. A person who bought a note for $411 would realize $1,000 in 15 years.

The commission also approved an application from MGM Grand Inc. for a shelf public offering.

MGM President Fred Benninger told the commission there was no timetable for the offering and how much it would be for. He said plans for the giant MGM Grand Hollywood theme park in Las Vegas should be completed soon. After that the decisions will be made.

Benninger said construction should start before the end of the year with completion in the fall of 1992.

(JULY 26) UPI - A municipal spokesman says Canada is trying to buy disputed land to end a standoff with Indians who claim the area is theirs. A spokesman for Oka, Quebec, said federal and local authorities are talking with French business executive Maxim Rousseau, who owns the land in Oka, just west of Montreal. Oka's City Council reached a deal with Rousseau in March to buy the land for a golf course and lease it back to Rousseau. But the deal is off because of the dispute.

A born-again California Christian of Jewish origin has put together a package to purchase the scandal-ridden P-T-L ministry. Morris Cerullo offered to buy P-T-L and its Heritage U-S-A religious retreat for 52-Million dollars. But at the 11th hour today... other creditors reversed their positions and opposed the sale. Cerullo has Millions of followers in Latin America, Haiti and Africa.

A four-mile-long convoy toting 15 tons of deadly nerve gas today made the first leg of a trip that'll take the U-S chemical weapons out of West Germany. They will be destroyed in the Pacific. About 80 heavily guarded trucks made the two and one-half hour, 30-mile crawl from a chemical depot at Clausen to the U-S Amry base at Miseau. The weapons will remain there until shipped out of West Germany by rail and sea.

Health officials today said they are investigating the first case in which a dentist with AIDS may have passed the virus to a patient. The federal Centers for Disease Control in Atlanta say the patient is a young woman who had two molars extracted. The dentist who did the work was diagnosed with AIDS before the operation but had NOT told his patients. The American Dental Association emphasizes that the findings are NOT conclusive.

#90207u3012 07/26/1990 ~United Press International
(JULY 26) UPI - An alleged drug kingpin was convicted of kidnapping but acquitted of murder in the 1985 torture-slaying of U-S drug agent Enrique Camarena . The verdict against Juan Ramon Matta Ballesteros came on the ninth day of deliberations by a federal jury in Los Angeles. The judge ordered the jury to keep deliberating on charges against three other defendants.

The House this evening passed a nearly four-BILLION-dollar budget for the District of Columbia. But President Bush is likely to veto the bill because it contains language that allows the use of tax money for abortions. One Republican lawmaker says White House Chief of Staff John Sununu told him the bill will be vetoed in its current form. The budget

was rejected twice last year over a similar spat involving abortion language.

New York prosecutors rested their case today against three youths charged with the rape and attempted murder of a Central Park jogger. Assistant District Attorney Elizabeth Lederer finished her case after 43 people testified over 22 days. Outside the court... a defense lawyer accused a detective of lying about how he obtained a videotaped statement in which one youth admits taking part in the attack.

President Bush says the nation celebrated a second independence day with today's signing of a civil-rights bill for the disabled. Bush says the bill was long overdue. The new law prohibits discrimination against the nation's 43-Million disabled people. The business community has been concerned about the costs associated with the bill, which requires that public places be made more accessible to disabled people.

#90207u3018 07/26/1990 ~United Press International

(JULY 26) UPI - There's another roadblock in the effort to deliver food to as many as one-Million starving people in Ethiopia. The latest problem is caused by a standoff between United Nations officials and a rebel group that will supply the boat that carries the U-N team and the supplies to a port. The rebels fear the Ethiopian government will try to infiltrate the area through the food convoy.

The former president of American Therapeutics Incorporated was sentenced today to two years in prison for bribing federal officials to speed approval of generic drugs. A federal judge in Baltimore also fined him 50-thousand dollars. The defendant pleaded guilty in January to two racketeering counts. 13 pharmaceutical company and Food and Drug Administration officials have been convicted of payoffs in the case.

A federal judge in Florida today dismissed a juror who telephoned a purported Colombian drug smuggler during deliberations in a money-laundering trial. The case involved the personal banker for former Panamanian dictator Manuel Noriega. The juror said he called a number in a defendant's address book ''out of curiousity.'' Another juror said the man was out to get the defendant. The judge ordered the remaining jurors back to deliberations.

The Air Force says 18-hundred 68 dollars is NOT too much to pay for a toilet cover assembly to go aboard a C-B-5 transport plane. The Air Force is once again the target of criticism from congressional investigators who say the military consistently pays too much for items. The Air Force says the toilet cover assembly is a complex device containing piping and electrical and mechanical components that justify its cost.

#90208b0010 07/27/1990 ~Business Wire
CHATTANOOGA, TN (JULY 27) BUSINESS WIRE - First Chattanooga Financial Corp. (NASDAQ/NMS:FCHT) Friday reported results for the fourth quarter ended June 30, 1990.

Commenting on the results, Spencer H. Wright, chairman of the board, said, ''First Chattanooga Financial Corporation recorded a loss of $3.5 million, or $1.27 per share, for the fiscal year ended June 30, 1990.

''The loss resulted from an additional provision of $7.5 million, taken in the fourth quarter, for loan loss reserves and the write-down of real estate owned. These loans are primarily commercial real estate loans which we committed to long standing customers at a time before our corporation became publicly owned.

''It should be noted that the provision and write-down were made at the completion of a comprehensive examination of commercial mortgages by federal examiners. These results also reflect the softness of the apartment and shopping center markets in our area. Also, in keeping with our conservative approach, the reserves taken were significantly in excess of requirements.

''First Chattanooga decided to cause this substantial impact on fourth quarter earnings of the fiscal year, so that known and anticipated problems would be behind us. The fourth quarter results, therefore, showed a loss of $5 million, or $1.79 per share, because of the above mentioned reserve.

''The corporation does not anticipate that the results from establishing strong reserves, to protect our financial strength, will have any effect on the pending merger with BMR. With an equity to asset ratio in excess of 12 percent, after taking reserves and write-downs, First Chattanooga continues to be one of the strongest financial institutions of its size in the United States, and far exceeds all regulatory capital requirements.

''Earlier in the year, because of ongoing merger discussions, the stock repurchase program, approved in 1989 by the board and by the regulatory authorities, was temporarily discontinued. First Chattanooga intends to resume the approved stock repurchase program, effective immediately.

''The board of directors declared our thirteenth quarterly cash dividend of 8 cents per share. The dividend is payable Sept. 14, 1990, to shareholders of record at the close of business Aug. 10, 1990.''

First Chattanooga Financial Corp. is the holding company and parent of

First Federal Savings & Loan which is a federally chartered FDIC-insured savings and loan. It operates 11 offices in southeastern Tennessee.

SACRAMENTO, CA (JULY 27) BUSINESS WIRE - Foundation Health Corp. (ASE:FH) Friday announced that it has sold its remaining minor equity interest in a Washington HMO to Qual-Med Inc., for $1 million in cash.

Foundation executives said the $1 million in profit was unanticipated because it looked doubtful that Colorado-based Qual-Med would exercise its option to purchase the remaining equity from Foundation.

''This is a $1 million windfall which will reflect favorably in fiscal year 1991,'' said Daniel D. Crowley, president and chief executive officer of Foundation Health Corp., which operates one of California's largest HMOs. ''It also officially marks the end of our last small link to the non-California subsidiaries.''

Qual-Med purchased the Washington HMO in 1989 as part of Foundation's move to spin off all non-California HMOs, which also included HMOs in New Mexico, Oregon, New Jersey.

Foundation earlier reported nine month net income for FY 1990 of $8.4 million as compared to a loss of $3.7 million for the comparable period a year earlier.

The company will issue its full FY 1990 earnings report in mid-August based on a June 30 year-end close.

#90208b0047 07/27/1990 ~Business Wire

TEMPE, AZ (JULY 27) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE:UDC) Friday reported second quarter net income of $4.9 million, or 16 cents per common share, on revenues of $91.3 million, compared with last year's record second quarter net income of $12 million, or $1.11 per common share, on revenues of $92.7 million.

Net income per common share was significantly impacted by the August 1989 partial recapitalization.

Closings for the second quarter were $86.6 million for 542 homes, compared with $89.4 million for 541 homes a year ago.

Net orders were $82.3 million for 480 homes, vs. 1989's $119.8 million for 692 homes.

For the first half ended June 30, net income was $11.9 million, or 61 cents per common share, on revenues of $163.9 million, compared with 1989's $19.2 million, or $1.71 per common share, on revenues of $156 million.

Closings for the first half totaled $153.9 million for 942 homes, compared with $149.7 million for 926 homes a year ago.

First half net orders were $189 million for 1,157 homes vs. 1989's first half net orders of $245.7 million for 1,461 homes.

UDC's backlog of homes ordered but not yet closed at June 30 was $159.8 million for 1,000 homes, compared with 1989's first half backlog of $201.9 million for 1,219 homes.

Richard C. Kraemer, president and chief operating officer of the Tempe-based homebuilder, said, ''The decrease in net income is attributable to an overall reduction in gross margins, especially in California, and fewer California closings.

''These results reflect more intense competition in each of our home building markets, as well as later-than-expected new product introductions in California,'' he said.

''Sales in the first half have continued at a good rate in both Arizona and the Southeast,'' he said. ''We anticipate increased California sales as new subdivisions open during the second half of the year.''

Gary A. Rosenberg, chairman and chief executive officer, said, ''Second quarter and first half earnings are not indicative of anticipated results for the entire year.

''While it is possible that analysts' estimates in the $3 per common share range may not be achieved, we do not expect further reduction in UDC's regular quarterly common distribution,'' he said.

''We expect new product introductions in California to be increasingly reflected in sales, closings and earnings during the next several quarters '' Rosenberg said. ''However, we expect earnings will remain low in the third quarter and then increase significantly in the fourth quarter.''

''Barring additional reduction in overall demand in our markets, or further margin erosion, UDC expects to continue the present quarterly distribution of 50 cents per common share.

''Furthermore, although last August's partial recapitalization has had significant negative impact on second quarter and first half earnings per common share, we believe it will have a positive impact on earnings per common share in the future,'' he said.

UDC builds quality upscale family and adult residential communities in six Sun Belt states, with operations in Arizona, California, Florida, Georgia, North Carolina and South Carolina. Its common and preferred shares are traded on the New York Stock Exchange.

IRVINE, CA (JULY 27) BUSINESS WIRE - AST President and Chief Executive Officer Safi Qureshey has been invited by U.S. Department of Commerce Secretary Robert A. Mosbacher to participate in a business development tour of Indonesia and Thailand.

The tour is designed to promote U.S. export and investment opportunities in key Southeast Asia markets. It also is aimed at promoting U.S. economic interests in the face of growing competition from Japan and Europe.

The business tour, from Aug. 1 to 6, focuses on sectors of U.S. business which have the greatest opportunity for development, including computers and peripherals, electrical power equipment and engineering services.

Qureshey, a representative of the U.S personal computer industry, will join six other chief executive officers of U.S. corporations invited on the trip. Tour members will accompany the secretary in meetings with senior government officials and industry leaders to discuss trade and investment policies of concern to the U.S. private sector.

The group will meet with Indonesian President Suharto and other senior officials and industry leaders. In Thailand, meetings are planned with Prime Minister Chatichai Choonhavan, the Thai Board of Investment and the Federation of Thai Industries.

''Secretary Mosbacher considers this trip an important step in the U.S. government's efforts to help American industry compete in Southeast Asia '' Qureshey said. ''I look forward to this opportunity to help maintain U.S. competitiveness around the world.''

CEOs also scheduled to participate in the business development mission are Charles Johnson of General Datacomm Industries Inc., Middlebury, Conn.; William Atwater of Foster Wheeler International, Clinton, N.J.; Kenneth Lay of Enron Corp., Houston, Texas; David Tappan of Fluor Corp., Irvine,

Calif.; Robert Valentini of Bell Telephone Co., Philadelphia, Pa.; and Lee Thompson of Smith Corona Corp., New Canaan, Conn.

AST is a leading worldwide manufacturer of high-performance computing solutions. The AST systems product line ranges from cost-effective Bravo systems to the 386-based and i486 Premium line of personal computers, including the new EISA bus architecture.

AST Research Inc. corporate headquarters are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif. 92713-9658. Telephone: 714/727-4141.

#90208b0081 07/27/1990 ~Business Wire

SAN MATEO, Calif. (JULY 27) BUSINESS WIRE - Bay View Capital Corp. (NASDAQ/NMS:BVFS) holding company for Bay View Federal Bank, announced Friday that it has amended its Dividend Reinvestment Plan to eliminate the 5 percent discount for purchases made with optional cash payments.

The new plan amendment will be in effect for the August 1990 optional cash purchase period. The 5 percent discount remains in effect for purchases with reinvested dividends.

Robert E. Barnes, Bay View's president and chief executive officer, said the change in the plan is intended to reduce the potential for arbitrage purchases of plan shares, which could result in downward pressure on Bay View's stock price.

''The plan continues to provide stockholders a simple and convenient way to purchase more shares, without paying brokerage commissions, service charges or other fees,'' noted Barnes.

Since the inception of the plan in the first quarter of 1990, Bay View has issued a total of 777,227 shares under the plan, at a weighted average price of $16.27 per share. Of these shares, 554,635 were issued subsequent to June 30, at a price of $15.91 per share.

Bay View also announced that it has withdrawn its proposed public offering of $31.25 million of convertible preferred stock. Barnes said that the withdrawal was due primarily to continued volatility in the market for financial institution stocks.

''Bay View's equity to assets ratio was 6.32 per cent at June 30, 1990. Our subsidiary, Bay View Federal Bank, substantially exceeds all of the

fully phased-in regulatory capital requirements. With trading prices at current levels, the issuance of convertible preferred stock is not attractive at this time,'' he added.

The board of directors of Bay View Capital Corp. today also adopted a Stockholder Protection Rights Plan and declared a dividend of one Right on each outstanding share of Bay View Capital Corp. Common Stock. The dividend will be paid on August 6, to stockholders of record on August 6.

The Rights Plan was not adopted in response to any specific effort to acquire control of the company. Rather, it was adopted to deter abusive takeover tactics that can be used to deprive stockholders of the full value of their investment.

Until it is announced that a person or group has acquired 10 percent or more of the Company's Common Stock or commences a tender offer that will result in such person or group owning 10 percent or more of the Company's Common Stock, the Rights will be evidenced by the Common Stock certificates, will automatically trade with the Common Stock and will not be exercisable.

Thereafter, separate Rights certificates will be distributed and each Right will entitle its holder to purchase one share of Common Stock for an exercise price of $55.00.

As previously announced, Bay View Capital reported consolidated earnings of $4.9 million (80 cents per share) for the second quarter of 1990, compared with $3.6 million (59 cents per share) for the second quarter of 1989. Earnings for the six months ended June 30, were $9.9 million ($1.62 per share) compared with $7.9 million ($1.29 per share) for the like period in 1989.

SEAL BEACH, CA (JULY 27) BUSINESS WIRE - Masco Corp. announced Friday the resignation of Charles Farrell as president of its Thermador division to join the Exhibit Place Inc. of Garden Grove, Calif. as managing director, chief operating officer and a member of its board of directors. The Exhibit Place is a leading manufacturer of trade show exhibits. This resignation will be effective Sept. 1.

In announcing the resignation, Masco Group Vice President James Connors said, "We are very sorry to lose Charlie Farrell, but we are pleased that under his guidance the basic direction for the future has been set, a

significant modernization of facilities has been initiated, and an extremely strong team is in place to implement these plans.

"Charlie's decision at this stage in his career to join a smaller firm close to his home and with an equity position is understandable, and we wish him well."

In a letter to Thermador distributors, Farrell said, "My decision to leave Thermador was based entirely on personal and investment considerations. Our strategies of aggressive upscale product development, flexible manufacturing, and selective distribution are well underway and will clearly distinguish Thermador from its competition."

Thermador is a leading manufacturer and marketer of high-end kitchen equipment. Farrell joined the company in late 1987 as president after its acquisition by Masco.

Connors indicated that a decision has not been made on a replacement for Farrell. Connors will assume Farrell's responsibilities until a successor is named.

#90208b0107 07/27/1990 ~Business Wire

SUNNYVALE, CA (JULY 27) BUSINESS WIRE - Boole & Babbage Inc. (NASDAQ:BOOL) Friday announced unaudited results for its third fiscal quarter ended June 30, 1990.

Revenue for the three months just ended was $23,105,000, up 36 percent from $17,028,000 reported in the third quarter of the prior year. Third quarter 1989 revenue is net of $1 million from a one-time sale of product distribution rights in Japan.

Net income for the three-month period was $670,000, or 17 cents per share, up 66 percent from the prior year's third quarter earnings of $403,000, or

10 cents per share. Third quarter 1989 earnings exclude net gains of $310,000, or 8 cents per share, from the sale of product distribution rights.

For the first nine months of fiscal 1990, revenue increased 33 percent to $68,654,000, compared with $51,554,000 (excluding $4.2 million) from the sale of a product's distribution rights cited above) in the comparable period in 1989. Net income was $3,431,000, or 87 cents per share, up 33 percent from the first nine months in fiscal 1989 excluding nonrecurring gains of $1,039,000, or 28 cents per share.

In commenting on the results, Han Bruggeling, president and chief executive officer said: ''We are pleased with the results of the 1990 third quarter as compared to 1989. Our base business is healthy; in fact European new product sales are up 43 percent over the comparable quarter last year, and domestic new product sales are up 24 percent over last year.

''However, we are disappointed that the integration of Avant-Garde Computing, which we acquired in February 1990, is taking longer than we had expected. As we were not able to accurately forecast the amount of Avant-Garde business that would close in this quarter, results were lower than anticipated.

''The company is taking a number of steps to expedite the Avant-Garde integration so the division will become profitable as soon as possible.''

In other news, the company announced that its European subsidiary will change its name from The European Software Co. (TESC) to Boole & Babbage Europe in October 1990. ''This name change should build even further awareness of Boole & Babbage's worldwide position in the information systems management and automation industry,'' Bruggeling remarked.

Boole & Babbage is a leading developer and worldwide distributor of software products for information systems management and automation. The company markets its products in the United States through its domestic sales organization, Empact Software, and Boole & Babbage Computer Services. Internationally, its products are distributed through Boole & Babbage Europe and distributors in Australia, Japan, the Pacific Rim and Latin America.

#90208b0109 07/27/1990 ~Business Wire

MOBILE, AL (JULY 27) BUSINESS WIRE - Altus Bank, a Federal Savings Bank (NASDQA:ALTS) reported a net profit of $0.1 million, or 1 cent per share

for the three months ended June 30, 1990, according to Chris C. DeLaney, chairman of the board.

This compares to a loss of $1.5 million, or 30 cents per share, for the three months ended June 30, 1989.

For the six month period ended June 30, 1990, Altus reported a net loss of $2.6 million, or 53 cents per share, compared to a net loss of $6.0 million, or $1.23 per share, for the same period during 1989.

DeLaney explained that the 1990 improvement in results as compared to 1989 were primarily attributable to a significant decrease in non-interest expense combined with an improvement in net-interest income. Non-interest expense decreased by $5.9 million, or 34 percent, and $8.3 million, or 24 percent, for the three and six month periods ended June 30, 1990, respectively, as compared to the same periods during 1989.

This decrease has been achieved through the implementation of strict cost control measures combined with a significant reduction in staff due to the consolidation of certain operations.

Net interest income increased $2.9 million, or 141 percent for the second quarter of 1990 as compared to 1989. The reduction of non-performing assets by approximately $30 million during the past 12 months has significantly contributed to this increase.

Partially offsetting the improvement in non-interest expense and net interest income was a $6.0 million decrease in gain on sale of real estate during 1990 as the second quarter of 1989 included the sale of three large shopping center projects by the company's real estate development subsidiary.

The key elements included in our plan to achieve these objectives are a reduction in operating expenses and an improved net interest margin,'' said DeLaney. ''The second quarter results indicate that although there is a significant amount of work still to be completed, actions taken to date are having very positive effects.''

Altus Bank is headquartered in Mobile, and has 43 branches statewide. As of June 30, 1990, Altus reported total assets of $2.2 billion and total deposits of $1.2 billion. Deposits are insured up to $100,000 by the Federal Deposit Insurance Corp. and backed by the full faith and credit of the United States Government.

NAPA, CA (JULY 27) BUSINESS WIRE - Napa Valley Bancorp (NASDAQ:NVBC), reported Friday net earnings for the second quarter of 1990 of $851,000 or 27 cents per share compared to $1,120,000 or 36 cents per share for the second quarter of 1989.

Year-to-date 1990 net earnings total $1,457,000 or 46 cents per share compared to $2,011,000 or 65 cents per share for the first six months of 1989. 1989 amounts have been restated to reflect the acquisition of Suisun Valley Bank on April 17, 1989, accounted for as a pooling of interests.

Per share amounts for 1989 have also beeen adjusted for a 5 percent stock dividend declared in December 1989.

Year-to-date results include after-tax gains from the sales of land held for development of $544,000 or 17 cents per share in 1990 compared to $668,000 or 21 cents per share in 1989.

Annualized return on equity for the second quarter and first six months of 1990 was 10.25 percent and 9.54 percent, respectively, compared to 16.15 percent and 14.63 percent for the related 1989 periods. Annualized return on assets was .67 percent and .59 percent for the second quarter and first six months of 1990 compared to 1.02 percent and .92 percent, respectively, for the related periods in 1989.

The company reported total assets of $511.2 million at June 30. Net loans at June 30 were $359.7 million compared to $338.9 million at March 31, 1990 and $301.9 million at June 30, 1989; deposits were $463.7 million compared to $470 million at March 31, 1990 and $425.4 million at June 30, 1989.

Napa Valley Bancorp is an independent multi-bank holding company headquarted in Napa. Its banking affiliates include Napa Valley Bank, Napa; Sonoma Valley Bank, Sonoma, Calif.; Bank of Lake County, N.A., Lakeport, Calif.; and Suisun Valley Bank, Fairfield, Calif. Napa Valley Bankcorp currently operates 17 banking offices in Napa, Sonoma, Lake and Solano Counties.

#90208b0112 07/27/1990 ~Business Wire
VANCOUVER, WA (JULY 27) BUSINESS WIRE - Pacific Telecom Inc. (NASDAQ: PTCM) reported increased revenues and net income for the three month and

six month periods ended June 30, 1990, compared to the same periods a year ago.

Net income for the second quarter 1990 was $17.9 million, or 47 cents per common share, an increase of 11 percent from the previous year. Although operating revenues included the effects of long lines intrastate rate decreases that became effective in June 1989 and March 1990, operating income increased in 1990 due to favorable out-of-period revenue adjustments and improvements in international operations associated with higher inbound message volumes and the effects of consolidation efforts.

Net income for the six months ended June 30, 1990, was $46.1 million, or $1.20 per common share, a 52 percent increase over 1989. The operating income improvement resulted from improvements in PTI's local exchange and international operations. These improvements were partially offset by lower out-of-period revenue adjustments in 1990 and the effects of the long lines intrastate rate reductions. Other income increased due to the $18.5 million pre-tax gain that resulted from the February 1990 sale of a subsidiary providing satellite-based cellular telephone and private line communication services in the Gulf of Mexico.

By action of the board of directors on July 27, 1990, a dividend of 29 cents per common share was declared. The dividend will be payable Sept. 3 1990, to shareholders of record as of Aug. 17, 1990.

WOODLAND HILLS, CA (JULY 27) BUSINESS WIRE -

(I) Reduction of exercise price of all warrants
E.N. Phillips Co. (NASDAQ:ENPQ) (the ''company'') has reduced the exercise price of all of its outstanding Class A, Class B and Class C Warrants. The exercise price and expiration of each of the classes of warrants is as follows:

(a) Each 100 Class A Warrants entitles the holder thereof to purchase one share of common stock for a period ending Dec. 31, 1990, at a price of $1.25 per share (reduced by the company from an original price of $2 per share).

(b) Each 100 Class B Warrants entitles the holder thereof to puchase one share of common stock for a period ending Dec. 31, 1990, at a price of

$1.75 per share (reduced by the company from an original price of $3 per share).

(c) Each 100 Class C Warrants entitles the holder thereof to purchase one share of common stock for a period ending April 6, 1991, at a price of $2.50 per share (reduced by the company from an original price of $4 per share).

(II) Redemption of all Class A Warrants
(a) Pursuant to the terms of the Warrant Agreement between the company and its Warrant Agent, American Stock Transfer & Trust Co., all of the Warrants are redeemable (or callable) by the company at any time prior to their conversion with a notice of redemption (or call) in writing to the warrantholders of record giving a 30-day notice of such redemption. The redemption price of the Warrants is $.001 per 100 Warrants.

The company hereby gives notice that on Aug. 31, 1990, which is 30 days from the effective date of this notice, the company shall redeem all outstanding Class A warrants. Any Class A warrants which have not been converted or exercised by 5 p.m. EDT on Aug. 31, 1990, shall expire on the books of the company and cannot be exercised.

(b) Exercise of warrants
The warrants are exercisable by tendering to American Stock Transfer & Trust Co., 99 Wall St., New York, N.Y. 10005 (the ''Warrant Agent''), the appropriate exercise price along with the Warrant certificate (with the election-to-purchase section on the reverse side of the certificate properly filled out). The company shall then issue and sell such fully paid and non-assessable shares of common stock to the Warrantholder as specified on the certificate to be tendered. Payment of the exercise price shall be made in cash or certified check or bank draft made payable to the order of ''E.N. Phillips Company.'' Effective date: Aug. 1, 1990

#90208b0124 07/27/1990 ~Business Wire
SAN JOSE, CA (JULY 27) BUSINESS WIRE - Business Bancorp, holding company of California Business Bank, N.A., announced net income of $140,000 (13 cents per share), for the second quarter of 1990 which ended on June 30, 1990.

These results compare with net income of $192,000 (19 cents per share) for

the second quarter of 1989. Average shares outstanding for the quarters ending June 30, 1990 and 1989 were 1,089,842 and 1 million, respectively.

For the six months ended June 30, 1990, Business Bancorp reported net income of $289,000 (27 cents per share) as compared with $361,000 (36 cents per share) for the like period in 1989, a decrease of $72,000 (7 cents per share).

The decrease in net income is attributed to income taxes which increased from $1,200 for the six months ended June 30, 1989 to $169,000 for the six months ended June 30, 1990. Average shares outstanding for the six months ended June 30, 1990 and 1989 were 1,089,842 and 1 million, respectively.

Total assets at June 30, 1990 were $59,542,000 as compared with $51,078,000 at June 30, 1989. Total deposits were $53,396,000 as compared with $46,132,000 and net loans outstanding were $40,808,000 as compared with $30,835,000. Total shares outstanding at June 30, 1990 and 1989 were 1,089,242 and 1 million, respectively.

Business Bancorp is a bank holding company founded in 1982. California Business Bank, N.A., is a federally chartered commercial bank with one office in the downtown area of San Jose. The bank serves the needs of businesses and professionals in Santa Clara County.

Business Bancorp had approximately 650 shareholders at Dec. 31, 1989. The common stock of Business Bancorp is traded over-the-counter and listed on the National Association of Securities Dealers Automateed Quotation System (NASDAQ). For additional information contact Richard Conniff, president and chief executive officer.

#90208b0135 07/27/1990 ~Business Wire

SOUTH SAN FRANSISCO (JULY 27) BUSINESS WIRE - Lewis Galoob Toys Inc. (NYSE:GAL) Friday reported second-quarter sales of $28,355,000, a decline of 49 percent from 1989 second-quarter sales of $56,064,000.

The second-quarter net loss after payment of the preferred dividend was $8,271,000, or 89 cents per share, compared with a net profit of $4,723,000, or 49 cents per share for the same period last year.

Revenues for the first six months of 1990 were $61,567,000, compared with $93,611,000 for the first six months of last year, a decrease of 34 percent. The net loss for the first half of the year was $9,783,000, or $1.05 per share, compared with a profit of $7,101,000, or 74 cents per

share for the same period in 1989.

David Galoob, chairman, president and chief executive officer, stated: ''The company continues to be in a very strong, highly liquid financial condition. As of June 30, 1990, the company's cash position had increased to $28.5 million, compared with $2.7 million a year earlier.

''Total bank debt as of June 30, 1990, was reduced to $6 million, down from $35.2 million a year earlier, and the company had no borrowings outstanding on its $80 million revolving credit facility.''

The company noted that results for the quarter and year-to-date were in line with its expectations for significant second-quarter and full-year losses announced earlier this month. The company attributed its performance to a continuing slow rate of domestic retail sales for its major product lines, as well as a general sluggishness in the retail toy trade.

These factors resulted in sharply reduced domestic shipments, causing a shift in the mix of sales between domestic and international customers. During the second quarter of 1990, international shipments, which generate slightly lower profit margins than domestic shipments, comprised 60 percent of the company's total sales, compared with 25 percent for the same period in 1989.

On June 29, 1990 the United States District Court, Northern District of California, issued a preliminary injunction prohibiting the company from selling its Game Genie product, pending trial of the company's litigation with Nintendo of America Inc. The company's appeal of the preliminary injunction order is expected to be heard in September.

If the company is permanently enjoined from selling Game Genie, then a future charge to earnings of approximately $3 million would occur.

Lewis Galoob Toys Inc. designs, develops, markets and distributes a variety of quality toy products sold worldwide.

INDIANAPOLIS (JULY 27) BUSINESS WIRE - Indiana Energy Inc., the holding company for Indiana Gas Company Inc., and other subsidiaries, reported consolidated earnings available for common stock for the three months ended June 30, 1990, the third quarter of the current fiscal year, of $269,000.

This compares with a loss of $1,413,000 for the like period in 1989. Earnings per average common share for the quarter were 2 cents, compared with a loss of 13 cents in 1989.

The increase in earnings for the quarter, when compared with the like period last year, is primarily the result of reductions in provisions for certain operating reserves and increased earnings from the company's subsidiary, EnTrade Corp., a gas marketing company.

For the 12 months ended June 30, earnings per average share of common stock were $2.05, compared with $1.92 for the like period in 1989.

DALLAS (JULY 27) BUSINESS WIRE - L&N Housing Corp. (NYSE: LHC) announced Friday operating results for the second quarter of Fiscal 1990.

Operations for the quarter ended June 30, 1990, resulted in a net loss of $704,000, or 32 cents per share, as compared to net income of $899,000, or 41 cents per share, for the same period last year. Net income for the six months ended June 30, 1990 amounted to $151,000, or 7 cents per share, as compared to $1,755,000, or 80 cents per share, for the same period in Fiscal 1989.

During the quarter ended June 30, 1990, the Company wrote down its investments in marketable securities by $1,500,000. The write-down will not affect dividends in the June quarter since the charge cannot be recognized currently for tax purposes. The Company intends to distribute 100 percent of its taxable income in the form of dividends to its stockholders. Prior to the write-down, operations produced net income of $796,000, or 36 cents per share, in the June quarter.

On June 29, 1990, a dividend of 36 cents per share was distributed by the Company to its stockholders.

Results of the operations are summarized as follows:

	Quarter Ended June 30		Six Months Ended June 30	
	1990	1989	1990	1989
Income	$1,289,000	$1,696,000	$2,736,000	$3,319,000
Expenses	$1,993,000	$797,000	$2,585,000	$1,564,000

LOS ANGELES (JULY 27) BUSINESS WIRE - The board of directors of Anthony Industries Inc. (NYSE:ANT) Friday declared a regular quarterly cash dividend of 11 cents per share payable Oct. 2, 1990, to shareholders of record Sept. 5, 1990.

On July 24, 1990, Anthony reported earnings of $2,129,000, or 23 cents per fully diluted share, for the quarter ended June 30, 1990, on sales of $98.3 million. Earnings for the year-earlier period were $3,356,000, or 35 cents per share, on sales of $99.1 million.

Anthony Industries is a diversified manufacturer with operations in two major business segments: recreational products consisting of K2 skis, Hilton active apparel, Shakespeare fishing tackle, Anthony swimming pools, Poolsaver pool covers and Stearns water safety products; and industrial products including Simplex building materials, Shakespeare fiberglass antennas and light poles and Shakespeare monofilaments.

#90208b0199 07/27/1990 ~Business Wire

LOS ANGELES (JULY 27) BUSINESS WIRE - Lee Pharmaceuticals (ASE:LPH) reported its financial results for the third quarter ended June 30, 1990.

The company is engaged in the research, development, purchase, manufacture and marketing of a range of professional dental products and consumer cosmetic products, including nail care products, depilatories, eye care and a feminine hygiene line.

The company reported its third quarter sales volume, for fiscal year 1990 which decreased $3,117,000, or 37 percent, to $5,222,000, from $8,339,000, for the comparative quarter. The company reported a loss of $619,000, or 15 cents loss per share, during the quarter ended June 30, 1990. This compares with reported income of $160,000, or 4 cents income per share,

for the quarter ended June 30, 1989.

The loss was more than offset by the reported gain of $646,000 (16 cents income per share), from the sale of land and building. The net result of the above was reported net income of $27,000, or 1 cent income per share, for the quarter ended June 30, 1990, compared with net income of $160,000, or 4 cents per share, for the quarter ended June 30, 1989.

The decline in third quarter revenue volume of several nail extension products contribute heavily to the loss from operations, before giving effect to the gain on the sale of land and building.

The five new shades of Miss Lee Sizzling Neons which were introduced last quarter have continued to be received quite well in the marketplace.

In the fourth quarter, the company will be introducing a bonus pack marketing program to improve the sales volume. This program will provide the customers with two for the price of one in the Lee Press-On Nail category.

#90208b0209 07/27/1990 ~Business Wire

CHICAGO (JULY 27) BUSINESS WIRE - Information Resources Inc. (NASDAQ:IRIC) Friday announced record revenues from continuing operations of $39.8 million and earnings per share of 7 cents for the second quarter 1990.

Revenues for the quarter increased 19.9 percent over the second quarter 1989. The company's strong revenue growth was fueled by sales increases in its Decision Support Software (DSS) and InfoScan product lines.

Revenues for Decision Support Software were $11.4 million, an increase of 64.7 percent over the second quarter of 1989 and a gain of 37.9 percent over the first quarter of 1990.

''With the launch of SalesPartner, and continued gains with DataServer Cover Story, Executive Information, Sales Management and Financial Management Systems, I believe this is the year when people will see us as the global software powerhouse we really are,'' said Gian Fulgoni, chief executive officer.

InfoScan revenues for the quarter were a record $20.9 million, an increase of 27.9 percent over the like period in 1989, and an increase over the first quarter of 1990 in spite of the accrual of significant cross-licensing fees in that period associated with the Citicorp transaction.

BehaviorScan revenues were down from the second quarter of last year by $1.4 million, or 20 percent. ''We have a series of aggressive action plans in place aimed at turning around this perfromance,'' said Fulgoni.

''We recently announced a strategic alliance with Bases-Burke Institute, the leading provider of pre-test market forecasting services, and this relationship, as well as increased sales and service resources being put in place behind BehaviorScan, will keep this product line in the forefront of new product and media testing services so necessary to our clients.''

Net earnings, after tax, of $1.3 million (7 cents per share) for the second quarter represent an increase of 48 percent over the first quarter of 1990, and compare to a loss of $3.8 million (22 cents per share) in the second quarter of 1989.

The company also announced that it expects to conclude the previously announced sale-leaseback of its headquarters facility during the next few weeks with cash proceeds being obtained by the end of the third quarter.

Proceeds of the transaction will be used to pay down the $19.1 million in bank debt remaining at the end of the second quarter, as well as to fund expansion of its InfoScan service into drug stores and mass merchandisers and to fund the spin-off of the VideOcart business.

As previously announced, in connection with the spin-off of VideOcart Inc. the company has filed a request for an IRS letter ruling for tax-free status. The IRS has not yet completed review of the company's request,

but the company believes this review will be completed shortly.

The company anticipates that VideOcart will be spun off as planned during the third quarter.

Chicago-based Information Resources Inc. develops and maintains computerized proprietary data bases, decision support software and mathematical models to assist clients, primarily in the consumer packaged goods industry, in testing, monitoring and evaluating their marketing plans for new products, media advertising, pricing and sales promotions.

SAN FRANCISCO (JULY 27) BUSINESS WIRE - Apple Computer and others testified in hearings on House Bill HR4801, submitted by Congressman Pallone of New Jersey, and with regard to amendment to House Bill HR4873, submitted by Congressman George Brown.

Both bills call for additional funding for research on the subject of ELF

(extremely low frequency) impacts upon human health.

In testimony before the Subcommittee on Natural Resources, Agriculture, Research and Environment in the House of Representatives, Dr. David Nagel stated Apple's position calling for industry standards on ELF emissions and a consortium approach to conducting research.

Nagel, an Apple vice president, noted the ''recent indications in electromagnetic science...prompting observers that more attention should be given to the issue.''

Speaking in support of the bills, Dr. Ross Adey, a noted researcher, hoped that industry-funded research would not be the primary source of information on this subject and discouraged the practice by which government scientists are allowed to accept large personal gratuities from electric power utilities in testimony on this subject.

Adey pointed to a growing body of scientific research implicating ELF emissions impacts on human health including: activities as a cancer promoter, upon the immune system, effects upon fetal development, and epidemiological studies linking clusters of cancer with ELF fields.

Articles on this subject will appear in the November and December issues of Macworld as part of its ongoing coverage of ELF fields and personal computers.

#90208b0607 07/27/1990 ~Business Wire

NEW YORK (JULY 27) BUSINESS WIRE - REGENCY CRUISES INC. (NASDAQ/NMS Symbol: SHIP) Friday released financial results for the company's second quarter ended June 30.

Revenues for the three months ended June 30, were $29,644,000 as compared to $31,330,000 reported for the same three month period last year.

Net income for the period was $337,000, or $.01 per share, as compared to $471,000, or $.02 per share, for the second quarter last year.

Revenues for the six months ended June 30, were $51,699,000 as compared to $54,159,000 reported for the six month period last year. Net loss for the current six month period was $1,709,000, or $.07 per share, versus net income of $869,000, or $.04 per share, for the same six month period last year.

Commenting on the company's results, William Schanz, chairman and chief executive officer, stated, ''The problems we experienced earlier in the Caribbean continued to have a negative impact on earnings in the second quarter of 1990.

''More recently, the grounding of the Regent Star in Delaware Bay over the Memorial Day weekend forced the cancellation of the first week of our 4-week Philadelphia cruise program. Although the ship sustained no real physical damage from this event, revenues and expenses for the period were adversely affected. In spite of this, earnings did show improvement toward the end of the quarter.

''Furthermore, the company is presently seeking from World Pioneer, S.A. the reimbursement of expenses incurred during the immobilization of the Regent Star, which is operated pursuant to a Time Charter Agreement with World Pioneer. There is, however, no certainty that the company will succeed in its recovery efforts. World Pioneer may be deemed to be under common control with Rainbow Cruises, which recently filed a 13D disclosing a 34.7 percent interest in the company.''

SUNNYVALE, CA (JULY 27) BUSINESS WIRE - To sharpen its strategic focus and position the company for continued growth, MIPS Computer Systems Inc. (NASDAQ:MIPS) Friday announced that it realigned its management organization and consolidated operating groups.

Charles M. Boesenberg has been appointed president of the company, reporting to Robert C. Miller, chairman and chief executive officer. Headquarters operations were consolidated, and a new strategic development group was formed.

Boesenberg, 42, previously MIPS' executive vice president of marketing, will immediately assume responsibility for worldwide sales, marketing, manufacturing and service. Since joining MIPS in 1989, he has developed comprehensive product and channel strategies which have attracted an increasing number of original equipment manufacturers, value-added resellers, system integrators and distributors.

In a related move, all management systems functions have been consolidated under the direction of David G. Ludvigson, 39, previously vice president of finance and chief financial officer. He has been promoted to executive vice president and chief financial officer with responsibiity for finance, legal, human resources and management information systems. Ludvigson reports directly to Miller.

Miller also announced the formation of MIPS Technology Development Group, and organization chartered to develop relationships with emerging technology companies strategic to MIPS' business. William D. Jobe, 52, previously executive vice president of field operations, has been named president of the group, reporting to Miller.

Separately, Miller announced that Jake Vigil, senior vice president, engineering and manufacturing, will be leaving MIPS to pursue other personal and business interests. He will remain with the company through the end of the year to complete key projects underway. Effective immediately, Miller will lead the R&D organization until a successor is named.

Also reporting to Miller will be Dr. John Hennessy, chief scientist and founder, and Dr. Edward ''Skip'' Stritter, vice president business development and founder.

MIPS Computer Systems Inc. is a leading supplier of technology based on RISC, including computer systems, optimizing compilers, and technology products. The company markets a line of high-performance computer systems based on RISC, from desktop workstations to deskside and data center servers. MIPS sells its systems through OEMs, VARs and system integrators worldwide.

LOS ANGELES (JULY 27) BUSINESS WIRE - The Kushner-Locke Co. (NASDAQ:KLOC) disclosed Friday it has signed a major distribution deal with the World International Network (WIN) to exclusively distribute several of Kushner-Locke's current and recent television productions worldwide through WIN's consortium of 16 leading international broadcasters, it was jointly announced by Kushner-Locke co-chairmen Peter Locke and Donald Kushner and World International Network founder, Chairman and Chief Executive Officer Larry Gershman.

World International Network will initially distribute two Kushner-Locke network ''movie for television'' productions: ''Murder C.O.D.,'' a two-hour NBC movie starring Patrick Duffy and William Devane, produced in association with Perry Lafferty Productions and ''Cops and Robbers,'' a two-hour movie for NBC, starring Ray Sharkey and Edward Asner.

''Cops and Robbers'' recently completed principal photography and is based on the headlined true story of the record-breaking $25 million Boston Depositors Trust Bank robbery. WIN will also distribute the one-hour television special of Martin Tahse's production of ''Aladdin's Lamp,'' starring Barry Bostwick and Richard Kiley and based on the classic fairy tale, which will air domestically on The Disney Channel.

''We are extremely pleased,'' commented Locke and Kushner, ''to be partnered with World International network for the distribution of these productions.''

Locke and Kushner further remarked, ''Through our new distribution pact we expect not only to increase our presence in many foreign marketplaces, but also take advantage of the direct access to a major group of potential co-production partners around the world. We believe this is a particularly fertile area and one which well complements our plans for continued growth.''

In making the announcement, Gershman stated: ''I am very excited to join forces on the distribution of various Kushner-Locke television productions. The company is an important supplier of quality product and I believe that we can derive great benefits through our combined efforts in its foreign distribution. I am looking forward to what I am confident will prove a mutually rewarding relationship.''

World International Network is comprised of 16 leading international broadcasters, including Central Independent Television (United Kingdom), Global Television Network (English Canada), ARD/Degeto (Germany), RAI (Italy), Rede Globo (Brazil), Revcom (France, central England), SVT (Sweden), Australian Television Network Seven, TV New Zealand, TFI (France), Tohokushinsha Film Co. Ltd. (Japan), Univisa/Protele (Latin America), Movies TV (Holland), Ibero-Americana (Spain), Alliance (French Canada) and TWT (Southeast Asia, Middle East and Africa).

The Kushner-Locke Co. is a publicly traded television production and distribution company providing programming for pay-cable services, first-run syndication and the major television networks.

#90208b0613 07/27/1990 ~Business Wire

SAN JOSE, CA (JULY 27) BUSINESS WIRE - A ''significant improvement'' in the accuracy of tests for illegal drugs is provided by a new scientific instrument according to toxicologist, Gary Wimbish, Ph.D.

Wimbish, director of the Institute of Forensic Medicine in Fort Worth, Texas, was part of an expert panel on human drug testing assembled by Finnigan Corp. for a news conference during the American Association for Clinical Chemistry meeting in San Francisco yesterday.

Finnigan introduced the ITS40 Witness System, described as a scientific breakthrough instrument that the company anticipates will become the ''dominant method'' for confirming drug-test results.

The Witness System is a highly sensitive, computerized GC/MS (gas chromatograph/mass spectrometer) with graphics-based software, designed for laboratories performing tests for illegal substances (normally marijuana, cocaine, amphetamines, barbituates and opiates). GC/MS is routinely used to confirm initial laboratory screening tests that indicate the presence of illegal drugs.

However, most laboratories use a type of GC/MS that is not as sensitive as the Witness System, Finnigan contends. The company's patented system can detect drugs at much lower levels and at less cost per sample than existing GC/MS, T.Z. Chu, president of Finnigan, said.

The Witness System produces a full spectrum of a drug's chemical structure similar to a complete fingerprint, Chu said. Current methods only look at parts of a drug's mass spectrum making identification less reliable.

Chu added that European authorities by and large will only accept the higher full spectrum standard for human drug tests, but the costs of performing them at the high volumes demanded by America's current drug war have been prohibitive. The Witness System economically tests at the higher standard with greater speed, Chu said.

Recent surveys of laboratories performing drug tests have indicated false negative error rates averaging 3 percent according to panelist Chris Frings, Ph.D., a consultant to businesses implementing drug-testing programs.

Frings and Wimbish both said errors are almost always false negatives, which indicate a person is drug free when drugs are actually present.

Finnigan's clinical marketing manager, Mark Uhrich, said the Witness System reduces these false negatives by finding drugs that other GC/MS systems miss. He went on to say that the false negative problem is a

serious public safety issue.

''More than 4 million transportation workers will be tested this year. With a false negative rate of 3 percent, that could mean as many as 120,000 of these tests are incorrect,'' said Uhrich.

''On my next business trip I want to be sure that the pilot, mechanic and air traffic controller were tested accurately for drugs. By the same token I'm sure transportation workers want their tests to be accurate as well.''

Finnigan Corp. is the world's leading manufacturer of mass spectrometers. Its products are widely used in government, industrial, analytical, service and university laboratories. Key applications include environmental, biochemistry, pharmaceutical, food and agricultural, chemical and petrochemical, health and forensic sciences.

Finnigan is a subsidiary of Thermo Instrument Systems Inc., headquartered in Waltham, Mass. Thermo Instrument Systems Inc. is an international manufacturer of instruments used to detect and measure air pollution, radioactivity, complex chemical compounds, toxic metals and other elements in a broad range of liquids and solids.

Finnigan is headquartered in San Jose, with manufacturing and marketing facilities in San Jose; Bremen, Germany; and Hemel Hempstead, United Kingdom.

LOS ANGELES (JULY 27) BUSINESS WIRE - LIVE Entertainment Inc. (NYSE:LVE) and its wholly owned subsidiary LIVE Home Video Inc. (formerly International Video Entertainment Inc.) announced Friday it had signed a $100 million revolving credit agreement with Credit Lyonnais Bank Nederland and Chemical Bank.

The agreement is an amendment to an existing $50 million credit facility with Credit Lyonnais. Under the increased credit line, Credit Lyonnais and Chemical will provide $60 million, with the balance of $40 million anticipated to be provided by a group of U.S. and overseas banks.

The loan is for the working capital needs, particularly the acquisition of home video film rights, of LIVE Home Video and its parent, LIVE Entertainment. The new amended agreement extends through Jan. 2, 1992.

Commenting on this announcement, Roger R. Smith, executive vice president and chief financial officer of LIVE Entertainment and David A. Mount, president and chief executive officer of LIVE Home Video, stated ''All of us at LIVE are very pleased to have a bank of the international stature of Chemical Bank become co-agent for our new expanded credit facility, joining Credit Lyonnais with whom LIVE has had a long and productive relationship.

''This $100 million facility will assure LIVE Home Video of more than sufficient funds to finance its continuing growth and remain by far the largest independent home video company. Credit Lyonnais and Chemical share an in-depth knowledge of our industry, and we are extremely pleased by this expression of confidence in our company.''

LIVE Entertainment is a diversified entertainment software supplier, distributor and retailer, with headquarters in Los Angeles, and is the parent company of Los Angeles-based home video supplier, LIVE Home Video; Minneapolis-based rackjobber Lieberman Enterprises Inc.; the LIVE Specialty Retail Group, with headquarters in Milford, Mass., which includes Strawberries Records, Tapes & CDs and the Waxie Maxie music chain; and indirect subsidiary VCL/Carolco Communications GmbH, a home video distributor based in Munich, Germany.

OSHKOSH, WI (JULY 27) BUSINESS WIRE - C.F. Hyde, chairman and CEO of Oshkosh B'Gosh Inc. (NASDAQ:GOSHA) Friday announced that consolidated net sales for the quarter ended June 30, 1990 were $66.4 million, a 24.4 percent increase over the $53.3 million in net sales for the same period in 1989.

Net income for the quarter was $5.0 million, up slightly from the $4.7 million net income earned during the second quarter in 1989.

For the six months ended June 30, 1990, consolidated net sales and net

income were $153.4 million and $13.7 million respectively. For the same period in 1989 net sales were $143.9 million and net income was $15.3 million.

Hyde stated that as a result of the sluggish retail climate the company expects sales for the second half of 1990 to be relatively flat when compared to 1989.

#90208b0629 07/27/1990 ~Business Wire

ST. PETERSBURG, FL (JULY 27) BUSINESS WIRE - Florida Federal Savings Bank Friday announced that the bank plans to record a loan loss provision of $36.3 million for the fourth quarter of its 1989-1990 fiscal year.

Slightly less than half of the $36.3 million loan loss provision to be recorded in the June quarter is for losses and costs related to resolution of the student loan matter.

Slightly more than half of the $36.3 million provision is for an increase in general reserves.

At March 31, Florida Federal had $1.3 million of equity capital. When the additional $36.3 million loan loss provision for the June 1990 quarter is officially recorded, it will eliminate remaining shareholder equity.

Florida Federal will add $17.5 million to its previous student loan loss reserve, which was raised to $35.0 million at the end of the preceding quarter (ended March 31). For fiscal years 1988-1989 and 1989-1990, Florida Federal will have recorded a total of $54.3 million in student loan loss provisions.

Court-ordered restitution and fines and a civil settlement providing for additional restitution and release from further civil claims have amounted to $20.2 million.

Florida Federal's management and board were required to increase general reserves by Office of Thrift Supervision (OTS) examiners who recently completed a regularly scheduled examination of Florida Federal. Chief Executive Officer John W. Sapanski said that examiners found the bank's existing reserves for performing assets, as a group, to be more than adequate.

With the provision to be recorded for the June quarter, Florida Federal's loan loss reserves will total $83.0 million (including $51.7 million for

student loans).

At June 30, Florida Federal's nonperforming assets (other than student loans) amounted to $140 million, down from $188 million one year ago. Since April 1988, the bank has disposed of, returned to earning status, or negotiated contracts to sell approximately $192 million of nonperformers.

Florida Federal directors approved disclosure of the loan loss provision, prior to the release of full financial results for the June quarter and 1989-1990 fiscal year, at their regular monthly meeting on July 24. Sapanski said that the bank currently expects to release complete, audited financial statements for both periods in late September.

(Florida Federal engaged a new independent auditing firm, KPMG Peat Marwick, in June.)

Sapanski also said that Florida Federal is encouraged by the continued interest of investors who may infuse capital into Florida Federal if an acceptable agreement can be reached with regulators. ''We hope to qualify for the new accelerated resolution program,'' he said.

The purpose of the accelerated resolution program announced by regulators on July 10 is to lower the cost of S&L resolutions by marketing and arranging the sale/recapitalization of severly undercapitalized thrifts before they are placed into conservatorship.

To qualify, an institution must have franchise value, stable operations, and an acceptable management structure. Such thrifts will be marketed to bidders through the combined efforts of the thrift's management, the OTS, and the Resolution Trust Corp. (RTC).

After bid proposals are submitted and the most cost effective buyer is identified, the institution would be--in rapid succession--closed by the OTS; passed through receivership by the RTC; and reopened immediately by the buyer with no disruption in customer service. All deposits would remain insured up to $100,000 per account.

The ''buyer'' of a thrift in the accelerated resolution program ''purchases'' the institution by infusing sufficient capital to meet FIRREA requirements into the thrift that has been ''bought.''

Former shareholders do not receive any money from the ''buyer'' since their ownership interest (equity capital) would have been completely expended prior to ''sale'' and recapitalization under the accelerated resolution program.

#90208b0637 07/27/1990 ~Business Wire

NORTHBROOK, IL (JULY 27) BUSINESS WIRE - General Binding Corp. (NASDAQ:GBND) Friday announced that second quarter sales increased 11 percent to $79,979,000 from $71,873,000 for the 1989 second quarter. Earnings for the quarter fell 11 percent to $5,004,000 or 31 cents per share compared with $5,598,000 or 35 cents per share in the year ago period.

For the first half sales increased to $155,615,000, a 12 percent increase over the $139,157,000 reported in 1989. Earnings for the first half decreased 8 percent to $8,918,000 or 56 cents per share compared with $9,707,000 or 61 cents per share for the 1989 first half.

GBC President and Chief Executive Officer Rudolph Grua attributed the Company's lower earnings to slow sales growth that did not support the Company's higher expense ratios. He said sales of the Company's supply products are relatively strong, but machine sales have been below expectations. The Company has significantly reduced expenses and will introduce new binding and laminating equipment during the third quarter. As a result, GBC anticipates the second half of 1990 will show improvement over performance in the 1990 first half. GBC is an international manufacturer and marketer of business machines and related supplies. The Company's binding, laminating and paper shredding systems are used worldwide in the business, commercial, education and government markets. GBC products are marketed under the GBC, Shredmaster and U.S. RingBinder names.

#90208b0639 07/27/1990 ~Business Wire

COSTA MESA, CA (JULY 27) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), the leading supplier of computer backup products, Friday announced revenues of $101.4 million for the fiscal 1990 third quarter ended June 29, 1990 compared to $50.5 million recorded in the comparable fiscal 1989 third quarter.

The third quarter consolidated results include the acquisition of Cipher Data Products Inc.

Net income for the quarter was $962,000 compared to $4.2 million reported in the third quarter of fiscal 1989, and reflects Cipher acquisition interest expenses booked in the quarter. Earnings per share are reported at 7 cents, compared to 31 cents earned in the same 1989 period.

For the nine month period ended June 29, 1990, revenues grew 52 percent to $200.5 million from $131.7 million for the comparable period of 1989. Nine month earnings of $8.5 million, or 62 cents per share, vs. the $11.1 million, or 84 cents per share, in the same nine month period of the prior year, reflect the Cipher acquisition interest charges incurred in the third quarter.

During the third quarter, Archive completed its acquisition of Cipher. Based in San Diego, Cipher is a leading supplier of 1/2 inch reel-to-reel and 3480 cartridge tape drive products.

In business since 1968, Cipher completed several acquisitions itself in the past five years, including its purchase of Irwin Magnetic Systems of Ann Arbor, Mich., a leader in the 1/4 inch minicartridge market, and Optimem of Mountain View, Calif., a leading American manufacturer of write-once optical disk drives.

As a result of the acquisition, Cipher and its subsidiaries Irwin and Optimem join Maynard, Archive Technology and ARDAT as Archive companies.

''Once the acquisition was completed, we moved rapidly to integrate the Cipher companies into the Archive organization with an emphasis on reducing corporate overhead, bringing expenses in line with revenues, combining manufacturing operations, reducing inventories and receivables and consolidating facilities,'' stated D. Howard Lewis, Archive chairman, president and CEO.

''Integration of the two companies is going well and is ahead of schedule '' commented Lewis. ''We must keep in mind that, although we initiated major cost saving steps in the third quarter, we will not see a significant effect on expenses until the next quarter.

''Cipher had earlier been feeling the effects of a general slowdown in the minicomputer systems market. However, the business conditions at Cipher have improved this quarter.

''Customers such as Digital Equipment Corporation, Datapoint and Olivetti are showing interest in the company's latest products and engineering developments,'' noted Lewis.

''Orders for the ARDAT DAT (Digital Audio Tape) drive continue to increase as several customers completed their evaluation of the recently-introduced 1.35 GByte capacity tape drive,'' Lewis said. The ARDAT DAT drive is the

standard backup device being designed into the newest systems of many of the company's major OEM customers.

''Earlier in the year, we strategically combined Maynard Electronics and the Archive Data Storage Division,'' stated Lewis. ''We are feeling the positive effedts of this combination as Maynard continues to make strong revenue and earnings contributions to Archive.''

Maynard is currently constructing a new 93,000 square foot facility near Orlando, Fla. scheduled to open in October that will allow Maynard to grow with the demand for its popular reseller products lines.

Founded in 1980, Archive Corp. today is the leading manufacturing and supplier of data storage products to original equipment manufacturers and reseller.

Archive and its companies offer a complete selection of drives and subsystems for ecomical computer data storage for minicomputers, workstations, multi-user systems and personal computers.

NAUGATUCK, CT (JULY 27) BUSINESS WIRE - The Eastern Company Friday reported a second quarter loss of $533,000, or 28 cents per share on sales of $16,800,000.

This reflects the abnormal costs associated with the previously announced phaseout of the malleable iron casting operation at its Alloy Foundries division. Last year's second quarter earnings were $634,000, or 34 cents per share on equivalent sales of $16,800,000.

R.G. McMillen, chairman of The Eastern Company, stated, ''Malleable iron has sustained heavy losses from some time and has continued unfavorable earnings forecasts. We do not anticipate significant additional closing costs. This phaseout will strengthen additional closing costs. This phaseout will strengthen the company's longer term performance, and it is noteworthy that a good earnings improvement from continuing operations was made on a year-to-year basis.''

'The current portion of our program to invest in further automation to increase capacity and productivity at our Frazer & Jones division is on schedule and the equipment will be operational in the third quarter. The

division is the leading producer of roof security fasteners for the underground mining industry, for which continued strong demand is forecast.''

McMillen concluded, ''Although business conditions are somewhat unsettled, with some softening of incoming orders for construction materials and other security products, we are optimistic about the balance of the year.''

JACKSON, MS (JULY 27) BUSINESS WIRE - LDDS Communications Inc. (NASDAQ/NMS: LDDSA) announced Friday that it has filed a Registration Statement with the Securities and Exchange Commission relating to the offering of $50,000,000 principal amount of convertible subordinated debentures and 1,400,000 shares of common stock.

Of the shares of common stock being offered, 1,301,272 are being sold on behalf of a selling shareholder, Heller Financial, Inc., and 98,728 are being sold by the company.

The company intends to use substantially all of the net proceeds it receives from the offering to repay long-term debt, which was incurred primarily in connection with acquisitions.

Managing underwriters for the offering are Prudential-Bache Capital Funding, The Robinson-Humphrey Company, Inc. (books), J.C. Bradford & Co. and Morgan Keegan & Company Inc.

LDDS is one of the largest regional long distance companies in the United States and provides long distance service to customers located in 12 contiguous states in the South and Midwest. The company offers its customers 24-hour station-to-station long distance service to all points in the U.S. and many foreign countries.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the Registration Statement becomes effective.

This shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such State.

#90208b0650 07/27/1990 ~Business Wire

SALT LAKE CITY (JULY 27) BUSINESS WIRE - Questar Corp. (NYSE: STR) said improved exploration and production results, including a significant increase in oil and gas reserves, offset the effects of warmer-than-normal weather on earnings during the first half of 1990.

Questar's consolidated net income was $4,630,000, or 23 cents per share, during the second quarter of 1990 and $33,603,000, or $1.68 per share, for the first six months of the year.

A year earlier, the integrated energy company earned $4,708,000, or 23 cents per share, during the second quarter and $32,903,000, or $1.70 per share, during the six-month period.

The company had 19.7 million average shares of common stock outstanding through June 30, 1990, compared with 19.1 million a year earlier.

''One of our primary 1990 objectives is to continue strengthening our exploration and production performance, which is critical to Questar's growth,'' said R.D. Cash, Questar chairman, president and chief executive officer.

''We are pleased with our progress so far, particularly with a 28 billion cubic feet (Bcf) equivalent increase before production in our exploration and production affiliates' gas reserves through the first half of the year.

Combined earnings for Questar's three exploration and production affiliates increased 30 percent during the second quarter and 44 percent for the first six months of 1990 compared with year-earlier totals.

The companies -- Wexpro Co., Celsius Energy Co. and Universal Resources Corp. -- had net income of $3,044,000 during the second quarter of 1990 after earning $2,343,000 in the year-earlier period. Six-month earning totals were $7,487,000 for the 1990 period and $5,187,000 for the previous year.

Lower depreciation rates and increased production associated with the reserve additions tempered the impact of falling oil prices during the second quarter. Wexpro had higher net income from gas-development drilling activities in the greater Green River Basin region of southwestern Wyoming.

In total, Universal Resources and Celsius Energy added 28 Bcf equivalent

of reserves through acquisitions and drilling during the first six months of 1990 at an average cost of less than $4 per barrel equivalent, or approximately $.65 per Mcf.

The two companies purchased 15 Bcf equivalent of reserves, primarily in the Midcontinent region. Approximately 11 Bcf of reserve additions resulted from four exploratory wells in Colorado and Wyoming, along with other drilling activities. Celsius Energy and Universal Resources had 150 Bcf equivalent of reserves at the end of 1989.

Oil production during the first half of 1990 fell 9 percent due to the normal decline of older fields while prices averaged 13 percent higher than a year earlier.

Gas volumes marketed by Universal Resources increased 35 percent to 20 million decatherms during the six-month period.

Questar Pipeline Co., an interstate natural gas transmission subsidiary, had net income of $2,526,000 during the second quarter of 1990 compared with a year-earlier total of $2,729,000. Net income for the first half of 1990 was $12,709,000, surpassing the $11,530,000 for the comparable 1989 period.

The pipeline's first quarter 1990 earnings had benefitted from lower transportation charges from other pipelines as well as recovery of costs associated with restructuring of gas-purchase contracts.

Questar Pipeline's deliveries to Mountain Fuel declined 5 percent in the second quarter and 13 percent for the first half of 1990. Temperatures in the utility's service area, as measured in degree days, were 11 percent warmer than normal during the first six months of 1990 and 14 percent warmer than for the 1989 period.

Transportation of gas on Questar Pipeline's interstate system increased 7 percent during the first six months of 1990, continuing the steady growth of recent years.

The warmer temperatures were the major reason for Mountain Fuel's $3 million net income drop for the six-month period. The company's six-month 1990 net income was $15,234,000 compared with $18,297,000 a year earlier. The utility reported a $92,000 loss for the 1990 second quarter due to higher operating costs compared with an $828,000 profit during the comparable year-earlier period.

Residential and commercial sales, which are most sensitive to temperatures and account for two-thirds of the utility's deliveries, increased 5 percent during the second quarter but were 7 percent lower for the first six months of this year.

Industrial deliveries were 17 percent higher during the second quarter and 11 percent higher year to date, reflecting an improving regional economy and conversions to gas for environmental reasons.

Mountain Fuel's customer growth continued to be above average for gas utilities, increasing 3 percent over the 12-month period to 489,000 on June 30, 1990.

Questar's other operations reduced their second quarter loss from $1,192,000 in 1989 to $848,000 during the current-year period. The six-month loss also dropped from $2,111,000 in 1989 to $1,827,000 this year.

SEOUL (JULY 27) BUSINESS WIRE - Daewoo Corporation announced Friday that it has entered into a joint venture with two Philippine companies to build and operate a bus assembly plant on the outskirts of Manila.

Daewoo Corporation and the two Philippine companies, First Philippine Holding Corporation and Westmont Asia Motors Corporation, will invest a total of US$10 million in the new company. Daewoo will hold 40 percent of the equity in the new venture, and First Philippine Holding and Westmont Asia Motors will have 40 percent and 20 percent shares, respectively.

Construction of the new plant will start this October, and the plant will open 12 months later. The new plant will assemble about 600 highway buses per year. They will be assembled from kits in semi-knockdown form manufactured in Korea by Daewoo Motor Co., Ltd., a 50-50 joint venture between Daewoo Corporation and General Motors of the United States.

The contract was signed in Manila today by Young S. Yoon, president of Daewoo Corp., Oscar Lopez, chairman of First Philippine Holding, and Charles Lee, chairman of Westmont Asia Motors.

''The new company will begin by concentrating on the local market, although exports are a possibility in the future,'' said Yoon.

Daewoo Corporation has already supplied about 100 fully-assembled Daewoo Motor buses to several Philippine tourism companies over the past nine months.

Daewoo Corporation, which recorded 1989 sales of US$7 billion, is the trading and construction arm for the Daewoo Group, which is engaged in a broad range of manufacturing and financial services. The group's total sales in 1989 were some US$20 billion. Daewoo Corporation is the parent company of a number of Daewoo Group companies.

FRAMINGHAM, MA (JULY 27) BUSINESS WIRE - The board of directors of Dennison Manufacturing Co. Friday declared a quarterly dividend of $.28 per share on company common stock, payable on Sept. 10, 1990 to shareholders of record on Aug. 10, 1990.

As previously announced, on May 24, 1990 the board redeemed all of the rights issued and outstanding under the terms of Dennison's Rights Agreement, dated April 23, 1986, for $.05 per right. The payment was made to holders of record of Dennison common stock as of May 24, 1990. Dennison's board of directors then adopted a new Rights Agreement.

The dividend declared today has been reduced from the amount of the company's most recent quarterly cash dividend by the $.05 per share paid in redemption of Dennison's old rights, as required by the terms of the company's agreement with Avery International Corp. The $.05 per share redemption payment previously made has been treated by the company as a dividend for tax purposes.

Dennison is a diversified ''Fortune 500'' manufacturer serving worldwide markets for stationery and office supplies for use in business, school and home; printing systems and fastener products for identification and control; and package decoration systems and materials.

WESTON, MA (JULY 27) BUSINESS WIRE - Eastern Enterprises (NYSE:EFU) said Friday that the Attorney General of Massachusetts has announced the submission to the state's Department of Public Utilities (DPU) of a proposed settlement of the rate increase requested by Boston Gas Co., an Eastern subsidiary.

The proposed settlement includes an annual revenue increase of $19.3 million which, if approved by the DPU, will become effective Oct. 1, 1990. This amount is approximately two-thirds of the $29.6 million increase requested by Boston Gas in its rate filing of March 15, 1990.

Eastern Enterprises is the parent company of Midland Enterprises Inc., leading barge operator on the nation's inland waterways; Boston Gas Co., New England's largest distributor of natural gas, and a Water Products Group serving municipal, commercial and industrial markets with water system components and purification systems. Eastern's 1989 net income was $56.6 million, or $2.43 per share.

#90208b0669 07/27/1990 ~Business Wire
NASHVILLE, TN (JULY 27) BUSINESS WIRE - Surgical Care Affiliates Inc. (NASDAQ/NMS: SCAF), the Nashville-based owner and operator of outpatient surgery centers announced Friday that its directors approved a two for one stock split. The stock split will be paid in the form of a 100 percent stock dividend.

The distribution of shares for the stock split will be made on Aug. 17, 1990, to stockholders of record on Aug. 10, 1990. The split will increase Surgical Care's outstanding common shares to 21,816,894 shares from 10,908,357 shares.

Joel C. Gordon, chairman and chief executive officer of SCA announced: "This action of the board is a reflection of SCA's financial and operational strength. By splitting the stock we are rewarding our shareholders with additional shares and enabling them to participate in our growth while also increasing the liquidity and the marketability of their investment."

Gordon also announced an increase in the quarterly cash dividend on common stock to be paid on Sept. 10, 1990, to stockholders of record on Aug. 31,

1990. The dividend will be increased by 33 percent from three cents to four cents per share on pre-split shares.

This dividend will be adjusted to two cents per share on the split stock. Gordon further stated the increased cash dividend will allow our stockholders to more fully participate in the growth of SCA. Management is pleased to be able to increase the cash dividend.

The stock distribution serves to emphasize the steady growth pattern of both the revenues and earnings of Surgical Care. SCA paid 25 percent dividends in September of 1987 and July of 1988 and a 50 percent dividend in June of 1989. This marks the fourth consecutive year of a stock dividend.

The outpatient surgery industry has shown exceptional growth over the past seven years and currently Surgical Care has 29 centers in 16 states with centers under development in three areas. Also, several acquisitions are under negotiations.

Surgical Care recently reported record earnings for the 2nd quarter ended June 30, 1990, and six months ended the same day. Revenues for the quarter were $29,863,605, compared to revenues of $20,116,724 for the comparable quarter of 1989. Earnings were $2,710,283, or 23 cents per share vs. $1,501,460, or 14 cents per share for the comparable quarter of 1989, an increase of 81 percent for the quarter.

#90208b0682 07/27/1990 ~Business Wire

GUERNSEY, CHANNEL ISLANDS (JULY 27) BUSINESS WIRE - Insituform Group Limited (''IGL'')((NASDAQ National Market System: IGLSF (shares); IGLWF (warrants)) Friday reported results for the first quarter ended March 31, 1990.

In Pounds Sterling Under U.K. GAAP The following results are given in Pounds Sterling under U.K. GAAP. The corresponding results expressed in U.S. Dollars under U.S. GAAP are shown in the accompanying tables. The translation is solely for convenience and should not be construed as a representation that the pounds sterling amounts actually represent or could be converted into U.S. dollars at the rate indicated.

Total revenues for the first quarter ended March 31, 1990 were 3,754,465 ($6,148,280) up 21% from 3,109,780 ($5,219,695) in the first quarter of 1989. However operating profit before income taxes, other income and exceptional items was 187,931 ($304,955) down from 383,530 ($626,500) in

the corresponding quarter in 1989. The decline is due to a weak quarter in the United Kingdom, the new consolidation of IGL Canada Limited and Action Products Marketing (Permaform) operations as well as to additional investment in patent defense and licensee support activities.

Exceptional expense of 318,728 ($523,375) was provided for warranty-related remedial work against installation contracts completed by a former licensee prior to the Company's restructuring of the territory. Consequently, the Company is reporting a net loss for the period of 296,959 ($490,923) or .03 ($.05) per share for the first quarter in 1990.

Revenue growth was primarily attributable to a 21% increase in net sales representing a 28% increase in installation sales against flat product sales. The installation sales increase reflects the consolidation of the 51% owned Canadian operation, IGL Canada Limited and the 66.66% owned Permaform manhole rehabilitation company, Action Products Marketing, offset by lower contract activity in the United Kingdom as an immediate consequence of the uncertainty following the recent water privatization.

The product sales results reflect higher net contract volume in Europe, especially Germany, Benelux, Italy and Switzerland, offset by lower contract volume in the U.K. and Japan and by first quarter delays in the plant start-up in Japan, which was commissioned in April.

Royalty income increased 20% due to higher world-wide Insituform contracting volume led by Germany reflecting the contribution of IGL's new joint venture, Insituform Brochier. Also contributing to the increase in royalty was the United States, Benelux, Canada and Italy, reflecting the contribution of Insituform Italia's new sub-licensee S3 Soncini; offset by lower volumes in Japan.

Total costs and expenses increased 31% in the first quarter primarily reflecting the increased cost of sales due to the consolidation of IGL Canada Limited and Action Products Marketing. Gross margin was not materially changed. Operating expenses increased 47% reflecting the consolidation of IGL Canada Limited's and Action Product Marketing's expenses plus increased legal expenses for patent defense and increased licensee support costs.

Other income increased 43% reflecting higher technical support and licensee consulting fees.

Michael A. Chapman, Chief Executive Officer, stated: "The first quarter results are naturally disappointing to us after several high growth quarters following our restructuring activities.

''Past inadequacies of a former licensee have recently come to light. We firmly believe, in this particular case, that we owe an obligation to our

clients, to our continued good name and to our trademarks to ensure the quality of certain installations completed and warranted by a former licensee prior to our restructuring. Therefore, although our inspection and testing is not yet complete, we have made provisions for this expected remedial work.

''In addition, with the privatization of the U.K. Water and Sewer Authorities last November, the new companies have been repositioning themselves to a commercial footing. During the first half of 1990, the U.K. Water and Sewer Authorities have held back on their infrastructure expenditures. We expect the release of the budgeted funds in the second half of the year, as evidenced by our U.K. subsidiary Insituform Permaline's recent receipt of several high value contract awards.''

''We can also see that our past restructuring is now paying off handsomely. In Europe, for example, our revenues increased 42% over the same period last year which is a pleasing result. The restructured territories of Germany, Italy and Benelux, however, have produced revenue growths of 500+%, 125% and 172%, respectively.

''Although the first quarter results are lower than expected, we believe it does not reflect a structural change in the market and we anticipate that we will return to our stated revenue and market growth objectives later this year,'' Chapman concluded.

Insituform Group Limited, through its wholly-owned subsidiaries, owns the world-wide rights to a system of pipeline and conduit rehabilitation known as the InsituformR Process. With more than 18,000 successfully completed contracts in over 40 countries, Insituform retains market lead, having renovated in excess of 3,700 km of pipeline to date.

By eliminating the need for disruptive excavation, the Insituform Process provides a cost-effective solution to the problem of deteriorating pipe systems. A flexible non-woven fiber tube (InsitutubeR), impregnated with a liquid resin, is inverted by water pressure through the damaged pipe and is forced firmly against the inside of the pipe.

The resin is then cured, either by hot water or high frequency light, creating a durable new structural pipe within the old.

#90208b0684 07/27/1990 ~Business Wire

BOCA RATON, FL (JULY 27) BUSINESS WIRE - Financial Benefit Group Inc. Friday reported record revenues and operating earnings for the three and six months ended June 30.

Net earnings compared with prior periods declined due to write-downs of the carrying values of certain corporate bonds.

Earnings before realized investment losses and income taxes for the three months ended June 30, 1990 increased 252 percent to $1.1 million from $309,000 for the like period in 1989. Losses from investments were $631,000 for the 1990 second quarter compared to a gain from investments of $373,000 during the 1989 second quarter.

Losses from investments for the three months included write-downs of certain securities in the Company's bond portfolio which represented a small percentage of the total portfolio.

Net earnings for the three months ended June 30, 1990 were $90,000, or two cents per share, compared with $477,000, or nine cents per share, for the three months ended June 30, 1989, a decrease of 81 percent. Revenues for the quarter increased 112 percent to $11.6 million, compared with $5.4 million for the 1989 second quarter.

For the six months ended June 30, 1990, earnings before realized investment losses and income taxes increased to $1.4 million from $53,000 for the six months ended June 30, 1989. Losses from investments for the 1990 first half, which included bond write-downs of $1.7 million, were $1.2 million compared to a gain from investments of $430,000 during the first half of 1989.

The net loss for the six months ended June 30, 1990 was $259,000 or five cents per share, compared with earnings of $278,000, or five cents per share for the 1989 period. Revenues for the first half of 1990 increased 114 percent to $20.9 million from $9.8 million for the 1989 first half.

Retirement annuity sales of Financial Benefit Life Insurance Co., a wholly-owned subsidiary of the Company, reached a record high for the six months ending June 30, 1990 of $138.1 million, a 15 percent increase over the like period of 1989.

Consolidated assets surpassed the half billion dollar mark exceeding $551 million at June 30, 1990, an increase of 39 percent since Dec. 31, 1989 and 115 percent since June 30, 1989. -0-

#90208b0685 07/27/1990 ~Business Wire

WILMINGTON, NC (JULY 27) BUSINESS WIRE - Pace Oil Co. which is owed a principle amount of $5,650,000 by City Gas and Transmission (CG&T), a subsidiary of Haben Industries (NASDAQ:HABN), has agreed Friday to subordinate its deed of trust of $2 million on CG&T's Wilmington, oil refinery.

Pace Oil has also agreed to extend the remainder of the debt on a second mortgage for one year and one day, long term. Pace Oil has an option to convert, at anytime, the remainder of the debt to Haben Industries stock at market value.

Out of the $2 million, Pace Oil will receive $1 million of the loan proceeds and CG&T will receive $1 million for operating expenses for its oil refinery. CG&T is negotiating a first mortgage loan that should close in the very near future.

A bid of $273,823 has already been received by CG&T from Yeargin Inc. of Greenville, S.C., a Raytheon Co., to put the oil refinery into operation through start up. Commencement of start up work of the oil refinery will be done following the loan closing of the first mortgage, and consist of three phases: 1) put the terminal into operation to buy and sell product locally; 2) put the blending facility into operation to make specialized products such as gasoline, jet A and JP4; and 3) put the fractionating distillation tower into operation.

All federal and state permits needed for operation of the fractionating tower start up, have been secured by CG&T. Presently, CG&T is awaiting an anticipated favorable ruling by the Wilmington Board of Adjustments stating that a special use permit will not be needed to put the fractionating distillation tower into operation. This ruling is expected at the next meeting of the Board of Adjustments, the third week of August.

Once the oil refinery is in operation, it is capable of producing 15,000 barrels a day. It should be noted that even if the facility operates at a reduced production level of 8,000 barrels a day, and because of the strategic location of the refinery, Haben/CG&T could still make $48,000.00 a day in income, according to AIM Consultants of Kingwood, Texas. The refinery intends to be in operation by mid-October, 1990.

Haben Industries recently purchased a 60 percent controlling interest in CG&T. CG&T is engaged in the marketing and refining of oil and gas

products. The company's primary products are jet fuel and NAPHTHA, diesel and industrial heating oil.

The company owns an oil refinery in Wilmington. This refinery, which is strategically located, is one of only a few refineries located on the east coast and is the only refinery in North and South Carolina. The CG&T refinery has the capacity to refine 15,000 barrels per day.

SAN ANTONIO, TX (JULY 27) BUSINESS WIRE - Valero Energy Corp. (NYSE:VLO) has completed the public offering of 4.75 million shares of common stock at a price of $15.25 per share.

Net proceeds to the company, after the underwriters' fee and issuance costs, were approximately $69 million. The offering included one million shares in Europe. Underwriters for the offering were a group managed by Shearson Lehman Hutton Inc. and Salomon Brothers Inc.

Valero intends to use the proceeds from the stock offering to finance a portion of the cost of various capital projects being undertaken by the company.

Valero Energy is involved primarily in refining high-sulfur atmospheric residual oil into premium products, principally unleaded gasoline, through its specialized refinery in Corpus Christi, Texas, and in the marketing of those products.

Through subsidiaries, Valero is general partner of and has an approximate

49 percent interest in Valero Natural Gas Partners, L.P. which owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas throughout the United States, provides third party gas transportation services, and owns 11 natural gas processing facilities.

NEW YORK (JULY 27) BUSINESS WIRE - Yeves Hentic, president of Deals Are Good Inc., a public Nevada Corp. and Charles Castelli, president of Linkon Corp. a private Delaware Corp., jointly announce their intent to merge their two entities.

Shareholders of Deals Are Good Inc., will vote on the proposed merger 10 a.m. August 6, 1990, at 220 E. 65th Street, New York, N.Y.

Hentic stated the proposed merger will enhance the position of the shareholders and be beneficial to the operations of the consolidated entity.

Linkon Corp. manufactures a complete line of voice processing products configurable from 4 - 6,144 ports with voice storage capabilities of 5 - 12,000+ hours.

The systems are modular in design and reproduce/record sound at the same bandwidth as standard telephone services.

Linkon Corp. operates a service bureau PHONE 800 & 900 Solutions Inc., which offers information providers trouble free operation at very affordable rates.

The service bureau is a dedicated MCI utility whereby MCI refers potential 800 & 900 audiotex customers.

The principals of Linkon Corp. feel the merger will add funding to place the company at a competitive advantage.

DALLAS (JULY 27) BUSINESS WIRE - Steven L. Volla, President and Chief

Executive Officer of American Healthcare Management Inc., (ASE:AHI) Friday announced the appointment of James Glenn, M.D. as Consultant Medical Director to the company, effective Oct. 1, 1990.

Additionally, Volla noted five other senior appointments as part of the company's efforts to assemble a new, seasoned management team, and he announced the selection of a site for the company's relocation to the Philadelphia area.

Dr. Glenn received his medical degree with honors from Duke University. He is Board certified in Urology and is a Fellow of the American College of Surgeons and the Royal College of Surgeons.

Dr. Glenn is presently the Executive Director of Markey Cancer Center at the University of Kentucky while concurrently serving as Director of the Council on Tobacco Research. He has served as Professor of Urology at Duke University School of Medicine, Chief of Urology at Duke Medical Center, Dean of Emory University School of Medicine, and President of Mt. Sinai School of Medicine.

Volla also announced the following immediate appointments to the company's management team:

Robert Fleming to Senior Vice President DD Hospital Operations; Mr. Fleming, who has 22 years experience in the hospital industry with multi-hospital chains, will be responsible for overseeing the daily operations of AHM's 17 facilities;

Brian Costello to Vice President DD Human Resources; Mr. Costello has been associated with Hahnemann University Hospital, Childrens' Hospital and Graduate Hospital, all major teaching facilities in the Philadelphia area; he has over 15 years experience in personnel and human resource matters within the hospital industry;

Thomas Sposito to Vice President DD Materials Management; Mr. Sposito has 20 years purchasing experience in the hospital industry, primarily in structuring national purchasing arrangements for multi-hospital chains;

Bruce Colburn to Controller DD Hospital Financial Operations; Mr. Colburn, a CPA previously associated with the New York and national offices of Ernst & Young, brings to AHM a diverse background in multi-location project audits; his experience includes strategic planning, reimbursement, consulting, and computer-related assignments for health care providers; and

Ernest Libman to Executive Director of Community Hospital of North Las Vegas; Mr. Libman has over 15 years experience in the Las Vegas hospital market, having held similar management positions at Valley Hospital and Sunrise Hospital.

In connection with AHM's previously announced plans to relocate to the Philadelphia area, Volla noted that the company will become an anchor tenant in the Valley Forge Square office complex located in King of Prussia, Pennsylvania. Volla said he expects the company to occupy its new headquarters by Oct. 1, 1990.

American Healthcare Management Inc., owns or leases 17 hospitals in 10 states with approximately 2,203 licensed beds. AHM's common stock is listed on the American Stock Exchange under the symbol AHI.

CHATTANOOGA, TN (JULY 27) BUSINESS WIRE - Signal Apparel Co. Inc. (NYSE:SIA) Friday reported net earnings of $45,000 for the second quarter ended June 30, 1990, compared with a net loss of $458,000 in the year-earlier period.

Net earnings per common share (primary) were nil in the second quarter of 1990 versus a net loss of 17 cents per share (primary) for the comparable quarter in 1989.

Net sales for the second quarter were $23,364,000 compared with $25,506,000 a year ago.

For the six months ended June 30, 1990, net sales were $46,379,000 compared with $49,793,000 for the first six months of 1989. The company reported a net loss of $224,000, or 11 cents per common share (primary), compared with net earnings of $786,000, or 21 cents per common share (primary) in the year-earlier period.

Net earnings for the 1989 period include a gain of $585,000, or 19 cents per share, resulting from a reversion of assets from a terminated pension plan and an increase of $292,000, or 9 cents per share, from a change in accounting method related to inventory valuation.

Signal Apparel Co. Inc. is engaged in the manufacture and marketing of apparel, including knit sportswear, sweaters and knit shirts for men and boys, and women's apparel. The company's common stock is traded on the New York Stock Exchange under the symbol SIA.

FORT WORTH, Texas (JULY 27) BUSINESS WIRE - Pancho's Mexican Buffet Inc. had revenues of $52,013,832 for the nine months ended June 30, 1990, compared with $48,015,292 for the same period 1989, Hollis Taylor, president and chief executive officer, announced Friday.

Net earnings for the nine months were $1,709,693 or 36 cents per share, compared with $2,337,308, or 48 cents per share, for the 1989 period.

Third quarter revenues were $18,870,713, compared with $17,404,487 for third quarter 1989. Net earnings for the 1990 quarter were $811,603, or 18 cents per share, compared with $966,728, or 20 cents per share, for like period 1989.

''During our third quarter we opened one new restaurant in Lakewood, Colorado, our third opening in the Denver market in the past year,'' Taylor said. Additionally, he said, ''No other new restaurants are scheduled to open during our fourth quarter, but we anticipate opening two new restaurants during the first quarter of fiscal 1991.''

Taylor also announced that directors of Pancho's Mexican Buffet, Inc. have declared a 15 cents per share cash dividend on the company's common stock, payable Sept. 28, 1990 to holders of record as of Sept. 7, 1990. As of July 27, 1990, 4,339,379 shares of common stock are outstanding.

The company now operates 64 restaurants in seven states--from New Orleans to Phoenix/Tuscon and north to Arkansas, Oklahoma, and Colorado.

Pancho's stock is traded on NASDAQ's National List, under the symbol ''PAMX.''

VANCOUVER, BRITISH COLUMBIA (JULY 27) BUSINESS WIRE - A software product developed and marketed by Synex will be featured in a United States-wide promotional program to be conducted by Lotus Development Corp.

The inclusion of Synex in the Lotus promotion will provide an important marketing boost for this highly acclaimed product.

''F9 The Financial Reporter provides a true hot-link between the Lotus 1-2-3 spreadsheet and the accounting system,'' said Mark Friedman, the Lotus manager in charge of this campaign. ''Applying the full power of the spreadsheet to the accounting data gives users unprecedented convenience and flexibility in report generation. Synex has developed an extremely useful product in F9 that is changing the way people prepare financial reports.''

By creating a direct link to accounting systems, F9 is useful to Lotus in marketing its spreadsheet to accountants and business managers, who are the target for this promotional program. Also included in this program are Novell Inc, Compaq Computer Corp. and five other well know companies in the computer industry.

The Lotus marketing program will include a direct mailing of product and company information to 160,000 Certified Public Accountants in the United States and a series of seminars in more than 40 American cities. The seminar series will start in August and continue into 1991.

Synex has now released versions of F9 for five of the most widely used accounting systems in the United States, and several other versions will be introduced over the balance of this year. Sales are increasing as the new versions become established in the North America-wide distribution system that Synex is assembling. By year-end, there will be more than one million potential customers for the F9 product line, which retails at US$595.

Synex is a well established software developer and marketer, with about 20 business and engineering products, and a rapidly growing list of users which now numbers more than 300,000.

SAN ANTONIO (JULY 27) BUSINESS WIRE - La Quinta Motor Inns Inc. (NYSE:LQM) announced the acquisition of a competitor lodging property in Houston for conversion to a La Quinta Inn.

The property was acquired by La Quinta Development Partners L.P., the company's recently-formed development joint venture. This is the second competitor property included in the venture for conversion to a La Quinta Inn.

The company also announced the purchase of a 100 room competitor inn in Las Cruces, N.M. The inn will be wholly owned by the parent company and converted to a La Quinta Inn.

Alan L. Tallis, senior vice president-development, reported, ''We are actively seeking lodging product suitable for conversion to La Quinta Inns. In addition to the three properties mentioned above, we have six properties or approximately 800 rooms under active negotiation or letters of intent.

''The acquisition and conversion of competitor lodging properties to La Quinta Inns is an important strategy for the company because the cost of converting inns is considerably less than the cost of new construction and it allows La Quinta to grow without adding new rooms to the market.

''Including anticipated borrowings and cash projected to be generated from operations, our new partnership will have resources of $150 million to support our growth targets for the next several years.''

La Quinta Motor Inns Inc. develops, owns and operates mid-priced limited service lodging facilities. As of July 27, there was 207 La Quinta Inns in operation in 29 states.

NEW YORK (JULY 27) BUSINESS WIRE - King World Productions Inc. will handle all overseas sales of its own properties directly through its own foreign sales division, King World International, effective immediately.

The announcement was made Friday by Fred Cohen, president of King World International. For the past three years King World has engaged Buena Vista International, a division of the Walt Disney Company, as its foreign sales representative.

Canadian sales will continue to be handled by William Cooke Enterprises of Toronto. King World International will continue to operate in New York under the supervision of Cohen.

In recent months, King World has greatly expanded its catalogue of properties available for foreign sales. New properties are Monopoly - a half hour game show based on the world's most popular board game and currently airing on the ABC television network in the United States; the Arts & Entertainment Revue - a one hour-series which explores the arts and entertainment worldwide.

The Arts & Entertainment cable channel's signature series has already profiled reowned guests such as Morley Safer, The Neville Brothers, actor Robert Morse and author E.L. Doctorow; Instant Recall - a daily half-hour strip anchored by former NBC news journalist John Palmer, which focuses on significant events, past and present.

These properties join the stellar line up of Wheel of Fortune, Jeopardy!, The Oprah Winfrey Show, Inside Edition, Sherlock Holmes, Little Rascals and King World's remaining catalogue of classic feature films.

Under the auspices of King World International, the company also intends to become an active player in acquiring foreign distribution rights to properties from outside producers. King World has successfully sold Night Heat, the RSL Entertainment production in association with Grosso-Jacobson

for CBS network, throughout the world. The company also plans to participate in international co-productions.

Wheel of Fortune is currently seen in over 20 countries and is the most watched game show in the world. Jeopardy! is licensed to 11 countries. The Oprah Winfrey Show is currently being telecast in such territories as Japan, the United Kingdom, the Netherlands, New Zealand and Poland among others. Inside Edition is carried nightly in the United Kingdom, Canada and Japan.

King World is the leading distributor of first run programming, including Wheel of Fortune, Jeopardy!, and The Oprah Winfrey Show, the three highest rated series in first run syndication, and Inside Edition, the sixth highest rated syndicated strip which the company also produces.

King World also distributes its own library of 68 feature films and 210 television programs, and through its barter subsidiary, Camelot Entertainment Sales Inc. sells national advertising for King World and The Disney Co. television programming.

In addition, King World is the owner of WIVB-TV, the CBS affiliate in Buffalo, N.Y.

#90208b0716 07/27/1990 ~Business Wire

SHELTON, CT (JULY 27) BUSINESS WIRE - Shelton Bancorp Inc. (NASDAQ:SSBC), the parent company of Shelton Savings Bank, announced Friday that net income for the fourth quarter ended June 30, 1990, was $205,000, or 18 cents per share, marking an unbroken string of profitability in each of the last 32 quarters.

Net income for the year ended June 30, 1990, was $1.1 million, or 94 cents per share. During the same periods last year, the company's net income was $210,000, or 19 cents per share, for the quarter and $1.5 million, or $1.32 per share, for the year.

Given that the company's real estate development projects were in the planning and development phase, there was minimal sales activity in fiscal 1990. As a result, the company's earnings from real estate sales fell from $1 million in 1989, to only $40,000 in 1990.

Although the company's earnings earnings from traditional banking activities increased by $333,000, or 22 percent, the sharp drop in

earnings from real estate sales caused a decrease in net income for the year.

Commenting on the company's operating results, Kenneth E. Schaible, president and treasurer, stated that, ''During the last 12 months we have had to confront the same problems plaguing all of New England's banking industry, including a very sluggish real estate market, artificially high interest rates, and a lackluster regional economy.

''These problems resulted in our experiencing an extremely low level of loan demand, a slight decline in the net interest margin and an increase in non-performing assets. In comparison to the region's banking industry as a whole, we do consider our 1990 performance to have been quite strong.''

Schaible added, ''We have taken what we believe to be a very conservative position regarding classifying loans as non-performing. In keeping with this policy, we do not necessarily wait for a loan to become delinquent to classify it as a problem loan. A recent review of a construction loan on a 174 unit condominium project, that we had participated in with two other banks, indicated to us that there were reasonable doubts as the borrower's future ability to comply with the terms of the loan.

''Although the loan was not delinquent, we felt that it was prudent to transfer the loan to other real estate owned at its current estimated net realizable value of $1.5 million, and to reverse all interest income that was recognized on the loan during 1990. The impact of this action was a $269,000 charge against interest income during the fourth quarter.

''In 1990, we also increased the allowance for loan losses to a level that equals 30 percent of all non-performing loans, up from 17 percent last year. We also continued to make steady progress in moving our foreclosure actions through the courts and in disposing of the properties as quickly as possible.''

Shelton Bancorp Inc. is the parent company of Shelton Savings Bank, a Connecticut-chartered, FDIC-insured savings bank. Since its founding in 1919, Shelton Savings Bank has specialized in retail banking, with specific emphasis on residential mortgage lending. The bank is headquartered in Shelton, and operates five full service offices within eastern Fairfield and southwestern New Haven counties.

GREENWICH, CT (JULY 27) BUSINESS WIRE - For the quarter ended June 30, Dynamics Corporation of America (NYSE:DYA) had net sales of $29,013,000 and net income of $671,000, or 17 cents per share.

This compares with net sales of $31,879,000 and net income of $1,099,000, or 28 cents per share, in the second quarter of 1989, and net sales of $27,231,000 and a net loss of $401,000, or 10 cents per share, in the first quarter of 1990.

Second quarter results include $606,000 of income of CTS Corp. as compared to $825,000 of such income in the same period in 1989. This represents the company's proportionate share of CTS' second quarter earnings in accordance with the equity method of accounting required for that investment.

Per share income was computed on the basis of weighted average common shares outstanding which were 3,934,428 in the latest period and 4,067,604 in 1989.

For the six-month period ended June 30, DCA had net sales of $56,244,000 and net income of $270,000, or 7 cents per share. This compared with net sales of $60,856,000 and net income of $1,198,000, or 30 cents per share, in the first half of 1989.

During the quarter, the company purchased 27,023 shares of its common stock pursuant to its previously announced stock repurchase plan and 65,300 shares of CTS Corp. (NYSE:CTS) common stock bringing the company's percentage ownership interest in CTS to approximately 37.5 percent, as compared to an ownership interest of 29.6 percent at June 30, 1989.

Dynamics Corporation of America is a diversified company which manufactures electronic components, mobile vans and transportable shelters for specialized electronic and medical diagnostic equipment, portable electric housewares and commercial appliances, air distribution equipment, specialized air conditioning equipment and generator sets.

#90208b0731 07/27/1990 ~Business Wire

SAN FRANCISCO (JULY 27) BUSINESS WIRE - Phoenix Laser Systems Inc. (NASDAQ: PXLS) Friday reported that initial reports from the Phoenix team that is testing the company's revolutionary laser ophthalmological surgical workstation (OSW) in Bogota, Colombia, indicate that ''findings are exceeding expectations.''

That report came from H. Alfred Sklar, director of research for the company, who heads a team of scientists that have developed the workstation and are currently conducting initial testing with the unit.

Sklar and other Phoenix personnel arrived in Bogota earlier this month, and with Dr. Olga Ferrer, are directing the preclinical and human clinical trials at the Instituto Barraquer de America (IBA).

Among the ophthalmologists at IBA participating in the training and the trials are Drs. Jose I. Barraquer, Francisco Barraquer, Carmen Barraquer, Angela Maria Gutierrez, Clemancia de Vivero, and Javier Benavides.

Testing so far has commenced using rabbits in the preclinical stage. This stage, according to Sklar, is meant to familiarize and train the ophthalmologists who will actually conduct the clinical testing.

A second round of preliminary testing commenced on July 16. This round dealt with establishing the type of lesions generated by the OSW in live rabbits, observing the healing process and verifying the reproductibility of the results.

According to a report by Sklar, an investigational Review session was chaired by Ferrer on July 22, at which the following conclusions were

reached:

-- The Ophthalmic Surgical Workstation is operational and functional within specification at current state of development.

-- The quantitative information provided by the Opthalmic Surgical Workstation, with about 20 micron accuracy, is very novel. It consequentially requires training in order to be able to use it correctly.

-- When correctly operated, the OSW does generate intrastromal lesions that have led to corneal surface reshaping.

WESTON, MA (JULY 27) BUSINESS WIRE - Eastern Enterprises (NYSE: EFU) announced Friday that it had reached an agreement in principle to acquire the stock of E&H Utility Sales Inc. of Carol Stream, Ill. The price was not disclosed.

E&H Utility Sales Inc. distributes components for municipal water systems in the metropolitan Chicago area and in northwestern Illinois and northern Indiana. The company has annual sales of approximately $17 million.

Robert W. Weinig, Eastern's president and chief executive officer, said, "The acquisition of E&H Utility Sales Inc. and the recent opening of a new branch of Water Products Co. serving the Denver market represent further progress towards Eastern's objective of building a major distribution business in the $1.6 billion market for municipal water systems and wastewater treatment products."

The acquisition is subject to execution of a definitive purchase and sale agreement, which is expected to be completed during the third quarter.

Eastern Enterprises is the parent company of Midland Enterprises Inc., leading barge operator on the nation's inland waterways; Boston Gas Co., New England's largest distributor of natural gas, and a Water Products Group serving municipal, commercial, and industrial markets with water system components and purifications systems. Eastern's 1989 net income was $56.6 million, or $2.43 per share.

#90208b0737 07/27/1990 ~Business Wire

MEDFORD, MA (JULY 27) BUSINESS WIRE - Regional Bancorp Inc., (NASDAQ:REGB) the holding company for Medford Savings Bank, Friday reported a net loss for the second quarter ended June 30, 1990 of $1,033,000 or $0.42 per share, compared to net income of $665,000 or $0.24 per share for the same period in 1989.

For the six months ended June 30, 1989 the bank reported a net loss of $28,000 or $0.01 per share compared to net income of $1,677,000 or $0.59 per share for the same period in 1989.

As previously announced, second quarter results were adversely affected by provisions to the bank's loan loss reserve and by costs the bank was forced to incur in connection with the proxy contest initiated by a dissident shareholder group. The provisions to the bank's loan loss reserve totaled $2,818,000 for the quarter ended June 30, 1990.

Non-performing loans at June 30, 1990 totaled $3,835,000 or 0.93 percent of total loans, compared with $509,000 or 0.13 percent of total loans on June 30, 1989. Other real estate owned totaled $2,425,000 at June 30, 1990.

Thomas F. O'Connor, president, stated that results reflect the continued deterioration in the local real estate market. ''Management and the board are committed to returning Regional to profitability through prudent management of our assets.''

Stockholders' equity at June 30, 1990 totaled $66,259,000 and, based on 2,481,841 shares of common stock outstanding, represented a book value of $26.70, an increase from $25.55 as of June 30, 1989. The bank's capital to assets ratio at June 30, 1990 was 13.3 percent.

Regional Bancorp Inc. is the holding company for Medford Savings Bank, a Massachusetts chartered savings bank. The bank offers a wide variety of services to both business and retail customers throughout eastern Massachusetts, from eight retail banking locations north of Boston.

#90208b0738 07/27/1990 ~Business Wire

MIAMI (JULY 27) BUSINESS WIRE - Cruise America Inc. (AMEX:RVR) Friday reported record revenues of $72,017,000 for the year ended April 30, 1990, a 14 percent increase over the $62,958,000 for the comparable period in 1989.

Revenues for the three months ended April 30, 1990 rose to $16,398,000 from $12,799,000, a 28 percent increase over the comparable period in 1989.

Operations for the 12 month period ended April 30, 1990 resulted in a net loss of $1,072,000 or 19 cents per share compared to a net loss of $3,712,000 or 67 cents per share for the like period in 1989. Operations for the three months ended April 30, 1990 resulted in a net loss of $2,266,000 or 41 cents per share compared to a net loss of $2,754,000 or 50 cents per share for the like period in 1989.

Leading the growth in revenues was Rental Vehicle Sales (sales of vehicles retired from the rental fleet) which increased 48 percent to $25,660,000 for the 12 months ended April 30, 1990 from $17,361,000 for the comparable period in 1989.

Rental Vehicle Sales for the three months ended April 30, 1990 were $7,847,000, a 35 percent increase over the $5,824,000 for the like period in 1989. Management's strong focus on sales, in conjunction with aggressive pricing and marketing campaigns were the driving force behind the increased sales.

These increases were accomplished in spite of an industry wide slowdown in total vechicle sales.

Rental Revenue also continued it's growth, increasing six percent to $39,063,000 for the year ended April 30, 1990 from $36,924,000 in the comparable period in 1989. Rental Revenue for the three months ended April 30, 1990 was $5,312,000, a 21 percent increase over the $4,391,000 for the like period in 1989.

The rental revenue increases were accomplished through the Company's new ''Flex Rate'' yield management computer reservation system. Flex Rate matches supply and demand to achieve optimal pricing.

Sales and service for the 12 months ended April 30, 1990 was $7,294,000, a decrease of 16 percent from the $8,673,000 for the comparable period in 1989. This decline reflects the slowdown in new vehicle sales, as consumers shy away from high priced purchases due to high interest rates, uncertainty about the economy and high consumer debt levels.

Sales and Service for the three months ended April 30, 1990 was $3,239,000 a 25 percent increase over the like period in 1989.

Included in the 12 month period ended April 30, 1989 was a pretax charge of $4.3 million for a contested liability. Included in the three month and 12 month periods ended April 30 was a pretax charge of $217,000 relating to additional interest charges on the contested liability.

Cruise America Inc. is the largest company in North America specializing in the rental and sale of recreational vehciles.

#90208b0744 07/27/1990 ~Business Wire

SHERMAN OAKS, CA (JULY 27) BUSINESS WIRE - HemaCare Corp. (NASDAQ:HEMA) announced record quarterly revenues for the second quarter ended June 30, 1990.

However, following 10 consecutive, profitable quarters, the company recorded a quarterly loss. Second quarter revenues were $1,865,000 compared to $1,425,000 in the same period last year. The net loss for the three months ended June 30, was $296,000, or 9 cents per share, against net income of $28,000, or 1 cent per share, for the second quarter in 1989.

''The quarterly loss was primarily attributable to expenses associated with clinical trials for an Investigational New Drug (IND) to treat AIDS and funding for a new division, HemaCare Clinical Laboratories, both of which represent an important investment in HemaCare's future,'' according to Hal I. Lieberman, president.

HemaCare's new clinical research project, Passive Hyperimmune Therapy (''PHT''), a plasma-based potential treatment for AIDS, received approval from the State of California, Department of Health Services, Food and Drug Branch.

PHT involves the infusion of sterilized, pooled plasma from healthy donors who have high Human Immunodeficiency Virus (HIV) antibody levels into AIDS patients with low or no antibody levels. HemaCare has the exclusive rights to perform the research and eventually commercialize the treatment in California.

''In addition, while the company's new division, HemaCare Clinical Laboratories, exceeded revenue projections for its initial four months of operation, it is not expected to be profitable this year despite an optimistic start-up. This division provides reference laboratory services to hospitals, clinics and physicians,'' Lieberman added.

HemaCare provides mobile therapeutic hemapheresis services to hospitals, as well as autologous blood services and hemapheresis-derived blood components designed to reduce patient risk of contracting hepatitis, AIDS and other diseases potentially transmitted by blood transfusion.

Its subsidiary, MD Laboratories Inc., operates three specialized plasma centers which provide rare antibodies to vaccine, diagnostic reagent and

other biological manufacturers. As noted above, the company's recently expanded clinical laboratory division provides reference laboratory services to hospitals, clinics and physicians.

#90208b0747 07/27/1990 ~Business Wire

BOSTON (JULY 27) BUSINESS WIRE - Consolidated earnings of Eastern Utilities Associates (NYSE:EUA) were $8.0 million, or 50 cents per share on operating revenues of $107.8 million for the three months ending June 30, 1990, Chairman and Chief Executive Officer Donald G. Pardus announced Friday.

Although the net earnings figure represents an increase of 1.5 percent above second quarter 1989 totals, earnings per share declined 8 cents, primarily due to an additional 2.4 million common shares outstanding, Pardus said.

EUA's consolidated earnings were $20.4 million or $1.30 per share for the six month period ending June 30, 1990 vs. the $19.5 million, or $1.45 per share in the first half of 1989. During this period, an additional 2.2 million common shares were outstanding.

''The unseasonable weather, together with a sluggish economy in our retail service territories, have combined to hold energy sales back and also negatively impacted our earnings,'' Pardus said.

For the 12 month period ending June 30, 1990, consolidated earnings were $41.7 million or $2.79 per share. For the comparable period last year, earnings were $39.5 million or $2.95 per share, he said.

EUA is a Boston-based investor-owned holding company, whose shares are traded on the New York and Pacific Stock Exchanges. Subsidiaries are Blackstone Valley Electric Co., Eastern Edison Co., EUA Cogenex Corp., EUA Energy Investment Corp., EUA Ocean State Corp., EUA Power Corp., EUA Service Corp., Montaup Electric Co. and Newport Electric Corp. Together, the companies are known as the EUA System.

LARGO, FL (JULY 27) BUSINESS WIRE - Sunstyle Corp. (OTC:SCCO), homebuilder and real estate developer, reported an unaudited net loss of $61,235 or 6 cents per share for the quarter ended June 30.

This compares to losses of $312,946 or 29 cents a share for the previous quarter and $212,091 or 19 cents a share for the comparable 1989 quarter.

Total revenues for the three month period ended June 30 were $2,722,000 compared to the quarter ended March 31 when revenues were $1,893,000. For the June 30, 1989 quarter revenues were $2,625,000.

''New sales contracts in the June 30 quarter totaled $2.5 million compared to $1.8 million for the previous quarter and $3.2 million for the quarter ended June 30, 1989,'' said Ralph W. Quartetti, president of Sunstyle Corp. He noted that during 1989 the company was operating in five locations instead of the present four.

Sunstyle Corp.'s principal subsidiary is Sunstyle Homes Corp., a 13 year-old real estate developer involved in six building and land development projects in Pinellas and Manatee Counties, Fla. Sunstyle Corp.

stock is traded over the counter.

CHERRY HILL, NJ (JULY 27) BUSINESS WIRE - Infotron Systems Corp., a Pennsylvania corporation, announced Friday that the board of directors has amended the bylaws of the corporation to opt out of Subchapter 25G and Subchapter 25H of the Pennsylvania Business Corporation Law of 1988.

This action was taken during the opt-out period, so these subchapters will not be applicable to the corporation.

Subchapter 25G (relating to control-share acquisitions) would prevent a person who has acquired 20 percent or more of the voting power of a covered corporation from voting such shares unless the ''disinterested'' shareholders approve such voting rights and the failure to obtain such approval would expose the owner to the risk of a forced sale of the shares to the issuer.

Subchapter 25H (relating to disgorgement) would apply in the event that (1) any person or group publicly discloses that the person or group may acquire control of the corporation or (2) a person or group acquires (or publicly discloses an offer or intent to acquire) 20 percent or more of the voting power of the corporation and, in either case, sells shares within 18 months thereafter.

Any profits from sales of equity securities of the corporation by the person or group during the 18-month period would belong to the corporation if the securities that were sold were acquired during the 18-month period or within 24 months prior thereto.

Infotron Systems Corp. is an international provider of integrated strategic networks, serving multi-national banks, manufacturers, government agencies and common carriers through a sales/service infrastructure in 57 countries.

BASKING RIDGE, NJ (JULY 27) BUSINESS WIRE - Science Management Corp.

(AMEX: SMG) Friday announced sales from continuing operations of $32,075,000 for the first six months of 1990 compared with sales of $39,531,000 for the same period of 1989.

A loss after taxes from continuing operations of $1,387,000, or 49 cents per share was incurred in the period compared with a loss of $331,000, or 12 cents per share in the 1989 six months.

Net loss for the second quarter was $569,000, or 20 cents per share, versus $380,000, or 13 cents per share, for the same period last year. Revenues for the quarter were $15.87 million as compared with $20.44 million a year ago.

The loss from continuing operations before taxes was $829,000 in the 1990 six months vs. profit of $24,000 in the 1989 period. Income tax expense resulted from Foreign and State Income taxes payable on profitable operations. The company had a loss from discontinued operations of $172,000, or six cents per share in the 1989 six month period.

Lower revenues and losses in the latest quarter in comparison to the same period of 1989 were experienced in Executive Recruiting and Compensation, Management Services in North America, and Computer Systems Operations.

The company's European subsidiaries and Engineering businesses continued to show good earnings performance in the 1990 second quarter. In late July the company was successful in subleasing excess office space in New York City for a period of three years.

Commenting on the company's operating results, James A. Skidmore Jr., chairman and chief executive officer of SMC, said "Markets for our domestic management services and computer systems operations remain soft. Improvement in the results of these operations are expected in the fourth quarter," he concluded.

ORLANDO, FL (JULY 27) BUSINESS WIRE - The 33+story Hyatt Regency Houston, a 958+room hotel near the downtown convention center and Houston civic center, has been purchased by Zaver Inc., a wholly owned subsidiary of Rushlake Hotels USA Inc. of Orlando, Fla.

Hyatt will continue as hotel operator and, other than renovation and improvements, no major changes are expected, said Terry M. Shaikh, vice president of Rushlake Hotels USA.

''Quite simply, we are bullish on Houston,'' said Shaikh. Rushlake also owns and operates the Hilton Southwest in Houston, as well as four hotels in the Orlando area, a deluxe property in Boca Raton, Fla., and several other deluxe properties overseas.

Zaver purchased the Hyatt Regency from Block 268 Venture, a partnership of Tenneco Realty and Prudential Insurance Co. of America. No terms were announced.

The Houston Hyatt Regency, located as 1200 Louisiana St., is famed for its 33-story-tall atrium, convenient downtown location, 28 meeting rooms, and guest+room view.

#90208b0763 07/27/1990 ~Business Wire
STAMFORD, CT (JULY 27) BUSINESS WIRE - Devon Group Inc. (NASDAQ: DEVN) Friday announced net income of $1,092,000 on sales of $45,255,000 for its first fiscal quarter (ended June 30, 1990).

These results were below last year's first quarter net income of $3,845,000 on sales of $47,636,000. Based on June 30, shares outstanding (7,126,000 vs. 10,425,000 last year), net income per common shares was 15

cents vs. 37 cents last year.

Commenting on this announcement, Marne Obernauer Jr. chairman and chief executive officer, stated, ''These financial results are generally in lines with expectations and are reflective of three factors: nonrecurrence of a major print advertising campaign which had favorably affected prior year results, integration and one-time expenses related to our recently expanded financial printing operations, and higher interest expense due to last September's stock repurchase.

With the exception of the post-budget acquisition project in the financial printing unit, the cumulative results in the rest of the company approximated projected levels. While consolidated first quarter results have been unusually depressed, the remaining quarters are expected to begin a strengthening trend.''

Devon Group Inc. is a diversified graphic arts company which provides the following services and products: pre-press computerized typesetting, composition, and color separation; complete financial printing; printing, binding, and fulfillment to a broad base of magazine publishers; and publishing/distribution of posters, art reproductions, original art, note cards, and calendars.

#90208b0765 07/27/1990 ~Business Wire
STAMFORD, Conn. (JULY 27) BUSINESS WIRE - Northeast Bancorp Inc. reported a loss of $23,350,000 or $3.22 per share for the quarter just ended June 30, as compared to net income of $9,010,000 or $1.13 per share for the same period in 1989.

In commenting on the second quarter results, Frank J. Kugler Jr., chairman of Northeast Bancorp Inc. stated that ''the continued deterioration of the Connecticut economy in general and the region's real estate market in particular caused non-performing assets to grow.''

Non-performing assets which include non-accrual and restructured loans and other real estate owned (O.R.E.O) totaled $138,009,000 at June 30, an increase of $66,380,000 from the March 31 levels of $71,629,000. Included in non-performing assets at June 30 are approximately $40 million of assets which have been reduced to or below current M.A.I. appraisals. The ratio of non-performing assets to total loans and O.R.E.O. increased to 5.86 percent at June 30 from 3.03 percent at March 31.

As a result, the company increased its provision for possible loan losses to $54 million and charged off $34,070,000, increasing the reserve for possible loan losses to $70,018,000 as compared to $49,554,000 at the end of the first quarter. The ratio of loan loss reserve to total loans now stands at 3 percent vs. 2.10 percent at March 31.

For the first six months of 1990, Northeast Bancorp posted a loss of $29,804,000 or $4.10 per share, compared to net income of $17,670,000 or $2.23 per share for the first six months of 1989.

In response to these results, on July 20, the company announced an early retirement plan for eligible employees, which is intended to reduce staff by approximately 9 percent and reduce salary expense by $5 million annually. The cost of this plan will be covered by the current overfunding of the existing employee pension plan. Kugler stated that

''coupled with other existing cost reduction programs this plan will increase our productivity and our competitiveness. We feel that these efforts, combined with our strong primary capital position of 8.48 percent leave Northeast Bancorp well positioned to continue to ride out this storm.''

As previously announced, on July 17, Northeast Bancorp declared its regular dividend of 35 cents per share on its common stock payable August 10 to shareholders of record July 26. In addition, Price Waterhouse completed the previously announced mid-year audit which provides Northeast Bancorp with an unqualified opinion of its financial statements as of June 30. Certified financial statements within 120 days of the effective merger date are called for in the merger agreement with the Bank of New York. As of June 30 primary book value, as certified by Price Waterhouse, was $30.04 vs. $33.61 at March 31.

Northeast Bancorp Inc. is the parent company of Union Trust Company, NBI Mortgage Investment Corp., UT Finance Ltd. and Fairfield Properties Inc. With $3.3 billion in assets and 70 offices throughout the state, Union Trust is the third largest Connecticut-based commercial bank.

#90208b0770 07/27/1990 ~Business Wire

MOBILE, AL (JULY 27) BUSINESS WIRE - Delchamps Inc. (NASDAQ/NMS:DLCH) reported Friday that net earnings for the 52-week fiscal year ended June 30, 1990, were $14,385,000, compared with $12,140,000 for the 52-weeks of the preceding year, an increase of 18.5 percent.

Net earnings were 1.5 percent of sales, compared with 1.3 percent last year. Net earnings per weighted average share outstanding were $2.02 per, an increase of 18.1 percent from the $1.71 reported last year.

Sales for the year were $948,257,000, compared with $899,532,000, an increase of 5.4 percent. Same store sales for 95 supermarkets increased 0.3 percent. Nine supermarkets, of which three were replacements for smaller stores, were opened during the year and two were remodeled and expanded. At the fiscal year's end, the company operated 110 supermarkets and seven liquor stores.

For the 13-week period ended June 30, 1990, net earnings were $5,170,000, compared with $5,654,000 for the same quarter last year, a decrease of 8.6 percent. Net earnings as a percent of sales for the 13 weeks this year were 2.1 percent, compared with 2.5 percent during the same quarter last year. Net earnings per share were 72 cents, compard with 79 cents for the corresponding quarter of the prior year.

Sales for the 13-week period this year were $246,701,000, compared with $228,692,000 last year, an increase of 7.9 percent from last year's results. Same store sales for 102 stores showed an increase of 1.6 percent during the quarter.

Randy Delchamps, chairman and president, said: ''During the year just ended we had record sales and earnings -- this results from the Delchamps' team paying constant attention to the needs and desires of our customers. We expect the current year to be even better since we continue to grow steadily and are financially very healthy.''

Delchamps also announced that the regular quarterly dividend of 10 cents per share would be paid Aug. 22, to stockholders of record Aug. 8, and that the company's annual meeting will be held in Mobile on Oct. 12, 1990.

WASHINGTON (JULY 27) COMTEX - The 8-K report filed at the SEC shows Davin Enterprises Inc. (TICKER: DAVE) dismissed its independent public auditor, Joseph Elbaz, as of July 16, 1990, and retained as a replacement the auditors of Greenberg & Co.

For the previous two fiscal years ended March 31, 1989 and 1988, audits

performed by that former auditor contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles, with but one exception.

For each of the two fiscal years, the audits of Joseph Elbaz contained a qualification as to the ability of Davin Enterprises Inc. to continue as a going concern.

For the previous two fiscal years, there were no disagreements between that former auditor and Davin Enterprises Inc.

The executive office of Davin Enterprises Inc. is located at 461 Beach 124 Street, Belle Harbor, New York 11694, and its telephone number is (718) 474-6568.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 26

ANNOUNCEMENT:

On July 26, 1990, the Centaur Partners Group issued a press release, dated July 25, 1990, regarding the 1990 annual meeting of company stockholders. Centaur submitted its proxies to the secretary of National Intergroup Inc. at NII's annual meeting held July 25, 1990. Centaur's slate of nominees for the NII Board consisted of Melvyn J. Estrin, Robert J. Slater, and William G. Tull. Centaur also proposed resolutions that would provide for confidential voting by stockholders, reject any proposal by the NII board to lower the trigger of Centaur Partner IV's "poison pill" below 20 percent and require approval by a majority of stockholders of any "golden parachutes" for management. Based on the proxies submitted, Centaur believes that the shareholders gave Centaur a decisive margin of victory.

Industries Inc. announced that T&N Automotive Components Inc. has extended the expiration date for its ongoing $17.30 per share tender offer for all outstanding shares of common stock of J.P. Industries (TICKER: JPI) until Friday, August 17, 1990. T&N Automotive Components Inc. and JP Industries Inc. agreed to the extension in order to allow additional time for the previously announced discussions with the staff of the FTC regarding a possible negotiated resolution of antitrust objections raised by the staff in connection with the acquisition. The tender offer is the first step in T&N Automotive Components Inc. and JP Industries Inc.'s announced agreement to effect a merger of T&N Automotive Components, a wholly-owned subsidiary of T&N plc, into J.P. Industries, Inc.

WASHINGTON (JULY 27) COMTEX - The 8-K report filed at the SEC shows during the week succeeding July 12, 1990, Computer Associates International Inc. (TICKER: CA), its directors and certain others were named as defendants in a lawsuit brought by plaintiffs seeking to represent certain Computer Associates shareholders as a class.

The lawsuit alleged misleading statements in violaton of securities laws on the part of the defendants in prior to a July 12, 1990 Computer Associates public announcement of anticipated fiscal quarter financial results.

That announcement, allegedly based on preliminary information, stated that Computer Associates's revenues for the fiscal quarter ended June 30, 1990 were significantly lower than the comparable 1989 fiscal quarter.

The announcement further stated that earnings for the period would be lower as a result.

A drop in the Computer Associates stock of $6.25 per share, closing at $10.25 per share, on the New York Stock Exchange followed the announcement.

WASHINGTON (JULY 27) COMTEX - The 8-K report filed at the SEC shows on June 28, 1990, the board of directors of Sun Up Foods Inc. elected to rescind all agreements with Midco Financial Services Inc. and Midco Energy Group Inc. (collectively "Midco").

The board further placed a permanent stop on all trades of preferred and common Sun Up stock issued to Midco as part of an agreement and plan of reorganization between Sun Up and Paragon Acquisitions Group Inc.

The shares in question amounted to five million, or 30.57%, of Sun Up's issued and outstanding common shares and nine million, or 22.5%, of Sun Up's issued and outstanding perferred shares.

The shares were to be reissued to president and director of Sun Up, James V. Mays, and to secretary/treasurer and director of Sun Up, Patsy J. Mays, in an equal distribution (50% for each).

The shares were originally issued to Midco from the holdings of those two officers.

Following the reissuance, the James and Patsy Mays collecti held 61.15% of the issued and outstanding common stock and 100% of the preferred stock of Sun Up.

The executive office of Sun Up Foods Inc. is located at P.O. Box 490, Benton, Kentucky 42025; One Sun Up Drive, Benton, Kentucky 42025, and its telephone number is (502) 527-2000.

WASHINGTON (JULY 27) COMTEX - The 8-K report filed at the SEC shows Giant Bay Resources Ltd.(TICKER: GBYL) secured financing of $2.8 million to complete its 100% purchase of Techlines Corp. Sdn Bhd, of Malaysia.

That acquisition was renamed Giant Bay Malaysian Sdn Bhd.

Great Bay Resources further reported that it was advancing the purchase to better directly control and speed project development at Giant Bay Malaysian.

The financier for the $2.8 million, three-year, interest-free loan used to complete the purchase was Silver Door Investments Ltd., of Hong Kong.

As consideration, Silver Door received a three-year option to purchase 20% of outstanding equity of Giant Bay Resources's subsidiary, Giant Bay Capital Ltd., at "nominal cost."

Great Bay Malaysian possesses 162 acres of residential, commercial and travel-services development property surrounding the 96 acre SamaWorld Theme Park in Genting, next to the Genting Casino and Resort.

PARIS (JULY 27) - The world's leading computer concern, IBM, said here Friday it was to restructure its European activities away from its focus on Paris to achieve more efficiency on the European market.

The decentralisation to distribute European activities between subsidiaries in Germany, Italy, Britain and France would mean that by 1992 the staffing level at the Paris headquarters would be halved from its current 1,800 people.

The reduction would be carried out "naturally," given that a large part of the current staff was on temporary assignment, IBM said.

In an internal document, IBM said that the move would give "international responsibilities to (offices in) the various countries at a time when the single European market is taking shape."

"In taking these operations closer to our clients, we will be in closer contact with our market and better able to react" to its needs, IBM said.

The European market for large systems for businesses and industrial clients will go to the West German subsidiary, IBM's largest European market.

The Italian subsidiary will take over mini-computer systems, and public sector clients, while personal computers and the AIX system will go to IBM UK, along with the services sector.

The IBM Europe headquarters at Paris will become a more adminstrative operation, but will retain control of strategic planning and fixing the subsidiaries' targets, while IBM France will be responsible for the group's communication and data systems.

#90208d0230 07/27/1990 ~French/German News Agency
BUCHAREST (JULY 27) - The Romanian defence ministry warned Friday against attempts to "discredit" the military after leaflets were distributed in the capital calling for strikes and demonstrations in favour of

"democratisation" within the army.

Defence ministry spokesman Lieutenant-Colonel Iulian Patca said on Romanian television that "those behind these provocative acts are attempting to destabilise the army."

Lt.-Col. Patca said the distributors of the leaflets had neglected to take into account recent efforts towards "democratisation" within the military, including the reduction of compulsory military service from 16 to 12 months.

In a press communique published by the Rompres news agency and read a few minutes later on television, the "Committee for Democratisation of the Army" said the committee had not been involved in the distribution of the leaflets.

The statement said the committee had demanded in June, when government security forces crushed an anti-government demonstration in Bucharest, that the army "undertake with dedication and professionalism" its mission to "prove its force and its unity."

Lt.-Col. Patca said that "inciting soldiers to go on strike is an attempt to weaken the army" and called on soldiers and citizens to "realise the gravity of the situation and resist all attempts to destabilise the army."

In February, the Romanian government was confronted with discontent and protests within the military, notably the demand that the defence and interior ministers resign.

The defence minister, General Nicolae Militaru, resigned on February 16 and then interior minister General Mihai Chitac was dismissed after the anti-government protests in mid-June.

The Committee for Democratisation of the Army, created during the June demonstrations, was disbanded on June 14 by the army's supreme council for having "violated military laws and rules."

The committee reemerged on Wednesday, saying it would "continue to push, by the force of ideas, for the values of last December's revolution which can be found within the army."

PRETORIA (JULY 28) - Campaigners lobbying against a seal cull on South Africa's west coast emerged from a meeting with Environment Minister Gert Kotze here Friday vowing to keep up the pressure despite winning consultation rights.

Mr. Kotze's office said he had met representatives of various groups opposing the cull of 30,000 Cape fur seals, which was to have started two weeks ago at Kleinsee near Port Nolloth.

He had agreed to set up a committee to advise him on all aspects of seal culling, featuring scientists acceptable to all groups, his office said.

Any cull would be suspended at least until the end of September, according to the official statement.

But the Seal Action Group (SAG) said in a statement released in Cape Town that Friday's meeting had been "unsatisfactory and unproductive."

Mr. Kotze had failed to explain why the government had issued seal harvesting licences in the first place, SAG said.

A Taiwanese businessman, Hsu Hsien, was issued a five-year permit last July to cull seals. But at that stage he was in a position to kill only some 5,000 seals out of a quota of 30,000.

According to an intermediary at Taiwan's trade mission in Johannesburg he spent around half a million dollars this year to set up a factory at Port Nolloth.

Some 50 people were to have been given seasonal jobs turning seal carcasses into pet food and pelts, with the genitals being used for aphrodisiacs for the Far East.

But French actress and animal rights campaigner Brigitte Bardot led an international outcry at the prospect of clubbers bludgeoning baby seals senseless and cutting out their hearts, prompting Mr. Hsu two weeks ago to abandon his scheme, according to state-run television citing Taiwanese sources.

HONOLULU, HAWAII (JULY 30) - Six sets of remains believed to be those of American soldiers missing in Cambodia arrived Friday -- the first repatriation of remains since the Vietnam War ended 14 years ago.

The remains arrived at Hickam Air Force Base and were carried off an Air Force plane in metal coffins past an honor guard. The remains were taken to the Army's Central Identification Laboratory for analysis.

It was the first time since the Vietnam War ended in April 1975 that Cambodia's communist government turned over remains believed to be those of

U.S. servicemen.

The U.S. Pacific Command said that of 2,300 Americans still missing or unaccounted for in Indochina, 83 are in Cambodia.

ADDIS ABABA (JULY 27) - The Ethiopian government Thursday accused Eritrean People's Liberation Front (EPLF) rebels of condemning millions of famine victims to mass starvation.

A statement issued here by the Council of State said the latest action by the EPLF to bar a United Nations technical team from entering the rebel-held port of Massawa on the Red Sea "was part of the same pattern the secessionists had been following in the past to prevent relief supplies from reaching the needy in northern Ethiopia".

The statement recalled earlier EPLF attacks and sea "piracy" committed against foreign ships while on their way to Massawa with cargoes of relief supplies destined for drought famine victims in northern Ethiopia. It also affirmed that the Eritrean rebels had ambushed and burnt relief convoys of trucks flying the U.N. flag.

The statement accused the rebels of launching a large-scale attack on Massawa last February when plans had been put in place by the government to use it for an emergency relief operation supported by the international donor community.

TOKYO (JULY 27) - Japan's general expenditures will grow 4.4 percent in fiscal 1991 starting next March under a budget ceiling the cabinet approved Friday, officials said.

The 4.4 percent rise from the current year would be the highest growth since ceilings on appropriation requests were introduced in 1982 to fight state budget deficits. The growth in the previous year was 3.0 percent.

The limit on general expenditures, excluding government bond financing and tax grants to local governments, was set at 36.94 trillion yen (246 billion dollars) in fiscal 1991.

Defense and official development assistance (ODA) were among categories exempted from the 4.4 percent ceiling.

The Defense Agency may ask for a spending rise up to 5.8 percent while the

ODA budget will grow 9.7 percent, the officials said.

TOKYO (JULY 27) - Japan's economy entered its 44th month of successive expansion in July, reflecting healthy domestic demand, a government report said Friday.

The Economic Planning Agency (EPA) said the trend was the second longest in the post-war period after a 57-month advance between November 1965 and July 1970.

"The Japanese economy is in unexpectedly good shape, hardly affected by the series of hikes in the official discount rate by the Bank of Japan since May last year," an EPA official said.

The central bank last raised the discount rate, charged on central bank loans to financial institutions, by one percentage point to 5.25 percent on March 20. In May last year, the rate was at a historic low of 2.5 percent.

The report said that individual consumption remained strong as seen in brisk retail and auto sales and booming tourism.

Capital spending was also on the rise, it noted, as were housing starts and industrial production.

NAIROBI (JULY 27) - A total of 45,716 bags of Kenyan coffee were offered for sale to markets at Nairobi's weekly auction and 45,464 bags were sold for an average price of 2,023.80 Kenyan pounds (1,750.69 dollars) per tonne.

Prices were again firmer for all qualities except unwashed or bunis which were steady.

To-date, 1,869,699 bags have been sold to all markets, including 672,100 bags of 198990 coffee pool, with an overall gross average price of 2,376 Kenyan pounds (2,055.36 dollars) per ton.

BUDAPEST (JULY 27) - The U.S. General Motors auto group and the Hungarian Raba lorry manufacturer have signed a joint-venture agreement for the manufacture and sale of Opel car models in Hungary, the Hungarian MTI news

agency reported on Friday.

Under the agreement, signed on Thursday, General Motors will own 67 percent of the new company and Raba 33 percent.

The new factory, to be sited at Szentgotthard in the west of the country,

wil produce 15,000 Opel Kadett cars and 20,000 engines per year from March 31 1992.

The initial investment is put at 170 million dollars.

A second joint company will sell all Opel models directly in Hungary from September.

ATHENS (JULY 27) - The Greek Government has decided to increase the prices of fuel by about 10 percent because of an increase in the international price of oil, it was announced here on Friday.

The overnight decision, representing the third increase during the last six months, affects petrol and diesel but does not apply to heating oil.

The increases mean that since December the price of ordinary petrol has risen by 58.3 percent, super petrol by 55.8 percent, lead-free petrol by 48.1 percent and diesel fuel by 44.7 percent.

The government has also decided to increase the price of postal services by 15 percent from August 1.

TAIPEI (JULY 27) - ASI Integral, the first company in the Soviet Union to be set up with investment from Taiwan, will start producing personal computers next month, the firm's Taiwanese partner announced Friday.

The six million ruble (one million dollar) project is a joint venture between the Taipei-based computer maker Aquarius Systems Inc. (ASI) and partners in the Soviet Union and West Germany, ASI president Paul Liu said.

ASI will provide technology for the new firm, which will produce 120,000 ASI brand computers annually, Mr. Liu said, adding that the estimated Soviet market was 500,000 to one million units a year.

Taipei has in recent years removed trade, travel and telecommunications

restrictions on East European countries, in line with its policy of political and economic liberalization.

It has also encouraged businessmen to strengthen trade and investment ties with the Eastern bloc to seek cheaper raw materials and expand overseas markets for local products.

Trade between Taiwan and the Soviet Union, the nationalist island's largest trading partner in Eastern Europe, totalled 141.34 million dollars in 1989 up 311 per cent over the previous year.

Taiwan exports consumer goods, electrical appliances and information products to Eastern Europe and imports lumber, minerals and industrial raw materials.

Eastern Chemical Corp., a cosmetics manufacturer, plans to set up a six-million-dollar joint-venture factory in the Soviet Union, and the Great Europe-Asia Corp. trading house has been discussing the possibility of setting up a joint venture firm in Moscow to promote two-way trade.

Tokyo (JULY 27) - Japan's No. 1 carmaker, Toyota Motor Corp., said Friday it may export cars made at its British plant to Japan and other markets outside Europe.

A spokesman said Toyota was ''considering'' such an adverse-import project. But he said it was premature to say when the project would start because it would be nearly two years before the British plant went into production.

''We have no concrete plans about it now. But the project is under consideration as a future possible plan,'' the spokesman said.

Nihon Keizia Shimbun newspaper reported Toyota plans to import subcompact cars made at its British factory which will start operation in late 1992.

Toyota plans to export ''several thousands'' of wagon-type passenger cars modelled on the 1.8-litre ''Corona'' a year to Japan from around 1993-1994. It intends to scale down the production of the same type of cars at its Japanese plants, said the financial newspaper.

Toyota plans to make about 100,000 passenger cars per year at its British plant in the middle of the 1990s and expand the output to around 200,000 by the second half of the 1990s.

The import of cars from Britain would be part of Toyota's new global manufacturing strategy aimed at dividing production footholds into three

areas - Japan, the United States and Britain.

Toyota has already decided to import about 40,000 of ''Camry Wagon'' cars from its Kentucky plant in the United States from 1992.

Tokyo (JULY 27) - Japan's steel exports in the first six months of 1990 sank to the lowest level in 21 years due mainly to dwindling shipments to China and the Soviet Union, the Japan Iron and Steel Federation said Friday.

Steel exports from January to June plunged 22.5 percent from a year earlier to 8.09 million tons, the smallest since 7.29 million tons in the corresponding period of 1969, the federation said.

Exports to China dropped a sharp 62.3 percent to some 771,000 tons while those to the Soviet Union fell 57.8 percent to 225,000 tons, it said.

#90208d6030 07/27/1990 ~French/German News Agency

BANGKOK (JULY 27) - Thailand will ease its economic sanctions against South Africa and allow private businessmen to trade with Pretoria, an official of the Thai Foreign Trade Office said Friday.

"Thai private sector firms wishing to export goods or import raw material, or both, from South Africa may now tender their applications at the Foreign Trade Department. The applications will be considered on a case-by-case basis," the official said.

The Commerce Ministry's proposal to ease Bangkok's embargo on trade with Pretoria was approved by the Cabinet this week.

The Cabinet's approval to ease the trade restriction, imposed in 1978, was aimed at expanding Thailand's overseas trade and seeking new outlets for its agricultural and industrial goods, as well as for sources of raw material.

"Our trade relaxation with South Africa should be considered separate from our foreign policy towards that country," the official said. "We are still bound by a United Nations resolution on Pretoria against its policy on apartheid."

The easing of the restriction would allow Thai traders and industrialists to import such needed raw materials as wood, gold, brown coal and gem stones, and to export rice, industrial goods and textile products.

Defending the apparent change in Thai foreign policy, the official pointed out that many governments had imposed economic sanctions against South Africa as a result of the U.N. resolution, but had turned a blind eye to trade conducted with that country by their own private sectors.

#90208d6300 07/27/1990 ~French/German News Agency

KABUL (JULY 27) - Afghan police have seized 400 kilograms (880 pounds) of heroin during raids carried out in this capital city in the past four months, a government spokesman said Friday.

The raids were part of a campaign to flush out drug dealers in Kabul, the spokesman said. Afghanistan is one of the largest producers of poppy, heroin's main ingredient.

The spokesman said dozens of people had been arrested in connection with drug charges since March. Offenders can receive death sentences, though capital punishment has not been carried out in Afghanistan in the past four years.

The number of addicts in Afghanistan is estimated at 10,000, while only less than 1,500 have undergone treatment.

#90208d6390 07/27/1990 ~French/German News Agency

NAIROBI (JULY 27) - Kenyan President Daniel arap Moi announced the commercial launching Thursday of a controversial anti-AIDS drug developed here which he said was efficient in treating the symptoms of the killer disease.

"Kemron may not be the all-out cure for AIDS," Mr. Moi said, "but we would be doing humanity a disservice if we did not act fast enough and make the drug available for those who need it."

The active ingredient of Kemron is an interferon that impedes reproduction of the HIV virus that causes Acquired Immune Deficiency Syndrome.

Unlike AZT, another interferon-based drug used to treat AIDS patients, Kemron has "minimum side effects" and gives AIDS patients "a new lease of life," Mr. Moi said. "Fifty people who were AIDS victims have already been cured," he said.

Scientists of the Kenya Medical Research Institute who developed Kemron last year claim that about 10 per cent of patients treated with the drug have improved so much that they no longer require treatment and tested negative for the AIDS virus.

Davy Koech, who headed the research team, dismissed scepticism about Kemron expressed by some scientists who have argued that further tests were needed to evaluate its usefulness.

Kemron, he said, "was proved, after careful investigation, to be effective."

Lobe Monekosso, World Health Organization (WHO) regional director for Africa, speaking at the launching ceremony, said "this is a claim which must be taken seriously."

He said WHO was ready to help in the "further refining" of the drug, which he described as a "new weapon" against AIDS, and was already organizing trials of Kemron and AZT underway in several African countries.

Dr. Koech thanked Joseph Cummins of the Texas-based Amarillo Cell Culture Company and Jun Minowada of Japan's Hayashibara Biochemical Laboratories, who had both reported remarkable recoveries by AIDS patients treated with Kemron.

#90208d6430 07/27/1990 ~French/German News Agency

CANBERRA (JULY 27) - Australia recorded an unadjusted current account deficit of 1.575 billion Australian dollars (1.23 billion U.S.) in June after a drop in both exports and imports, the Bureau of Statistics reported Friday.

This compared with a May deficit of 1.632 billion dollars (1.27 billion U.S.), revised from 1.55 billion (1.21 billion U.S.).

The current account deficit for the fiscal year ended June 30 was 21.157 billion (16.48 billion U.S.), up 19 percent on the previous year's 17.760 billion (13.84 billion U.S.).

It was also 2.657 billion (2.07 billion U.S.) more than Treasurer Paul Keating's budget forecast.

The bureau said that exports in June fell 9.0 percent to 3.576 billion (2.79 billion U.S.), dragged down by the rural sector including wool, which was down about 65 percent on the previous month.

Exports were worth 3.938 billion (3.07 billion U.S.) in May and 3.988 billion (3.11 billion U.S.) in June last year.

Imports fell 14.0 percent in June to 3.551 billion (2.77 billion U.S.) dollars from 4.114 billion (3.21 billion U.S.) in May against 4.184 billion (3.26 billion U.S.) in June last year.

The June deficit was at the higher end of market expectations, financial analysts having tipped a figure between one billion (780 million U.S.) and 1.5 billion (1.17 billion U.S.).

Seasonally adjusted, the June current account deficit was 1.808 billion (1.41 billion U.S.) compared with 1.426 billion (1.11 billion U.S.) in May and 1.916 billion (1.49 billion U.S.) a year ago.

The bureau said the unadjusted merchandise trade balance for June showed a surplus of 25 million (19.48 million U.S.) after a 186 million (144.89 million U.S.) deficit in May and a 196 million (152.68 million U.S.) deficit in June last year.

The current account measures the difference in value between ingoing and outgoing transactions in goods, services, incomes and transfers.

#90208d6440 07/27/1990 ~French/German News Agency

TOKYO (JULY 27) - New Zealand's Prime Minister Geoffrey Palmer warned Friday that the global trading system was likely to collapse if the Uruguay Round of trade talks failed to reach a compromise on agricultural subsidies.

"We continue to encounter long-held and deeply ingrained beliefs about agricultural self-sufficiency which negate the potential for international trade in primary and processed foodstuffs," he said.

Mr. Palmer, speaking at the Tokyo Chamber of Commerce and Industry, called on Japan, the United States and Europe to provide leadership in the Uruguay

Round under the General Agreement on Tariffs and Trade (GATT) and due to be completed in December.

"If no agreement is reached, the world trading system is likely to collapse," he later told a news conference. "The result will be a disaster."

Mr. Palmer said that New Zealand was "sick and tired" of arguments defending subsidies for farming which would not be acceptable in the industrial sector.

"We cannot see the distinction," he said. "We demand common justice."

The visiting premier was to meet with Emperor Akihito later Friday followed by talks with International Trade and Industry Minister Kabun Muto.

He was also scheduled to meet former prime ministers Noboru Takeshita and Yasuhiro Nakasone before leaving for the annual meeting of the South Pacific Forum in Vanuatu.

Mr. Palmer, who arrived here Wednesday, met Prime Minister Toshiki Kaifu Thursday.

DHAKA (JULY 27) - Heavy rain across much of Bangladesh has claimed 45 lives and left a million persons homeless, officials said Friday.

Water from the Jamuna river flooded the worst-hit Bogra district in the north where three days of torrential rain killed 14 people, destroyed 15,000 homes and swept away 25 bridges, disrupting road and rail links.

The army was called out to assist the civilian administration in massive relief efforts in central Sirajganj and Faridpur districts where 25 deaths were reported, the state-run radio said.

The rising Brahmaputra river in Sadarpur district uprooted 20,000 people while six people were drowned and five others reported missing.

In Manikganj district, the Padma river breached a dam, demolishing 5,000 homes and forcing 10,000 families to seek shelter in relief camps.

The relief ministry has estimated that at least a million people have become homeless in ten affected districts due to incessant rain and rush of water from across the border in India.

The daily Bangladesh Observer said more than 500 villages have been

devastated across Bangladesh in this week's floods.

AUCKLAND, NEW ZEALAND (JULY 27) - One egg from the extinct moa bird remains worldwide after the only other one was destroyed in an accident, the New Zealand Herald reported here Friday.

Moas, which were flightless birds about three meters (10 feet) tall with flat breastbones and inhabited New Zealand, have been extinct for over 500 years.

The second to last whole egg was held by Canterbury Museum in Christchurch. It was used to make a mould for the Abiko Museum in Japan and the 600-year-old egg broke in the casting process, the paper said.

It was not clear how the real egg got mixed up with a plaster model but museum board member Pat Harrow was furious at the breakage, the report said.

The sole surviving whole egg is in another New Zealand museum in Wanganui, 500 kilometres (300 miles) south of here.

The earliest Polynesians in New Zealand ate them, used the bones as tools and the eggs for carrying water.

NEW DELHI (JULY 27) - At least nine people were killed and several injured Friday when a three-story house collapsed in a township near Bombay, the Press Trust of India (PTI) reported.

Four of the dead in the collapse in Dombivli town were women, PTI said. The town is about 100 kilometers (62 miles) from Bombay.

Five others were trapped in the rubble and were taken to hospital after rescuers dug them out, PTI said.

It was not known what caused the collapse which was the second in five days in the same region.

A five-story house under construction came down Monday in neighboring Bhiwandi town, killing four people and trapping some 20 others who were rescued.

#90208d7140 07/27/1990 ~French/German News Agency
LONDON (JULY 27) - Britain is to tighten control on moves by state-owned foreign companies to take stakes in British concerns, new Trade and Industry Secretary Peter Lilley said in a statement published in the Financial Times newspaper Friday.

Lilley, in a written reply to a question from a member of parliament, said the level of state holding in a foreign company seeking to take over a British company would be a determining factor in deciding whether to refer the deal to the Monopolies and Mergers Commission. The minister was appointed this week after Nicholas Ridley resigned in the wake of anti-German and anti-European remarks he made in an interview.

Lilley said the government had tried to allow market forces to determine

the most efficient allocation of resources with its policy of privatization, deregulation, and boosting competition, and was not going to see these efforts undermined through "nationalization by the back door."

The Financial Times newspaper said his remarks were clearly aimed at the French, noting that French state-owned companies had been particularly active in the British market in the first quarter of this year.

French nationalized groups have entered 40 stake-holding deals in Britain, worth a total 2.52 billion European Currency Units (ECU's) (three billion dollars), or 58 percent of total French purchases in Europe.

Purchases of British companies by French nationalized groups totalled 1.52 billion ECU (1.8 billion dollars) last year, including Rhone-Poulenc's acquisition of RTZ Chemicals for 512 million pounds (921 million dollars).

#90208d7150 07/27/1990 ~French/German News Agency

LONDON (JULY 27) - A young man parcelled himself up, was stamped and posted the length of Britain to raise money for a school for handicapped children in Surrey, south of London, said a spokesman for the school Friday.

The organization "Friends of Starhurst School" launched an appeal to fund essential repairs to the school which involved betting on the time the human parcel would take to travel the 700 miles (1120 kms) from tip to tip of the country.

Andy Rowe, a 23-year-old chartered surveyor, was helped into a specially prepared large Royal Mail envelope, stamped with a 130 pound stamp (220 dollars), before being dispatched care of the Royal Mail by coach and train.

The parcel left John O' Groats on the northern tip of Scotland on Thursday and arrived 23 hours, 18 minutes and 22 seconds later on Friday morning at Land's End in Cornwall on the southwest coast of England.

The school presented gifts to those who bet most accurately and raised 5,000 pounds (8,500 dollars).

LONDON (JULY 27) - Lloyds Bank, Britain's fourth largest deposit-taking bank, said Friday its pre-tax profit soared 339 percent in the first half of this year to 408 million pounds (680 million dollars).

But the spectacular rise was largely due to the fact that the bank had put aside provisions totalling 483 million pounds (805 million dollars) in the first half of last year for risky debt, leaving it with profit of only 93 million (155 million dollars).

Excluding tax and bad debt provisions, profit totalled 711 million pounds, up only two percent on the 697 million for the first half of last year. The pre-tax profit figure announced Friday was at the low end of market forecasts of profit of between 400 million and 483 million pounds.

But the stock market was comforted by the lack of bad surprises and the higher than expected 16 percent rise in interim dividend to five pence, and Lloyds shares were up two pence to 300 at the end of the morning.

Bank chairman Sir Jeremy Morse warned that "conditions in the UK will be difficult thoughout year but we are weathering them well and our life insurance business is developing strongly."

The bank said it had made provision of a further 66 million pounds on risky Third World debt in the first half of the year, but had also set aside 237 million for other risky debt, mostly in Britain, almost double the 121 million of the first half of last year. Provision for doubtful British debt has been increased to 190 million pounds from a mere 60 million.

Lloyds said it doubled profit abroad in the first half of the year, and benefitted from an increased contribution from insurance subsidiary Lloyds Abbey Life. But retail banking activities in Britain saw their profit tumble 28 percent to 202 million pounds (336 million dollars).

Sir Jeremy said the rise in interim dividend could be justified by the satisfactory development of Lloyds Abbey and the fact that the bank had made adequate provision for doubtful debt.

The steep rise in provision for risky British debt was a result of the difficulties experienced by companies and individual clients in meeting payments due to high interest rates and a slowdown in economic activity. The bank's British portfolio is now 8.3 percent covered, against 5.5 percent a year ago.

Analysts expected the other three major high street, or deposit-taking, banks - National Westminster, Midland, and Barclays - to raise their provision for British debt to at least the level of Lloyd's when they announce their interim results next week.

Non-payment of interest on loans abroad, mainly in Argentina and Brazil, required a provision of 66 million pounds, bringing Lloyd's level of cover to 73 percent.

MANILA (JULY 27) - Foreign creditors are willing to provide funds to the Philippines to rebuild after a powerful earthquake but may cut off cash flow if it suspends debt repayments, a top finance official warned Friday.

Finance Secretary Jesus Estanislao said he had been given the warning at a meeting earlier Friday with representatives of 49 foreign governments and donor agencies.

"It is very clear from the signals that I got from several ambassadors this morning, there is no new money that will be processed or released to the Philippines if we go into default," he said.

He was referring to calls by congress to suspend foreign debt repayments for at least two and a half years so that the money could be used for debt relief.

Mr. Estanislao said President Corazon Aquino had sent a letter to the leaders of Britain, Canada France, Italy, Japan, the United States and West Germany, appealing for "fresh financing and debt relief at this critical time."

"No one is talking about a moratorium (on debt servicing). What we are looking for is a re-financing facility ... which can include a wide-range of options according to the real possibilities of every country," he said.

Mrs. Aquino said late Thursday she would seek up to 500 million dollars in additional foreign assistance to rebuild the country after a powerful quake devastated several towns and cities on July 16.

Mr. Estanislao said the World Bank may provide as much as 100 million dollars, while the Asian Development Bank may provide up to 150 million dollars for reconstruction, depending on their review of the situation.

"Much is contingent on the damage assessment," he said.

"We are going to go as far as is possible" to obtain foreign assistance, he said.

Mrs. Aquino said damage caused by the quake, which killed more than 1,600 people, was initially estimated at 15 billion pesos (628 million dollars) but that this was expected to rise as more reports came in.

SINGAPORE (JULY 27) - A Chinese delegation is due here late Friday to discuss setting up diplomatic ties between the two countries, a foreign ministry statement said Friday.

The delegation is to stay here until Tuesday, the statement said.

It did not give further details or provide the names of the Chinese officials.

Singapore is set to open diplomatic ties with China following the recent move by Indonesia to re-open diplomatic ties with China after 20 years.

Bilateral ties were severed after an abortive coup in Indonesia in 1967. Indonesia accused China of backing the attempt. China denied the allegations.

Indonesia is expected to re-establish ties with Peking next month.

Singapore has said it will establish ties with Peking only after Jakarta does so so.

Three other members of the Association of Southeast Asian Nations (ASEAN) -- Malaysia, Philippines and Thailand -- already have ties with China.

Brunei, the sixth member of ASEAN, has no ties with China. Brunei's Foreign Minister Prince Mohamad Bolkiah said in Jakarta earlier this week that Brunei had no immediate plans to establish links with China.

HANOI (JULY 27) - Vietnam exported 12,000 tons of hardened latex in the first half of this year out of total production of 12,800 tons that fell well short of the planned target, the daily Nhan Dan said Friday.

The rubber industry achieved only 28 percent of its annual plan by June, due mainly to a prolonged drought that set back production in March and affected crop yield, the newspaper said.

The modest production figures nonetheless represented a rise of 12.7 percent over the same period last year, it said.

If the target of the 1986-1990 five-year plan were reached, the area of land in Vietnam where rubber is cultivated should total about 300,000 hectares (741,000 acres), compared with the 77,000 hectares (192,500 acres) that remained after the fall of South Vietnam in 1975.

The rapid expansion in rubber plantations came after cooperation agreements

with the Soviet Union, Czechoslovakia, Bulgaria, Poland, East Germany and Cuba, which allowed the planting of some 155,000 hectares (387,500 acres) during the past five years.

#90208d7500 07/27/1990 ~French/German News Agency

VIENNA (JULY 27) - Doctors in Austria early Friday successfully separated Libyan Siamese twins joined at the head.

After the eleven-hour operation, Dr. Wolfgang Koos of the Vienna neurology clinic said the conditions of three-and-a-half-year old Hassam and Salam was ''in circumstances good''.

In the last of five operations to seperate the twins doctors had to cut an artery supplying blood to the brains. ''It was a matter of life or death'', Koos said.

The twins will eventually undergo surgery to construct skull bones and to transplant skin as well hair.

Hassan and Salam have spent almost their entire life in the Vienna hospital. They were taken to the clinic by their father on Apr. 9, 1987. He has not been seen again.

MARSEILLES, France (JULY 27) - A 16th person was indicted here Friday in connection with an alleged arms trafficking network between Lebanon and France, legal sources said.

Alain Andre, a retired police officer, is suspected of receiving arms sent from Lebanon by Jean-Claude Labourdette, former head of security at the French embassy in Beirut.

Mr. Labourdette is alleged to have been the ringleader of the smuggling operation. Eleven of the 16 people charged in the scandal are police officers.

On Thursday former police officer Philippe Nino, whose testimony to police set the arms smuggling inquiry in motion, was formally charged with arms offences and criminal association.

Mr. Nino was originally arrested on charges of smuggling stolen cars.

The operation lasted five years and brought about 100 weapons from Lebanon to France aboard military aircraft. Some of the arms ended up in the hands

of gangsters.

#90208d7630 07/27/1990 ~French/German News Agency
PARIS (JULY 27) - Heat waves and drought are parching southern Europe this summer while Europeans to the north are looking desperately for a hint of sunlight.

The drought affecting southern Europe is particularly alarming in Greece where authorities call it the worst dry spell of the century. The cities of Athens, Thessaloniki and southwestern Patras have been hit the hardest.

In the Greek capital the water supply is shrinking by the day, and officials fear they will not be able to guarantee Athens dwellers water beyond next November.

Greek crops are withering, with reported losses of up to 150 billion drachmas (nearly 900 million dollars). Meanwhile, the cost of water has tripled, authorities have hastily ordered a drilling program and oil tankers diverted to bring in water from the outside.

There has been a parallel campaign to convince Greeks to save on water consumption, with posters suggesting that car owners sponge-bathe their vehicles and homeowners "water your flowers but not the sidewalk."

In Turkey, people in some areas of Istanbul are packing the public baths, the only place where bathing water is freely available. In residential neighborhoods, running water is cut off for all but four hours a day.

In the shanty towns where more than three-quarters of Istanbul's population live, water is only distributed for six hours a week.

In France, water restrictions have been slapped on many districts in the north, center, southeast and southwest of the country.

Some factories have stopped running because of water shortages and the Golfech nuclear power plant in southwestern France has been shut down because of the sharp rise in the temperature of the Garonne River.

Thermometers have been breaking the 40 degree centigrade mark (104 degrees Fahrenheit) in northern Spain, generally unaccustomed to such temperatures. The situation is especially worrisome in the northwestern region of Galicia, hit by a wave of forest fires.

With the onslaught of the tourist season, water restrictions have been ordered in Galicia and the northern Asturias region.

Except for recent heavy rainfall in central Italy's Abruzzi region, most of Italy from northern Liguria to Sicily is suffering from drought. Dwindling water supplies have touched a "water war" between Genoa and Piacenza over the use of Lake Brugneto.

"The lake's water is now at one-third its capacity and if we give water to Piacenza, we may as well turn off our own faucets," a Genoa city official recently complained.

Italian farmers have demanded government aid and indemnities as losses, for which there are still no official figures, continue to mount.

But for Denmark, the Netherlands and East Germany, July has brought only grey skies and rain.

Danes are hurrying south towards the sun while in The Hague Dutchmen on Thursday celebrated their first sunny day in a week.

East Germany has been under the clouds for two straight months, while in West Germany warm weather has ripened crops before their natural harvest times.

#90208d7690 07/27/1990 ~French/German News Agency

PRETORIA (JULY 27) - The South African Government has scrapped the mandatory death sentence for murder and promulgated an amendment granting condemned prisoners automatic right of appeal.

Under the new law, published in the official Government Gazette here Friday, the death sentence could only be imposed in specific situations, Justice Minister Kobie Coetsee said in a statement.

Until President Frederik de Klerk imposed a moratorium on executions on February 2, 90 percent of all executions in the Western world were carried out in South Africa.

The number of executions has declined steadily since 1987 when 164 people were executed. In 1988, 117 people were executed and in 1989 only 53.

Murderers always went to the gallows if the judge deemed there were no mitigating circumstances.

Provisions of the new law, which includes automatic petitioning for clemency to the president, also apply to people already on death row.

At present, the death sentence for treason can only be imposed when South Africa is at war. Previously, several anti-apartheid activists charged with

treason faced the mandatory imposition of the death sentence if no extenuating circumstances existed.

David Unterhalter, spokesman for the Society for the Abolishment of the Death Penalty, welcomed the new bill saying, "Obviously the bill will not eliminate error, but the risk of error will be reduced".

He added that the bill "ought to ensure a greater measure of consistency in the way that the death penalty is imposed by trial courts".

Observors believe that one of the first cases to be reviewed under the new law will be that of 14 blacks, known as the "Upington 14", sentenced to death in May 1989 for the 1985 murder of a black policeman in Upington, an agricultural town bordering the Kalahari desert.

The trial caused controversy because the 14 had been convicted on the principle of "common purpose" -- they had not actually murdered the victim but were part of a crowd encouraging the killers.

The same doctrine was used in the case of the black "Sharpeville Six" activists sentenced to death in 1985.

The six were convicted for their part in the mob-murder of a black municipal councillor but reprieved from the gallows and given long jail sentences in 1987 after intense pressure from Western governments.

Meanwhile the Pretoria Supreme Court handed down 18-year prison sentences Friday against two African National Congress (ANC) car bombers who killed three people and injured 15 in 1988 in a rush-hour blast at the colliery town of Witbank, some 120 kilometres (80 miles) east of here.

The presiding judge said that although the bombing was "diabolical" it would not be in the community's interest to impose the death sentence on former teachers Joseph Vilakazi and Stephen Maboa.

#90208d7830 07/27/1990 ~French/German News Agency

LUSAKA (JULY 27) - A close friend of President Kenneth Kaunda's youngest son, Kambarage, told a coroner's court here Friday how the Zambian leader's son shot and killed a 20-year-old girl.

Rafiq Mulla, 28, a Zambian businessman of Asian origin, told an inquest into the death of Tabeth Mwanza in September last year that Kambarage shot her. But he said the shooting was not intentional.

Mr. Mulla said he and Kambarage with two other colleagues were on their way home from a party. After dropping off a friend they were suddenly

confronted by a mob of 15 people who attacked and stoned their car.

"We were attacked by this mob of 15 people who were standing in the centre of the road ahead of us. I told Kambarage not to stop, but he hooted twice and the group did not move. As we approached three of them came close to the car. One of them had something in his hand and we heard a bang on the right side of the car."

He said "Kambarage was forced to stop the car and the group drew closer. We both got very frightened. I grabbed the gun on the floor of the car and fired one warning shot in the air. Then Kambarage got out too, and using his pistol shot three warning shots in the air. But after that I ran to the front of the car to keep at bay the mob approaching from the front. Kambarage went to the back from where I heard him fire more shots."

Asked by Tabeth's family lawyer Chifumu Banda if it was he or Kambarage who fired the fatal shot, Mr. Mulla said: "It was Kambarage, and the bullet found in the girl's head was found to be from Kambarage's pistol."

But witnesses who were with Tabeth that night have testified that their group, also going home from a party, did not attack Kambarage's car. They said shots were fired from from occupants of the car as it went past, killing Tabeth.

One witness, Andrew Kaonga, told the coroner's court how his group scampered in all directions. "We were so scared because we did not know what was happening. I personally got so scared that I fell down then Kambarage came to me. I quickly raised my hands and he hit me with the butt of his gun and ordered me to go to the car.

"When I tried to open the door of the car he stopped me and told his friend to help him put me in the boot (trunk) of the car," he said. Mr. Kaonga, a 17-year-old student, told the court that he was driven to the police station in the boot. Kambarage said police should charge him with "trying to rob a car."

Mr. Mulla, visibly nervous giving evidence, denied that the boy was put in the boot.

The hearing was adjourned to August 1 when Kambarage will give evidence.

BELFAST (JULY 27) - Pope John Paul II appealed to Northern Ireland's terrorists to renounce violence Friday at the funeral of a nun killed in an Irish Republican Army (IRA) bomb attack that also left three policemen dead.

Addressing hundreds of mourners at the funeral of Sister Catherine Dunne in the village of Middletown near Armagh, the pope called on "the men and women who espouse violence to recognize the grievous injustice and futility of terrorism".

The pope also implored "God's peace upon Northern Ireland".

The 37-year-old, Dublin-born Roman Catholic nun was driving south of Armagh when a mine exploded in front of a nearby police vehicle. Another woman in the car was seriously injured.

The three policemen were killed instantly by the explosion.

The IRA, which claimed responsibility for the attack, said it regretted the death of the Catholic nun.

VIENNA (JULY 27) - The politburo of the Albanian Communist Party has announced measures allowing the partial privatization of agriculture, the Albanian news agency ATA said in a report monitored here Friday.

Under the new measures, peasants will be allowed to raise livestock on their own land, not just that owned by cooperatives, and will be allowed to have up to 2,000 square metres (2,400 square yards) of cooperative land for their own use.

The Albanian authorities recently decided to allow small businesses to be privatised.

#90208d8270 07/27/1990 ~French/German News Agency

Amman (JULY 27) - Finance Minister Basel Jardaneh announced Friday his government plans to enter negotiations with international creditors to buy back part of its 8 billion dollar foreign debt at a 30 percent discount.

The finance minister told reporters that Amman hoped to reach an agreement with the London Club of commercial banks by the end of next month.

He said an agreement on the buy back would finalise the rescheduling of 575 million dollars in commercial debt to the London Club due between January 1989 and mid-1991.

The six-member steering committee of the London Club was expected to meet August 1 to discuss Jordan's request to buy back part of its debt at 70

cents to the dollar, Jardaneh said.

He said the government hoped to obtain fresh long-term soft loans from the world bank to buy back the debt. But he did not specify the amount the government planned to borrow.

The debt buy back would help the government convert some of the debt into investments by commercial creditors and in repaying some of the debt directly by exports.

''We will seek to convince creditors to invest in Jordan to regain the debt through that investment or to repay them through exports,'' Jardaneh said.

#90208d8280 07/27/1990 ~French/German News Agency

PRAGUE (JULY 27) - The European Economic Community is to provide aid of 400 million ECUs (500 million dollars) to Czechoslovakia for the modernization of its industry and infrastructure, EEC Commision Vice President Henning Christophersen said here on Friday at the end of a two-day visit.

The aid would be part of the so-called Phare program sponsored by the group of 24 industrialized countries to support reforms in countries in East Europe excluding the Soviet Union and Romania.

The EEC aid, lasting three years, would be used for training, fighting pollution, and for investment in transport, energy, and small and medium-sized companies, Czechoslovak Economy Minister Vladimir Dlouhy said. It is the first western aid to accelerate the conversion of the Czechoslovak economy to market principles.

Christophersen told a press conference: "We should develop our efforts to support the program of economic reforms begun in Czechoslovakia." He expressed confidence in the future of the economy which had "big potential an industrial tradition and seems to have the political determination necessary to make the reforms successful".

He recommended that the internal convertibility of the crown from January 1 be accompanied by "significant and rapid reforms in other sectors of the economy", referring to prices, banks, privatization, and taxation.

The EEC and Czechoslovakia were due to begin in the autumn negotiations to reach a more ambitious association agreement than the one signed in May, leading eventually to free trade. For Czechoslovakia such cooperation was a first step towards membership of the EEC by the end of the century.

Dlouhy said that in coming weeks Czechoslovakia would "accelerate"

negotiations to join the International Monetary Fund to gain access to other loans and to create a stabilization fund.

MOSCOW, July 27 (AFP) - Soviet President Mikhail Gorbachev confirmed Friday that he would visit Japan next year, despite his earlier warning that the trip could be cancelled if Tokyo insisted on discussing the Kuril islands dispute.

"I am prepared to take big steps to meet Japan half-way", Mr. Gorbachev said during a meeting at the Kremlin with Daisaku Ikeda, chairman of a major Buddhist educational organisation.

"Despite the fact that the forthcoming months and the year 1991 will mark a great time in the life of the Soviet Union, representing a great test...perhaps in the entire history of this country, it will be essential to find a moment for a visit to Japan," Tass news agency quoted him as saying.

"I am prepared for a candid discussion with Japan, its people and its government. There are no off-limit subjects for me. Anyone can say what he really thinks. But we must step over the stereotypes and begin to make progress.

Mr. Gorbachev went on: "The main thing is that there should be no ultimatums and no pre-conditions. They are simply humiliating for two such nations."

#90208d8530 07/27/1990 ~French/German News Agency

AMMAN (JULY 27) - Debt-crippled Jordan hopes to introduce a special clause in its upcoming agreement with the London Club of commercial creditors to buy back its commercial debts at a discount, Finance Minister Bassel Jardaneh said here Friday.

"We will reach within the next six months a national program to buy back our commercial debts from the international market at a discount," he told reporters.

He said Jordan's commercial loans totalled 1.3 billion dollars out of 8.3 billion dollars in debt to foreign governments and international lending institutions.

Jordan defaulted on principal and interest payments last year but reached an agreement with the International Monetary Fund (IMF) to reschedule its disbursements on the full arrears for 1989 and for the principal only for 1990.

The agreement is to be renewed on an annual basis.

Jordan later went to the Paris Club of government creditors and the London Club of commercial lenders to reschedule its 1990 debt payments.

Mr. Jardaneh said he had wrapped up the last of a series of talks with the London Club but failed to reach common ground on the inclusion of a special clause allowing Jordan to buy back its debts.

"Although we made progress in our negotiations in London, I was disappointed on the debt buy-back process that Jordan asked to be added to the agreement," Mr. Jardaneh said, adding that he expected both parties to reach an accord by August.

The minister -- drawing on an IMF-oriented five-year "Economic Structural Programme" -- painted an optimistic picture of Jordan's economy in the first half of 1990.

"Imports went down by three percent from 1.15 billion dollars last year to 1.11 billion dollars this year whereas exports soared by four percent from 430 million dollars last year to 450 million in the first six months of 1990," he said.

-30- 2059

#90208d8540 07/27/1990 ~French/German News Agency

LONDON (JULY 27) - Sir Alan Walters, former economic adviser to Prime Minister Margaret Thatcher, said Friday the British Government did not plan rapid, full entry of the pound into the European Monetary System (EMS).

Sir Alan, an opponent of the EMS, said in an interview with Sky Television that the conditions set by Britain last year for sterling's entry into the exchange rate mechanism of the EMS were far from being filled.

The economist recalled that one of these conditions had been a substantial reduction in Britain's inflation rate, but this had risen since last year's Council of Europe meeting in Madrid.

Inflation is currently running at 9.8 percent, and Sir Alan said he

expected it to continue rising until the end of the year, running counter to City expectations that it will peak in August.

Despite Sir Alan's gloomy predictions on EMS entry, the pound was up almost two pfennigs at 2.96 Deutsche marks in afternoon trading in London, thanks to pre-weekend buying in case the government made a sudden decision to take sterling in.

Mrs. Thatcher's reliance on Sir Alan's advice led to the resignation in October of Chancellor of the Exchequer Nigel Lawson, after which Sir Alan himself stepped down as her economic adviser.

Mrs. Thatcher has said she continues to see Sir Alan "as a friend of the family."

PRETORIA (JULY 27) - Scientists discovered one of the oldest large Dinosaur fossils in the world in a remote part of the Orange Free State province, a government spokesman said Friday.

The spokesman said the Euskelosaurus fossils was found in a largely inaccessible area on private property near the town of Clarens, 400 kilometres (250 miles) south of here.

Witwatersrand University paleontologist, James Kitching, said the Dinosaur was one of the largest found in South Africa and roamed the country about 190 million years ago.

Professor Kitching said the find was an adult Dinosaur, nine metres (29.7 feet) high with an elephant-like body, a small head and a long neck. The fossil is 15 metres (49.5 feet) long from the tip of its snout to its tail.

He said it is planned to reconstruct the Dinosaur to eventually form part of a growth series to represent baby to adult dinosaurs.

HARARE (JULY 27) - Air Zimbabwe's regional and international flights were expected to get back to normal Friday after more than 500 striking engineers and 100 groundstaff heeded a government appeal to return to work.

Transport Minister Dennis Norman and Labour Minister John Nkomo told workers that the strike was illegal as proper industrial relations procedures had not been followed.

Airline workers struck Wednesday after promised pay rises were not in their pay packets.

Airline officials confirmed Friday that management and union leaders were now in negotiations.

Meanwhile striking bank workers vowed to continue their action until their demands for better working conditions and pay were met.

Bank employees are seeking 26 percent pay rises but have been offered only 16 percent.

The government news agency, Ziana, said Friday that the bank strike was forcing many foreign tourists to cut short their visits because they had run out of money.

#90208d8690 07/27/1990 ~French/German News Agency

JOHANNESBURG (JULY 27) - The African National Congress (ANC) Friday began a boycott of white firms in east Transvaal in protest against killings by "right-wing vigilantes" in the region's townships, correspondents said.

The ANC announced on July 25 that the boycott will last until September in eight towns viewed as bastions of the extreme right and until Aug. 29 elsewhere in the eastern Transvaal.

The ANC wants the white-minority government to dismantle and disarm the extreme right and force authorities in the targeted towns to allow ANC protest marches.

White businessmen in the towns have hit out at the ANC-backed boycott and are planning a counter-boycott, cutting off supplies to black townships.

#90208d8820 07/27/1990 ~French/German News Agency
JOHANNESBURG (JULY 27) - Former Nigerian head of state General Olusegun Obasanjo met rival black leaders here Friday to urge them to bury the hatchet, his aide Yusuf Maiangwa said.

Speaking on behalf of the general at a press conference, Mr. Maiangwa said Gen. Obasanjo had met Pan Africanist Congress (PAC) president Zeph Mothopeng for over an hour and was scheduled to meet African National Congress (ANC) leader Nelson Mandela later Friday.

Before flying out on Saturday after his three-day fact finding mission, the general would also meet Zulu leader Mangosuthu Buthelezi, Mr. Maiangwa said.

His message to the three leaders was that schisms in the black community had urgently to be addressed.

"The issue of unity and talking to each other needs to be dealt with if the South African situation is to be resolved," he said.

The general had told Mr. Mothopeng that he was gravely concerned about the lack of unity among black organisations and at internecine violence in Natal Province, where clashes between pro-Inkatha and pro-ANC Zulus has seen some 3,000 people killed since 1986.

All anti-apartheid organisations, the ANC, the PAC and Inkatha differ, inter alia, on the methods to be used to overthrow the race policies of

South Africa's white minority government.

The PAC is the most militant of the three, refusing to counter negotiations with Pretoria; the ANC has laid down certain conditions for negotiations while Mr. Buthelezi has said he is ready to negotiate now.

General Obasanjo is in South Africa at the behest of his government and is travelling on the official presidential plane. On Thursday he held talks with President Frederik de Klerk.

At the press conference, Mr. Maiangwa announced that Mr. Mothopeng was to travel to Nigeria on Saturday for a brief visit and for talks with Nigeria's military ruler, Gen. Ibrahim Babangida.

#90208d9000 07/27/1990 ~French/German News Agency

ROME (JULY 27) - Italian Prime Minister Giulio Andreotti moved quickly Friday to fill the resignations Thursday of five Christian Democrat ministers in his coalition government in a row over television commercials.

The five, all left-wing Christian Democrat ministers, resigned over a draft law setting new regulations governing the time allowed television commercials during the broadcast of films.

Mr. Andreotti's new team, all Christian Democrats, are: Virginio Rognoni, who replaces Mino Martinazzoli at defence; Franco Piga, replacing Carlo Fracanzani as state participation minister; Gerardo Bianco, replacing Sergio Mattarella at public education; Vito Saccomandi, replacing Calogero Mannino at agriculture; and Giovanni Marongiu, replacing Riccardo Misasi at development.

Mr. Andreotti had announced before parliament he intended to call a confidence vote on the draft legislation which set January 1, 1993 for the new television rules, almost two years later than the European Economic Community recommendation of October 1991.

Many Christian Democrats are opposed to the legislation arguing that it also violates the community guidelines stipulating that the time of commercials respect the natural flow of television programs.

The former ministers said the draft legislation favoured private television networks, particularly those owned by Silvio Berlusconi, a known Socialist Party sympathiser.

Italy's coalition government is composed of 15 Christian Democrats, 10 Socialists, two Liberals and two Social Democrats.

Mr. Andreotti is expected to get parliamentary approval for his new team despite stiff opposition from the Communist Party.

LONDON (JULY 27) - Corporate West Germany's push to forge partnerships with East German firms appears already complete, according to European corporate partnership statistics compiled by accountants KPMG Peat Marwick Mclintock here.

Second quarter 1990 showed a strong decline in corporate partnerships struck with East German firms, to 44 from 106 in the first quarter.

Only 10 of the 150 partnerships arranged with East Germany in the entire first half were made by companies outside West Germany.

According to the report the figures suggest that the major industries have now been absorbed, although activity is continuing on a smaller scale.

The low proportion of non-West German firms involved suggests that for the rest of the world an East German business opportunity never really existed the report said.

A KPMG Peat Marwick spokesman said that to qualify as a corporate partnership a "significant economic interest in a joint arrangement" had to be proven.

BRASILIA (JULY 27) - Senior government officials from Argentina, Brazil, Chile and Uruguay will meet here next week to assess U.S. President George Bush's free enterprise initiative for Latin America, it was officially announced here Friday.

The four nations of South America's southern cone, have already taken steps to increase the flow of regional trade and are eager to study Mr. Bush's proposal made one month ago in Washington.

Mr. Bush's Enterprise for the Americas Initiative calls for a free trade zone in the hemisphere, increased investment in the region and an easing of Latin America's external debt by linking its repayment to efforts to protect the environment.

The meeting Tuesday and Wednesday in Brasilia will be attended by the foreign and economy ministers of the four southern cone countries.

Argentine President Carlos Menem and Brazilian President Fernando Collor de Mello will also discuss Mr. Bush's initiative on Monday, when they will attend the maiden flight of the jointly produced CBA-123 airplane, near Sao Paulo.

JOHANNESBURG (JULY 27) - Up to 1,400 black mineworkers have been dismissed at Consolidated Modderfontein gold mine east of here after they downed tools in support of wage demands, the National Union of Mineworkers (NUM) said Friday.

But management of the mine, situated near Brakpan 40 kilometres (25 miles) east of Johannesburg, said late Friday that all but 50 of the workers had been reinstated after they had agreed to return to work.

A NUM spokesman said the workers were locked out of the mine premises and their hostels on Thursday after having begun a strike on Wednesday. They were then informed that they had been dismissed.

A spokesman for the mine denied there was a lockout and claimed a "hardcore" of about 50 workers had intimidated other miners from turning up for work.

The NUM spokesman said that apart from wage increases, the workers were also demanding an improvement in the quality of food and the removal of a security gate so that taxis could drop workers near their hostels.

Meanwhile, about 22,000 coalminers are set to go on strike next week after the NUM rejected a Chamber of Mines strike offer of between 15.5 and 17 per- cent, the spokesman said.

Arguing that the collieries had shown good profits, the workers are sticking to demands for an average 20 percent increase, he said.

WELKOM, South Africa (JULY 27) - Right wing vigilante leader Hennie Muller, accused by blacks of fanning racial hatred in this ultra-conservative Orange Free State town, announced Friday he was disbanding his militia and joining the police.

Mr. Muller told state-run radio that he and his White Security (BV) force had become irrelevant, as Law and Order Minister Adriaan Vlok had kept a promise he made at the height of tension in May to send in more police.

A panelbeater by trade, he said he and 600 followers would now rather join the police reserve.

BV vigilantes were accused of random attacks on black people in Welkom following the rape and murder of a 29-year-old white woman in March.

They stepped up patrols after a tornado wrecked white suburbs on March 20, ostensibly to prevent looting.

Community leaders in the black township of Thabong retaliated by calling a consumer boycott of white businesses.

Tensions erupted on May 16 when black miners killed two white colleagues at a gold mine in the town. Four days later police shot dead 11 demonstrators in Thabong.

Meanwhile Eugene Terre'Blanche, leader of the neo-fascist Afrikaner Resistance Movement (AWB), cancelled a trip to London Friday when the British independent television station Channel Four put on hold its plans to fly him over to appear on a news review programme.

The South African Press Association (SAPA) said editors on the Channel Four show "The World This Week" had decided an interview with African National Congress (ANC) leader Nelson Mandela would be more newsworthy in the light of this week's arrests of ANC and South African Communist Party members.

BURGOS (JULY 25) EFE - The fossilized bones of several 500,000-year-old men and women have been unearthed in northern Spain, and experts are hoping to use them to reconstruct the first full skeleton of a pre-Neanderthal man, a leading Spanish paleontologist said Friday.

The excavators found over 160 male and female bones believed to be between 500,000 and 700,000 years old in Atapuerca, one of Spain's northern mountain ranges, team leader Emiliano Aguirre said.

Exact dating of the skeletons has not yet been completed.

The geologists, archeologists and paleontologists on the dig believe that the fossilized bones they unearthed this year, described by Aguirre as their +most fruitful+ ever, belong to the species of pre-Neanderthal man who travelled from Africa to Europe and Asia over a million years ago.

Until now, the most famous pre-Neanderthal bone was the Mauer jawbone, thought to be 700,000 years old. But Aguirre's group has uncovered a complete skeleton which they have called "The Man of Atapuerca".

According to preliminary studies made on the bones, the "Man of Atapuerca" was dark-skinned, between 1.6 and 1.7 meters tall, and had a strong skull and steeply-sloping forehead.

Investigators believe he was a cave-dweller who made axes from stones and fed himself on vegetables and small animals.

Excavators have also found other important fossils, including the jaw of a child.

The team, funded by the regional government and local universities, has been studying fossil deposits in Atapuerca since 1978.

Santiago (JULY 27) EFE - Two people were injured and a number of buildings were damaged overnight when at least seven bombs went off in the Chilean capital, police said Friday.

No group has claimed responsibility for the attacks, but police said Chilean left-wing extremists commemorating the 37th annivesary of the assault which predated the Cuban Revolution were believed to be responsible.

The bombs targeted several U.S. companies, among them Citibank, Chase Manhattan Bank, Union Trading Company and VTR Communications. Offices of Chile's state telephone company were also attacked.

The two people were injured in the attack on the VTR offices.

At the scene of some of the blasts, police found leaflets of the leftist Manuel Rodriguez Patriotic Front (FPMR) rebel group which said the bombs were set off to mark the anniversary of Cuban leader Fidel Castro's failed attack on the Moncada barracks.

The FPMR set off numerous bombs and killed dozens of police and military officers during the former military dictatorship of Gen. Augusto Pinochet.

Pinochet handed over office to democratically-elected President Patricio Aylwin in March but is to stay on as Army chief until 1997 under the military-drafted constitution.

#90208e0040 07/27/1990 ~Latin America New Agency

BRASILIA (JULY 27) EFE - Brazil's largest car manufacturer, Autolatina,

which is jointly owned by Volkswagen and Ford, Friday closed indefinitely one of its key plants following violent clashes between police and strikers, a company spokesman said.

The latest outbreak of violence at the Autolatina car plant, 21 km southeast of Sao Paolo, occurred Thursday when the company's management called in police to dislodge workers who were holding a sit-in in the factory to press for a 166 percent wage hike.

Some 500 police charged the strikers with clubs and tear gas at the plant.

The strikers destroyed several cars, threw stones and debris at the police and threatened to set fire to the factory.

Thursday's outbreak of violence was the third in six days as strikers upped the stakes in their 46-day stoppage, which was also called to press for the reinstatement of 100 sacked colleagues.

The company's vice-chairman for corporate affairs, Miguel Jorge, said Thursday, +After three sit-ins, three cases of vandalism and two bomb explosions there are no more possibilities for negotiation.+

The factory will remain closed until some kind of accord is reached.

Ford and Volkswagen formed Autolatina in 1986. Since then, the company has controlled up to 50 percent of the Brazilian car market.

But, earlier this year, the firm put some 28,000 of its 45,000 workers on temporary leave as a result of a major austerity program launched by President Fernando Collor de Mello's government which reduced car sales to a trickle.

A presidential spokesman has ruled out federal government intervention in the strike.

#90208e0041 07/27/1990 ~Latin America New Agency

Cadiz, Spain (JULY 27) EFE - Civil guards have seized 231 kg of hashish and arrested two people carrying 920 grammes of heroin in separate hauls in southern Spain, government officials said Friday.

Civil guards surprised the crew of a motorboat who had dumped 231 kg of hashish on a beach near the town of La Linea 500 km southwest of Madrid before fleeing to open seas.

A few kilometers away in the southern port city of Algeciras, civil guards arrested two Spaniards as they tried to smuggle 920 grammes of heroine

hidden under their clothing through customs.

Police arrested 31 people last month in Spain's northwestern region of Galicia, in one of the country's largest anti-drug operations.

A Spanish government report released this month said more drugs were seized in Spain last year than in any other European nation, with some 1,852 kg of cocaine being confiscated.

LONDON (JULY 27) XINHUA - THE BRITISH ARMY HAS SCALED DOWN TRAINING BECAUSE IT LACKS AMMUNITION, A SPOKESMAN OF THE DEFENCE MINISTRY SAID TODAY.

"THERE HAVE BEEN RESTRICTIONS ON NON-ESSENTIAL TRAINING WHICH MEANS SOME NON-ESSENTIAL TARGET PRACTICE HAS NOT BEEN UNDERTAKEN," HE SAID.

THE DEFENCE MINISTRY WITHDREW A BATCH OF AMMUNITION WHICH WAS REACHING THE END OF ITS LIFE, CAUSING A TEMPORARY SHORTAGE.

THE SPOKESMAN SAID THE SHORTAGE WOULD NOT AFFECT "OPERATIONAL EFFECTIVENESS OF THE ARMY." "A CONTRACT IS NOW IN HAND FOR THE REPLACEMENT OF THE AMMUNITION BY THE END OF THE SUMMER," HE ADDED.

REPORTS SAID BRITAIN HAS SECURED A 15 MILLION POUNDS STERLING (27 MILLION DOLLARS) EMERGENCY SUPPLY OF BULLETS FROM INDIA, BUT THEY TURNED OUT TO BE FAULTY AND COULD NOT HIT PRECISELY THE TARGET. THE DEFENCE MINISTRY GAVE NO CONFIRMATION ON THAT REPORTS.

HONG KONG (JULY 27) XINHUA -- A LARGE QUANTITY OF SILK WORTH ABOUT 1.1 MILLION H.K. DOLLARS (141,025 U.S. DOLLARS) WAS BURGLED THIS MORNING FROM A DYEING FACTORY IN KWAI CHUNG OF NEW TERRITORIES, HONG KONG.

POLICE SAID THE CASE CAME TO LIGHT AT ABOUT 8 AM WHEN THE PROPRIETOR RETURNED TO THE FACTORY AND FOUND THE IRON GATE WAS PRIZED OPEN.

AFTER CHECKING, HE FOUND THAT ABOUT 35 BOXES CONTAINING SILK AND 6,000 H.K. DOLLARS (769 U.S. DOLLARS) CASH, HAD BEEN MISSING.

THIS IS THE SECOND SILK BURGLARY CASE WITHIN TWO DAYS. POLICE REPORTED THAT A GODOWN IN YAU TONG, KOWLOON, WAS REPORTEDLY ROBBED OF 700,000 H.K. DOLLARS (89,743 U.S. DOLLARS) WORTH OF SILK CLOTH BY EIGHT MEN YESTERDAY.

THE SUSPECTS FLED AWAY ON BOARD A LIGHT GOODS VEHICLE WITH THE SEVENTY ROLLS OF SILK CLOTH.

THE TWO CASES ARE BEING INVESTIGATED.

#90208h0156 07/27/1990 ~Chinese News Agency

CAIRO (JULY 27) XINHUA -- IN FACE OF A RAPIDLY INCREASING HOUSING SHORTAGE CAUSED BY THE ARRIVAL OF TENS OF THOUSANDS OF SOVIET JEWS, ISRAELI FINANCE MINISTER YITZHAK MODAI SUGGESTED TODAY THAT THE NEWCOMERS BE ACCOMMODATED IN TENT CAMPS.

REPORTS FROM JERUSALEM QUOTED MODAI AS SAYING THAT "IT IS PERMISSIBLE AND WE MUST TALK ABOUT TEMPORARY HOUSING UP TO THE POINT OF ARMY CAMPS."

SOME 74,000 SOVIET JEWS HAVE ARRIVED IN ISRAEL SINCE EARLY 1989 AND SUBSIDIES FOR THE NEWCOMERS HAVE CAUSED A SHOOTUP IN HOUSING COSTS AND ISRAELI HAVE SET UP DOZENS OF TENT CAMPS TO PROTEST AGAINST BEING DRIVEN OUT OF THEIR HOMES BY THE RISING RENTS.

ABOUT 10,000 HOUSING UNITS HAVE BEEN STARTED THIS YEAR, BUT ISRAELI OFFICIALS SAY THAT 40,000 SUCH UNITS ARE NEEDED TO ACCOMMODATE THE 150,000

SOVIET JEWS EXPECTED TO ARRIVE BY THE END OF THE YEAR.

HOUSING MINISTER ARIEL SHARON WILL PRESENT A PLAN TO IMPORT 3,000 TRAILERS AND 40,000 PREFABRICATED HOUSES. SHARON EARLIER TRIED TO IMPORT SUCH HOUSES UNDER EMERGENCY REGULATIONS. BUT THE SUPREME COURT RULED HE NEEDED PARLIAMENTARY APPROVAL.

THE MASSIVE INFLUX OF SOVIET JEWS HAS CAUSED GREAT CONCERN AMONG ARAB PEOPLE WHO FEAR THAT MANY OF THEM WILL BE SETTLED IN THE OCCUPIED ARAB TERRITORIES.

-30- 1427

#90208h0157 07/27/1990 ~Chinese News Agency

ISTANBUL (JULY 27) XINHUA -- A POLICEMAN WAS SHOT DEAD BY THREE GUNMEN TODAY IN THE GAZIOSMANPASA DISTRICT OF ISTANBUL, THE BIGGEST CITY OF TURKEY, THE STATE-RUN ISTANBUL RADIO REPORTED.

THE THREE GUNMEN, DISGUISED AS CIVIL POLICEMEN, RANG THE BELL OF THE HOUSE OF ISMAIL KILIC, WHO WORKED IN THE MOBILE DIVISION OF ISTANBUL POLICE DEPARTMENT.

THE GUNMEN OPENED FIRE AS KILIC OPENED THE DOOR. HE WAS KILLED ON THE SPOT THE RADIO SAID.

CHIEF OF ISTANBUL POLICE HAMDA ADALI SAID THAT THE GUNMEN, WHO "BELONG TO AN OUTLAWED ORGANIZATION," ESCAPED IN A STOLEN CAR.

AT LEAST THREE POLICEMEN HAVE BEEN KILLED IN SIMILAR ATTACKS THIS YEAR.

-30- 803

#90208h0239 07/27/1990 ~Chinese News Agency

NANNING (JULY 30) XINHUA - A TEAM OF CHINESE ANTHROPOLOGISTS, AND POPULATION AND MEDICAL EXPERTS HAS DRAWN MANY USEFUL CONCLUSIONS FOR LIVING A LONG LIFE FROM A RECENT GENERAL SURVEY, ORGANIZED BY THE MINISTRY OF PUBLIC HEALTH, IN THE YAO AUTONOMOUS COUNTY OF BAMA, A REGION KNOWN AS THE "HOME OF LONGEVITY".

THE COUNTY, AN UNDERDEVELOPED MOUNTAINOUS REGION IN THE GUANGXI ZHUANG AUTONOMOUS REGION OF SOUTH CHINA, BOASTS 52 CENTENARIANS AND 203 PEOOPLE AGED AT OR ABOVE 90 OUT OF THE 220,000 POPULATION IN THE COUNTY.

STUDIES SHOWED THAT MANY CENTENARIANS FOLLOW A COMMON LIVING PATTERN -- A RATIONAL FOOD STRUCTURE, A MODERATE AMOUNT OF PHYSICAL EXERCISE, SMALL DOSES OF LOW-STRENGTH MEDICINAL LIQUOR, A HARMONIOUS FAMILY LIFE AND A QUIET AND POLLUTION-FREE ENVIRONMENT.

THE LOCAL PEOPLE TAKE MAIZE, BEANS AND VEGETABLES AS THEIR STAPLE FOOD. THEY MILL MAIZE INTO FINE FLOUR AND COOK GRUEL WITH IT, AND GRIND SOYA BEANS TO MAKE BEAN CURD AND BEAN BALLS WHICH ARE BOILED TOGETHER WITH VEGETABLES. PORK AND BEEF ARE RARELY SEEN ON TABLES. ALL THE FOOD IS BOILED INSTEAD OF BEING STIR-FRIED AS IS COMMON IN OTHER PARTS OF THE COUNTRY.

THE SCIENTISTS CONCLUDE THAT MAIZE HAS AN ANTICANCER EFFECT, BEANS CONTAIN MANY SORTS OF MINERAL SUBSTANCES AND VITAMINS, AND VEGETABLES ARE RICH IN VITAMINS C AND B AS WELL AS CAROTENE. THE DIET IS REALLY GOOD FOR THE HEALTH OF THE LOCALS, THEY SAID.

AS THE COUNTY NESTLES DEEP IN THE REMOTE MOUNTAINS AND THERE IS NO EASY ACCESS FOR MOTOR VEHICLES, PEOPLE HAVE TO CARRY WATER AND DAILY NECESSITIES ON THEIR BACKS.

LU DIHUA, 109, LIVES IN BAMA TOWNSHIP. SHE IS STILL SPRY AND CAN DO ALMOST ALL KINDS OF FARM WORK SUCH AS CUTTING GREENFEED FOR PIGS, HUSKING RICE AND HERDING CATTLE.

#90208k0017 07/27/1990 ~Japanese News Agency

TOKYO (JULY 27) KYODO - MITSUI TAIYO KOBE BANK LTD. SAID FRIDAY THAT MITSUI BANK LTD., WHICH MERGED WITH TAIYO KOBE BANK LTD. IN APRIL, PAID 5.5 BILLION YEN IN COMPENSATION TO CUSTOMERS FOR INVESTMENT LOSSES ASSOCIATED WITH THE ''BLACK MONDAY'' STOCK CRASH IN OCTOBER 1987.

MITSUI BANK BOUGHT BACK JAPANESE GOVERNMENT AND CORPORATE BONDS FROM MAJOR CLIENTS TO COVER THEIR HUGE LOSSES AS A RESULT OF A PLUNGE ON BOND MARKETS IN THE WAKE OF THE GLOBAL STOCK MARKET CRASH, A SPOKESMAN FOR MITSUI TAIYO KOBE BANK SAID.

BUT HE INSISTED THE COMPENSATION DID NOT VIOLATE ANY LEGISLATION. THE SECURITIES AND EXCHANGE LAW PROHIBITS BROKERAGE FIRMS FROM PAYING MONEY TO CUSTOMERS FOR INVESTMENT LOSSES, BUT THERE IS NO STIPULATION CONCERNING BANKS.

THE TOKYO REGIONAL TAX BUREAU ON THURSDAY ACCUSED A DOZEN BROKERAGE HOUSES INCLUDING ''BIG FOUR'' MEMBERS YAMAICHI SECURITIES CO. AND DAIWA SECURITIES CO., OF COMPENSATING CUSTOMERS FOR STOCK LOSSES ESTIMATED AT 16 BILLION YEN.

FINANCE MINISTER RYUTARO HASHIMOTO, SPEAKING AT A REGULAR PRESS CONFERENCE AFTER A CABINET MEETING, SAID HE CRITICIZED MITSUI TAIYO KOBE BANK PRESIDENT KENICHI SUEMATSU, WHO VISITED HASHIMOTO TO MAKE AN APOLOGY FRIDAY MORNING, FOR ''SUCH WRONGDOING IN THE VIEW OF BANKS' CHARACTER AS PUBLIC INSTITUTIONS.''

HASHIMOTO SAID REGULATORY STEPS WOULD BE NEEDED TO PREVENT SUCH ''REGRETTABLE'' CASES IN FUTURE.

#90208k0128 07/27/1990 ~Japanese News Agency

MOSCOW (JULY 30) KYODO - SOVIET PRESIDENT MIKHAIL GORBACHEV ON FRIDAY CONFIRMED HIS PLANNED VISIT TO JAPAN NEXT SPRING IN A MEETING WITH NEWLY APPOINTED JAPANESE AMBASSADOR SUMIO EDAMURA, JAPANESE EMBASSY OFFICIALS SAID.

GORBACHEV'S REMARKS FOLLOWED A SIMILAR COMMITMENT HE MADE EARLIER IN THE DAY WHEN HE MET DAISAKU IKEDA, THE SPIRITUAL LEADER OF THE JAPAN-BASED LAY BUDDHIST ORGANIZATION SOKAGAKKAI.

FOLLOWING A CEREMONY IN WHICH EDAMURA PRESENTED HIS CREDENTIALS, GORBACHEV TOLD EDAMURA THAT NEXT SPRING WILL BE THE BEST TIME FOR HIM TO VISIT JAPAN.

IN THE 15-MINUTE MEETING FOLLOWING THE CEREMONY, GORBACHEV EXPRESED WILLINGNESS TO FORGE A NEW RELATIONSHIP WITH JAPAN WITH WHICH HE SAID THE SOVIET UNION HAS GREATER POTENTIAL FOR COOPERATION THAN SOUTH KOREA.

GORBACHEV SAID HE PERSONALLY IS OPTIMISTIC ABOUT FUTURE BILATERAL RELATIONS, BUT REITERATED THAT BOTH SIDES NEED TO COMPROMISE IN ORDER TO IMPROVE THEIR TIES IN ACCORDANCE WITH CHANGING GLOBAL SITUATIONS.

HE WAS REFERRING TO THE THORNY TERRITORIAL DISPUTE OVER A CLUSTER OF SOVIET-HELD ISLANDS IN NORTHERN JAPAN. JAPAN REFUSES FULLFLEDGED ECONOMIC SUPPORT TO THE SOVIET UNION UNLESS THE DISPUTE IS RESOLVED.

FALLS CHURCH, VA (JULY 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY. A COMPLETE COPY OF MARKET CONSENSUS IS AVAILABLE FOR

$5.95 BY CALLING 1-900-226-7726.

IN THE NEWS:

The COMMERCE DEPARTMENT reports this morning that the gross national product advanced at a 1.2% annual rate in the second-quarter. Economists polled by "Dow Jones Capital Markets Report" had expected a 1.8% increase. GNP grew at 1.9% in the first-quarter.

The Nikkei plunged as much as 1000 points, but gained back about half that to close down 506.27. ... The FT 100 is down 13.2. ... The DAX index also has fallen, down 12.95.

DONALD TRUMP's major bankers have extended his $20 million bridge loan they made a month ago. ... BOEING says its second-quarter net income rose 98%. ... GOODYEAR TIRE AND RUBBER reports a second- quarter loss of $9.4 million. .... OPEC ministers meeting in Geneva are deadlocked over an Iraqi demand that the cartel drive prices as high as $25 a barrel. ... "Reuters News Service" says WILLIAM DONALDSON, a founder of DONALDSON LUFKIN & JENRETTE, is the top choice to head the New York Stock Exchange. ... GENERAL ELECTRIC agrees to pay $16.1 million in criminal and civil penalties related to defense contract overcharges by MANAGEMENT AND TECHNICAL SERVICES COMPANY, a subsidiary of its aerospace group. ... The HOUSE ENERGY AND COMMERCE COMMITTEE votes to grant immunity from further prosecution to former junk-bond king MICHAEL MILKEN and admitted inside trader IVAN BOESKY to get them to testify in hearings. ... The same committee also votes to reimpose rate regulation on basic cable-television service. The measure also contains provisions that would help emerging competitors of cable.

WHAT'S AHEAD:

NORTHROP faces congressional scrutiny today in connection with allegations it unduly pressured Defense Department officials. ... Republican budget negotiators may propose new sin taxes, specifically on alcohol. ... The Senate Finance Subcommittee holds hearings this morning on U.S. dependence on foreign oil. ... REEBOK INTERNATIONAL LTD. chairman and CEO PAUL FIREMAN is taking a huge pay cut next year - from $14.6 million in 1989 to a $1 million salary and maximum $1 million bonus. His compensation for this year will not be determined until year-end results are tallied.

FROM THE BULLS:

"As bullish as I am - I'm still a bull - I am astounded by the skittishness of the market," says LOUIS EHRENKRANTZ of EHRENKRANTZ & KING. He calls the market "brittle," and says "the underpinning is very weak." He says people are very willing to jump in and out of the market "like lemmings marching into the sea." (CNBC "Market Wrap-Up", 7/26)

FROM THE BEARS:

"The market is being weighed down by the poor earnings. It's a minefield out there," says JON GROVEMAN, president of LADENBURG THALMANN & CO. Groveman says the market is vulnerable to more disappointments and to failure in the budget talks. He says that there is "massive" resistance at 3000, and that the "first legitimate buying opportunity" will come when the Dow falls to 2700. "At this point, I would try to be out of the market, and if I were a long-term player, I'd do something to hedge my portfolio." ("Investor's Daily", 7/27)

STOCK MARKET:

JAMES AWAD, president of BMI CAPITAL, says the market's recent decline is "transitory" and he thinks Congress will have hammered out a budget agreement in two months "that will calm the market." (WSJ, 7/27)

"It's still going to be a very erratic market," says RAY DeVOE of LEGG MASON WOOD WALKER. "Intermediate-term to long- I think it's going to be working higher, but a lot of damage was done ... on Monday, a good part of it due to program trading." DeVoe predicts the third quarter will be "choppy." (CNBC "Market Wrap-Up", 7/26)

"There are so many crosscurrents in the marketplace that people can't seem to get a handle on where things are going," says RICHARD MEYER, head of institutional trading at LADENBURG, THALMANN & CO. "People are kind of holding back on doing anything," says JOSEPH McALINDEN, director of research at DILLON, READ & CO. "In part, people are waiting to see what the GNP number looks like." (WSJ, 7/27)

"If you remember, as the market was trending higher, people were saying, 'Well, we'll get over the second quarter [earnings reports] and then it's back to the races in the third and the fourth,'" says JOSEPH BATTIPAGLIA, associate director of research at GRUNTAL & CO. He says the upcoming quarters may not provide the good news that many investors are expecting. This negative outlook on earnings is pushing stocks down, says Battipaglia. (CNBC "Market Wrap-Up", 7/26)

"Corporate earnings are still a factor" in the skittish market, says KENNETH DUCEY of S.G. WARBURG & CO. "And a lot of people are focusing on the GNP numbers out today. They feel the economy is slowing down more than anticipated." A report by MELISSA BROWN of PRUDENTIAL-BACHE shows that just under 19% of the 410 companies she surveyed have reported stronger-than-expected profits so far this year, but almost 25% reported weaker-than-expected earnings. Moreover, she says she expects that as additional earnings come in, they "will probably stay skewed toward disappointments." (NYT, 7/27)

"Anytime you have a company the size of MICROSOFT getting knocked like that, it affects the general tone of the market," says NELSON GOLD, senior vice president of over-the-counter trading at INTERSTATE-JOHNSON LANE CORP. in Atlanta. Microsoft skidded 2 3/4 to 68 3/4 yesterday after cautioning that increased spending next year will crimp its profit margin. Other technology shares also fell after the Microsoft slide, pressuring the broader OTC market. (WSJ, 7/27)

STOCK TIPS:

UNION CARBIDE is rumored to be the target of a buyout bid by German BASF or BRITISH PETROLEUM, reports CNN's DAN DORFMAN. He says an unknown buyer is thought to have taken a 2% position in the stock which has been trading at up to three times normal volume. A takeover by either BASF or BP would be "a natural," is what JOHN GARCIA of WERTHEIM SCHRODER tells Dorfman. The price per share would be in the $40-$60 range says the analyst, who cautions that he expects lower earnings from Union Carbide in 1990 and 1991. The company has no comment. (CNN "Business Morning", 7/27)

"I am particularly impressed by the manufacturing sector of the economy," says LOU EHRENKRANTZ of EHRENKRANTZ & KING. RAYTHEON has long been associated with the defense sector, but Ehrenkrantz likes the company's other manufacturing abilities and thinks the stock is cheap. Although he's no longer enamored of the drug stocks, he says GLAXO has "a long way to go." In the technology sector, Ehrenkrantz' favorite is HEWLETT-PACKARD which he expects to be in the forefront of marketing new products in the 1990s. (CNN "Business Day", 7/27)

RAYMOND JAMES & ASSOCIATES recommends stock in SUPERIOR TELETEC INC., a maker of copper telephone wire, fiber-optic cable and telecommunications testing equipment. The brokerage says the company's earnings should grow 20% annually in the next few years as it expands its fiber-optic and equipment testing business and reduces debt. ("USA Today", 7/27)

As the 1980s oil bust winds down, many experts are predicting that BAKER HUGHES will be among the first companies to benefit from the rebound. "I think you're going to see increasing energy prices, natural gas and oil prices," says JAMES FENGER of KEMPER FINANCIAL SERVICES. "Baker Hughes is one of the leading companies in several of the exploration markets." ("Investor's Daily", 7/27)

"What you want to do is invest strategically in an economy that's weak," says JOSEPH BATTIPAGLIA, associate director of research at GRUNTAL & CO. He says his firm moved out of pharmaceuticals and oil stocks, but is now investing in individual situations. He says Gruntal likes DuPONT and MERCK, because of their joint venture, GTE, because of their purchase of CONTINENTAL TELECOM, and many of the stocks that "have been taken out and

shot because their earnings in the quarter were one cent less than they should be." He says he is "optimistic, but not afraid to take profits." (CNBC "Market Wrap- Up", 7/26)

"This [the technology sector] was a charmed group for a while, and now it looks like people are showing concern about the second half," says TOM CALLAHAN, executive vice president at YAMAICHI INTERNATIONAL. (Reuters, 7/26)

COMPAQ COMPUTER CORP. stock fell 1 1/2 to 57 7/8 yesterday after the company reported a 24% increase in net income for the second-quarter. But gross revenue was $50 million to $60 million less than analysts expected. "People are worried," says analyst MARK STAHLMAN of ALEX. BROWN & SONS. "I'm concerned about the health of the high-end PC business." RICK MARTIN of PRUDENTIAL-BACHE says he believes the worst is over for the PC market, citing a 10% increase in May sales over a year earlier. "It's not a hell of a lot of pickup, but at least it's a pickup." MARK STAHLMAN of ALEX. BROWN & SONS says, "It may be, and I suspect this is true, that the traditional personal computer business is heading toward permanent, single-digit growth rates." RANDY BROPHY, an analyst with GARTNER GROUP, says he has not "totaled up the [technology company earnings] numbers for the second- quarter yet, but I'm encouraged, more so than what I see on Wall Street. Earnings are going to be up for a number of firms and revenues continue to grow overall." ("USA Today," "The New York Times" and "Investor's Daily", 7/27)

Specialty chemical producers are featured today in "Investor's Daily" in the first of a two-part series. The paper says the companies are somewhat shielded from economic downturns by the nature of their narrowly targeted marketing approach. "Their products are very highly value-added," says MATT ROBBINS, an analyst with DUFF & PHELPS INC. "There's a high service component to [the] products and they're very R&D intensive. Top names in the 45-company group: CROMPTON & KNOWLES CORP., BETZ LABS INC. and GREAT LAKES CHEMICAL CORP. ("Investor's Daily", 7/27)

GENERAL MOTORS reports second-quarter net income down 38% and FORD says its earnings were off 45%. Both auto giants blame slower U.S. sales, soaring incentive costs and problems overseas. "If you were to throw a [sales] decline like this at these companies 10 years ago, they would have lost money," says analyst JOHN KIRNAN of KIDDER, PEABODY. "We don't have the worst behind us yet," says JOSEPH PHILLIPPI of SHEARSON LEHMAN HUTTON. "It may not get horribly worse, but there's no reason in the world why sales couldn't stay crummy for three or four more quarters." ("USA Today" 7/27)

#90208m0002 07/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY. A COMPLETE COPY OF MARKET CONSENSUS IS AVAILABEL FOR $5.95 BY CALLING 1-900-226-7726.

MONEY & CREDIT:

The dollar rose against the Japanese yen yesterday, but finished mixed against most other major currencies in seesaw trading. BOB MORRISSEY, senior trader at the BANK OF BOSTON's New York office, says there were rumors the Federal Reserve entered the market to sell dollars and buy yen in an effort to stem the dollar's rise, but those rumors were not confirmed. ("Investor's Daily", 7/27)

"The rise in Japanese interest rates is basically bad news for world capital markets in general," says PETER TASKER, head of research at KLEINWORT BENSON, JAPAN. He says the damage will be contained, but it will be "an unsettling influence." (CNBC "World Business", 7/27)

"The bond market is moribund," says CHRISTOPHER RUPKEY, a financial economist at MITSUBISHI BANK. "People don't want to stick their necks out" in advance of today's GNP report, says ROBERT McGEE, a senior vice president at TOKAI BANK LTD. (WSJ, 7/27)

The bond market was "as quiet [yesterday] as I can remember" it as traders waited for today's GNP figures, says LEONARD GRIGGS of GRIGGS, SANTOW. ("Investor's Daily", 7/27)

"It is clear that some people are ready to buy bonds if Congress comes up with an agreement, but it seems very unlikely that will happen by early August," says LOUIS CRANDALL, chief economist at R.H. WRIGHTSON & ASSOCIATES INC., an economic consulting firm. (NYT, 7/27)

"I think some of the debtors like [Donald] Trump are trying to scare bondholders and I think we should speak out," says EDWARD D'ALELIO, managing director of the high-yield bond group at the PUTNAM COMPANIES in Boston. The money management firm holds a sizable amount of Trump Plaza and Trump's Castle junk bonds. (NYT, 7/27)

JOHN WARD, managing director and head of convertible sales at KIDDER PEABODY, says "the outstanding [RJR Nabisco] bonds are more attractive than the new issue" the company is offering as part of a debt-reduction package. (NYT, 7/27)

Bonds are very dangerous right now, says DAVID JONES, economist at AUBREY G. LANSTON although he likes the short end of the market. He is concerned that the Fed might ease short-term rates but long-term rates would remain high because of inflation. "Eventually the Fed will ease and pull

short-term rates down, but bonds have a lot of problems." (CNN "Business Morning", 7/27)

THE ECONOMY:

"I think the economy is teetering on the edge of recession," says LAWRENCE KUDLOW, chief economist at BEAR, STEARNS. "When you see these big companies warning about sluggish business conditions, you should take that seriously. These are the front-line spear carriers and normally they're optimists." DONALD STRASZHEIM, chief economist at MERRILL LYNCH, says, "I don't know that it's appropriate to start talking about recession." However, he says he is "more concerned about a recession than I was a few months ago. ... There is simply more anecdotal evidence of weakness than there is anecdotal evidence of strength." (WSJ, 7/27)

KATHLEEN CAMILLI of MARIA RAMIREZ CAPITAL CONSULTANTS expects the consumer spending segment of the GNP figures to be relatively unchanged. "We have incomes rising, but more is being saved," says Camilli. "Consumption should be flat for the year." ("Investor's Daily", 7/27)

"An income tax hike would be the worst possible medicine for an economy which is just barely growing," says DAVID JONES, economist at AUBREY G. LANSTON, who believes talk of new taxes has already depressed consumer confidence in the economy. Jones says Fed Chairman Alan Greenspan is right to wait until he sees a concrete budget proposal before easing rates but Jones thinks that won't happen until the fall. "We may end up with the worst of both possible worlds - sluggish growth and higher inflation because of higher oil prices," worries Jones. (CNN "Business Morning", 7/27)

"I can't tell you exactly when, but around 1980, spending began to be equally divided, half for services and half for goods," says RICHARD TRAINER, senior economist at the BANK OF TOKYO in New York. The Commerce Department reported that for the first-quarter, expenditures were evenly divided, whereas in 1960, 56% of spending was on goods. Trainer says this trend is likely to continue. "For the 1990s, it's going to weigh more heavily on services." ("Investor's Daily", 7/27)

IN WASHINGTON:

"The New York Times" quotes congressional aides as saying the Bush Administration is close to agreeing to compromise legislation that would give the SECURITIES AND EXCHANGE COMMISSION far less than the broad new authority it had wanted to regulate stock index futures. (NYT, 7/27)

HOUSE MAJORITY LEADER RICHARD GEPHARDT (D. - Mo.) reports that the budget process is being held up by small, but hotly contested, stumbling blocks. "They say that if we're going to get a five-year number in defense, that

the Defense Department wants to know that number is going to be real so they can plan. That's the nub of the disagreement in that area. It's a very tough disagreement." (CNBC "Market Wrap-Up", 7/26)

#90208p9468 07/27/1990 ~PR Newswire

NEW YORK (JULY 27) PR NEWSWIRE - Liz Claiborne, Inc. (NASDAQ: LIZC), today announced that it will be changing its terms of sale for the Liz Claiborne Women's Sportswear and Dress divisions by increasing its standard trade terms from 8 percent/10 days EOM to 10 percent/10 days EOM. The change will affect the Collection, Lizsport, Lizwear, Liz & Co., Elisabeth and Dress divisions. This change will be effective for the Spring I selling season, shipments of which begin in late 1990.

"We are pleased to come up with a program to help our retail partners overcome some of the increased costs of business and to do it in a way that does not increase prices to consumers," stated Jerome A. Chazen, chairman of Liz Claiborne, Inc. The company hopes to be able to offset the effects of this change through manufacturing and operational efficiencies and increased market share.

CONTACTL Samuel M. Miller, senior vice president-finance of Liz Claiborne Inc., 212-354-4900.

#90208p9470 07/27/1990 ~PR Newswire

WEST LONG BRANCH, NJ (JULY 27) PR NEWSWIRE - Second-quarter net income of Electronic Associates, Inc. (EAI) (NYSE: EA) amounted to $62,000, or $.02 per share, for the three months ended June 30, 1990, vs. $169,000, or $.06 per share, for the comparable period last year. Net profit for the six months ended June 30 amounted to $1,022,000, or $.36 per share, including a previously reported gain from the sale of a former EAI subsidiary, compared with $344,000, or $.12 per share, in 1989.

Combined sales and operating income of EAI's two principal businesses -- contract manufacturing and field service -- rose to record levels in 1990, said Robert G. Finney, president. However, he said, curtailed spending plans of the defense and aerospace industries caused deep reductions in EAI's simulation computers business. "In simulation computers, we have reduced costs to fit the new realities," said Finney.

"Overall, the second half of 1990 looks good," said Finney. "We expect continuing good results from contract manufacturing and field service, over and above the seasonal factors which generally make their second-half results stronger than the first half. Their current backlogs indicate more growth, and order prospects continue to be bright."

EAI's book value per share rose to $3.88 at June 30, 1990, from $3.85 at the end of the first quarter and $3.26 a year ago.

In contract manufacturing, EAI provides manufacturing service for products designed and marketed by customers. In field service, the company provides independent maintenance of electronic equipment. EAI also manufactures and sells computers for simulation applications and real-time data handling products.

#90208p9471 07/27/1990 ~PR Newswire

IRVINE, CA (JULY 27) PR NEWSWIRE - Western Digital Corp. (AMEX: WDC) today reported net income of $9.5 million, or $.32 per share, for the fourth fiscal quarter ended June 30, 1990, a 118 percent increase from earnings of $4.3 million, or $.15 per share, in the fourth quarter of fiscal 1989. Fourth quarter revenue totaled a record $293.9 million, a 21 percent increase from the $243.5 million in the fourth quarter of fiscal 1989.

Revenue for fiscal year 1990 totaled a record $1.07 billion compared with fiscal 1989 revenue of $992.1 million. Net income totaled $24.2 million, or $.82 per share, compared with profit of $34.3 million, or $1.18 per share, in fiscal 1989.

Roger W. Johnson, chairman, president, and chief executive officer of Western Digital, said, "Our continued revenue and profit improvement in the fourth quarter reflects the underlying strengths of our products and the strategies that we have been pursuing over the last two years. We are encouraged about the company's prospects for the new fiscal year, based on customers' enthusiastic response to our high-performance and cost-effective interarchitected product offerings."

Johnson indicated that the company made further progress in cross-selling its line of generic computing products to its largest original equipment manufacturer customers. "In the fourth quarter, 60 percent of our top OEM customers purchased products from at least four of our five principal lines, compared with 48 percent in the immediately preceding quarter."

Johnson also noted that the company had recently signed additional development agreements with IBM which should further strengthen the company's relationship with this important customer. Largest Single Drive Order Booked

The company's Storage Products unit, which includes storage controllers, chips, and 3.5-inch intelligent disk drives, posted fiscal fourth quarter revenue of approximately $199 million compared with revenue of approximately $195 million in the immediately preceding third quarter.

Kathryn A. Braun, senior vice president and general manager of Storage Products, said the unit's profitability was bolstered by the fifth consecutive quarter of improved drive margins, the result of continued strong demand for its 3.5-inch intelligent drives. "We shipped approximately 570,000 intelligent drives, the majority of which were our 40 megabyte Centaurs," she said.

During the fourth quarter, the company secured its largest single order for intelligent disk drives since entering the 3.5-inch drive business in March, 1988. The agreement calls for Western Digital to supply a U.S.-based volume manufacturer of personal computers with its new, high performance 80 megabyte Caviar intelligent drives and the 40 megabyte Centaurs in a transaction valued at approximately $38 million over the next six months. New Platform Solutions Sampled

The Microcomputer Products unit -- which is comprised of imaging, communications, and systems logic product lines -- registered fiscal fourth quarter revenue of approximately $95 million, up from approximately $92 million in the immediately preceding third quarter.

Western Digital Corp., headquartered in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductor devices, subsystems, and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry. The Storage Products unit provides a broad range of intelligent disk drives and storage controllers. The Microcomputer Products unit provides communications, imaging, systems logic, and integrated systems products.

#90208p9474 07/27/1990 ~PR Newswire

PITTSBURGH (JULY 27) PR NEWSWIRE - Chambers Development Company Inc. (AMEX: CDVB) announced today that it has received a permit from the Pennsylvania Department of Environmental Resources (DER) for 82 acres of landfilling space at its Arden Landfill in Washington County, Pa.

With the permit the landfill can accept an average of 2,400 tons per day of solid waste, company officials said, adding that construction on the new area will begin immediately.

"We are very pleased to receive this permit that will provide years of

environmentally sound and economically efficient disposal to residents and business in Washington County and the surrounding area," said John G. Rangos Jr., Chambers' executive vice president of operations.

"Our Arden landfill is one of the finest sanitary landfills in the state with mumerous environmental safeguards. Chambers has invested millions of dollars in this sanitary landfill to make it environmentally safe."

Chambers has a permit application pending for the repermitting of 37 acres at its Monroeville Landfill in Allegheny County, Pa.

"Chambers continues to work closely with the DER on the final processing of this permit in Monroeville," Rangos said. "At this stage in the process we feel very good about a positive resolution of any remaining questions the DER may have regarding our Monroeville landfill," Rangos said.

In addition, Chambers has an application pending with the DER for the re-opening of its Fulkroad Landfill in Dauphin County, Pa.

"The Fulkroad application is being processed in an ordinary and normal fashion and we are working with officials in Dauphin County to demonstrate the environmental and economic value of this facility," Rangos said.

Earlier this year, Chambers received a permit from the DER for 34 acres of landfilling space at its Southern Alleghenies Landfill in Somerset County, Pa.

Chambers Development Company, headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development.

#90208p9477 07/27/1990 ~PR Newswire

NORCROSS, GA (JULY 27) PR NEWSWIRE - Financial results for the second quarter ended June 30 were announced today by Intelligent Systems (AMEX: INP).

Revenues in the second quarter were $12,703,000 compared to $16,796,000 in the same period last year.

A year ago, Intelligent Systems completed the sales of several product lines. At the same time, the company decided not to commit additional resources to product development and inventory for its portable computer line due to significant price competition in the marketplace. These two factors were primarily responsible for the year-to-year decline in revenue.

For the quarter, the net loss allocable to limited partners was $1,875,000 or $0.24 per unit based upon 7,700,466 average units outstanding. For the comparable period last year, net income allocable to limited partners was $251,000 or $.03 per unit on 8,681,768 units outstanding. The decline in the number of units outstanding is a result of the company's ongoing repurchase program.

Last year's second quarter results were boosted by a gain of approximately $2,700,000 on the sale of a product line. In the second quarter this year the revenue decline contributed to lower gross profits. In addition,the company expensed approximately $435,000 in advertising credits related to its portable computer line and recorded a significant non-cash amortization expense related to the acquisition of OrCAD in December 1989.

The company's second quarter results include losses of close to $500,000 related to its pro rate ownership share of Brier Technology, a privately held company involved in the development of superfloppy disk drives. Brier Technology shipped small quantities of its 25 megabyte floppy disk drive in the second quarter and is concentrating on refining the manufacturing process to increase volume by the end of year.

Intelligent Systems is a diversified technology partnership whose depositary units are traded on the American and Pacific Stock Exchanges under the symbol INP. The company conducts its business through subsidiaries: Q/COR (enhancement products for microcomputers), InterQuad (European distribution of enhancement products), OrCAD (electronic design automation software) and Datavue (laptop computers). The company also has investments in developing technology companies, including Brier Technology (25 mb superfloppy disk drive).

#90208p9478 07/27/1990 ~PR Newswire

MIDLAND, MI (JULY 27) PR NEWSWIRE - The Dow Chemical Company (NYSE: DOW) announced that its subsidiary, Destec Energy, Inc., has filed a registration statement with respect to a public offering of its stock. Destec is a wholly owned subsidiary of Dow.

In its filing with the Securities and Exchange Commission, Destec said it will issue up to 27.7 percent -- or 17.25 million shares -- of its stock for sale in an initial public offering. Dow intends to hold the remaining shares.

Destec Energy, Inc. is a major independent power company that develops, builds and operates facilities that produce and sell electrical and

thermal energy, as well as synthetic fuel gas, for use in energy production.

"One of the principal purposes of the public offering is to provide a market basis for valuing Destec, which is an important and growing business to Dow," said Enrique C. Falla, Dow's financial vice president and chief financial officer.

"Taking the subsidiary public," added Robert McFedries, chairman and chief executive officer of Destec, "enables Destec to have access to important capital markets while pursuing significant growth opportunities in the market for independent generation of power."

It is anticipated that the public offering will commence following the declaration of effectiveness of the registration statement by the Securities and Exchange Commission, which is estimated to occur in September.

The underwriters who are co-managing the public offering are Goldman, Sachs & Co.; Donaldson, Lufkin & Jenrette; Merrill Lynch Capital Markets and Salomon Brothers Inc.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This communication shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such State.

A prospectus covering the offering is included in a registration statement which has been filed with and a copy of which may be obtained from the Securities and Exchange Commission, Washington, D.C. 20549.

#90208p9480 07/27/1990 ~PR Newswire

COLUMBIA, MD (JULY 27) PR NEWSWIRE - The Ryland Group, Inc. (NYSE: RYL) today reported its second-quarter earnings and results for the first six months of 1990.

Net earnings for the quarter were $5.7 million, a 46 percent decrease compared to 1989's second quarter. Primary earnings per share for the second quarter were $.40 (fully diluted: $.37) compared to $.79 (fully

diluted: $.79) in 1989. Year-to-date earnings from operations were $12.1 million, or $.86 per share, a 19 percent decrease from 1989. Consolidated revenues for the second quarter were $324 million, a 5 percent decrease from the same period last year.

Ryland Building Company settled 2,046 homes during the second quarter of 1990, a 14 percent decrease from the same period last year. Year-to-date new orders were 4,207 homes. Dollar volume of outstanding contracts decreased 23 percent compared to June 30, 1989.

The drop in Ryland's net earnings is primarily the result of the weakness of the Northern Virginia, New Jersey and Southern California housing markets. The company experienced its strongest results in Florida and in Northern California.

Ryland Mortgage Company had increased servicing revenue from certain mortgages, but did not enjoy the $1.9 million gain from sales of mortgages and servicing it experienced in 1989.

The Ryland Group, one of the nation's largest homebuilders, is headquartered in Columbia, Md.

ST. PETERSBURG, FL (JULY 27) PR NEWSWIRE - Milton Roy Company (NYSE: MRC) today announced that its board of directors has authorized discussions with Sundstrand Corporation (NYSE: SNS) regarding the unsolicited proposal advanced by Sundstrand earlier this week.

The company further reported that its board had determined not to opt out of any of the provisions of the recently enacted Pennsylvania anti-takeover legislation.

In addition, the board has declared a regular quarter dividend of 14 cents per share, to be paid on Sept. 14 to shareholders of record on Aug. 15, 1990.

Milton Roy is a multinational manufacturing company which produces process control equipment and analytical instruments. Major product lines include metering and centrifugal pumps, spectrophotometers, mass spectrometers, and environmental and automotive emissions testing equipment. These products are used in a wide variety of industrial, research and educational applications where they control and monitor the flow of liquids and analyze the components of a complex mixture of fluids and gases.

#90208p9485 07/27/1990 ~PR Newswire

SOUTHFIELD, MI (JULY 27) PR NEWSWIRE - Franklin Savings Bank (NASDAQ: FSVB) announced net income for the fiscal year ended June 30, 1990, of $831,136 or $.88 per share. This is a 174-percent improvement over net income of $303,266 or $.32 per share for the fiscal year ended June 30, 1989. Income before tax and extraordinary items improved 712 percent in year-to-year comparisons, or $1,233,373 for the year ended June 30, 1990 compared to $151,932 the previous year.

For the quarter ended June 30, 1990, Franklin's net income was $301,348 ($.32) compared to $57,023 ($.06) for the fourth quarter last year. June 30, 1990, marked Franklin's 22nd consecutive quarter of profitability.

"We are especially proud to deliver greatly improved earnings during such a turbulent year for the industry," said President and CEO Read P. Dunn.

Net interest income, considered a traditional benchmark of banking profitability, was $8,031,143 for the year ended June 30, 1990, compared to $6,890,741 the previous year, a 17-percent improvement. Franklin's net yield on average earning assets was 2.01 percent at June 30, 1990, compared to 1.89 percent at June 30, 1989.

"Our staff has worked diligently all year to improve the net interest yield by concentrating on the most profitable products for Franklin," explained Dunn.

Franklin's general and administrative expenses for the year increased 4 percent, totaling $7.8 million compared to $7.4 million for the year ended June 30, 1989. Most of the increase in operating costs is a direct result of FIRREA, including higher professional fees, higher costs associated with examinations, and increased insurance premiums. Implementation of FIRREA also resulted in lower dividends on FHLB stock.

Stockholders' equity grew 6 percent, reaching $13.7 million at June 30, 1990, compared to $12.9 million June 30, 1989. Tangible book value was $14.26 at June 30, 1990 compared to $13.43 the previous year.

On July 25, 1990, Franklin consummated a $7 million subordinated capital note and common stock purchase warrants offering underwritten by First of Michigan Corporation. The notes and warrants will be delivered in exchange for their purchase price at a closing scheduled to take place on Aug. 1, 1990. Following the closing, Franklin will exceed all three of

the current capital requirements prescribed by FIRREA.

Asset quality remains strong. At June 30, 1990, Franklin was in the process of foreclosing only one house and owned two other real estate properties (one apartment and one house).

Assets reached $412 million at fiscal year ended June 30, 1990 compared to $401 million the prior year. Deposits grew $20 million, from $336 million at June 30, 1989 to $356 million.

Southfield-based Franklin Savings Bank is Michigan's 10th-largest savings institution with regional branch offices in Southfield, Grosse Pointe Woods, and Birmingham.

JFK INTERNATIONAL AIRPORT (JULY 27) PR NEWSWIRE - New York-based Tower Air reported its June 1990 revenue passenger miles (RPMs) declined 33.06 percent, mostly as a result of suspension of service from Miami to Scandinavia for the summer season.

Carrier expects to resume service from Miami to the Scandinavian countries in November of this year. Total RPMs for the month were 164.75 million compared to 246.14 million for the same month in 1989. June 1990 available seat miles (ASMs) were cut back 28.7 percent -- mostly due to the termination of a wet lease agreement with Air Europe -- from 283.3 million in June 1989 to 201.8 million last month. Revenue passengers boarded declined 35.2 percent from 62,985 in June 1989 to 40,801 in June 1990. Average load factor on all of Tower Air's services was 80.9 percent, a drop of 6.8 percentage points from the June 1989 figure of 87.7 percent.

For the first six months of the 1990 calendar year, Tower Air's RPMs

declined 11.7 percent, from 1.18 billion in the first half of last year to 1.05 billion for the six months ended June 30, 1990. Seat miles were reduced 10.1 percent, from 1.35 billion in 1989 to 1.21 billion in 1990. Revenue passengers boarded dropped 18.6 percent, from 315,412 in 1989 to 256,660 this year. Revenue for the six months increased $5.5 million, from $62.7 million in 1989 to $68.2 million for the same period in 1990, an 8.7 percent increase. Operating income for the first half increased to $3.5 million from $881,500 for the comparable 1989 period.

Tower Air is a U.S. international scheduled and charter services operator headquartered at New York's JFK International Airport. It provides scheduled Boeing 747 service to Copenhagen, Denmark; Oslo, Norway; Stockholm, Sweden, and Tel Aviv, Israel. Under the recent agreement initialed by the United States and France this month, Tower Air will begin scheduled service five times per week in the New York-Paris market in the spring of 1991.

QUEENSBURY, NY (JULY 27) PR NEWSWIRE - In response to growing business volumes in Warren, Washington and Saratoga Counties, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., (NYSE: CNF) has relocated its Glens Falls terminal operation to a new six-door facility.

The four-acre terminal, located at 248 Queensbury Ave. in Queensbury, serves current CF customers in Glens Falls, Granville, Lake George, Queensbury, Saratoga and Ticonderoga. The terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 697-terminal network serving virtually every business address in the United States and Canada, including Alaska, Hawaii and Puerto Rico.

The Glens Falls terminal is a spin-off of the company's Albany, N.Y. and Rutland, Vt. terminals, which have served businesses in upstate New York for more than 20 years. Current CF Motor Freight customers in the Glens Falls area include International Paper, James River Corp., General Electric, Telescope Casual Furniture and Native Textile Co. Among the commodities transported are paper, machinery, roofing material and textiles.

The new terminal has five employees -- three drivers and two office workers -- and uses three tractors and eight trailers.

Like all CF Motor Freight terminals, Glens Falls is tied into the company's

freight-flow system through a sophisticated nationwide computer freight tracking and data management network. The company's system enables Glens Falls customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

The company also provides related computer programs and services utilizing a customer's own computer resources. These include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, a PC-based program that streamlines shipping functions by automatically preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds. It is the largest subsidiary of Consolidated Freightways Inc., which in addition to long-haul trucking, has businesses in regional next-day trucking, domestic and international air freight, intermodal truckload, customs brokerage and ocean freight services.

ELKRIDGE, MD (JULY 27) PR NEWSWIRE - CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., (NYSE: CNF) has opened a 25-door Laurel terminal, which will enable the company to provide improved freight transportaiton services to its customers in Laurel and surrounding communities of Baltimore, Howard, Montgomery and Prince Georges Counties.

The five-acre facility, located at 7010 Brookdale Rd. in the Brookdale Industrial Park, serves businesses in Elkridge, Laurel, Columbia, Jessup, Savage and Fort George G. Meade. The terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 697-terminal network serving virtually every business address in the United States and Canada, including Alaska, Hawaii and Puerto Rico.

"By opening this terminal, we are moving closer to our Laurel customers," said Shirley Ropiza, Laurel terminal manager. "This enables us to provide our customers here with more responsive and efficient freight transportation services."

The Laurel facility is a spin-off of the company's Baltimore terminal, which have served businesses in northeast Maryland for more than 32 years. Current CF Motor Freight customers in the Laurel area include Alcon Laboratories, Westinghouse, Mack Truck, C.R. Daniels and the United States General Printing Office. Among the commodities transported are pharmaceuticals, computer software, truck parts and printed documents.

The new terminal has 12 employees -- seven drivers and five office workers -- and uses seven tractors and 20 trailers. The Laurel facility currently operates 25 loading doors but is expandable to 30 doors.

Like all CF Motor Freight terminals, Laurel is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data management network. The company's system enables Laurel customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

"Comprehensive and accurate shipment information is very important today, particularly for businesses involved in just-in-time retailing and manufacturing," Ropiza said. "The ability of a carrier to provide consistent, error-free service often can make the difference between a production line operating efficienly, or a retailer having the proper goods in time for a sale."

The company also provides related computer programs and services utilizing a customer's own computer resources. Thses include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, a PC-based program that streamlines shipping functions by automatically preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

CF Motor Freight provides intermediate and long-haul transportation of less-than-truckload freight, which are commercial and industrial shipments generally weighing less than 10,000 pounds. MONTGOMERY, AL (JULY 27) PR NEWSWIRE - In response to growing business volumes in Montgomery and Elmore Counties, CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc., (NYSE: CNF) has relocated its Montgomery terminal operation to a new 32-door facility.

The four-acre Montgomery terminal, located at 2241 Congressman W.L. Dickinson Dr., serves current CF customers in Montgomery, Clanton, Prattville, Selma, Tallassee and Union Springs. The terminal is the area's link to CF Motor Freight's nationwide freight-flow system, a 697-terminal network serving virtually every business address in the United States and Canada, including Alaska, Hawaii and Puerto Rico.

The Montgomery terminal has served businesses in south-central Alabama for more than 13 years. Current CF Motor Freight customers in the Montgomery area include Rhweem Manufacturing Co., National Industries, American Sterilizer and Bush Hog Corp. Among the commodities transported are water heaters, auto parts, hospital supplies and farm implements.

The new terminal has 26 employees -- 14 drivers and 12 office workers -- and uses 13 tractors and 36 trailers.

Like all CF Motor Freight terminals, Montgomery is tied into the company's freight-flow system through a sophisticated nationwide computer freight tracking and data management network. The company's system enables Montgomery customers to obtain instant status of their shipments, whether inbound or outbound, as well as pricing, volume and other freight profile and logistics information that helps customers manage their businesses.

The company also provides related computer programs and services utilizing a customer's own computer resources. Thses include OMNIRATE, a personal computer-based software program that simplifies the pricing of freight shipments; LOGISTICS MANAGER, a PC-based program that streamlines shipping functions by automatically preparing bills of lading and shipping labels; and CF DIRECT, a telecommunications link that allows customers to directly access CF's computer network for shipment information and specialized reports.

PARSIPPANY, NJ (JULY 27) PR NEWSWIRE - Home Nutritional Services Inc. (NASDAQ: HNSI) today announced record financial results for the second quarter and six months ended June 30.

For the second quarter, net earnings increased 43 percent to a record $2.3 million compared to $1.6 million for the same period last year. On a per-share basis earnings were $0.20 compared to $0.16 last year on additional shares outstanding due to an equity offering in December 1989. Revenues for the second quarter of 1990 increased 25 percent to $19.3 million vs. $15.4 million in 1989.

Net earnings for the six months ended June 30 rose 56 percent to $4.5 million compared to $2.9 million in the same period of 1989. On a per-share basis earnings were $0.38 vs. $0.29 last year on the additional shares outstanding. Revenues for the first six months of 1990 increased 29 percent to $37.6 million compared to $29.3 million for the same period of 1989.

Kent Kerkhof, president and chief executive officer, stated: "We are pleased with our continued growth and strong profitability. Our

operating margin improved to 18.7 percent this quarter from 18.3 percent in the first quarter of this year. As a result, we have maintained our leadership position in profitability within our industry. In addition, the company-wide initiatives to improve collections and accounts receivable management are producing the desired results, as evidenced by a decline in days-sales-outstanding to 159 from 168 at the end of the first quarter."

Kerkhof concluded, "We are pleased with the company's performance to date and expect the trends to continue during the remainder of the year."

Home Nutritional Services Inc. is a national provider of home infusion therapies and related services. It is a 66 percent-owned subsidiary of Healthdyne Inc. (NASDAQ: HDYN). Founded in 1980, HNS is one of the oldest and largest providers of home infusion care, with operations in 26 states that are conducted through 21 regional centers, 18 satellite facilities and 27 additional sites of service. HNS is recognized as a leader in quality care and clinical sophistication.

JENKINTOWN, PA (JULY 27) PR NEWSWIRE - Flagship Financial Corp.'s (NASDAQ-NMS: FLGF) board of directors announced today that after close monitoring of the weakening real estate market and updated loan portfolio reviews of both thrift subsidiaries, it has elected to make a one time addition of $1.5 million to the allowance for loan losses for the June quarter.

Management said it further anticipates that this provision will result in a quarterly loss of approximately $260,000 and expects to disclose final second quarter results next week.

In a separate action, Flagship's board of directors voted to pay the regular quarterly common stock cash dividend of $.10 per share. This dividend will be paid on Aug. 17, 1990, to holders of record on Aug. 3.

Commenting on these decisions, Frank P. Felton 3rd, chairman and chief executive officer, said, "As evidenced by the recently received FDIC examination comments, the loan loss provisions that we are making now do not reflect a significant deterioration in the company's loan portfolio, but are instead intended to bring our reserve ratio in line with commercial bank standards and help us weather a weakening real estate market. We believe it is prudent to use a portion of the company's excess capital position to build reserves that will provide further protection to future earnings.

"After the provision, the capital ratios of both subsidiaries will continue to remain well in excess of the federal government's fully phased-in capital requirements. Based on this and our strong belief in the company's future prospects, it was unanimously voted to maintain the existing dividend," Felton said.

Flagship Financial, which ranks among the 10 largest publicly traded thrift institutions in Pennsylvania, conducts business through its wholly owned subsidiaries First American Savings and Brandywine Savings Bank. First American operates 12 full-service and six "convenience" branches in Pennsylvania and New Jersey. Brandywine Savings operates nine full-service branches in Chester County, Pa. The common stock of Flagship Financial is traded on the NASDAQ National Market system under the symbol FLGF.

#90208p9502 07/27/1990 ~PR Newswire

TAYLOR, MI (JULY 27) PR NEWSWIRE - Net sales for Masco Corporation (NYSE: MAS) for the second quarter ended June 30, 1990, increased 4 percent to $825 million from the 1989 second quarter, the highest level of sales for any quarter in the company's history. The second-quarter sales include recently acquired KraftMaid Cabinetry, Inc., a leading manufacturer of semi-custom kitchen cabinets, the sales of which offset the absence of the recreational accessories and insulation products businesses sold early this year to TriMas Corporation.

Net income for the quarter declined 20 percent to $61.7 million from $76.8 million in the comparable 1989 quarter, with earnings per share also declining 20 percent to $.40 from $.50. The company said its earnings continue to be adversely affected by: economic softness in most of its markets, particularly housing-related activity, lower equity earnings of affiliated companies and significant costs related to major expansion and profit improvement programs.

The company said it believes that its near-term results will continue to be negatively impacted by depressed conditions in the housing industry as well as cautious spending by consumers and inventory reductions by many of its trade customers reflecting their concerns over the uncertain economic outlook. Longer term, the softening of the economy should result in lower interest rates which will significantly improve the prospects for many of its markets. The company believes that this improvement, when combined with the growth opportunities from its recent major investments in the home furnishings industry, should provide a sound basis for well-above-average growth in the future.

The board of directors of Masco Corporation, considering the company's strong financial position and favorable long-term outlook, has increased the quarterly dividend to $.14 from $.13 per common share. This dividend is payable on Aug. 6, 1990, to shareholders of record on July 20, 1990. This marks the 32nd consecutive year in which dividends have been increased.

Masco Corporation manufactures building, home improvement and home furnishings products for the home and family.

TULSA, OK (JULY 27) PR NEWSWIRE - Matrix Service Company has filed a registration statement with the Securities and Exchange Commission relating to a proposed initial public offering of 3,250,000 shares of its common stock. PaineWebber Incorporated, Robertson, Stephens & Company and First Analysis Securities Corporation are managers of the offering. Of the 3,250,000 shares being offered, 2,750,000 are being offered by the company and 500,000 are being offered by certain selling stockholders. The underwriters have been granted an option by the company and certain selling stockholders to purchase up to 487,500 additional shares to cover over-allotments. The company will not receive any proceeds from the sale of shares by the selling stockholders.

Matrix Service Company provides specialized on-site maintenance and construction services for petroleum refining and storage facilities. Through its wholly-owned subsidiary, Matrix Services, Inc., the company is a leading provider of these services and related products for large aboveground storage tanks for petroleum and petrochemical products and piping systems located at petroleum refineries and bulk storage terminals.

Concurrently with the closing of this offering, the company will acquire Midwest Industrial Contractors, Inc., a leading provider of maintenance and construction services for refineries. Midwest Industrial Contractors, Inc. specializes in performing "turnarounds", which involve complex, time-sensitive maintenance of the critical operating units of a refinery. Owners of petroleum refining and storage facilities use the company's services to improve operating efficiencies and comply with environmental and safety regulations.

MELBOURNE, FL (JULY 27) PR NEWSWIRE - Harris Corporation's Semiconductor Sector announced today that it is further consolidating manufacturing operations and reducing its workforce by some 250 people. The sector employs 13,000 people worldwide.

The actions are part of Harris Semiconductor's previously announced plan to restructure operations following the acquisition of General Electric's semiconductor business. The restructuring is aimed at increasing economies of scale throughout the company, and concentrating resources on the signal processing and control segments of the world semiconductor market.

Harris Semiconductor will transfer part of its manufacturing operations at Research Triangle Park, N.C. to its Melbourne, Fla. plant This consolidation will reduce the workforce at the North Carolina facility by about 100 people.

Also, the sector is reducing its Melbourne workforce by about 80, and its Somerville, N.J. employment by 50. A further 20 employees will be released from other sector operations in the U.S. and overseas. Those affected include marketing, engineering, and manufacturing employees associated with certain digital CMOS product lines, including semicustom ASICs. These products are being de-emphasized to allow greater focus on core and developing businesses that are more central to the sector's strategic thrust in signal processing and control applications.

Employees affected by the restructuring will receive severance benefits based on length of service, and every effort will be made to assist them with outplacement services.

Harris Semiconductor manufactures discrete semiconductors and integrated circuits and is the sixth largest U.S. merchant manufacturer.

Harris Corporation (NYSE: HRS), with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronics systems, semiconductors, communications, and a worldwide office-equipment distribution network.

#90208p9512 07/27/1990 ~PR Newswire
PALO ALTO, CA (JULY 27) PR NEWSWIRE - Emery Worldwide, a leading air freight carrier, has been selected as the official equipment carrier for

the Denver Broncos and Seattle Seahawks when the two teams travel to Japan to compete in the National Football League's "Toshiba American Bowl," Aug. 5 in Tokyo.

Emery Worldwide has complete responsibility for equipment loading and unloading as well as for customs clearance in both the U.S. and Japan. The company will transport approximately 14 tons of gear for the two teams.

Both teams' charter flights are scheduled to depart from their respective U.S. cities by mid-afternoon on July 31. According to Mike Bastanchury, Emery's international supervisor in Seattle, the Seahawks will be practicing until late that morning, which puts Emery on a tight schedule for loading all the gear and clearing U.S. customs within a three-hour time frame.

On the return leg of the trip, all the equipment must be loaded and cleared by Japanese customs as soon as possible after the end of the game because the teams must be back in the U.S. the next day to begin preparing for the following week's exhibition games.

Kathryn Miller, Emery's Denver-based international supervisor, will accompany the Denver flight and coordinate unloading and loading of both teams' equipment with Emery Worldwide's Japanese staff in Tokyo.

Emery also is the official equipment carrier for the Los Angeles Raiders and New Orleans Saints between the U.S. and England when those teams compete in the annual "American Bowl" game at Wembley Stadium, also on Aug. 5. This is the fifth consecutive year that Emery has handled this assignment on behalf of the NFL.

With one of the world's largest freighter fleets, Emery Worldwide delivers any size or weight shipment -- including envelopes, parcels and heavy freight -- to any business address in the world. The carrier provides Same Day, Next Day AM and PM, and Second Day delivery in the U.S. and Canada, and door-to-door and airport-to-airport service overseas.

Emery Worldwide, based in Palo Alto, Calif., is a subsidiary of Consolidated Freightways, Inc. (NYSE: CNF), a $4-billion diversified transportation company with businesses in long-haul and regional trucking, air freight, ocean container freight and intermodal rail service.

HARTFORD, CT (JULY 27) PR NEWSWIRE - Aetna Life & Casualty (NYSE: AET) today reported second quarter net income of $204 million, or $1.82 per common share, compared with $170 million or $1.52 per common share a year ago. The 1990 results include net realized capital gains of $31 million (27 cents per common share), of which $30 million resulted from the sale of a portion of the company's equity interest in MBIA Inc. The 1989 results included net realized capital gains of $12 million (11 cents per common share).

Second quarter 1990 results included catastrophe losses of $24 million, compared with $48 million in the second quarter 1989. Also, charges to second quarter 1990 results for additions to loss and loss expense reserves for prior accident years were substantially lower than charges in the quarter a year ago.

For the first six months of 1990, net income was $384 million, or $3.43 per common share, compared with $343 million, or $3.04 per common share for the same period last year. Net income included net realized capital gains of $51 million (45 cents per common share), compared with $33 million (29 cents per common share) a year ago.

Total shareholders' equity at June 30, 1990 was $7.1 billion, up 6 percent from a year ago. Shareholders' equity per common share of $63.61 was 6 percent greater than a year ago.

ZURICH, SWITZERLAND (JULY 27) PR NEWSWIRE - Harrier, Inc. (NASDAQ: HARE) disclosed today that it sold 25 percent of its wholly owned HDC A.G. subsidiary to a private European investor for approximately $2.2 million.

HDC A.G., incorporated in Switzerland, holds the patent rights to the Harrier Diesel Cleaner, a device which, both alone and in conjunction with a catalytic converter, significantly reduces harmful emissions from mobile and stationary diesel engines without increasing fuel consumption. While field testing of the product on specific types of engines continues, certification tests for its use on other diesel units will be launched shortly in Southern California and Texas. Planned commercial introduction of the product is now being implemented with the installation of production units in key U.S. and international sites.

Jurg Kehrli, Harrier president, stated that the proceeds from the sale would be used primarily to fund the stepped-up production and distribution costs envisaged over the next 24 months.

Earlier this month the company announced that it had completed the second phase of a $6 million placement of Harrier convertible preferred stock to private investors in Switzerland and Japan.

GREENWICH, CT (JULY 27) PR NEWSWIRE - Paul W. Douglas, chairman and chief executive officer of the Pittston Company (NYSE: PCO), announced today the election of Roger I. MacFarlane and Peter Thorrington as joint chief executives of Burlington Air Express Inc., Pittston's worldwide air freight unit.

David L. Marshall, who has served as chief executive officer of Burlington for the past two and one-half years, will remain chairman of the board of that Irvine, Calif.-based unit but will now devote more of his energies to his responsibilities as vice chairman and chief financial officer of the Pittston Company.

MacFarlane and Thorrington have served as presidents of Burlington's U.S. and international subsidiaries, respectively, for the past two years. Over that period, Burlington's performance has strengthened substantially, both in service quality and profitability. With the company's turnaround now so solidly in place, Douglas noted, "We are fortunate indeed to be able to turn over the chief executive responsibilities for Burlington to these two distinguished air freight executives and we have every confidence in Burlington's future under their strong leadership."

The Pittston Company is a diversified firm engaged in mining and marketing of bituminous coal through the Pittston Coal Group, Inc. and Pyxis Resources Company, air freight services through Burlington Air Express Inc., security transportation services through Brink's, Incorporated, and

home security services through Brink's Home Security, Inc.

#90208p9526 07/27/1990 ~PR Newswire

TROY, MI (JULY 27) PR NEWSWIRE - Despite a 5-percent decline in sales from the first quarter, VOPLEX Corporation (AMEX: VOT) cut its second-quarter losses to $85,864 or $.03 per share, compared to a loss of $359,285, or $.13 per share in the first three months of the year.

Second-quarter sales were $15,970,919 compared to $16,831,090 in the first quarter.

VOPLEX minimized its losses in the quarter by continuing to lower its operational break-even point and the selling of its cartridge business to Sonoco Products Company, of Hartsville, S.C.

In the second quarter, the company's success rate at obtaining new business in future years continued to be encouraging. The company was awarded a contract from Hyundai to supply front- and rear-door panels on its 1991-92 Sonata model that will be made in Bromont, Quebec. VOPLEX also will produce the lower instrument panel for a 1991 model of a major domestic carmaker.

In the first six months of the year, the company lost $445,149, or $.17 per share, on sales of $32,802,009, compared to earnings of $141,641, or $.05 per share, on sales of $37,741,852, in the same period last year.

The board of directors declared a third-quarter dividend of $.10 per share payable on Aug. 31, 1990, to stockholders of record on Aug. 3, 1990.

VOPLEX is a Troy-based company that designs, engineers and manufacturers interior trim components, modules and systems for the automotive industry as well as supplying blow-molded products to the packaging industry.

JACKSON, MI (JULY 27) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today reported that it has a 25-percent working interest in the Sheathelm No. 2-20, an oil well located in Patrick's White Oak prospect, Ingham County, Mich.

The Sheathelm No. 2-20 flowed at a rate of 315 barrels per day during

recent initial testing over a 9.5-hour period. The well was perforated in the Brown Niagaran formation at intervals between 4,202 and 4,210 feet, using a 30/64-inch choke. The well has an estimated 41 feet of net pay. Synergy Corp., the operator, and others own the remaining 75-percent interest in the well.

In Manistee County, Mich., Patrick has a 30.6-percent working interest in the Leppala No. 11-17, a 5,307-foot gas well drilled to the Gray Niagaran formation. Initial flow rates on the recently completed well were in the range of 4 million cubic feet of gas per day with approximately 75 barrels of condensate. Other participants in the well are Terra Energy, Inc., the operator, and its associated partners.

Patrick Petroleum Company is an independent exploration and production company listed on the New York Stock Exchange since 1976 (symbol: PPC). The company has interests in producing properties and undeveloped acreage in 13 states, including various interests in approximately 549 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma, and Louisiana.

#90208p9530 07/27/1990 ~PR Newswire

VINELAND, NJ (JULY 27) PR NEWSWIRE - Security Investments Group, Inc. (NASDAQ-NMS: SSLN), the holding company for Security Savings Bank, SLA announced that the corporation had a loss for the quarter ended June 30, 1990 of $1,988,000 or $0.42 per share. This compares to net income of $1,594,000 or $0.34 reported for the same quarter in 1989. For the six months ended June 30, 1990, the corporation had a loss of $1,054,000 or $0.22 per share as compared to net income of $2,764,000 or $0.59 per shares reported for the comparable six month period in 1989.

As previously announced, second quarter earnings were impacted by management's decision to provide $3.6 million for loan loss reserves and writedowns of other real estate to address the decline in real estate values.

According to Ronald A. Seagraves, president and chief executive officer, "The decision to make these additional provisions was made as the result of the devaluation of two assets in our portfolio, as well as the continued uncertainty of the real estate market and general economic conditions." Seagraves continued, "The two assets are: a loan on a residential condominium project in Atlantic City, and commercial real estate development projects which, despite having close to a 70 percent

occupancy level, require a valuation adjustment to more closely reflect their current market values."

Seagraves emphasized that even after the loss, Security continues to be in compliance with the tangible and core capital requirements of FIRREA. He further stressed that the loss does not conflict with the Bank's risk-based capital plan approved by the Office of Thrift Supervision in April of 1990.

Net interest income was $7,225,000 for the current quarter as compared to $9,735,000 for the three months ended June 30, 1989, and $14,608,000 for the six months ended June 30, 1990 as compared to $17,954,000 in 1989. The decrease in net interest income was attributable to the non-recurring income in 1989 from the accretion of discount associated with loans acquired under the purchase method of accounting. This non-recurring income totaled $2,842,000 and $4,419,000 for the three and six month periods ended June 30, 1989.

Other income was $4,776,000 for the second quarter 1990 as compared to $4,890,000 reported for corresponding three month period in 1989. Gains from the sale of loan servicing increased by $1,945,000, while gains on sale of mortgage loans decreased by $1,779,000 as compared to the same quarter in 1989. Additionally, income from real estate operations decreased $1,055,000 as compared to the second quarter of last year. Of the decrease, $975,000 resulted from valuation allowances for commercial real estate projects.

Non-interest expense for the quarter increased by $222,000, including a $950,000 valuation for real estate owned, offset by a $874,000 net decrease in compensation and marketing costs for the period, the result of a cost containment program initiated by management in 1989. Year-to-date non-interest expense, while unchanged at $23.8 million, included reductions of $1 million in compensation and $725,000 in marketing and advertising, further demonstrating the progress being made in containing expenses.

Security's assets were $1,552,749,000 compared to $1,528,470,000 at Dec. 31, 1989. Deposits totaled 1,043,580,000 up from the $976,104,000 reported at year end. Shareholders' equity was $83,188,000, or $17.75 per share at June 30, 1990.

Security Savings Bank, SLA, its subsidiary, is a state-chartered financial institution headquartered in Vineland. Security operates 34 branches throughout southern New Jersey and provides businesses and consumers with a wide variety of financial products and services.

#90208p9536 07/27/1990 ~PR Newswire

MIAMI (JULY 27) PR NEWSWIRE - Atlantis Group, Inc. (AMEX: AGH) today reported its operating results for the second quarter ended June 30, 1990.

The company generated revenues of $54.6 million for the second quarter of 1990 vs. $56.5 million for the second quarter ended June 30, 1989. Revenues in the first six months of 1990 totaled $104.9 million, compared with $111.3 million in the comparable 1989 period.

Second quarter 1990 operating income was $6.4 million, a 13 percent increase over second quarter 1989 operating income of $5.6 million. Year-to-date operating income of $10.4 million was seven percent ahead of the $9.7 million recorded a year ago.

Second quarter 1990 income from continuing operations totaled $575,000, well ahead of the $37,000 recorded in the comparable 1989 quarter. For the first six months of 1990, income from continuing operations totaled $110,000, or $.01 per share, compared with a loss from continuing operations of $779,000, or $.12 per share, generated in 1989.

Net income for the second quarter of 1990 of $1.1 million, or $.15 per share, represents a substantial increase over the $.4 million, or $.05 per share, posted in the second quarter of 1989. It also represents a significant improvement over the $420,000, or $.06 per share, net loss posted in the first quarter of 1990. For the first six months of 1990, net income totaled $707,000, or $.09 per share, compared with $151,000, or $.01 per share, during 1989.

Western Pioneer Insurance Company, Atlantis Group's insurance subsidiary reported as discontinued operations, posted net income of $597,000, or $.08 per share, during the six months ended June 30, 1990, vs. $930,000, or $.13 per share, reported during the same period in 1989. For the second quarter of 1990, Western Pioneer's net income was $552,000, or $.08 per share, ahead of the $347,000, or $.05 per share, reported during the second quarter of 1989, and also ahead of the $45,000, or $.01 per share, reported during the first quarter of 1990.

Atlantis, headquartered in Miami, is a diversified plastics and contract furniture manufacturing company.

WILMINGTON DE (JULY 27) PR NEWSWIRE - Rollins Environmental Services Inc. (NYSE, PSE: REN) board of directors today declared a quarterly cash dividend on common stock of 2-1/4 cents per share payable on Sept. 20, 1990, to shareholders of record at the close of business on Aug. 20.

The company noted that this dividend represents an increase of 12-1/2

percent over the previous quarterly dividend rate paid in June 1990.

The board determined that this action was appropriate at this time after considering the continuing earnings improvement of the company.

The company is a technological leader for commercial incineration in the chemical waste treatment and disposal industry and operates facilities in Baton Rouge and Plaquemine, La.; Bridgeport, N.J., and Deer Park, Texas. Chempak treatment and disposal services for small quantity generators of hazardous waste are provided through offices located in Delaware, North Carolina, Michigan, Illinois, Louisiana, Texas, New Mexico and California. The company also operates waste processing, recycling and repackaging facilities in Tipton, Mo., and Los Angeles, and a major laboratory facility in Ann Arbor, Mich.

#90208p9543 07/27/1990 ~PR Newswire

HOUSTON (JULY 27) PR NEWSWIRE - Battle Mountain Gold Company (NYSE: BMG) today reported second quarter 1990 net income of $6.7 million, or 9 cents

per share on 76.2 million average shares, down 17.4 percent from last year's $8.1 million, or 12 cents per share, on 65.6 million average shares.

For the first half of 1990, net income was $13.7 million, or 19 cents per share, compared with $19 million, or 29 cents per share, earned during the same period a year earlier, a decline of 28 percent.

Net sales for the 1990 second period were $36 million, up 4 percent from $34.8 million in 1989. Revenues for the first six months of 1990 were $66.7 million, compared with $69.8 million in the first half of 1989.

The company's net profit margin for the first half of 1990 was 21 percent.

BMG Chairman Karl E. Elers said the company's low cash operating costs of $151 per ounce for the first half of 1990 were up, compared with the same period a year earlier, because of higher average stripping ratios. He noted that earnings for the first half were also affected by reduced gold shipments, higher provisions for unproven lease abandonments, and slightly higher G&A costs associated with increased acquisitions and related activities. These factors were partially offset by increased interest income from investment of proceeds from the company's earlier stock and debenture offerings.

Battle Mountain Gold common stock trades under the symbol BMG on the New York Stock Exchange, the Australian Stock Exchange Limited, the Frankfurt Stock Exchange, the Swiss Stock Exchanges and the Toronto Stock Exchange.

#90208p9549 07/27/1990 ~PR Newswire
SHIREMANSTOWN, PA (JULY 16) PR NEWSWIRE - Rite Aid Corp. (NYSE: RAD) announced today that the trial of its president, Martin L. Grass, has come to a successful conclusion.

Through a ruling by Common Pleas Court Judge Lillian J. Greene, dismissing the case, Martin Grass and Rite Aid Corp. were found innocent of all charges brought against them last year by Assistant Cuyahoga County Prosecutor William R. Caine. The case was dismissed even before defense testimony began.

The trial, which began July 2, was examining bribery allegations by a consultant to an Ohio drugstore chain Rite Aid acquired in April 1989. The accuser was also a member of the Ohio Board of Pharmacy.

Greene's ruling indicated that the state's own witnesses had established the defendants' innocence. She said that the key prosecution witness, Melvin T. Wilczynski, himself, had suggested the terms of the buy out of his contract with the drug chain and never indicated to state regulatory authorities that anything but normal contract negotiations had occurred. There was, she said, insufficient evidence to show purpose to corrupt or improperly influence a public official in the discharge of his duties.

The company continually denied all allegations, remained confident of vindication throughout the judicial process, and said it is extremely pleased with today's decision.

Rite Aid Chairman and Chief Executive Officer Alex Grass said in a news conference following the verdict that there was never any doubt in his mind that the company and Martin Grass would be cleared of bribery charges filed nearly 15 months ago in Ohio.

"This is an extremely happy day for me, for Martin, and for all of our associates here at Rite Aid. I'm disappointed that the case ever was initiated. The charges were ludicrous, a vicious attempt to blemish the corporation and its president - it has been an outrage," he said.

The bribery allegations, in fact, concerned the legal buy out of Wilczynski's contract with Peoples Drug Stores Inc., which Rite Aid had assumed in the acquisition of 99 of the chain's drugstores in Ohio in April 1989. The transaction involved a $33,249.93 corporate check prepared by Rite Aid Corp. at the request of Wilczynski and with the participation of corporate attorneys.

Evidence presented in the trial and gathered through independent investigations suggests that the charges stemmed from long-standing enmity toward Rite Aid on the part of certain staff members of the Ohio Board of Pharmacy.

SAN ANTONIO, TX (JULY 27) PR NEWSWIRE - Valero Energy Corporation (NYSE: VLO) has completed the public offering of 4.75 million shares of common stock at a price of $15.25 per share.

Net proceeds to the company, after the underwriters' fee and issuance costs, were approximately $69 million. The offering included one million shares in Europe. Underwriters for the offering were a group managed by Shearson Lehman Hutton Inc. and Salomon Brothers Inc.

Valero intends to use the proceeds from the stock offering to finance a portion of the cost of various capital projects being undertaken by the company.

Valero Energy is involved primarily in refining high-sulfur atmospheric residual oil into premium products, principally unleaded gasoline, through its specialized refinery in Corpus Christi, Texas, and in the marketing of those products.

Through subsidiaries, Valero is general partner of and has an approximate 49 percent interest in Valero Natural Gas Partners, L.P. which owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas throughout the United States, provides third party gas transportation services, and owns 11 natural gas processing facilities.

GLEN ROCK, NJ (July 27) PR NEWSWIRE - Citizens First Bancorp, Inc. (AMEX: CFB) today reported a loss for the second quarter ending June 30, 1990, due to a significant increase in the provision for loan loss reserves. Richard G. Kelley, chairman, commented, "Citizens' loan portfolio and cash flows are very strong. However, the increasingly stringent regulatory banking environment nationwide is now penetrating our region requiring banks to add to loan loss reserves because of the widespread downturn in the real estate industry."

For the second quarter, Citizens reported a loss of $34,488,000, or $1.47 per share, compared with net income of $9,222,000 or $.40 per share on a fully diluted basis and $.43 on a primary basis, for the comparable 1989 period.

Citizens has made a provision of $70 million to its loan loss reserve in the second quarter.

Citizens First Bancorp offers a full range of consumer and corporate banking services. Currently, Citizens operates 51 offices serving five counties in New Jersey.

CINCINNATI (JULY 27) PR NEWSWIRE - Frisch's Restaurants, Inc. (AMEX: FRS) reported higher earnings and slightly lower sales for the fifty-three weeks ended June 3, 1990. Total revenue was $146,841,649, compared to $147,116,512 in fiscal 1989. Net earnings were $3,096,999, or $.58 per share, an increase of 54 percent from $2,014,676, or $.37 per share before a change in accounting for income taxes in fiscal 1989.

Total revenue for the fourth quarter was $36,798,117, compared to $33,696,882 a year ago. Net earnings were $1,257,135, or $.23 per share compared to $425,544, or $.08 per share last year. The fourth quarter contained one extra week this year.

Craig F. Maier, president, stated that "The increase in annual earnings

came primarily from the Big Boy division as a result of closing older unprofitable restaurants last year. This year five Big Boys, two Roy Rogers and one Prime 'n Wine were closed. Due to these closings revenues were flat."

Maier stated further that "five new Big Boy restaurants were opened during the year and one Big Boy restaurant was acquired from a franchisee. Frisch's will build six new Big Boy restaurants during the first half of the current fiscal year." The company operated 100 Big Boys, 11 Roy Rogers two Prime 'n Wine Restaurants and two Quality Hotels as of the year end.

Average unit sales on a fifty-two week basis of company-owned Big Boy Restaurants rose 6 percent to $1,148,000 from $1,082,000. Average unit sales of franchised Big Boy units declined to $864,000 from $894,000 a year ago. Total fifty-two week sales of the 169 Big Boy Restaurants in the Frisch's system, including franchisees, were $176,000,000, down from $181,000,000 in fiscal 1989.

ST. PAUL, MN (JULY 27) PR NEWSWIRE - ZEOS International, Ltd. (NASDAQ: ZEOS), today reported record sales for the second quarter ended June 30, 1990.

The company attributed much of its sales improvement to a growth in demand for its 80386-based personal computer workstations. Net income was impacted by increased advertising and development expenditures related to the introduction of the company's new line of portable computer systems which are scheduled to begin shipping in the third quarter.

Demand for the company's 386SX-based desktop systems remained strong. In addition, the company experienced increased demand for systems based on Intel Corporation's 386DX processor. According to Greg Herrick, chairman and CEO of ZEOS International, "Demand for ZEOS 386SX systems continues to grow. Our 386DX product line is growing in strength and our recently announced '486-based workstations have been well received. We anticipate continued strength in these product lines and look forward to shipping our new portable lineup beginning in the third quarter.

"We are also pleased to note an increase in targeted market segments. Our government and educational sales department in particular experienced significant growth during the past quarter," Herrick added.

ZEOS International, Ltd., manufactures and markets, direct to end users,

ISA and EISA (Industry Standard and Extended Industry Standard Architecture) personal computer systems worldwide under the ZEOS name. The company also manufactures electronic products for others through its contract manufacturing division, NPC Electronics, and distributes electronic components through its parts distribution division, Parts1.

WASHINGTON (JULY 27) PR NEWSWIRE - In response to today's Wall Street Journal article indicating that the Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) has bid to take over HEAF's assets, the corporation issued the following statement:

The Department of Education has invited Sallie Mae to propose ways in which it could participate in a resolution of HEAF's financial difficulties. Among the options being explored on a preliminary basis is the possibility of Sallie Mae's being designated by the secretary of education as a guarantor of student loans originated under the Guaranteed Student Loan Program. Sallie Mae's federal charter permits such a designation.

Any solution Sallie Mae would propose or undertake would be in keeping with its mandate to support the higher education credit market and in the best interest of its investors.

#90208p9576 07/27/1990 ~PR Newswire

ATLANTA (JULY 27) PR NEWSWIRE - Bank South (NASDAQ: BKSO) today reported a second quarter loss of $8.4 million, or $.25 per share compared to earnings of $10.8 million, or $.32 per share during the second quarter of 1989.

Second quarter earnings reflect a $34.3 million provision to the loan loss reserve, compared to $6.2 million in the first quarter of 1990 and $4.3 million during the second quarter of 1989. The second quarter provision includes a special provision of $24.7 million. The higher provision increases the reserve for loan losses to $57.7 million, or 1.66 percent of total loans, compared to $41.2 million and 1.19 percent at the end of the first quarter.

"Continuing deterioration in the real estate market during the second quarter has made this special provision to the loan loss reserve necessary " said Robert P. Guyton, chairman and chief executive officer. "The increased provision is affecting earnings adversely for the short-term, but is prudent as we continue to focus on credit quality, safety and soundness in this environment of soft real estate markets and a deteriorating economy."

During the second quarter Bank South conducted a thorough internal review of its commercial real estate portfolio, and representatives of the Office of the Comptroller of the Currency also conducted a targeted commercial real estate exam. Following these reviews, management increased the loan reserve to this higher level.

During the second quarter, non-performing assets increased $42.9 million to $121.5 million. Non-performing assets at the end of the second quarter represented 3.45 percent of total loans and other real estate owned, compared to 2.26 percent for the first quarter of 1990 and 1.65 percent for the second quarter of 1989.

Non-accrual and renegotiated loans totaled $75.6 million at the end of the second quarter, compared to $59.1 million at the end of the first quarter. Loans current in both principal and interest included in non-accrual loans totaled $11.2 million. Other real estate owned increased to $45.9 million at the end of the second quarter from $19.4 million at the end of the first quarter, reflecting regulatory-directed in-substance foreclosures of $24.3 million.

Charge-offs for the second quarter totaled $17.8 million, or .51 percent of total average loans, compared with $4.1 million, or .12 percent of total average loans for the first quarter of 1990 and .08 percent during the second quarter of 1989.

Guyton said that core earnings for the second quarter were strong, particularly in light of economic conditions. "Operating trends were

favorable as net interest income and non-interest income each increased by 8 percent compared to the second quarter of 1989. Low-cost core deposits increased 7.4 percent, reflecting in part the success of our retail banking strategy of convenience through supermarket banking. At the same time, non-interest expense decreased by 1 percent during the quarter and by 2 percent during the first half of the year compared to the same periods a year ago. We are also pleased to have ended the quarter with a sound capital position," Guyton said.

Excluding the effects of additional provisions to the loan loss reserve, after-tax operating income for the second quarter totaled $14.1 million, an increase of 31 percent over the second quarter of 1989. After-tax operating income year-to-date, excluding the effects of additional provisions, totaled $27.5 million, an increase of 30 percent.

Including the effects of additional provisions to the loan loss reserve, net income for the first half of 1990 totaled $3.1 million, or 9 cents per share, compared to net income of $21.2 million, or 63 cents per share during the first half of 1989.

Guyton said the company expects sluggish loan growth and further softness in the real estate market and economy through the end of the year. "We will continue to focus on credit quality cost containment, and sales and marketing," he said. "At the same time, we are acting aggressively to enhance the long-term value of this franchise by expanding into high-growth markets that offer deposits, and into services that generate non-interest income."

Bank South took three major steps during the quarter to enhance market presence and generate non-interest income:

In May, Bank South announced a letter of intent to acquire the name, business and operations of Lex Jolley & Co., a leading provider of investment banking services to Georgia cities and counties in the area of municipal finance. The acquisition is expected to substantially expand Bank South's public finance capability, and also benefit other areas such as Trust and Government Banking.

Also during the quarter, Bank South announced a definitive agreement to merge with The First National Bank of Clearwater, a $427 million-asset financial institution in Pinellas County, Fla. First National maintains a conservative loan to deposit ratio of 53 percent, and has a strong trust department with assets under management of $743 million.

In June, Bank South further enhanced its position as the most convenient bank in Atlanta by announcing an agreement whereby Bank South will purchase 142 automated teller machines from GTE. The agreement will increase the number of Bank South ATMs in Georgia to 242, more than any

other financial institution, and is expected to generate substantial new non-interest income. These ATMs are located in Big Star, Cub Foods, Winn Dixie and A&P supermarkets, as well as Rich's stores and Atlanta Hartsfield International Airport. When conversion is completed later this year, it is estimated that nearly one of every five AVAIL transactions will take place on a Bank South ATM.

Additionally, Bank South has a merger pending with Metro Bancorp Inc., a $175 million-asset, one-bank holding company in Douglas County, Ga. Metro Bancorp owns The Commercial Bank, which has nine offices and is ranked number one in market share in this high-growth west metropolitan Atlanta region.

The board of directors of Bank South recently declared a regular quarterly dividend of $.13 per share, payable Oct. 1 to shareholders of record at the close of business on Sept. 14.

Bank South Corp. is a $5.5-billion multi-bank holding company with 140 offices throughout Georgia and the Florida panhandle.

SOUTHFIELD, MI (JULY 27) PR NEWSWIRE - Progress Pattern, a wholly owned subsidiary of Lear Seating Corporation, reported it achieved record sales of over $20 million for the fiscal year ended June 30. Progress Pattern is the largest independent pattern maker in Michigan.

Eric Kozlowski, vice president and general manager, noted that much of Progress Pattern's recent growth is due to increased market share, including several new OEM (original equipment manufacturing) programs. He said sales were up 38 percent.

Progress Pattern, a leader in lost foam technology, has provided prototype and production tooling for several engine and drivetrain components manufactured by the lost foam process.

Kenneth L. Way, chairman and CEO of Lear, said Lear considers Progress Pattern "a strategic core business and will continue to invest in and

pioneer new technology in order to maintain its leadership position."

FARMINGTON HILLS, Mich. (JULY 27) PR NEWSWIRE - Medar, Inc. (NASDAQ: MDXR) reported net earnings for its second quarter ended June 30, 1990 of $106,137, or $.02 per share, on net sales of $3,536,938, as compared to a second-quarter loss in 1989 of $836,885, or $.15 per share, on net sales of $2,657,732.

On a year-to-date basis, Medar, Inc. reported net earnings for the six-month period ended June 30, 1990 of $145,616, or $.03 per share, on net sales of $7,290,294, compared to a loss for the six-month period ended June 30, 1989 of $1,034,616, or $.19 per share, on net sales of $6,425,988.

Increased sales of both resistance welding controls and machine vision equipment to automotive and non-automotive markets, combined with further cost reductions has resulted in the company's third consecutive profitable quarter. Of particular importance has been export sales of machine vision products to European countries, where markets for the company's products have expanded rapidly.

Quoting activity remains high and the outlook for the remainder of 1990 is considered strong.

Medar designs and manufactures computer-controlled automotive equipment including vision gauging and inspection systems, resistance welding controls and computer communications systems. Medar's customers include major companies in the defense, aerospace, automobile, appliance, entertainment and consumer goods packaging industries.

LOS ANGELES (JULY 27) PR NEWSWIRE - Veronex Resources Ltd. (AMEX: VX) reported a net loss of $322,000 ($0.03 per share) on revenues of $914,000 for the first quarter ended May 31, 1990, compared to a net loss of $26,000 ($0.00 per share) on revenues of $1,006,000 for the same period one year ago.

Oil production rose 23 percent in the first quarter to 154,000 barrels of oil compared to 125,000 barrels of oil for the same period a year ago. Veronex revenues decreased due to a change in the oil sharing ratio between Veronex and the operator as well as to a decline in the average price of oil from $18.32 per barrel for the period a year ago to $18.06 for the current period.

The oil sharing ratio changes depending on each partner's proportionate investment in the project. Veronex's oil sharing ratio decreased from 65 percent for the quarter ended May 31, 1989 to 40 percent for the current quarter. Veronex's share is now fixed at the contractual rate of 40 percent.

Veronex Resources is an internationally diversified natural resource company with commercial oil production in Indonesia, gold exploration programs in Canada and Papua New Guinea, and ongoing plans for a wood chip project in Southeast Asia.

BEVERLY HILLS, CA (JULY 27) PR NEWSWIRE - Qintex Entertainment Inc. (QEI) (NASDAQ: QNTXQ) today reported that a settlement has been reached between the company's officers and directors, their insurer, and stockholders in a class-action suit brought following QEI's Chapter 11 bankruptcy filing on Oct. 19, 1989.

Under the terms of the settlement, the insurer will deposit $4 million for payment of claims, and the plaintiffs will release all claims against QEI and its officers and directors. The company's officers and directors deny any liability or wrongdoing and reached the agreement in order to avoid the expense and time demands of protracted legal proceedings.

The settlement agreement is principally contingent upon court approval, or affirmation of the court approval if an appeal is filed.

#90208p9588 07/27/1990 ~PR Newswire

FRASER, MI (JULY 27) PR NEWSWIRE - In keeping with the health- conscious consumer, Tubby's Sub Shops, Inc. has added a new line of low- fat, low-calorie sandwiches to its menu. Introduction into all units shall be completed by Aug. 20, 1990.

The new menu items consist of 6-inch size sandwiches in four varieties, each under 300 calories: Tubby's grilled chicken with 2.62 grams of fat, 253 calories; Tubby's turkey & cheese with 6.5 grams of fat, 283 calories; Tubby's vegetarian sub with 4.3 grams of fat, 224 calories; and Tubby's seafood & crab with 11.3 grams of fat and 198 calories. Tubby's also offers a "Lite" dressing which adds only 1 gram of fat per sandwich.

The company has condensed and revised its present menu of 23 sandwiches to 13 and has added an all "new" 6-inch sandwich to go with its standard 8-inch and 16-inch sandwiches.

President J. Thomas Paganes said, "We are making this change with a great deal of enthusiasm and anticipation that this format of better nutrition, price and value, along with a conscious effort to bring the consumer a healthier product will be an all-around benefit to our customers."

In keeping with the health-conscious consumers' desire for healthier

products, Tubby's Sub Shops, Inc. said it is pleased to announce that its products rate lowest in fat content among some of the major fast- food chains. For example, Tubby's 8-inch steak & cheese has only 11.8 grams of fat and Tubby's cheeseburger has only 22.3 grams of fat, compared to the similar items offered by competition, which may go as high as 44.0 grams of fat. That puts Tubby's well ahead of the competition in meeting the increasing health-conscious consumers. Tubby's has been using pure vegetable oil to fry its food since 1982. Tubby's 22-year policy of using fresh bread daily, with no preservatives, is also a company standard policy that adds to distinguish Tubby's.

Tubby's Sub Shops, Inc. will also be opening a location in Hutzel Hospital on Aug. 15, 1990. Tubby's was chosen among three fast-food applicants because of its variety and the products it serves.

Tubby's newest location is in Springfield, Ill. Jack Rooney, franchisee, officially opened that location for business on June 2, 1990, to an enthusiastic response from the community.

Tubby's Sub Shops, Inc. is a franchiser of 62 sandwich shops, two Ricky's Dairy Bar & Luxury Grills, and two Stuff Yer Face restaurants in New Jersey. The New Jersey Stuff Yer Face restaurants were recently acquired through a merger.

#90208p9593 07/27/1990 ~PR Newswire

HOUSTON (JULY 27) PR NEWSWIRE - Shell Oil Company earned $161 million in the second quarter of 1990, a decline of $279 million from the same quarter last year, President Frank H. Richardson announced today.

A major factor in the decline was a decision to write off some of the investment in certain oil and gas properties offshore California because of continuing delays in securing development permits.

In addition, the company wrote off the cost of an artificial island and

exploration wells associated with an oil discovery in the Beaufort Sea offshore Alaska that was determined to be noncommercial.

For the first half of 1990, total earnings were $363 million, a decrease of $438 million from the same 1989 period, which was a record. Cash flow provided by operating activities totaled $243 million for the quarter, compared with $701 million last year. For the six-month period, it was $625 million, compared with $1,381 million in 1989. Higher working capital requirements and lower earnings in both 1990 periods accounted for the declines.

Revenues were $5.2 billion for the quarter and $10.9 billion for the first half, compared with $5.9 billion and $11.0 billion for the respective 1989 periods.

Earnings declined 63 percent for the quarter and 55 percent for the six months.

#90208p9594 07/27/1990 ~PR Newswire

DEARBORN, MI (JULY 27) PR NEWSWIRE - Several organizational and executive personnel changes were announced today by Ford Motor Company (NYSE: F) Chairman Harold A. Poling. The moves are effective Sept. 1 and involve key positions in the company's North American Automotive Operations (NAAO).

"The changes will provide an improved organizational structure to support NAAO's strategic objectives for the 1990s," Poling said. "In particular, the new structure is designed to enhance simultaneous engineering and further reduce product cycle times." The changes are as follows:

Max L. Jurosek is appointed vice president and general manager, Powertrain Operations, reporting to Alexander J. Trotman, executive vice president, North American Automotive Operations. Jurosek will have responsibility for the company's North American powertrain activities.

In addition to Engine Division and Transmission and Chassis Division, Powertrain Operations is being expanded to include Casting Division and Powertrain Engineering. Previously, Jurosek was vice president, Car Product Development.

Kenneth K. Kohrs is appointed vice president - Car Product Development, reporting to Trotman. His previous position of vice president - Car Programs Management and Powertrain Planning and Engineering will be discontinued.

As part of a realignment of Car Product Development, a Vehicle Engineering activity is established with Neil W. Ressler as executive director, reporting to Kohrs. Vehicle engineering will consolidate Advanced Vehicle Engineering, Vehicle Development and Car Chassis Engineering. Previously, Ressler was director of Quality and Product Systems and Advanced Engineering.

Henry A. Nickol is appointed general manager of a newly established Vehicle Operations activity, reporting to Trotman. Previously, he was general manager, Powertrain Operations. Vehicle Operations initially will consist of Body and Assembly Operations and Body Engineering.

W. Dale McKeehan is appointed general manager of Body and Assembly Operations and Robert H. Transou, executive director of Body Engineering, both reporting to Nickol. Previously, McKeehan was assistant general manager, Stamping and Assembly Operations, and Transou was engineering director, Body and Chassis Engineering.

William E. Scollard, Ford vice president and senior adviser, North American Automotive Operations, and Donald A. Jesmore, general manager of Body and Assembly Operations, have indicated plans to retire in early 1991.

Following Scollard's retirement, Ford of Mexico and NAAO Production Purchasing also will report to Nickol. Until his retirement, Jesmore will serve as senior adviser, Vehicle Operations, and assist with the transition related to the realignment.

ROCHESTER, NY (JULY 27) PR NEWSWIRE - Roadway Motor Plazas, Inc. (NASDAQ: RDWI) today reported its first fiscal year end loss of $587,445 on revenue of $125,511,304 for the year ended April 30, 1990, compared to net income of $902,796 on revenues of $109,558,935 for the fiscal year ended April 30 1989. John Holahan, the company president, noted that the year end loss was largely attributable to several non-recurring charges, start up expenses for the three new locations, lower than normal fuel margins, and an increase in certain operating expenses that occurred over the past year. The company experienced non-recurring charges in excess of $1,000,000 stemming from recognition of uncollectible accounts receivable, the establishment of certain reserves for legal actions, and the expensing of tax obligations resulting from a sales tax audit.

Holahan noted that the company should return to normal profitability

levels in the first quarter of fiscal 1991, as fuel margins have stabilized and no further significant legal expenses are anticipated for the current fiscal year. Furthermore, the three new locations as a group that had not been profitable during fiscal 1990 are projected to show profits during the first quarter of fiscal 1991.

#90208p9606 07/27/1990 ~PR Newswire

CHICAGO (JULY 27) PR NEWSWIRE - In a joint announcement today, William A. Mathison, president and CEO of Harcros Chemicals Inc (Harcros), and Louis H.T. Dehmlow, president and CEO of Great Lakes Terminal & Transport Corp. (GLT&T), made public an agreement to purchase GLT&T's Chicago-based chemical distribution business, GLS Chemicals.

Harcros -- a member of the Harcros Chemicals Group, London -- operates 42 chemical distribution centers throughout the United States and Canada.

According to Mathison, "This acquisition fits perfectly into Harcros' long-term commitment and growth plans for the Chicago market and the Midwest."

The GLS Chemicals business -- originally called Great Lakes Solvents -- has served a broad customer base with liquid chemicals and solvents for 50 years.

Dehmlow said that the sale of this division would ensure the continuity of GLS Chemicals, provide employment for key people, and allow GLT&T to concentrate on their fiber glass, plastics, trucking and terminaling business.

A new state-of-the-art distribution center is planned and will accommodate Harcros' expanded business in the Chicago area and to meet its growth requirements for the future.

In addition to Chicago, Harcros Chemicals Inc has U.S. distribution facilities in the following areas: Seattle; Portland, Ore.; San Francisco; Los Angeles; Phoenix; Denver; Houston; Dallas; Tulsa; Wichita; Omaha; St. Paul; Davenport; Kansas City, Kans.; St. Louis; Little Rock; Shreveport; St. Gabriel, La.; Jackson, Mich.; Muscle Shoals, Ala.; Bessmer, Ala.; Mobile; Tampa; Atlanta; Thomasville, N.C.; Memphis; Nashville; Indianapolis; Cincinnati; Holtsville, N.Y.; Merrimack, N.H., and Westbrook Maine.

LAPEER, MI (JULY 27) PR NEWSWIRE - Durakon Industries, Inc. (NASDAQ-NMS: DRKN) released today its sales and earnings results for the second quarter and first six months of 1990.

"Exclusive of the one-time gain associated with the sale of DFM, the net income for the second quarter is the best quarter in the company's history " said Durakon Industries, Inc. President and Chief Executive Officer David Laro.

Net sales for the three-month period ended June 30, 1990, were $35,819,000 compared to $38,501,000 for the same period in 1989. Net income for the second quarter of 1990 was $3,973,000 ($.64 per share) compared to $1,707,000 ($.28 per share) in 1989.

For the six-month periods ended June 30, 1990 and 1989, net sales were $69,331,000 and $71,772,000, respectively. Net income for the first six months of 1990 was $4,132,000 ($.67 per share) compared to $641,000 ($.10 per share) for the same period in 1989.

The operating performance of the company for 1990 includes other income of $1,955,000 associated with the June sale of DFM Corp. Operations of DFM, the manufacturer and distributor of bug and gravel deflector shields, have been included through May 1990.

"We are pleased with the second quarter and six month performance and expect improvements in manufacturing and market penetration, as well as improvements at our Jerr-Dan subsidiary to be the basis for strong

operating performance in the future," stated Laro.

Durakon is the world's leading producer and distributor of pick-up truck bed liners and roll-back car carriers. Headquartered in Lapeer, it has manufacturing facilities in Clare, Mich.; Brentwood, Tenn., and Greencastle, Pa.

#90208p9612 07/27/1990 ~PR Newswire

SIMSBURY, CT (JULY 27) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) today reported an after-tax loss from continuing operations of $300,000, equal to $.09 per common share (after payment of preferred dividend), on sales of $59 million during the second quarter ended June 30, 1990. Comparable figures for the 1989 prior period were a net loss from continuing operations of $900,000, or $.09 per common share, on sales of $59.1 million. Included in the second-quarter after-tax loss are nonrecurring proxy contest and related costs of $1.8 million ($.17 per common share) and the previously announced settlement with Vernitron Corporation of $2.0 million ($.18 per common share).

Income from continuing operations after tax for the first six months of 1990 was $1.2 million, or $.06 per common share, on sales of $119.7 million compared with a loss of $230,000, or $.02 per common share, on sales of $117.7 million in the prior period.

Discontinued operations for the second quarter ended June 30, 1990, resulted in a net loss of $1.4 million, or $.13 per common share, compared

with a net loss of $9.0 million, or $.85 per common share for the comparable 1989 period.

For the six-month period ended June 30, 1990, discontinued operations resulted in net income of $15.6 million (principally gains on the disposition of assets), or $1.46 per common share ($1.19 on a fully diluted basis), compared with a net loss of $8.2 million, or $.77 per common share, for the 1989 comparable period.

Total net income for the first six months of 1990 was $16.9 million, or $1.52 per common share ($1.42 on a fully diluted basis), compared with a loss of $8.4 million, or $.79 per common share, for the comparable 1989 six-month period. Total operations for the second quarter of 1990 resulted in a net loss of $1.8 million, or $.22 per common share, compared with the total second-quarter 1989 net loss of $9.9 million, or $.94 per common share.

Kollmorgen Corporation has continuing operations in two business segments: special purpose servo motors and controls, and electro- optical instruments.

#90208p9613 07/27/1990 ~PR Newswire

CHICAGO (JULY 27) PR NEWSWIRE - Duff & Phelps has raised its rating of McDonald's senior debt to 'AA+' (Double-A-Plus) from 'AA' (Double-A). This rating action affects approximately $1.0 billion of debt securities.

"This rating reflects a number of strong qualitative and quantitative factors. Heading the list is a relatively young management which is very experienced and committed to maintaining the company's pre-eminent position in the restaurant industry. Members of McDonald's senior management have a vast array of experience within the organization and their successors are being developed accordingly," explained a D&P spokesman.

The franchising system is another major strength, not only for the strong cash flows it provides to McDonald's, but also for the manner in which the company selects and trains its personnel (this also applies to those employed in the company-owned units). McDonald's development of these people's skills has helped the company to achieve its impressive financial performance over the years.

Other qualitative strengths include the site selection process, product development and design, and engineering activities. The latter, in

particular, has developed and continues to develop ingenious ways in which a unit's volume can be increased and its costs reduced. We cannot over-emphasize the importance of McDonald's site selection process. The careful and intense analysis of demographics and geography has resulted in McDonald's acquisition of choice locations. Location is critical to the company's success.

Despite the strong cash flow, McDonald's debt ratio is above average (including capitalized operating leases) when compared to other large industrial entities. However, this is offset to a considerable degree by the company's vast real estate holdings which are carried at depreciated cost, but believed by us to be undervalued on a current market basis. Additionally, the company's fixed charge coverage of about 4.0 times is somewhat below the desired level for the rating assigned. We feel this is offset by lower business risk, including less seasonality and cyclicality, than many other comparably rated companies, as well as the cash nature and cash flow characteristics of its business.

"Finally, our rating recognizes the intensely competitive nature of the restaurant industry as well as McDonald's aggressive new store opening program. In our view, these are not mutually exclusive. Domestic expansion appears linked to the weakened competition in the 'hamburger segment.' The company seems to be leveraging on its business and financial strengths in order to exploit an opportunity. Overseas, the company is exploiting its growing presence and keeping well-ahead of its competition. Because of low saturation levels, the international arena represents a large potential market for McDonald's (although initial costs seem higher)," said the spokesman.

"Overall, we expect McDonald's to continue to generate large, improving cash flows. The capital spending program, however, will likely require continued external financings including operating leases. Thus, fixed charge coverage will show only modest improvement above the 4.0 times level, while the fixed obligation ratio declines towards 55 percent (from 60 percent) through additions to retained earnings (this could be retarded by share repurchases)," he continued.

#90208p9615 07/27/1990 ~PR Newswire

NEW YORK, NY (JULY 27) PR NEWSWIRE - Standard Motor Products, Inc. (NYSE: SMP), automotive replacement parts manufacturer, reported that sales for the second quarter, the three months ended June 30, 1990, were $131,630,000 compared with $117,403,000 a year ago. Net income was $1,279,000, or 10 cents per share, compared to last year's $4,987,000, or 38 cents per share.

Sales for the six months totaled $261,417,000 compared with $213,001,000 in the 1989 period. Net income for the six months was $4,230,000, or 32 cents per share, compared with $8,549,000, or 65 cents per share, for the same period last year.

Commenting on the results for the second quarter, Lawrence Sills, president, stated that approximately $11 million of the sales increase resulted from the late 1989 acquisition of Guaranteed Parts/Sorensen. Although revenues increased substantially at the Four Seasons Air Conditioning and Heater Parts Division and satisfactorily at the EIS Brake Division, this was partially offset by decreases in sales for the Standard Hygrade and Champ product lines.

Sills stated that the decrease in net income was attributable to certain write-offs and one-time charges the company is sustaining this year that affected the second quarter and will likely affect results for the remainder of the year. The write-offs related to inventories and accounts receivable while the one-time charges pertain to the GP/Sorensen acquisition.

JACKSONVILLE, FL. (JULY 27) PR NEWSWIRE - First Union National Bank of Florida's Chairman and Chief Executive Officer Billy J. Walker announced today that along with his duties as chairman and CEO of First Union National Bank of Florida and vice chairman of First Union Corporation (NYSE: FTU), he is assuming the additional responsibilities of chairman of the bank's Credit Policy Committee. This committee's mission is to promote

the bank's corporate and commercial lending efforts throughout the state.

"The integration of Florida National is progressing so well that we are now positioned to move forward with a renewed focus on making loans and supporting the economic development of the state," said Walker. "With Byron Hodnett so capably handling the day-to-day activities, I want to dedicate my time and energy to building upon the long-standing relationships we have in the Florida market place."

Walker announced in February that First Union National Bank of Florida's president Byron Hodnett will become CEO of the bank in March 1991.

"Billy Walker has always been devoted to lending money and developing relationships with corporations and businesses throughout Florida," said Hodnett. "With his continued leadership in this role, he will further First Union's position as a leader in corporate banking, commercial lending and economic development for years to come.

"I feel fortunate to have had Billy as my mentor for the past several years, and I look forward to continuing with him as my teammate as we work toward the continued development of our bank in Florida."

First Union National Bank of Florida, headquartered in Jacksonville, Fla., has assets of $16.6 billion and 346 banking offices in 33 counties. It is a subsdiary of Charlotte, N.C.-based First Union Corporation which reported assets of $38.4 billion on June 30, 1990 and operates banking and financial services offices in 36 states.

PALO ALTO, CA (JULY 27) PR NEWSWIRE - Syntex Corporation (NYSE: SYN) announced today with deep regret that its long-time chairman and former chief executive officer, Dr. Albert Bowers, died last evening at the University of California San Francisco Medical Center after an extended illness. He was 60.

"We are deeply saddened by the loss of our dear friend and colleague," Paul E. Freiman, chief executive officer of Syntex, said. "The Board of Directors and Bert's many friends at Syntex extend our deepest sympathies to his family."

Dr. Bowers joined Syntex in 1956 as a group leader in research. He

subsequently held a number of research and management positions at Syntex, an international pharmaceutical and life sciences company.

He was elected president of the corporation in 1976, served as chief executive officer from 1980 through July 1989 and as chairman of the Board of Directors since 1981.

During his tenure as chief executive officer, the company successfully developed a number of new prescription pharmaceutical products and enjoyed a period of historic growth in sales and earnings. He had planned to retire as chairman, due to ill health, effective July 31, 1990.

Dr. Bowers was a former chairman of the board of the Pharmaceutical Manufacturers Association, the pharmaceutical industry's national trade association.

He was also a member of the board of directors of The Clorox Company; the Business-Higher Education Forum; the Rockefeller University Council; the advisory board of the Beckman Center for the History of Chemistry; the executive committee of the Bay Area Council; a member of the California Business Roundtable; and was a founding member of the board of trustees of the University of California San Francisco Foundation.

A renowned scientist, Dr. Bowers published more than 90 scientific papers on steroid research and originated more than 120 United States patents. Among his major scientific accomplishments was his pioneering work in developing methods for the selective fluorination of steroids, leading to the synthesis of new topical corticoids for the treatment of skin diseases.

Dr. Bowers' discovery of a new synthesis for norethindrone made possible the large-scale manufacture of this important oral contraceptive agent. In 1964, Dr. Bowers was awarded the Science Prize by the Mexican Academy of Science.

#90208p9626 07/27/1990 ~PR Newswire

BOSTON (JULY 27) PR NEWSWIRE - BayBank today announced a program featuring a special discount on a three-year adjustable-rate mortgage (ARM) to homebuyers during August and September.

The ARM is being introduced to consumers at an interest rate of 8.875 percent plus one point, the lowest in the state for a three-year ARM, and has a term of up to 30 years.

"BayBank is a leader in originating high-quality residential mortgages. Today, we're offering homebuyers a great interest rate on one of our most popular mortgages. By offering this ARM rate we are helping consumers take advantage of real estate opportunities in today's market," said Karen H. Carpenter, president, BayBanks Mortgage Corp.

The special rate, currently at 8.875 percent, can represent significant savings on monthly mortgage payments. With this special discount consumers who borrow $135,000, for example, can save about $100 per month over the first three years of the mortgage.

Consumers can call the BayBank 24-hour Customer Service Center at 1-800-BAYBANK to schedule an appointment with a mortgage specialist or to request an application package, Homebuyers can also use BayBank's new One-Day Mortgage(tm) program and in most cases receive a decision on their mortgage application in one business day.

The BayBank One-Day Mortgage was introduced earlier this spring. Consumers who complete a mortgage application and deliver it to a BayBank mortgage specialist by 3 p.m. on a business day will generally receive a decision by 5 p.m. the following day at no additional charge. And consumers who apply for an ARM have the option of locking in their interest rate at time of application for up to 60 days.

Homebuyers also can stop in at any one of the more than 215 Baybank offices located throughout Massachusetts for more information about the wide range of mortgage products currently available.

BayBank, Inc. (NASDAQ: BBNK) is one of the largest bank holding companies in New England with $10 billion in assets as of June 30, 1990. BayBanks offers a complete range retail and commercial banking services to consumers and businesses throughout New England.

#90208p9627 07/27/1990 ~PR Newswire

ARLINGTON, VA (JULY 27) PR NEWSWIRE - USLICO Corporation (NYSE: USC) reported strong first half earnings, with net operating results, excluding realized gains, up 18 percent to $12 million, or $1.11 per share, on an after-tax basis for 1990, compared to $10.2 million, or $.93 per share for 1989.

Realized investment gains after taxes decreased to $511,000 for 1990 compared to $4.4 million in 1989. As a result of the lower realized gains net income fell to $12.5 million, or $1.15 per share, in the first half

of 1990 compared to $14.5 million, or $1.33 per share, in the 1989 period.

Growth in operating results was led by USLICO's life companies, which produced a 24 percent increase in operating income after taxes to $11.8 million for 1990. Premiums and investment income increased $21 million, while policy benefits rose only $11 million.

USLICO reported that its property and casualty companies had a good first half result, despite storm losses in the Midwest. The combined ratio was 102.6 percent for 1990 compared to 102.5 percent for 1989. Earnings remained level at $2.7 million (after-tax) in the first six months of 1990 compared to the same 1989 period.

Realized gains of $5.4 million (pre-tax) in 1989 resulted from the sale of three non-insurance properties. No similar sales occurred in the first six months of 1990.

Sales of life and annuity products increased 28 percent to $113 million of new annual premium in 1990 compared to $88.4 million for the first six months of 1989. Direct premiums written by the property and casualty companies increased 10 percent over 1989 to $70.9 million for the first half of 1990.

USLICO also announced that it had purchased certain business assets from the Perpetual Insurance Agency, a subsidiary of Perpetual Savings Bank, on June 29, 1990. As a result of the purchase, through USLICO's insurance brokerage agency, this agency will service approximately 11,000 policyowners for auto and homeowners insurance and for certain commercial insurance lines previously serviced by Perpetual. The USLICO agency also will place and service the insurance needs of Perpetual and its subsidiaries.

SAN ANTONIO (JULY 27) PR NEWSWIRE - La Quinta Motor Inns Inc. (NYSE: LQM) announced the acquisition of a competitor lodging property in Houston for conversion to a La Quinta Inn. The property was acquired by La Quinta Development Partners L.P., the company's recently-formed development joint venture. This is the second competitor property included in the venture for conversion to a La Quinta Inn. The company also announced the purchase of a 100-room competitor inn in Las Cruces, N. M. The inn will be wholly-owned by the parent company and converted to a La Quinta Inn.

Alan L. Tallis, senior vice president-development, reported, "We are actively seeking lodging product suitable for conversion to La Quinta Inns. In addition to the three properties mentioned above, we have six properties or approximately 800 rooms under active negotiation or letters of intent. The acquisition and conversion of competitor lodging properties to La Quinta Inns is an important strategy for the company because the cost of converting inns is considerably less than the cost of new construction and it allows La Quinta to grow without adding new rooms

to the market. Including anticipated borrowings and cash projected to be generated from operations, our new partnership will have resources of $150 million to support our growth targets for the next several years."

La Quinta Motor Inns Inc. develops, owns and operates mid-priced limited service lodging facilities. As of July 27, 1990, there were 207 La Quinta Inns in operation in 29 states.

MT. HOLLY, NJ (JULY 27) PR NEWSWIRE - Franklin Electronic Publishers Inc. (NASDAQ-NMS: FPUB) today reported a loss of $2,777,000, or $.42 per share, for its first quarter ended June 30, 1990, as compared to a loss of $1,221,000, or $.21 per share, for the quarter one year ago.

Sales for the quarter were up by 12 percent to $12,036,000 from $10,774,000 one year ago.

Morton E. David, Franklin's chairman, said, "Our goal during the June quarter, Franklin's seasonally slowest time, was to continue to reduce inventory levels. Franklin has had excess inventories that have been difficult to reduce given the company's market share, which approximates 60 percent of domestic reference product sales, and the sluggish retail environment for electronics. Nevertheless, inventories have been reduced by almost 40 percent from the June quarter one year ago to $17,600,000. Gross margins during the quarter were impacted by these inventory reductions. Inventories should be in line by the end of the September quarter and thereafter gross margins will rebound. Although there is widespread softness in consumer durables, we expect to return to profitability in the second half of the 1991 fiscal year."

Franklin publishes a library of 20 hand-held electronic reference products with more than 3 million volumes sold throughout the world, including the popular Spelling Ace(R) spelling corrector, Language Master(TM) electronic dictionaries, and Wordmaster(TM) electronic thesauruses. Franklin's publication list is being broadened to include hand-held electronic versions of "The Columbia Concise Encyclopedia" and "Bartlett's Familiar Quotations."

MILWAUKEE (JULY 27) PR NEWSWIRE - The Northwestern Mutual Life Insurance Company has named W. Ward White, 50, vice president- communications. He will assume his new duties on Aug. 15. In that post, White will be responsible for all of the company's public relations, advertising and creative services with a staff of 45.

White fills the position formerly held by Vice President Robert O. Carboni who will now report to Chairman and CEO Donald J. Schuenke and will assist the chairman with corporate contributions and community projects. Carboni, 60, has been the head of Northwestern's communications department since 1973.

Before joining Northwestern Mutual Life, White has served as president of Golin/Harris East, New York City, since 1988. From 1977 to 1988, White was with Bozell, Inc., serving as president of Bozell Public Relations from 1986 to 1988. He simultaneously served as executive vice president of Robinson, Lake and Lerer. Prior to 1986, White was senior vice president-general manager of Bozell's Chicago office, senior vice president in the Los Angeles office, and vice president-operations manager in Houston.

White began his career in communications with Standco Industries, Inc. and was regional manager in Houston for the P.R. firm of Ruder and Finn when that organization was acquired by Bozell in 1977.

A native of Chicago, White has a master's degree from DePaul University and received a Ph.D. from Catholic University in Washington, D.C.

Headquartered in Milwaukee, Northwestern Mutual Life is the nation's 10th largest life insurance company, with assets of more than $30 billion. The company specializes in selling only individual policies for life insurance disability income insurance and annuities. Northwestern has been ranked the most admired of the 10 largest life insurance companies in each of the eight years Fortune magazine has conducted its survey of corporate reputations.

In the book, "The 100 Best Companies to Work for in America," Northwestern was ranked by the authors among the top 15 companies. In the A.M. Best's annual study of 20-year cost comparisons, Northwestern Mutual has been ranked first or lowest cost 17 times in the past 18 years.

DALLAS (JULY 27) PR NEWSWIRE - Quest Medical Inc. (NASDAQ: QMED) today announced results for the second quarter and six months ended June 30, 1990.

For the second quarter, Quest's revenues were $1.47 million, and net earnings were $1.64 million, or 29 cents per share, including an unrealized gain of $307,000 on marketable securities and a pretax gain of $1.15 million from a favorable court ruling. In May 1990 the United states Court of Appeals upheld the favorable decision Quest received in a Federal District Court in March 1989 in its defense of a patent infringement lawsuit brought by Minnesota Mining & Manufacturing Co. (3M) in January 1986. The decision entitled Quest to receive an additional cash

payment as part of the sale in 1987 of its electronic intravenous infusion device product line to Kendall McGaw Laboratories. During the second quarter of fiscal 1989, Quest had net earnings of $138,000 or 2 cents per share, on revenues of $1.50 million.

For the six months ended June 30, 1990, Quest had revenues of $3.0 million and net earnings of $1.13 million, including the pretax gain from the favorable court ruling and an unrealized loss of approximately $330,000 on marketable securities. For the same period of the previous year, Quest's revenues were $3.3 million, and net earnings were $2.6 million, or 42 cents per share, including a pretax gain of $2.66 million from the Federal District Court ruling in March 1989.

Thomas C. Thompson, president, noted that Quest's operations were profitable during the second quarter of 1990, reflecting higher gross profit margins.

NEW YORK, (JULY 27) PR NEWSWIRE - Renault Vehicules Industriels S.A. ("RVI"), a wholly owned subsidiary of Regie Nationale des Usines Renault, announced today that Mack Trucks, Inc. (NASDAQ: MACK) has advised RVI that although discussions between Mack and Mack's lenders and lenders to certain of Mack's subsidiaries are continuing, Mack had not yet received an extension of the maturity of the MFC revolving credit agreement to Dec. 31, 1990, and certain waivers from lenders to Mack and its subsidiaries through that date. Receipt by Mack prior to July 20, 1990 of such an extension and such waivers is a condition to the consummation of the tender offer (the "offer") by ITM Acquisition Corp., an indirect wholly owned subsidiary of RVI, to acquire all of the outstanding shares of common stock of Mack not beneficially owned directly or indirectly by RVI, at $6.00 per share, net to the seller in cash.

As previously announced by RVI, this condition can no longer be satisfied. Mack, however, has requested that ITM amend this condition to require receipt by Mack of such an extension and such waivers prior to Aug. 8, 1990 rather than July 20, 1990 in order to permit Mack more time to satisfy this condition to the offer. RVI and ITM are considering Mack's request as well as the other alternatives available to them.

The offer is scheduled to expire at midnight, New York time, on Wednesday, Aug. 8, 1990.

HARLEYSVILLE, PA (JULY 27) PR NEWSWIRE - Harleysville Group Inc. (NASDAQ: HGIC), a regional insurance holding company, today announced that an agreement in principle has been reached to acquire two of Phoenix Mutual Life Insurance Co.'s property and casualty insurance company subsidiaries: Phoenix General Insurance Co. and New York Casualty Insurance Co.

Under the terms of the agreement, Harleysville Group will purchase, for cash, all of the issued and outstanding shares of capital stock of both companies. Consummation of this transaction is contingent upon receipt of all required regulatory approvals, approvals of the respective boards of directors, completion of due diligence, and the execution of a mutually satisfactory definitive agreement.

"This acquisition is of important strategic value to us in that it significantly broadens our market penetration in both New York and New England and complements our existing operations there," commented Harleysville Group chairman of the board and chief executive officer, Bradford W. Mitchell. "We are particularly pleased about expanding our presence in upstate New York, an area which has been traditionally profitable for property and casualty insurers."

The Phoenix General Insurance Co., headquartered in Hartford, Connecticut, operates exclusively in Connecticut through 72 independent insurance agents. In 1989, the company's property and casualty insurance premiums totaled $8.8 million.

The New York Casualty Insurance Co., based in Watertown, N.Y., is represented by 359 independent insurance agents. The company, which operates primarily in New York, reported $23.1 million of property and casualty insurance premiums in 1989.

Harleysville Group Inc. is a regional holding company for four property and casualty insurers whose marketing territory encompasses the entire East Coast. The companies include: Atlantic Insurance Company of Savannah, Harleysville Insurance Company of New Jersey, Huron Insurance Company and Worcester Insurance Company. Harleysville Group also manages the operations of Berkshire Mutual Insurance Group, headquartered in Pittsfield, Mass., the financial results of which are not consolidated into Harleysville Group at the present time. Harleysville Group's net written premiums totalled $300.8 million in 1989, while assets stood at $568.5 million at Dec. 31, 1989.

Harleysville Mutual Insurance Co., founded in 1917, is the controlling stockholder of Harleysville Group Inc. Together, they form one of America's leading regional property and casualty insurance groups. On a combined statutory accounting basis, the property and casualty operations of the Harleysville organization, including Harleysville Mutual, produced direct written premiums of $584 million in 1989, while consolidated assets stood at $1.2 billion at Dec. 31, 1989. Harleysville Mutual also has subsidiaries that specialize in insurance and insurance-related services other than direct property and casualty insurance. These subsidiaries are not part of Harleysville Group Inc. The largest of these companies, Harleysville Life Insurance Co., offers a wide variety of individual and group life insurance products.

SCOTTSDALE, AZ. (JULY 27) PR NEWSWIRE - An incorrect article ran in yesterday's Arizona Daily Sun newspaper in Flagstaff, Ariz., regarding three local gas stations that supposedly received substandard gasoline.

The one station supplied by Giant Refining Co. received properly tested octane fuel with accompanying bills of lading. The gas pumps at the station were improperly labeled, indicating a higher octane fuel than what had been received and documented from Giant.

Giant Refining Co., a division of Giant Industries Inc. (NYSE: GI), did not deliver substandard fuel to any of its customers.

FAIRFAX, VIRGINIA (JULY 27) PR NEWSWIRE - Scottish Heritable Inc. (NASDAQ: SHER) has named two new members to its board of directors.

Gregory J. Bush is a director and president of Linwood Mining and Minerals Corp., a private company in Davenport, Iowa. He is also a director of other closely-held companies.

Peter C. Timms is chief operating officer of Scottish Heritable, Inc. Prior to assuming his current post this year, Timms served as chief executive officer of United Metrology Inc., and chief executive officer of Elbar Industrial PLC in England. His background also includes serving as a management consultant with PA International Consulting Group in the United Kingdom.

"Both men represent highly strategic additions to our company's board of directors," said Neville C. Platt, president and chief executive officer of Scottish Heritable Inc. "Greg Bush has been involved in all aspects of the limestone business for more than five years, and has a very sound knowledge of the industry and its practices. Peter Timms' broad management expertise is proving invaluable in our efforts to improve our company's overall performance."

Headquartered in Fairfax, Scottish Heritable Inc. operates chemical lime and limestone subsidiaries in Arkansas, Pennsylvania, Texas and Virginia. The Scottish Heritable Trust PLC of York, England owns 50.02 percent of Scottish Heritable Inc.'s stock. The Scottish Heritable Trust PLC has a broad range of international business interests, including oriental carpets and homebuilding, as well as domestic engineering and manufacturing operations.

DALLAS (JULY 27) PR NEWSWIRE - Dallas-based United Medicorp Inc. (NASDAQ: UMCI) announced today the sale of two million shares of common stock at $5.00 per share in an underwritten public offering managed by Eppler, Guerin and Turner Inc. Of the two million shares sold, 1,850,000 shares are being sold by the company and 150,000 shares are being sold by certain selling stockholders. The net proceeds to the company will be used to repay short-term indebtedness, provide funding in connection with the company's advance funding services,

repurchase certain shares from a stockholder and provide working capital. The offering is expected to close on or about Aug. 3, 1990.

The company provides medical insurance claims management and advance funding services to health care providers. The company employs proprietary electronic and computer technologies to address the claims management and cash flow needs of its customers, who are primarily hospitals, medical clinics and physicians.

#90208p9673 07/27/1990 ~PR Newswire

BRENTWOOD, TN (JUNE 27) PR NEWSWIRE - United Cities Gas Co., (NASDAQ: UCIT), the Nashville area-based natural and propane gas distributor, announced today that its six-months earnings continue to trail last year's earnings for the same period.

Gene C. Koonce, company president, announced common stock earnings of $3,157,000 or $.44 per common share on revenues of $128,428,000. The earnings represent a 34 percent decrease over the same period in 1989 when the company reported common stock earnings of $4,787,000 or $.80 per common share on revenues of $104,435,000.

"Six-month earnings are in line with our expectations following our unusually warm first quarter," said Koonce. "The weather throughout our service area was approximately 25 percent warmer than normal during the first six months of 1990, and our earnings certainly reflect the role that weather can play."

Koonce pointed out that the seasonal nature of the natural gas business normally results in a loss for both the 2nd and 3rd quarters, causing

industry analysts to focus on "trailing twelve-month results" rather than any one quarter. For the twelve months ended June 30, 1990, United Cities' common stock earnings totaled $8,377,000 or $1.17 per common share compared to $5,740,000 or $.99 per share for the same period in 1989.

Koonce also announced that the company's board of directors had declared a dividend of $.23 per common share to shareholders of record August 31, 1990, payable September 15, 1990.

United Cities Gas Company distributes natural and propane gas to approximately 290,000 customers in parts of eleven states. The company is also involved in other energy-related businesses.

#90208p9674 07/27/1990 ~PR Newswire

TEMPE, AZ (JULY 27) PR NEWSWIRE - Symbion Inc. (NASDAQ: SYMB) announced today its results of operations for the second quarter ended June 30, 1990. Largely as a result of the U.S. Food and Drug Administration's ("FDA") withdrawal of the Investigational Device Exemptions ("IDEs") for Symbion's Total Artificial Heart and Acute Ventricular Assist devices,

second quarter sales in 1990 were down significantly from the comparable period of the prior year.

The company has not sold any of these products (domestically or internationally) during 1990, and second quarter sales for 1990 were $195,000, as compared to sales of $938,000 during the second quarter of 1989.

As a result of the removal of the aforementioned IDEs, Symbion's sales in the first half of 1990 consisted of MITROFLOW valves, which currently are being sold only to customers outside of the United States. The company voluntarily suspended its IDE studies on MITROFLOW valves in the United States in May 1990, while it reevaluates all of its clinical studies.

The company incurred a net loss of $269,000 in the second quarter of 1990, as compared to net income of $5.7 million in the comparable period of the prior year, which resulted from the $5.8 million gain realized on the sale of Symbion's centrifugal pump technology to St. Jude Medical.

On an operating basis (before interest income and the gains realized on the sale of assets), the company recognized a $602,000 loss in the current year quarter, as compared to a $274,000 loss in the prior year period.

In addition to the reduced level of sales, the increased operating loss for the second quarter of 1990 also reflected expenditures relating to FDA regulatory matters.

NEW ORLEANS (JULY 27) PR NEWSWIRE - Expanded responsibilities for four

senior executives, including the creation of new positions in a consolidated operations function, were announced today by Entergy Corp. (NYSE: ETR) as part of a strategic management restructuring.

The officers and their new positions are: -- Jack L. King, executive vice president of operations for Entergy Services Inc.;

-- Donald Hunter, senior vice president and fossil operations officer for Entergy Services Inc.;

-- Jerry D. Jackson, executive vice president of finance and external affairs for Entergy Corp. and Entergy Services Inc.; and,

-- Donald E. Meiners, president and chief operating officer of Louisiana Power & Light Co. and New Orleans Public Service Inc.

The King and Jackson appointments are effective Aug. 1; Hunter and Meiners will assume their new positions on Oct. 1.

Jackson will also serve temporarily as chief financial officer of Entergy Corp., succeeding John L. Cowan who announced his resignation as CFO effective July 31 to become executive advisor. As executive vice president Jackson will retain overall responsibility for the financial area once a search for Cowan's successor as CFO is concluded.

ENCINITAS, CA (JULY 27) PR NEWSWIRE - SDN Bancorp (OTC "Pink Sheets"), holding company for San Dieguito National Bank, reported net earnings of $267,000 for the first six months of 1990, compared to $294,000 the previous year. The 1989 net earnings reflect a $120,000 tax benefit as a result of utilization of loss carryforwards. Earnings before income taxes showed a significant increase of 41.6 percent to $419,000 for the first six months of 1990, compared to $296,000 for 1989.

Total assets were $76.7 million at June 30, 1990, compared to $72.9 million at Dec. 31, 1989, and $65.5 million at June 30, 1989.

"The earnings for the first six months of 1990 show great progress compared to the first six months of 1989," said Paul E. Schedler, president. "Even with a 17 percent growth in assets compared to a year ago, San Dieguito National Bank still has a strong primary capital ratio in excess of 7 percent."

Net loans continue to increase to $59.1 million at June 30, 1990, compared to $53.7 million at Dec. 31, 1989, and $50.5 million at June 30, 1989. Total deposits were $71 million at June 30, 1990, compared to $67.4 million at Dec. 31, 1989, and $61 million at June 30, 1989.

San Dieguito National Bank is an independent community bank in the North Coastal area of San Diego County. The bank, organized by local business men and women almost 10 years ago, is headquartered in Encinitas with an office in La Costa, Calif. Just recently, the bank received approval to open a full-service office in the downtown area of Carlsbad, Calif.

#90208p9686 07/27/1990 ~PR Newswire

SEATTLE (JULY 27) PR NEWSWIRE - KLM Royal Dutch Airlines today ordered two Boeing 747-400 freighters and took options on two more of the latest new-technology aircraft, Boeing Commercial Airplane Group confirmed today. The order for the two firm aircraft is valued at about $325 million.

KLM became the first European carrier to operate the 747-400 in June 1989 and will be one of the first airlines in the world to receive the new type of freighter.

With the 747-400F in its fleet, KLM will operate all three versions of the -400: the standard passenger model, the combi version -- for the transportation of both passengers and freight on the main deck -- and the freighter. Because of its commonality with the other -400 derivatives, the freighter will fit easily into KLM's 747-400 fleet.

Including today's announcement, KLM has ordered 17 of the -400s. Of these, 10 are combis, five are passenger versions and two are freighters. Three passenger versions and five combis have been delivered.

At today's contract signing ceremony, Jacques Ancher, executive vice president of KLM's cargo division said, "Our customers demand from KLM dedication, commitment and continuity as a leading cargo carrier. The new 747-400 freighter will, together with our combis, form an integral part of this service to these customers."

Richard R. Albrecht, Boeing Commercial Airplane Group executive vice president said, "KLM has a history of nearly 20 years as a 747 operator. They are a leader in developing the 747 air cargo market."

The freighters will be powered by General Electric CF6-80C2-B1F engines rated at 57,900 pounds of thrust each. They will give the 747-400F the

capability of carrying up to 44,000 pounds (20,000 kg) more payload than today's 747-200F at longer ranges -- up to 6,000 miles (9,655 km).

The 747-400F, launched in September 1989, features the same wing-to-body fairing, extended wing span, distinctive six-foot-high (1.8 m) winglets and digital, two-crew flight deck as the 747-400 passenger model. Because it carries no passengers, the -400F has the shorter upper deck of the 747-200 freighter.

Today's announcements brings firm orders for the 747-400 to 340 of which 80 have been delivered to 18 customers. Year-to-date orders for all Boeing jetliners have reached 251 with an approximate value of $23.9 billion.

#90208p9688 07/27/1990 ~PR Newswire

PITTSBURGH (JULY 27) PR NEWSWIRE - H.H. Robertson Co. (NYSE: RHH) today announced that for the second quarter of 1990, the company had a net loss of $2,420,000 or $0.39 per share on revenues of $126,129,000. This compares to 1989 second quarter net income of $1,044,000 or $0.16 per share on revenues of $123,300,000.

During the first six months of 1990, H.H. Robertson incurred a net loss of $8,388,000 or $1.34 per share compared with a net loss in the first half of 1989 of $3,396,000 or $0.55 per share. Revenues for the first two quarters of 1990 were $233,854,000 compared with $232,533,000 for the same period in 1989.

Results for both the second quarter and first half of 1990 are "below expectations," according to Jack Hatcher, chairman and chief executive officer.

"The non-residential building materials business is historically in its cyclical low during the first part of each year," Hatcher noted. "In the second quarter, this condition was aggravated by unexpected delays at several customer job sites, preventing delivery of products as scheduled and slowing production at several of our manufacturing facilities.

"In addition, second quarter revenues reflected an increase in the level of lower-margin installation work, resulting in reduced overall gross profit margins." Hatcher noted that the company anticipates improved results during the second half of 1990.

At the end of June, H.H. Robertson's backlog of uncompleted orders was $267 million. This compares with $258 million at the end of March.

#90208p9695 07/27/1990 ~PR Newswire

HOUSTON (JULY 27) PR NEWSWIRE - LL&E Royalty Trust (NYSE: LRT) announced today that its monthly distribution to unit holders will be made on Aug. 16, 1990 to unit holders of record on Aug. 6, 1990. This distribution represents amounts payable to the trust with respect to production for the month of May 1990.

The total amount of the July distribution will be $758,994 or approximately $.03996 per unit. Due to the nature and timing of other operating and capital projects along with monthly production fluctuations, this distribution is not necessarily indicative of future monthly distributions.

As previously announced, the working interest owner has begun to escrow amounts for the Fort Worth Basin property in connection with the issue of recapture of intangible drilling and development costs under Section 1254 of the Internal Revenue Code. The trust's interest in the amount escrowed from the current month's distribution and the cumulative balance of such are $886.64 and $509,795 respectively. As stated last month, pending the possible appeal by the IRS of the previously announced favorable ruling rendered by the United States Tax Court on the Section 1254 issue, the working interest owner has made no decision on whether and when these amounts will be released from escrow.

The working interest owner has determined under the terms of the trust documents that it is eligilbe to escrow funds from all trust properties for the 1254 recapture issue. However, it has advised the trustee that it does not intend to exercise its rights to escrow funds, other than for the

Fort Worth Basin, for this issue for the August 1990 distribution. However, the working interest owner intends to continue to monitor its estimates of relevant factors in order to evaluate the necessity of escrowing funds for this issue on an ongoing basis. The working interest owner is under no obligation to give any advance notice to the trustee or the unit holders in the event it determines that funds should be escrowed. If the working interest owner does begin to escrow such funds with respect to the productive properties, other than Fort Worth Basin, the effect on royalties paid to the trust would be significant, and in certain circumstances could eliminate distributions for a period of time.

#90208p9697 07/27/1990 ~PR Newswire

CLARENDON HILLS, IL (JULY 27) PR NEWSWIRE - MAF Bancorp, Inc. (NASDAQ-NMS: MAFB), the holding company of Mid America Federal Savings Bank, reported that earnings for the fourth quarter ended June 30, 1990, increased 8 percent from their level of the same period a year ago. For the 1990 fourth quarter, net income was $1.91 million, or $.54 per share, compared to $1.76 million for the 1989 fourth quarter. Earnings per share for the prior-year period is not meaningful because the bank did not complete its conversion from mutual to stock form of ownership until January 1990.

The improvement in fourth-quarter earnings resulted principally from an increase in servicing and other product fee income, offset in part by a small percentage decline in net interest income and an unrealized loss recognized on an investment security held for sale. The improvement in servicing fee income, which totalled $845,000 in the current quarter compared to $520,000 in the fiscal 1989 fourth quarter, reflects the continued growth in the bank's portfolio of loans serviced for others, a consistent component of Mid America's core earnings. Loans serviced for others increased from $729 million at June 30, 1989, to $869.5 million at June 30, 1990. Other non-interest income also increased, due in part to fee increases on customer products and services which were implemented during the current quarter.

Net interest income after provision for loan losses for the 1990 fourth quarter declined to $6.9 million compared to $7.3 million for the year-earlier period. The decline was generally attributable to a decline in the average yield on interest earning assets offset in part by a decline in the bank's average cost of funds. Although down from the prior year, net interest income for the current quarter was consistent with the fiscal 1990 third quarter level and up by 9.7 percent and 7 percent from the fiscal 1990 first- and second-quarter levels, respectively.

Income from real estate operations remained relatively stable at $958,000 in the fiscal 1990 fourth quarter compared to $1 million in the year-earlier period. The sale of an 80-acre unimproved parcel of land in Naperville, Ill., generated a $530,000 pre-tax gain during the current-year quarter. In addition, the bank disposed of a $2 million commercial parcel of real estate owned during the current-year quarter at a pre-tax gain of $140,000 included in other income.

Net income for the fiscal year ended June 30, 1990, was $5 million, or $1.44 per share, compared to $8.6 million for the prior fiscal year. Earnings per share for fiscal 1989 is not meaningful because the bank's conversion was not completed until fiscal 1990. The decline in annual earnings resulted primarily from various non-recurring factors affecting non-interest income in both the prior year and the current year. The prior-year results include a $2.5 million gain on the sale of a shopping center held for investment while the current year reflects $2 million in losses on investment securities which were offset in part by a $946,000 gain on the sale of the bank's credit card portfolio. Despite the securities losses reflected in the fiscal 1990 results, asset quality continues to be very good. The ratio of non-performing assets to total assets was .73 percent as of June 30, 1990.

Net interest income after provision for loan losses totalled $26.6 million for fiscal 1990 compared with $26.7 million in the year-earlier period. This stability was due to an improvement in net average interest earning assets as a result of the stock conversion proceeds, offset by the absence of risk-controlled arbitrage activity as compared to the substantial level of this activity in 1989. Non interest expense increased only 1.6 percent for fiscal 1990 due to a significant decrease in data processing costs.

At June 30, 1990, the company had total assets of $1.60 billion, up from $1.54 billion at fiscal year ended June 30, 1989. Deposits increased to $1.21 billion at June 30, 1990, from $1.16 billion at year end 1989. Stockholders' equity, all of which is tangible capital, improved to $54.4 million at June 30, 1990, from $25 million at June 30, 1989. The company's book value per share was $15.43 at June 30, 1990.

Mid America Federal Savings Bank is a federally chartered stock savings bank. The bank operates a network of 13 retail banking offices primarily in the western suburbs of Chicago.

#90208p9699 07/27/1990 ~PR Newswire

CHICAGO (JULY 27) PR NEWSWIRE - Peoples Energy Corporation (NYSE: PGL) today reported higher third quarter earnings, reflecting a cost-recovery payment from a mandated low-income customer assistance program, but results for the company's first nine months declined from levels of a year ago.

The Chicago-based parent for two natural gas utilities said consolidated net income for the third fiscal quarter of 1990 -- the three months ended June 30 -- amounted to $8.5 million, compared with $5.5 million in the year-earlier period. On a per-share basis, earnings were 26 cents in the most recent quarter, against 17 cents a year ago.

Eugene A. Tracy, chairman and chief executive officer of Peoples Energy, explained that the higher numbers reflect a reimbursement for the shortfall in revenues a subsidiary had incurred over a two-year period under a state low-income customer assistance program that ended last fall. The subsidiary, Peoples Gas, received the cost-recovery payment in June from the State of Illinois.

Absent this payment, Tracy noted, earnings for the current quarter would have shown a loss of three cents per share, mainly due to lower gas deliveries, higher operating expenses, and lower interest income.

Net income for the first nine months of this year dropped to $86.8 million or $2.66 per share. This compares with $98.6 million, or $3.03 a share, for the comparable period ended last year.

For the 12-month periods ended June 30, net income this year amounted to $75.8 million, or $2.32 per share. This compares with last year's results of $82.6 million, or $2.54.

Figures for both prior periods include the effect of an accounting change that was made in 1989 to help the utilities match their revenues and costs more closely. Minus this change, earnings for last year's nine-month period would have been $88.9 million, or $2.73 per share. If the accounting change had been made before the year-ago period, earnings for the prior 12 months would have been $73.3 million, or $2.25 a share.

In addition to the accounting change, warmer weather, increased operating expenses, and lower interest income were the principal negatives in the current nine- and 12-month comparisons. These more than offset the impact of the state's reimbursement, the company said.

Operating revenues for all three 1990 periods showed relatively little change over levels of a year ago.

PEOPLES ENERGY CORPORATION

Financial Highlights

Third Quarter	Three Months Ended June 30, 1990	1989
Revenues	$ 203,167,000	$ 201,803,000

#90208p9701 07/27/1990 ~PR Newswire

SAN DIEGO (JULY 27) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced revenues of $5.2 million and earnings of $140,000, or 2 cents per share, for its first quarter ended July 1, 1990. For the comparable period of the prior fiscal year, IRT reported revenues of $5.1 million and net income of $437,000, or 8 cents per share, including $50,000 of other income. IRT's backlog at the end of the first quarter of fiscal 1991 was $2,453,000, compared with $5,541,000 at the same point in the previous fiscal year.

The company said that, while sales and net income were on budget, reported net income was below that of the previous year because of increased expenditures relating to expanded international sales and marketing efforts and product research and development. "We are pleased with the

first quarter's results," said John W. Battin, president and chief executive officer. "Although delays in award of certain large orders have eroded current backlog, we're hopeful that our increased worldwide marketing and sales efforts and newly introduced X-ray systems will produce increased order volume and revenues as the year progresses."

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace, and defense applications. IRT also operates a commercial radiation processing facility that provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

KANSAS CITY, MO (JULY 27) PR NEWSWIRE - Bo Jackson has added one more item to the list of things he knows: sports medicine. And that spells good news for Cramer Products, Inc.

America's best known two-sport athlete and the Kansas City area based sports medicine manufacturer today announced a partnership to develop and market Bo Med, a complete line of sports medicine products for the retail consumer. Jackson signed the contract with Cramer at a news conference today.

Cramer Products, based in Gardner, Kan., is a 73-year-old national manufacturer of sports medicine products for professional and amateur teams.

"We are enthusiastic at the prospect of teaming up with a super athlete like Bo Jackson," said Mike Vineyard, president of Cramer Products. "The combination of Cramer, with our reputation and commitment to quality products, and Bo, with his enormous athletic talents and marketing presence, creates a special opportunity for both of us."

Jackson views the partnership as an opportunity to represent a premium line of sports medicine products available to everyone. Cramer's products are already well known to high school, college, and professional athletes around the country. Bo Med will be Cramer's first major entry into the general retail market.

"As an athlete, I know the need for good products to prevent or treat sports injuries," said Jackson. "Bo Med will give the weekend athlete the same kind of products the pros use in the training room. I've been around Cramer products my whole career and I'm proud to be working with them now."

Cramer officials and Jackson both see an increasing need for a complete line of consumer products. In the past, consumers have had limited access to sports medicine products. Cramer and Bo Jackson intend to redefine the category.

"The boom in fitness and sports activities continues at a record pace," said Vineyard. "That means more injuries and a need for products that will treat or prevent them. Bo's line of products will feature neoprene braces and supports, analgesics, tape, foot care products, cold packs and much more. It will be everything a person will need."

The line will feature 19 protective, preventive and treatment aids. Bo Med will initially be sold through sporting goods stores, retail sporting goods departments and other retail outlets. It is scheduled to be on store shelves by mid-October 1990.

CADILLAC, MI (JULY 27) PR NEWSWIRE - George R. Kempton, chairman of the board and chief executive officer of Kysor Industrial Corporation (NYSE: KZ) announced the following action taken at the board of directors meeting held today, Friday, July 27:

DIVIDEND ANNOUNCEMENT -- The board of directors approved the payment of the regular quarterly dividend of $.15 per share, payable Oct. 25, 1990, on stock of record Oct. 10, 1990.

FINANCIAL INFORMATION - Quarter and six months ended June 30, 1990 -- Sales and revenues for the quarter ended June 30, 1990, were $60.0 million -- 8 percent below last year, while earnings applicable to common stock were $1.6 million, equating to primary earnings per share of $.28.

For the six-month period ended June 30, 1990, sales and revenues were a record $119.3 million -- 3 percent below last year. Earnings applicable to common stock reported for the six-month period of $3.0 million were up 38 percent from 1989 and equated to $.52 per share -- up 58 percent from $.33 per share a year ago.

Commercial product sales of $73.1 million were 2 percent above last year

with product sales to supermarkets and convenience stores up 9 percent. Transportation product sales for the six months of $44.4 million were 13 percent below last year.

Prospects for the second half of 1990 are viewed with a certain degree of caution. Although current backlogs are above a year ago, these orders may be reduced if interest rates do not moderate and the softness in the domestic economy continues to deepen. Kysor continues to expect that 1990 will be a year of improved operating performance.

Detailed financial information for the six months and second quarter is as follows:

VALDESE, NC (JULY 27) PR NEWSWIRE - ALBA-WALDENSIAN, INC. (AMEX: AWS), a diversified knitwear producer, has announced net earnings of $348,269 on sales of $10,627,569 for the second quarter ending June 30, 1990. This

compares to earnings of $391,059 on sales of $11,922,587 in the same quarter a year ago.

Year to date earnings are $307,458 on sales of $20,679,312 compared to earnings of $220,927 on sales of $22,860,015 in the same period a year ago.

"The Company continues to perform well compared to our plan and to last year. Year to date net profits were 39 percent over the same six month period last year in spite of having to take a $293,000 write-off as a result of the Ames Corporation going into Chapter 11. We are optimistic about 1990 and thus far are particularly pleased with the performance of our branded products and of our Health Products and Telemarketing businesses", said William F. Karnbach, President and CEO.

ALBA-WALDENSIAN, INC. manufactures women's and men's hosiery, women's intimate apparel, and medical specialty products. The Company presently employs approximately 1,000 employees in six locations in Valdese, NC and in Chilhowie, VA.

#90208p9727 07/27/1990 ~PR Newswire

WASHINGTON (JULY 27) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Guaranty Federal Savings Bank, Fayetteville, N.C., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Guaranty Savings Bank, F.S.B., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the management of the Resolution Trust Corporation.

The receivership did not result in any interruption of Guaranty's day-to-day operations. The institution and its three branches located in Fairmont, St. Pauls and Hope Mills will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Guaranty was operating in an unsafe and unsound condition in that it had insufficient capital, with no prospect of replenishment without federal assistance.

Guaranty's condition is due primarily to poor asset quality, a high cost of funds and $5.7 million in goodwill written off in December 1988. The institution has delinquent loans and repossessions totaling $5 million, or 9 percent of assets, as well as $7.5 million in total troubled assets.

Guaranty is insolvent in that it has negative tangible, core and risk-based capital.

Guaranty was a federally chartered stock association. Shareholders will retain no interest in the new institution.

As of March 31, 1990, Guaranty reported assets of $56.1 million, liabilities of $58.5 million and tangible capital of negative $2.66 million, for a tangible capital-to-assets ratio of negative 4.78 percent.

#90208p9728 07/27/1990 ~PR Newswire

LA JOLLA, Calif. (JULY 27) PR NEWSWIRE - Intermark Inc. (AMEX: IMI) today reported results of operations for its first fiscal quarter ended June 30, 1990. Although revenues were up 21 percent over the prior year, the Company reported a net loss of $6.1 million, or $.67 per share, compared to net income of $15.9 million, or $1.74 per share, in the first quarter of the prior year.

Intermark's results include those of its 51.6 percent controlled subsidiary Triton Group Ltd. (NYSE: TGL), which was consolidated retroactive to April 1, 1989. Prior year amounts have been restated to include Triton. The current quarter loss is primarily attributable to Triton, which previously reported a first quarter loss of $12.8 million caused by writedowns of marketable securities, early stage losses at its recently acquired Partner Companies Western Sizzlin and Liquor Barn and only a minimal return on its investment in Fuqua Industries.

Revenues for the quarter amounted to $290 million, up from $241 million in the prior year. The increase reflects the acquisition of Liquor Barn by Triton Group in October 1989, revenue growth of 22 percent at Pier 1 Imports and a significant property sale at Mission West Properties.

Results for the quarter include an extraordinary benefit of $1.2 million, or $.13 per share, relating to the utilization by Sunbelt Nursery Group of its tax loss carryforward. On a consolidated basis, income taxes amounted to $6.4 million, despite a pretax loss of $595,000. Intermark explained that this unusual tax relationship resulted from inability to offset Partner Company profits and losses for federal income tax purposes.

In the first quarter of the prior year, net income also included $6.4 million, or $.70 per share, related to the cumulative effect of a change

in the method of accounting for stock sales by subsidiaries, and $9.2 million representing income recognized by Intermark as a result of Pier 1's conversion of its 6-7/8 percent convertible debentures into common stock. The prior year also included a loss of $172,000, or $.02 per share relating to the operations of Munson Sporting Goods which was sold in February 1990.

Commenting on the results, Charles R. Scott, Chairman and Chief Executive Officer, stated "Although the quarterly loss was disappointing, we are very pleased by the dramatic turnaround at Sunbelt Nursery Group and the profit recovery at Fuqua Industries. Much of the first quarter loss was attributable to the writedown of securities at Triton, which we believe to be the last of such losses. We continue to be concerned about the weakness of the general economy and are working closely with our Partner Companies as they adjust expense levels to maintain profitability at lower volume levels."

Intermark is an operating/holding company whose business is to own control of and add value to well-established mid-sized American growth companies operating in broadly diverse industries. Each of these "Partner Companies" is autonomously managed and is a leader in its own market niche or industry.

Intermark and Triton have entered into an Agreement and Plan of Merger and Reorganization calling for the combination of the two companies. In the tax-free reorganization, stockholders of Triton will receive 1.4 shares of Intermark Common Stock for each share held of Triton Common Stock. Shareholder meetings of the two companies to vote on the proposed merger will be held on August 30, 1990.

#90208p9732 07/27/1990 ~PR Newswire
ST. LOUIS (JULY 27) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today announced two executive appointments: Jim Dorrenbacher, formerly president-McDonnell Douglas Space Systems Co., was named senior vice president-group executive, responsible for McDonnell Douglas' non-aerospace operations. Among his duties will be those presently under the responsibility of James T. McMillan, who will retire Aug. 31.

In addition, Kenneth A. Francis, 56, formerly executive vice president-McDonnell Douglas Space Systems, was named president of that company. Both promotions are effective Sept. 1.

Dorrenbacher, 62, will become chairman of the boards of four McDonnell Douglas complementary businesses, positions now held by McMillan. The businesses are McDonnell Douglas Financial Services Corp., McDonnell Douglas Realty Co., McDonnell Douglas Travel Co., and McDonnell Douglas Technical Services Co.

In addition, McDonnell Douglas' two computer systems businesses -- McDonnell Douglas Systems Integration Co. and McDonnell Douglas Information Systems International -- will now report to Dorrenbacher. In addition, Dorrenbacher will become president of McDonnell Douglas Employees' Community Fund-West, replacing McMillan in that role.

McMillan began his career with McDonnell Douglas in 1954 as an attorney with Douglas Aircraft Co. In 1968, he founded McDonnell Douglas Finance Corp. and transformed it from a small in-house provider of financing for the purchase of McDonnell Douglas commercial jets into a diversified finance and leasing company with more than $3 billion in assets and more than $60 million in earnings. He will continue to service as chairman of the board for Irish Aerospace Ltd. and will be a member of the boards of McDonnell Douglas Finance and McDonnell Douglas Realty.

Dorrenbacher joined McDonnell Douglas in 1950 as a field group engineer for Douglas Aircraft Co. In 1962, he was named director-manned spacecraft programs, and in 1965 he became vice president-advanced systems and technology. Dorrenbacher became vice president-general manager of McDonnell Douglas Astronautics Co.'s Huntington Beach, Calif., operation in 1979, and in 1987 he was named the company's executive vice president. In 1988, Dorrenbacher became president of McDonnell Douglas Space Systems.

Francis, joined McDonnell Douglas in 1955, soon after receiving an electrical engineering degree at Valparaiso University. In his 35 years with McDonnell Douglas, Francis has held positions of ever increasing responsibility in engineering, business and management. He has held many positions in missiles, space, commercial aircraft and corporate office.

TULSA, OK (JULY 27) PR NEWSWIRE - On July 20, 1990, Florafax International Inc. (NASDAQ: FIIF) (the "company") was served with an action filed on July 17, 1990, by Bellerose Floral Inc., an affiliate of 1-800-FLOWERS Inc., in the United States District Court for the Eastern District of New York, alleging breach of a communication services contract

and seeking $12.5 million in alleged actual damages, punitive damages and costs. These communication services were subcontracted by the company to GTE Market Resources Inc. with the knowledge and prior consent of Plaintiff. The company intends to defend vigorously the New York action.

The New York action follows the filing by the company of a $218,000 collection case against the Plaintiff in Tulsa on July 9, 1990. The Tulsa action also sought a declaratory judgment on behalf of the company that GTE is contractually obligated to indemnify the company for any damages suffered by Plaintiff arising out of GTE's communication service agreement with the company. In addition, the company intends to pursue its own claim against GTE for damages suffered by the company, including the loss of Plaintiff's business, by reason of GTE's failure to provide communication services in accordance with its obligations under the GTE/Florafax agreement.

Florafax is headquartered in Tulsa and provides a nationwide wire service and related services to its member florists. Its stock is traded over the counter on the NASDAQ, symbol FIIF.

#90208p9746 07/27/1990 ~PR Newswire

RALEIGH, N.C. (JULY 27) PR NEWSWIRE - Microwave Laboratories, Inc. (MLI) (NASDAQ: MWAV) announced today that sales for the fourth quarter and year ended April 30, 1990 amounted to $347,484 and $2,696,717 respectively. This is a decrease of 9.8 percent and 39.6 percent over sales of $385,048 and $4,463,451 respectively for the comparable periods a year ago.

Operations for the fourth quarter resulted in a loss of $(710,579) or $(0.27) per share as compared to a loss of $(2,853,021) or $(1.06) per share for the year ago period. Operations resulted in a loss of ($2,548,063) or $(0.94) per share for the year ended April 30, 1990 as compared to a loss of $(4,806,556) or $(1.78) per share for the year ended April 30, 1989. Research and development expenses for the current year amounted to $1,705,825 as compared to $4,213,259 for the prior year, a decrease of 59.5 percent. Selling, general, and administrative expenses for the current year amounted to $981,927 as compared to $1,161,192 for the prior year, a decrease of 15.4 percent.

The company stated that losses in fiscal years 1989 and 1990 were a result of a decline in revenues attributable to the completion of several contracts for the manufacture of traveling wave tubes, which had provided the majority of sales and revenue in previous years. Along with declines in revenue, losses reflect the continued expenditures associated with the delays in completing development of new products.

The company further stated that its T-1062 traveling wave tube has completed all government required life and environmental qualification testing. The successful completion of qualification is still dependant, however, upon the approval by the U.S. government of the first article test report. The company currently has a contract for approximately $4.4 million to manufacture the T-1062 traveling wave tube for sale to the Navy.

Previously, the company had announced that qualification testing a T-1073 traveling wave tube began on June 18, 1990. The qualification tests include a 2000 hour life test and various environmental tests. The earliest life testing could be completed on the T-1073 tube is October, 1990. An additional T-1073 tube is currently being subjected to the required environmental tests. To date, the T-1073 has passed the environmental tests which have been conducted. The company has contracts totalling approximately $9.3 million to manufacture the T-1073 traveling wave tube.

NEW HAVEN, Conn. (JULY 27) PR NEWSWIRE - The board of directors of First Constitution Financial Corporation (NASDAQ: FCON) unanimously elected John J. Crawford to serve as president and chief executive officer of both the company an its subsidiary, First Constitution Bank, according to Robert F. Carney, chairman of the board.

Crawford has been serving in these capacities on a temporary basis for the past four months, since his precedessor, Walter R. Miller Jr., relinquished the responsibilities in early April.

"The board concluded that Mr. Crawford has demonstrated superior management and leadership abilities in a period of challenging business conditions," Carney said. "Actively involved in all aspects of management he has displayed a fine ability to bring together the seemingly diverse interests of bank customers, shareholders and financial professionals, employees, regulators and community leaders. He goes forward with the full support of all of his fellow board members," Carney emphasized.

A committee of First Constitution's directors considered candidates for the post of chief executive officer for almost four months, according to Marcus R. McCraven, a board member and chairman of the committee. "We reviewed the qualifications of several fine candidates," he said. "But while our deliberations were under way, John Crawford was using his professional background in management, finance and accounting, as well as his skills in human relations, to introduce positive change into First

Constitution's business."

Among other accomplishments, McCraven cited Crawford's implementation of a plan to reorganize management, tightening up reporting lines and focusing attention on workout of non-performing assets; the addition of outside workout teams to assist in collecting on non-performing loans; and direction of a broad review of all areas of expense to reduce future operating costs.

"John Crawford has had to make tough decisions, including the closing of three branch offices and a personnel reduction. His fellow board members were impressed with the way he faced these issues squarely and on a timely basis," McCraven said.

Crawford, 45, previously was a partner in the financial consulting firms of Sachem Consulting and Holt Wexler Crawford & Merchant, and earlier served as executive vice president and chief operating officer of the New Haven Water Company. He began his business career as a budget analyst with Southern New England Telephone Co. A board member at First Constitution since March 1989, he will also continue to serve as chairman of the board of Ansonia Derby Water Company.

First Constitution Bank is a state-chartered, FDIC-insured savings bank with 22 branches in communities in Fairfield and New Haven counties. It employs 450 people and has been serving customers for more than 50 years.

First Constitution Financial Corporation is a publicly owned holding company, with common stock traded on the NASDAQ National Market System.

IRVINE, CA (JULY 27) PR NEWSWIRE - Western Digital Corp. (AMEX: WDC) today announced the appointment of Kathryn A. Braun as executive vice president of all business operations. Previously senior vice president of the company's Storage Products business unit, Braun will continue to report to Roger W. Johnson, chairman, president, and chief executive officer.

An executive with 12 years experience at Western Digital, Braun will be responsible in her new role for product research and development, manufacturing and marketing for the company's two business units, Storage Products and Microcomputer Products. Robert N. Stephens, senior vice president and general manager of the Microcomputer Products group, will report to Braun.

In its recently completed 1990 fiscal year, Western Digital recorded revenue of $1.07 billion on net income of $24.2 million, the first time in the company's 20-year history that it eclipsed the $1 billion revenue mark. Braun has overseen a great deal of that growth by directing the Storage Products unit for the last nine years. In fiscal year 1990, Storage Products accounted for approximately $748 million of the company's 1990 revenue and a majority of its profitability. When Braun joined the Storage group in 1981, its revenues totaled $15 million.

"The appointment of Kathy Braun to this new position assures that Western Digital will have dedicated senior management resources focused on the execution of our proprietary interarchitecture approach to the design of small computer subsystems, involving both our storage and microcomputer products," said Johnson. "This approach has created tremendous opportunities for the corporation, and we look forward to having Kathy apply her strong operating capabilities to these challenges on a cross-business unit basis.

"Kathy's ability to meet and overcome operating issues associated with high rates of technological change and new product introduction, as well as steep production ramps -- all while sustaining solid profitability of the Storage operation -- has been exceptional. She richly deserves this opportunity," Johnson concluded.

Braun joined Western Digital in 1978. She has held a variety of marketing and management positions in her 11 years with the company. Prior to coming to Western Digital, she was with Computer Automation. Braun holds a B.S. degree in biology from Duke University.

Western Digital Corp., headquartered in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductor devices, subsystems, and intelligent disk drives for original equipment

manufacturers and resellers which serve the microcomputer industry.

TALLAHASSEE, FL (JULY 27) PR NEWSWIRE - State Comptroller Gerald Lewis today authorized the U.S. Office of Thrift Supervision to place Professional Savings Bank of Coral Gables in receivership. The Resolution Trust Corporation was immediately appointed receiver of the institution.

Lewis stressed that customers should remain wholly unaffected by today's action and emphasized that there would be no interruption in service. "Deposits up to $100,000 remain fully insured," Lewis said.

Professional operated 13 branches in Dade and Broward Counties. It opened in 1963 as the Dixie National Bank and converted to a state savings and loan in October of 1985.

Professional has approximately $695,604,000 in total assets. As of June 30 1990, total liabilities exceeded total assets by $32,839,000. Regulators attribute the failure primarily to poor real estate and commercial loans made by prior management.

DALLAS (JULY 27) PR NEWSWIRE - Pentad Development Corp., a Dallas based company, announced today a successful completion of the Luckett Billingslea No. 1 well in Madison County, Mississippi.

The well was drilled to a depth of 7100 feet, and produces from the Lower Tuscaloosa formation from 6808 to 6819 feet and from 6822 to 6824 feet. Initial test for the well was 173 b.o./day on a 12/64ths choke.

Company spokesmen said two offsets are planned for the well and should be drilled within the next two months.

The Luckett Billingslea is the first well to be drilled and operated by Pentad in Mississippi even though they have been quite active in other states including Texas, Oklahoma and Wyoming. Pentad owns many undeveloped leases in Mississippi, however.

"With a little time and success, we plan to drill other prospects in Mississippi and the southeast," said Jim McGowen, Pentad's vice president. "We are screening deals and generating new prospects in several areas and Mississippi is one we really feel has the size of reserves and offers the opportunities which are attractive for a company like Pentad."

#90208p9768 07/27/1990 ~PR Newswire

BRYN MAWR, PA. (JULY 27) PR NEWSWIRE - Philadelphia Suburban Corp. (NYSE: PSC) today reported earnings for the second quarter of $1.4 million or $.18 per share, compared to $1.8 million, or $.25 per share reported in the same period in 1989.

For the six months, earnings were $2.9 million, or $.38 per share, compared to earnings of $3 million or $.42 per share in the same period in the prior year.

Revenues for the second quarter totaled $34.4 million, an increase of 4.7 percent compared to the same period in 1989. For the six months, revenues totaled $69.9 million, an increase of 8.6 percent compared to the prior year.

John W. Boyer Jr., president and chairman of PSC, stated that Philadelphia Suburban Water Co.'s income was slightly ahead of the level reported in the first half of 1989 but not as high as expected considering the higher rates which went into effect in late 1989. Water sales were not as strong as anticipated, because rainfall was abundant and frequently occurred on weekends, thereby curtailing normal springtime consumption.

In the second quarter, the nonregulated companies experienced a decline in the results of their operations compared to that reported in the first quarter.

Boyer said that the outlook for the second half would be largely dependent on the occurrence of normally hot, humid summer weather and resultant increased water sales. He also noted that the soft business conditions experienced by most of the nonregulated services segment in the first half might continue throughout the year, due to the nature of the general economy as it relates to PSC's diversified businesses. As a result, PSC's net income in the second half may not equal that reported in 1989.

Philadelphia Suburban Water Co., the company's largest subsidiary, reported on March 30, 1990, that it had filed a request for a 9.7 percent increase in revenues. Boyer said the filing was in response to increased operating expenses and because of costs associated with continuing capital improvements necessary to satisfy the needs of customers in the PSW service territory.

#90208p9770 07/27/1990 ~PR Newswire

TULSA, OK (JULY 27) PR NEWSWIRE - CITGO Petroleum Corp. today reported that Ronald E. Hall, CITGO president and CEO, announced to employees a record high $130.4 million preliminary operating profits for the first half of the year, and second quarter preliminary operating profits of $84.4 million. These are up approximately 32 percent and 16 percent from the comparable amounts for 1989.

"Excellent refining margins were available for the downstream segment of the petroleum industry as crude oil supplies remained in surplus and refined products continued tight due to scheduled and unscheduled refinery shut-downs. These higher margins, coupled with the company's safe, efficient operations and growing long-term relationships with customers, suppliers and employees continue to pay off handsomely," said Hall.

"Company sales of branded products continued good growth patterns led by gasoline sales which increased at a 16 percent rate for the first half of the year," Hall added.

"CITGO expects refining and marketing margins will decline during the third quarter as crude oil producers struggle to better control production and increase prices. Higher costs of raw materials will probably more than offset the supply and demand fundamentals which remain strong for gasoline. Distillate performance, however, could be threatened this winter since product inventories continue to build. Nevertheless, we anticipate good earnings for the third quarter and total year," Hall concluded.

Hall reminded employees that for meaningful year-to-year comparisons, CITGO tracks operating profits, which exclude interest, income taxes, non-cash inventory valuation adjustments and incremental depreciations arising from the company becoming a wholly owned, indirect subsidiary of Petroleos de Venezuela, S.A., in January.

CITGO Petroleum Corp., headquartered in Tulsa, is a privately owned refiner, marketer and transporter of quality petroleum products. CITGO's refining complex at Lake Charles, La., is one of the nation's largest and most efficient, and CITGO branded gasoline is marketed at approximately 9,000 retail outlets located primarily throughout the eastern two-thirds of the United States. The company also markets jet turbine fuel, other light oils, over 300 types and grades of automotive and industrial lubricants, refined waxes and various other petroleum-based products.

#90208p9772 07/27/1990 ~PR Newswire

BOISE, ID (JULY 27) PR NEWSWIRE - Second quarter earnings on common stock announced today by Idaho Power (NYSE: IDA) were $13.1 million, or 39 cents per share, reflecting a return to more normal operations compared to 1989's near banner second quarter of $19.1 million, or 56 cents per share.

For the six months ended June 30, earnings were 85 cents per share, compared with $1.25 per share in 1989. The 1989 figure was the second highest per share showing for a six-month period in Idaho Power's history.

According to Dewey Hammond, chief financial officer, the prime influence on earnings has been this year's mild winter and low snowpack.

"It resulted in streamflows half of normal, limited our supply of low-cost hydroelectricity and caused increased use of more costly coal-fired generation." First-half hydro production was 23 percent below 1989 levels and 35 percent less than normal.

The resulting mix of 55 percent hydro and 45 percent coal generation during the first half of the year compared unfavorably to a normal water year's mix of 73 percent hydro and 27 percent coal during the same period. But the utility limited the impact on operating expenses by combining the flexibility of its thermal operations with purchases of attractively priced surplus energy from other Northwest utilities that are enjoying a hydro-rich year.

Those actions allowed the utility to keep Brownlee reservoir - the largest in the company's system - full as summer's peak demand began.

Because the healthy reserve of hydro will allow flexible use of coal, the company fully expects to have more than adequate energy supplies for customer needs this year.

Besides the unfavorable hydroelectric conditions, Hammond said a large part of the difference between 1989 and 1990 earnings so far can be attributed to warmer than normal weather early this year that reduced energy demand in the company's service area. In early 1989 record-breaking cold weather caused unprecedented demands for energy.

The economic outlook in the company's service territory continues to be bright, according to Hammond. The company experienced a 6,200 customer increase from one year ago for an annual 2.2 percent growth rate, the largest one-year increase in more than 10 years. Nonagricultural employment continues to rise and the company's load growth is climbing at a weather-normalized rate of 2.3 percent annually. Hammond called that rate "manageable and most welcome."

Second quarter operating revenues were $109.4 million compared to $119.1 million in 1989.

BEVERLY HILLS, CA (JULY 27) PR NEWSWIRE - Jerold H. Rubinstein, chairman of the board and chief executive officer of International Cablecasting Technologies Inc. (''ICT''), reported today that the shareholders of ICT had approved the plan of reorganization for the company at a special meeting of shareholders held on July 24, 1990. The reorganization, which will result in a change of sites of ICT from Canada to Delaware, was approved by the unanimous vote of a majority of the shareholders of ICT and by the holders of outstanding options and warrants. The reorganization will be submitted before B.C. Court approval next week and, when approved, is expected to become effective in late summer. A registration statement (Form S-1) related to the transactions has been filed with the U.S. Securities and Exchange Commission (''SEC''). Management plans to initiate the NASDAQ application process in conjunction with these filings. At the meeting, Rubinstein reported to the shareholders that ICT had completed its recent private placement of 3.4 million shares, with aggregate gross proceeds to the company of $7.1 million U.S. The proceeds of the offering will be applied to general corporate purposes and to implement the launch of the premium audio service scheduled for the Fall of 1990.

NEW ORLEANS (JULY 27) PR NEWSWIRE - Entergy Corp.'s (NYSE: ETR) board of directors voted today to increase its common stock repurchase program by one-third, allowing for the repurchase of its common stock at a level equivalent to $200 million per year.

The program had been in existence at a level equivalent to $150 million per year since Nov. 17, 1989. Entergy's board also declared a regular quarterly dividend of 25 cents per common share. The dividend will be payable on Sept. 3, to stockholders of record on Aug. 10, 1990.

In other business, Adm. Kinnaird R. McKee, USN (Ret.), was named today to the board of directors. A 1951 graduate of the U.S. Naval Academy, Adm. McKee, 60, retired from active duty in 1988 as director of Navy Nuclear Propulsion. Adm. McKee took over that position in 1982 upon the retirement of Adm. Hyman Rickover.

Adm. McKee had served on an advisory committee to Entergy Corp.'s Entergy Operations Inc. subsidiary and was named to its board of directors on June 6 of this year. Entergy Operations Inc. is Entergy Corp.'s nuclear management subsidiary.

NEW YORK (JULY 27) PR NEWSWIRE - Aer Lingus, the national airline of Ireland, today reported a net profit of IRL 37 million ($60.85 million) for the year ended March 31. This was down on the previous year (IRL 39 million) but reflects another good year for the Irish carrier.

Highlights of the report include: -- Passengers carried increased by 16 percent to a record 4 million. -- Cargo business was up 11 percent. -- The total number of tourists brought to Ireland reached 972,000 -- an increase of 24 percent.

-- External ancillary activities which include hotels in the U.S., Britain Europe and Ireland, had a net profit of $54.27 million, an increase of 27 percent.

-- Airline related services (maintenance, training, handling) registered an increase of 61 percent to $38.97 million profit.

-- Air transport incurred on operating loss of $17.27 million compared to a profit of $3.92 million the previous year.

Senior vice president-North America John Bastable echoed the chairman, Brian Slowey, when he pointed out the importance of Aer Lingus being a diversified group, as the air transport result compared very poorly to the previous year. "A rising cost trend, particularly in the area of fuel and maintenance, has affected the results of many airlines. The inevitable result of this, together with low fares was a serious fall in financial margins," he said.

Bastable went on to say that the next major development on the Atlantic would be the start-up of Ireland-Los Angeles cargo service in September and passenger flights next May. This new route will be operated by the next addition to the Aer Lingus fleet, long-range B767's.

#90208p9792 07/27/1990 ~PR Newswire

INDIANAPOLIS (JULY 27) PR NEWSWIRE - Merchants National Corporation (NASDAQ: MCHN) has announced that it has agreed to acquire Palmer Bancorp, Inc.

The announcement, that was made in Danville, Ill. and Indianapolis, is Merchants' 22nd announced acquisition.

The agreement, which provides for a purchase price of $122.75 per share, is subject to approval by the shareholders of Palmer Bancorp, Inc. and regulatory agencies. Palmer Bancorp, Inc. is also permitted to pay to shareholders a semi-annual dividend of $2.40 per share, pro- rated to the closing, which is anticipated to occur during the first quarter of next year.

Palmer Bancorp, Inc., whose principal subsidiary is Palmer American National Bank, had total assets of approximately $185 million at June 30, 1990. Palmer American National Bank has two banking locations, in Danville, Ill. In addition, Palmer Bancorp, Inc. is awaiting final regulatory approval of its acquisition of The Citizens State Bank in Williamsport, Ind.

This acquisition of Palmer Bancorp, Inc. is particularly significant in that it will be the first acquisition of an out-of-state bank by Merchants National Corporation. James D. Massey, president and chief operating officer of Merchants National Corporation said, "We are extremely pleased to welcome Palmer Bancorp, Inc. to the growing Merchants National Corporation. This is our initial entry into Illinois and we are pleased to align ourselves with a recognized banking leader having a strong community commitment. Their genuine interest in customer service parallels ours. Palmer Bancorp, Inc. will be an excellent addition to our family."

Tom Crays, chairman of the board of Palmer Bancorp, Inc., said of the agreement, "We are excited about our association with Merchants National Corporation. It has always been our philosophy to remain responsive to the needs of our local community. Our association with Merchants National Corporation will allow us to continue to improve upon our commitment to provide our customers with the same high quality that is synonymous with the Palmer American National Bank name."

Merchants National Corporation, an Indiana multi-bank holding company headquartered in Indianapolis, is the second largest publicly held bank holding company in the state. A network of subsidiary banks serves the banking and financial needs of customers in Indiana and contiguous states. The corporation, through its subsidiaries, offers a broad range of commercial, retail, and mortgage banking services as well as trust and investment services.

MELBOURNE, FL (JULY 27) PR NEWSWIRE - Harris Corporation (NYSE: HRS) was honored Thursday night for its commitment to promoting minority business opportunities by the Greater Florida Minority Development Council.

Harris received "Corporation of the Year" and "CEO of the Year" honors by the Space Coast Chapter of the development council. It is the second year in a row that Harris has been honored by the council.

The awards were presented at the seventh annual Minority Business Enterprise Trade Fair in Orlando, Fla. The conference brings together major corporations and small minority business enterprises and helps them develop mutual minority business opportunities.

Phillip W. Farmer, president of Harris' Electronic Systems Sector, accepted the awards for Harris. "We have set some real goals and challenges for ourselves in the minority development area," said Farmer. "But more than goals, we have people who are committed to carrying out those goals, and we are constantly seeking new ways, new efforts and new techniques for accomplishing them."

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronics systems, semiconductors, communications, and a worldwide office-equipment distribution network.

BLOOMFIELD HILLS, MI (JULY 27) PR NEWSWIRE - PHM Corporation (NYSE: PHM), Bloomfield Hills, announced today its consolidated revenues, income before income taxes, income taxes and net income for the second quarter and six months ended June 30, 1990, and the declaration of its regular quarterly dividend.

For the quarter ended June 30, 1990, PHM's net income was $8,547,000 ($.35 per share), compared with $20,363,000 ($.76 per share), including an extraordinary loss from early extingushment of debt of $3,045,000 ($.11 per share) for the comparable period in 1989.

Sales from homebuilding operations in the second quarter of 1990 increased to $189,432,000, from $180,045,000 in 1989. This resulted primarily from an 8 percent increase in the average unit sales price to $133,000. Pre-tax income from homebuilding operations was $6,297,000 in the second quarter of 1990, compared with $10,136,000 in 1989. Pre- tax income in the second quarter of 1989 included a one-time $3,000,000 land condemnation award ($.11 per share).

During the quarter ended June 30, 1990, net new orders of $211,000,000 (1,604 units) were received, compared with $203,000,000 (1,458 units) during the quarter ended June 30, 1989. Housing unit backlog at June 30, 1990, increased to $335,000,000 (2,254 units) from $275,000,000 (1,907 units) at June 30, 1989.

The Company's financial services subsidiaries (mortgage banking, financing and thrift operations) had pre-tax income of $3,070,000 for the quarter ended June 30, 1990, compared with $9,491,000 for the quarter ended June 30, 1989. Pre-tax income for the second quarter of 1989 included $7,700,000 ($.29 per share) of gains on the sale of mortgage-backed securities related to the early redemption of certain long term debt and the reversal of mortgage foreclosure reserves.

The Board of Directors declared a regular quarterly dividend of $.03 per share on the Company's common stock, payable October 1, 1990, to shareholders of record at the close of business on September 14, 1990.

#90208p9831 07/27/1990 ~PR Newswire

VALLEY FORGE, PA. (JULY 27) PR NEWSWIRE - UGI Corp. (NYSE: UGI) today reported a seasonal loss of $827,000, or 8 cents a share, for the second quarter ended June 30.

This compares with income from continuing operations of $34,000, or a loss of 4 cents a share after preferred dividends, in the same period a year ago.

In last year's second quarter, the Pennsylvania utility and national distributor of propane benefited from income of $4,442,000, or 22 cents a share, principally from the sale of discontinued industrial gases operations, and posted net income of $4,476,000, or 18 cents a share. Second quarter revenue increased to $63,309,000 from $57,498,000.

Income from continuing operations for the six months ended June 30 declined to $18,371,000, or 83 cents a share, from $19,867,000, or 91 cents a share. Net income of $24,068,000, or $1.11 a share, in the prior period included income of $4,201,000, or 20 cents a share, from discontinued operations. First half revenues rose to $185,581,000 from $171,092,000.

For the 12 months ended June 30, income from continuing operations advanced to $30,671,000, or $1.37 a share, from $27,130,000, or $1.21 a share. Net income of $32,331,000, or $1.47 a share, in the prior period included income of $5,201,000, or 26 cents a share, from discontinued operations. Revenues increased to $338,191,000 from $309,431,000.

The per-share results in all periods reflect the company's recent 2-for-1 split of its common stock.

James A. Sutton, chairman and chief executive officer, attributed the second quarter loss from continuing operations to an expected greater seasonal loss from the wholly owned propane business due to its increased size and to higher operating expenses in the Gas Utility Division, as well as increased interest and corporate expenses. The loss was partially offset by interest income from the temporary investment of residual cash proceeds from UGI's sale of industrial gases operations.

Sutton said the reduction in earnings from continuing operations for the six months resulted primarily from lower earnings by the company's propane joint-venture caused principally by warmer first quarter weather across the country and higher operating expenses. This, combined with higher interest expense, more than offset an increased income contribution from the wholly owned propane business and higher interest income, he reported.

#90208p9832 07/27/1990 ~PR Newswire

DALLAS (JULY 27) PR NEWSWIRE - SPI Holding Inc. reports a net loss of $18.1 million for the three months ended June 30, 1990 compared to a net loss of $20.5 million for the same quarter of 1989. For the six months ended June 30, 1990, SPI reports a net loss of $37.1 million as compared to a net loss of $36.4 million for the same period of 1989. A $4 million

extraordinary loss due to the early extinguishment of debt within the three month and six month period ended June 30, 1989 was offset by higher interest expense and depreciation expense for the comparable periods of 1990.

Revenues for the three month period ended June 30, 1990 increased 10 percent to $36.7 million from $33.3 million for the comparable three months of 1989. Revenues for the six months ended June 30, 1990 increased 14 percent to $72.2 million from $63.2 million for the six months ended June 30, 1989. This increase in revenues is primarily due to a 19 percent higher number of hotel rooms producing pay-per-view revenues for the comparable periods. The increase in revenues attributable to the higher number of rooms for the three months ended June 30, 1990 was offset by a lower hotel occupancy level. In addition, for both the three months and the six months ended June 30, 1990, the increase in revenues attributable to the higher number of rooms was offset by a lower level of viewings per occupied room.

#90208p9843 07/27/1990 ~PR Newswire

LOS ANGELES (JULY 27) PR NEWSWIRE - Capital Bank of California today reported second quarter 1990 net income of $389,000, or $.014 per share, compared with $735,000, or $.027 per share, for the second quarter of 1989. Earnings for the six months ended June 30, 1990 were $714,000, or $.026 per share, compared with $1,629,000, or $.059 per share, during the first half of 1989.

"The decline in net income from 1989 can be attributed to an overall increase in expenses in salaries and staffing as well as a doubling of provisions for credit losses," said Daniel M. Holtz, president and chief executive officer. "This increase in provisions was necessitated by the decline in the market value of sub-investment securities and the general softening of the economy."

Although federal tax benefits attributable to operations prior to the 1985 acquisition of the bank cannot be credited to net income, accounting conventions allow the bank to apply the benefit of the net operating loss (NOL) carryforward to the bank's capital accounts. Consequently, shareholders' equity grew by $1,147,000 as a result of the first-half 1990 operating performance.

At mid-year 1990, shareholders' equity stood at $19.7 million compared with $20.4 million a year ago. The bank's primary capital ratio was 7.54 percent at June 30, 1990.

Total assets at June 30, 1990 were $293.8 million, an increase of 10.3 percent from $266.3 million a year ago. Deposits increased to $270.9 million, up 11.0 percent from $244.0 million, and net loans increased to $215.6 million, up 13.4 percent from $190.1 million at June 30, 1989.

Headquartered in Century City, Capital Bank of California has 10 offices in Southern California. The bank is affiliated with Capital Bank in Miami a $1.1 billion-asset institution with 26 South Florida offices and a factoring subsidiary, Capital Factors, Inc. Capital Bank of California also is affiliated with Capital Bank, N.A., a $103 million-asset bank in Washington, D.C.

#90208p9849 07/27/1990 ~PR Newswire

MELVILLE, NY (JULY 27) PR NEWSWIRE - Chyron Corp. (NYSE: CHY) announced today that based on preliminary figures, final quarter shipments were approximately $10 million as against a projected $14 million. While its recently introduced iNFiNiT! graphics generator had received outstanding acceptance in the marketplace, shipments of 100 units in the quarter were 50 units short of its projected production schedule of 150 units. The company believes that a significant part of the shortfall was attributable to working capital pressures which impaired its production schedule. A softness in market conditions accounted for the balance of shortfall.

As previously announced, the company has been in discussion with its two banks, European American Bank (EAB) and Manufacturers Hanover Trust Co. (MHT), with respect to restructuring its loans. In September 1989, the company agreed to grant a security interest in its accounts receivable to both banks. The banks have been in dispute for many months with respect to their sharing of the collateral. The company believes that this impasse has been a significant obstacle to restructuring of both loans and procuring additional financing from MHT, which MHT has indicated it is willing to provide if agreement could be reached with EAB and the company on the originally granted collateral, the collateral for the additional funds and terms of repayment.

In light of the continuing discussions between the company and each of the banks and the company's financial pressures, the company has not made recently due installments of principal and interest. Nevertheless, while fully reserving their rights, neither bank has indicated its intention to call the loans at the present time which loans, as previously announced, have been in technical default since June 30, 1989.

The Chyron Group -- Chyron, DSC, CMX and Aurora -- headquartered in Long

Island, N.Y., employs more than 300 people -- designs, manufactures and markets digital electronic graphics equipment and systems, computer-assisted video, film and audio editing systems, special effects equipment and paint and animation systems for the broadcast television, cable, video production, post-production and industrial markets.

#90208p9850 07/27/1990 ~PR Newswire

WASHINGTON (JULY 27) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Statesman Bank for Savings, FSB, Des Moines, Iowa, in receivership and chartered a new federal mutual institution to take its place.

The new institution, Statesman Federal Savings Bank, will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corporation.

The takeover did not result in any interruption of Statesman's day-to-day operations. The institution and its branches in Iowa and Florida will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Statesman Bank for Savings was operating in an unsafe and unsound condition in that it had substantially insufficient capital, with no prospect of replenishment without federal assistance.

Stateman's condition is due primarily to poor asset quality which caused continued operating losses at the institution. Statesman has also lost several top level officers in the past year.

Statesman was chartered in March 1988, when The Statesman Group, Inc. acquired a troubled Florida thrift, First Federated Savings Bank of North Palm Beach, and three troubled Iowa thrifts -- Perpetual Savings & Loan Association, First Federal Savings Bank and Peoples Federal Savings and Loan, all based in Waterloo, Iowa. Under the terms of the federally assisted transaction, the acquirer received a federal assistance package including cash, a note, yield maintenance and capital loss coverage. The institution was also granted a forbearance to include in its capital supervisory goodwill in accordance with then existing policy.

Statesman is insolvent in that it has negative tangible capital. Statesman

Bank for Savings was a federally chartered stock association. Shareholders will retain no interest in the new institution.

As of March 31, 1990, Statesman Bank for Savings reported assets of $573.8 million, liabilities of $554.5 million and tangible capital of negative $2.7 million, for a tangible capital-to-assets ratio of negative 0.46 percent.

#90208p9857 07/27/1990 ~PR Newswire

EL PASO, Texas (JULY 27) PR NEWSWIRE - El Paso Refinery, L.P. (the "partnership") (NYSE: ELP) announced the declaration of a 75 cents per unit distribution on its cumulative participating convertible preferred units payable Aug. 30, 1990 to record holders as of Aug. 15, 1990.

Net income for the quarter ended June 30, 1990 totaled $3.8 million, or 29 cents per unit, on sales of $67.1 million as compared with net income of its predecessor entities of $4.1 million on sales of $60.4 million for the quarter ended June 30, 1989. A scheduled maintenance turnaround was successfully completed on the refinery's crude, coking and reforming units during early June which reduced refinery production rates during the first half of the month. This turnaround, which occurred during a period of very strong gasoline margins, negatively impacted second quarter results but should improve refinery operations for the remainder of 1990. Refined products sold during the quarter averaged 25,952 barrels per day, an increase of 11.1 percent compared with an average of 23,350 barrels per day in the second quarter of 1989. This increase was attributable to both higher average processing rates and the inclusion of TM&S Oil Company (TM&S) sales beginning June 1, 1990.

The partnership's net income for the six months ended June 30, 1990 was $5.9 million, or 46 cents per unit, on sales of $137 million as compared with predecessor entities' net income for the six months ended June 30, 1989 or $8.1 million on sales of $120.6 million. Refined products sold during the first half of 1990 averaged 27,258 barrels per day, an increase of 5.4 percent compared with an average of 25,871 barrels per day in the first half of 1989.

On Nov. 1, 1989 the partnership assumed the refining operations and assets of El Paso Refining Inc. in connection with the sale to the public of a 43 percent limited partnership interest in the partnership. The partnership raised net proceeds from the offering of approximately $127 million which are being utilized primarily for the expansion of the partnership's El Paso, Texas refinery from 26,000 barrels per day to

55,000 barrels per day. Expansion of the refinery is continuing to progress on schedule with completion of the initial phase anticipated in mid-1991. On May 31, 1990, the partnership concluded the previously announced acquisition of TM&S in exchange for 260,000 newly issued preferred units. TM&S is a multi-brand retailer and wholesaler of fuel and lubricants in the El Paso area.

#90208p9865 07/27/1990 ~PR Newswire

SASKATOON, Saskatchewan (JULY 27) PR NEWSWIRE - Potash Corporation of Saskatchewan Inc. today announced net income of $9.5 million, or $.28 per share, on sales of $84.4 million during the second quarter of 1990. The net income for the first six months was $13.1 million, or $.38 per share, on sales of $133.3 million. Operating income was $14.9 million for the second quarter and $23.7 million for the first half.

In total the company sold 1.8 million tons of potash in the six months ended June 30, 1990, compared to 2.1 million tons during the same period in 1989. The decline was due primarily to the predicted discontinuance of sales to Potash Company of America as shipments to both domestic and offshore customers were up in the second quarter of 1990 compared to the second quarter in 1989.

Tons sold to North American customers through our North American sales network during the second quarter in 1990 were .492 million compared to .481 million in the second quarter of 1989. Sales volumes to offshore customers were .633 million tons compared to .606 million tonnes during the same period in 1989. The shipments to offshore customers during the second quarter of 1990 marked the second highest quarter of export volumes in the history of the company.

A primary factor in the lower first half results is lower prices received by the Company for its products. Lower prices and a strengthening Canadian dollar resulted in a 10 percent decrease in the average unit price realized in the first half of 1990 compared to the first half of 1989. Over 95 percent of the company's sales are in U.S. dollars.

During the first half of 1990 the corporation produced 1.9 million tons compared to 2.6 million tonnes during the same period in 1989. Consistent with the company's long-term strategy of matching production to sales demand, inventory control shutdowns were implemented at three of the four mines the company operates. These shutdowns enabled PCS to match closely first half production with first half sales volumes.

#90208p9871 07/27/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA, (JULY 27) PR NEWSWIRE - North American Metals Corp. (Vancouver: NAM) and Chevron Minerals Ltd. (''Chevron''), its 50 percent joint venture partner at the Golden Bear Mine, today reported preliminary diamond drilling results from surface drilling by Golden Bear Operating Company Limited on the mine-site exploration program.

Hole	Target Structure(x)	From (m)	Core Width (m)	True Width (m)	Grade (opt) Au	Ag
90-135	Bear Main Fault	53.46	0.29	0.24	9.33	12.41
	Internal Silver (hanging wall)	63.94	0.86	0.60	3.77	1.8
	Internal Silver (footwall) plus Footwall Fault	75.64	10.09	5.38	11.97	19.7
90-136	Bear Main Fault plus internal Silver (hanging wall)	44.8	3.05	2.38	9.9	6.7
	Internal Silver (footwall) plus Footwall Fault	58.56	0.53	0.44	0.14	33.3
90-137	Bear Main Fault	67.33	2.91	2.76	2.4	2.0
	Internal Silver (hanging wall) plus Internal Silver (footwall)	76.4	7.12	4.91	14.7	13.02
	Footwall Fault	101.77	0.95	0.36	13.7	20.2
90-138	Bear Main Fault plus internal Silver (hanging wall)	47.85	3.97	3.63	0.4	1.2

All drill holes to date are located above the 1360m and 1400m level portals and have targeted structures immediately parallel to the Bear Main fault which hosts the present and previously reported mineable ore reserves at the mine. The area being targeted with these drill holes is structurally complex; hence the economic significance and continuity of these drill hole intersections has not yet been established and no mineable inventories have been added from these parallel structures at the mine.

To date complete results have been received from 4 holes totalling 401

meters of drilling. The approved surface drilling program is budgeted to include an additional 12 holes and 1800 meters.

CONTACT: Robert T. Boyd, 604-684-8330 or J. Steven McAlpine, VP, 604-684-9648, both of North American Metals Corp.

(JULY 27) UPI - Lawyers for three New York City youths charged in the rape and attempted murder of a Central Park jogger will begin presenting their defense Friday. Prosecutors rested their case Thursday after having 43 people take the witness stand 22 days. Defense attorneys say their toughest task will be combatting the confessions given by the youths.

The lawyer for Washington Mayor Marion Barry charged in court Thursday that Barry was brought down by what he called an government ''assault force'' that targeted black politicians across the nation. R. Kenneth Mundy made the charge during a bench conference the jury was NOT allowed to attend. The F-B-I called the accusation ''unfounded.''

Iraq emerged victorious from the OPEC mid-year conference in Geneva. In exchange for promising NOT to attack Kuwait, Iraq won concessions from both Kuwait and the United Arab Emirates to hold to their oil quotas. And Kuwait also agreed to submit to one-on-one talks with Iraq on Sunday. Iraq claims Kuwait owes it more than two-BILLION dollars for illegally drilling Iraq's oil.

A fiery auto crash involving a car carrier hauling Porsches and Lincoln Continentals left seven people dead Thursday on Interstate 79 in West Virginia. The carrier collided with two moving cars, dislodging one of the autos it was carrying and starting a fire that engulfed all the cars, the truck, a second truck and a tractor.

#90208u0266 07/27/1990 ~United Press International
SUTTON, WV (JULY 27) UPI - A car carrier rammed two cars at a construction site on Interstate 79, touching off a massive fire that

killed eight occupants of the cars and destroyed 13 vehicles, state police said Friday.

None of the victims was identified several hours after the accident Thursday about 62 miles north of Charleston, said state police dispatcher Sue Conley.

State police said the driver of the car hauler apparently went into a restricted section of I-79 and hit two moving cars, causing one of the luxury cars he was hauling to dislodge and flatten one of the cars.

The carrier was hauling Porsches and Lincoln Continentals, police said.

A huge fire enveloped the crash site, destroying the two struck cars, the carrier, eight vehicles aboard it, and two vehicles owned by the West Virginia Division of Highways - a dump truck and a tractor.

Police said the carrier's driver suffered only minor burns in the accident and apparently was the only survivor of the spectacular crash.

It appeared the driver was hauling cars for two, and possibly three, dealerships, but his destination was not determined.

Police believed the victims were riding in cars licensed in New York and West Virginia.

(JULY 27) UPI - Around the world... around the clock... U-P-I brings you the latest news.

Massachusetts Democrat Barney Frank became the second lawmaker to be disciplined for ethics violations in 24 hours. The House yesterday reprimanded Frank for his dealings with a male prostitute. One day earlier the Senate denounced Minnesota Republican David Durenberger for unethical conduct in his personal finances.

Tobacco companies were dealt a blow yesterday in a ruling by the New Jersey Supreme Court. The court said the law requiring warnings on cigarette packs does NOT bar claims that smokers did NOT receive adequate warnings of health risks. The ruling came in a suit filed by the widow of a man who died of lung cancer in 1982.

Eight people were killed in a fiery crash in West Virginia when a car carrier rammed two vehicles at a construction site on Interstate 79. State police say the driver of the car hauler apparently went into a restricted section of I-79 and hit two moving cars. The truck driver suffered only minor burns.

Tropical Storm Arthur weakened yesterday after encountering a trough of low pressure, but regained tropical storm strength as it moved across the Caribbean. At last report, Arthur was 120 miles south of Port Au Prince, Haiti, and was moving west-northwest at 22 miles-an-hour. Maximum winds are 40 miles-an-hour.

In Cambodia, Khmer Rouge guerrillas reportedly ambushed two civilian passenger trains this month, robbing passengers, executing officials and killing 80 people. The defense minister says the attacks, one on July 15th and another the week before, are part of a Khmer Rouge effort to step up pressure on the government.

#90208u0332 07/27/1990 ~United Press International

(JULY 27) UPI - The Senate adjourned in the wee hours this morning after working late on the farm bill. Lawmakers will reconvene today to continue work on it. Senators earlier voted to take the first steps to reforming the federal crop insurance program, but ran into a logjam on proposals to cut off export credit to Iraq.

South Africa's President F-W de Klerk held an urgent meeting last night with black leader Nelson Mandela. A spokesman says the two men agreed to meet again next week, apparently indicating they did NOT resolve a crisis sparked by the government's charges that communists in the African National Congress are plotting insurrection.

Two Soviet cosmonauts took another spacewalk yesterday, their second venture outside the Mir space station to repair the giant orbital complex. They fixed a faulty hatch on a module addition and transferred handrails they used last week to re-attach insulation torn from their Soyuz capsule.

Cuban leader Fidel Castro apparently has NO intention of holding elections or moving toward a capitalist-style economy. Castro indicated as much in a speech yesterday marking the 37th anniversary of the launching of the Cuban revolution. He said Cuba will continue its communist fight, with or without help from Moscow.

An autopsy is to be peformed today on the body of Brent Mydland, keyboardist for the rock band The Grateful Dead who died yesterday at his home in Lafayette, California. He was 38. A band publicist says he doesN'T know what the cause of death was, but says he believes it was an accident.

-30- 1733

#90208u0344 07/27/1990 ~United Press International

HAVANA, Cuba (JULY 27) UPI - Cuban leader Fidel Castro told hundreds of thousands of followers at an annual revolutionary rally that with or

without the Soviet Union, Cuba will continue its communist fight as the last enemy of the United States.

In his address Thursday to mark the 37th anniversary of the launch of the Cuban revolution, Castro indicated that he still has no intentions of holding elections or moving toward a capitalist-style economy.

''Now that the Soviet Union is no longer the enemy of the U.S. empire, we are the enemy of the empire,'' Castro said. ''We are the only enemy left ... and they are focusing all their propaganda and strength against Cuba.''

Castro, who on July 26, 1953 launched his armed struggle against the dictatorship of Fulgencio Batista, told the crowd at the Jose Marti Revolution Plaza that Cuba will hold out despite the fall of communist governments in Eastern Europe.

''Our reaction will be to struggle, struggle, and struggle to resist. As I have said before, if the Soviet Union were to disappear, we would continue to build socialism in our country.''

Castro acknowledged that the Soviet Union's economic hardships, coupled with the changes in Eastern Europe and U.S. pressure, is making things difficult for Cuba.

''I did not come here on this 37th anniversary to say everything is fine, that there is no risk involved, that we are not threatened by any problems. It is hard to admit that our extraordinary efforts to develop our country have coincided with the decline of the socialist bloc,'' Castro said.

The crowd stood in the heat for three hours listening to the 65-year-old leader, dressed in his customary olive green fatigues. They jumped up and down chanting, ''whoever doesn't jump is a Yankee!''

The ceremony was attended by a number of international left-wing groups, including former Nicaraguan President Daniel Ortega and other members of his Sandinista party, a delegation of Salvadoran rebels and members of Guatemala's rebel movement.

Castro addressed the issue of Cubans seeking asylum in Western embassies in Havana, challenging the United States and Europe to open their borders to Cubans who want to leave the island.

''If the Yankees want to receive these so-called persecuted citizens, let them bring in their ships and visas,'' Castro said. ''It is not us stopping them leaving the country, but they who will not let them in.''

Earlier this year, human rights activists in Cuba who served prison terms

for a variety of offenses against the one-party state, charged they were denied visas to enter the United States.

Castro, however, repeated earlier statements that he will not permit Cubans who illegally enter foreign embassies to leave the country.

A diplomat at the Spanish Embassy told reporters Wednesday that 18 Cubans remained in the embassy, although other Western diplomats have said at least half of those are suspected to be Cuban agents sent by the Interior Ministry to disrupt efforts to grant asylum to the refugees.

Another four Cubans remained housed at the official residence of the Italian ambassador.

Castro said the refugee problem was orchestrated by European countries and included it in a list of aggressions he said the United States has recently carried out against Cuba.

''There is no power in the world, neither from the north nor from Europe, that can bring Cuba to its knees, that can humiliate Cuba,'' he said.

Castro said trade has virtually ceased with a number of Eastern European countries, causing a drop in supplies of metals, wood, fertilizers and other industrial and agricultural inputs.

Castro warned this would bring ''very difficult circumstances,'' but said, ''We do not complain, however, because the Soviet government is making every effort possible to honor its commitments.''

''In these times (of scarcity) the people are producing a lot,'' Castro said.

#90208u0380 07/27/1990 ~United Press International
JAKARTA, Indonesia (JULY 27) UPI - U.S. Secretary of State James Baker said Friday the United States will not tolerate the ''Khmer Rouge's dialogue of death'' and refused to alter Washington's withdrawal of diplomatic recognition of the Cambodia resistance coalition.

In his first confrontation with members of the Association of Southeast Asian Nations (Asean) since announcing the policy shift last week, Baker also rejected the group's demands to forcibly repatriate unwanted Vietnamese boat people despite threats of massive pushoffs.

Offering a compromise, Baker said the United States is willing to join with other nations in a commitment to resettle or return all asylum seekers by the end of 1992.

''Cambodia's U.N. seat should belong to a freely elected government or, as a transitional arrangement, to Cambodians committed to fair and free elections in the context of a comprehensive settlement that includes a cease-fire,'' Baker told delegates at the post ministerial conference of Asean officials and their dialogue partners.

''Continued support for the coalition at the U.N. is only providing the Khmer Rouge with diplomatic cover for its military maneuvers,'' Baker said adding Washington would back the continued presence of the two non-communist factions if they cut their links with the Khmer Rouge.

Asean, which groups the non-communist countries of Indonesia, Malaysia, Thailand, the Philippines, Singapore and Brunei, warned the U.S. about-face on Cambodia could set back a solution to the 11-year-old conflict.

The ministers proposed the U.N. seat currently held by the followers of Prince Norodom Sihanouk and former Prime Minister Son Sann plus the Khmer Rouge be expanded to include the Hanoi-backed government in Phnom Penh as well.

They argued the military might garnered by the Khmer Rouge made it essential it be accepted as a partner in any settlement.

Indonesian Foreign Minister Ali Alatas, who hosted three unsuccessful regional meetings on Cambodia in addition to the international Paris conference last year, said, ''We now know better the considerations'' that went into the U.S. policy shift.

''We may differ on some aspects of tactics, but on goals we are on the same track.''

Alatas said Baker's compromise on the boat people ''was a helpful step forward, but I don't know if it meets all of our concerns.''

Baker said the United States was opening a direct dialogue with Vietnam on Cambodia with the first talks beginning at the United Nations Aug. 6 and is considering contacts with the Phnom Penh regime.

He said the talks were aimed at determining if Hanoi is prepared to support a process of political reconciliation in Cambodia culminating in free and fair elections.

''We must set our sights on the achievement of a just, durable and comprehensive peace in Cambodia,'' Baker said. ''We do ourselves, and the Cambodians, a great disservice if we blur this vision through a failure to recognize the steady, threatening movement of brutal men through the jungles.''

Asean's other dialogue partners including Canada, the European Community, Australia and New Zealand endorse Baker's stand. Japan's Foreign Minister Taro Nakayama said he was siding with Asean and was opposed to excluding the Khmer Rouge from the peace process but welcomed the U.S. dialogue with Vietnam as ''a concrete step.''

The Khmer Rouge, blamed for the deaths of more than 1 million Cambodians from 1975 to 1979 when the Vietnamese drove them out, are armed by China and have become the most powerful of the resistance factions fighting the Hanoi-backed government in Phnom Penh.

''Can there be any doubt that a Khmer Rouge return to power through violence will make a mockery of all our efforts in Cambodia?'' Baker asked.

Baker stressed the common goals the United States has shared with Asean for a decade still stand. He cited a verified withdrawal of Vietnamese troops, prevention of a Khmer Rouge return to power and self-determination for the Cambodian people through free elections.

''These are our common goals today just as they were when we met one year ago,'' he said. ''Our current challenge, and our new opportunity, is to move them towards resolution by the time we meet next year.''

Hanoi maintains all of its troops were pulled out last September but the resistance claims many still remain.

Baker said self-determination through elections must not be pursued without first ''preventing the Khmer Rouge from shooting their way back into power.''

''That impetus can come from offering new diplomatic incentives, and from showing no tolerance for the Khmer Rouge's dialogue of death,'' he said.

Baker was unwavering in refusing to accept the forced repatriation of Vietnamese boat people found to be economic refugees and not fleeing political repression. The Asean countries have threatened to follow the policy set by Malaysia, where international refugee workers estimate the country has pushed off boatloads containing 8,500 people in the past year.

The first-asylum countries, non-communist Southeast Asia along with the British Colony of Hong Kong, host 150,000 refugees awaiting resettlement in the West. Asean accused the United States of not meeting its commitments under the U.N.-sponsored Comprehensive Plan of Action adopted in Geneva last year.

Baker disputed the accusation, pointing out the United States has pledged $21 million to the U.N. High Commissioner for Refugees this year and is ahead of schedule in resettling refugees.

#90208u0388 07/27/1990 ~United Press International

NEW YORK (JULY 27) UPI - Three big sponsors dropped advertising for the

telecast of the 1990 PGA Championship on ESPN and ABC in protest over the site of the tournament, the all-white Shoal Creek Country Club in Birmingham, Ala.

The announcement Thursday poured fuel on the flames of controversy already raging in Birmingham over the country club's membership policy, and plans by black activists to picket the championship.

The sponsors cancelling were IBM, which dropped its spots on ABC, and Toyota and American Honda, which axed their ESPN spots.

Published reports said Anheuser-Busch also had withdrawn its sponsorship, but company spokesman Jeff Davis said the brewer had not planned advertising for the PGA on either network.

Nevertheless, Davis said: ''Responsible drinking ads may appear on the ESPN broadcast of the PGA Championship, but we won't know for sure until the schedule is set in August.''

The controversy has already prompted a clarification of Shoal Creek's bylaws, issued Monday by the club - but it may not be enough to satisfy outraged black leaders, or to bring back the cancelled ads, officials acknowledged.

''Membership in the club is open to any natural person over the age of 21. In considering proposed members, the board of governors evaluates each candidate solely on the basis of that candidate's individual merit, character, integrity and financial responsibility and, when a vacancy in the membership exists, members will be encouraged to suggest candidates from all qualified persons without regard to race, religion, color, sex or national origin,'' the club announced.

Birmingham Mayor Richard Arrington said in a statement the amendments, along with a letter from the club's chairman, Hall Thompson, ''make it clear that Shoal Creek is fully and formally committed to a policy of non-discrimination in the selection of new members. I further believe that this commitment was made by men of honor and in good faith.''

But advertisers stood firm.

''Those advertising dollars have already been recommitted,'' American Honda spokesman Bob Butorac said.

''American Honda believes this is a sound business decision and is consistent with the company's policy as an equal opportunity employer,'' he added.

Toyota spokeswoman Mindy Geller said the auto company pulled its ads

''because it's basically going against everything we've tried to accomplish with our various minority programs.''

Mark Mandel, manager of sports information at ABC Sports, said IBM has pulled its advertising, adding that other advertisers have called in concern about the controversy. The station will discuss at a later date how the PGA tournament will be covered, he said.

Meanwhile, Abraham Woods, a black activist in Birmingham, indicated that the ''clarification is not enough'' for him to call off a planned protest.

''I understand the mayor's stance,'' Woods said, ''but I do not share his optimism. I want some effort of substance, some concrete movement on their part.''

Woods hinted that protest plans could be averted if the club came up with a timetable for acceptance of black members.

Although a minimum of six months is required for an ''expedited admission'' into the club, Woods complained, ''It does't take that long to get somebody to the Supreme Court.

''The nation is looking this way now. The world is looking this way now. Now is the time to do it, make that statement now,'' he urged.

-30- 3721

#90208u0395 07/27/1990 ~United Press International

(JULY 27) UPI - Pirates pitcher Neal Heaton came to the All-Star game with 10 wins and a smile. Thursday night, he left after 2-3 of an inning with five runs, four hits, two walks and a harsh self-assessment.

''I just felt like I was all over the place with everything,'' Heaton said following the Philadelphia Phillies 12-4 rout of the Pittsburgh Pirates. ''I was just horse dirt. Basically, it's as simple as that.''

The Phillies pounded out 14 hits, dropping the Pirates into a first-place tie with the New York Mets in the NL East.

Pirates Manager Jim Leyland summed up his whole club's pitching in one word. Bad.

''From time to time you run into cycles on your starting staff where you just don't get anybody out,'' Leyland said. ''You pitch like we did tonight and you're not going to win many ballgames.

''Philadelphia is an excellent hitting team, but it was definitely a case of bad pitching.''

The Phillies, who scored six runs in the ninth inning of a 10-9 loss to the Mets Wednesday, picked up where they left off, scoring five in the first, two in both the second and third and three in the sixth.

''I think that last inning (against the Mets Wednesday) revived us,'' Phillies Manager Nick Leyva said. ''If we lost 9-2, we might come out a little flat tonight. But we came out with life, we swung the bats with authority, It helps a pitching staff when you give it five runs in the first.

''We were aggressive at the plate and that is one thing we have to do. This ballclub is capable of scoring runs and that takes the pressure off the pitching staff.''

Terry Mulholland allowed four runs on 10 hits in pitching his second complete game for his fifth road win. Following two first-inning hits, Mulholland retired 11 straight before a Jeff King fifth-inning single.

''Obviously it's nice to have a big lead,'' Mulholland said. ''But the guys on the other side can hit so you can't just lay it up there. You have to mix it up, they keep you on your toes.''

Tommy Herr's two-run triple, Charlie Hayes' two-run home run and Von Hayes' sacrifice fly gave the Phillies a 5-0 first inning lead.

''The guys are just trying to be aggressive,'' Charlie Hayes said. ''This is just the way the game goes. We could just as easily hit all those balls right to somebody. Today was just our day.''

Elsewhere in the National League, New York and St. Louis split, with the Mets winning the opener, 6-1 and the Cardinals taking the second game, 3-1; Montreal topped Chicago, 3-2; Los Angeles crushed Atlanta, 8-1; San Diego defeated Houston, 8-2; and San Francisco out-lasted Cincinnati, 4-3.

In the American League, it was: Seattle 6, Minnesota 4; California 4, Oakland 2; Detroit 10, Boston 4; and Toronto 7, Kansas City 5.

-- AROUND THE AL --

Mets 6, Cardinals 1, 1st game
Cardinals 3, Mets 1, 2nd game

At New York, Ken Hill, making his first start of the season, combined with Lee Smith on a three-hitter to give the St. Louis Cardinals a split with the New York Mets.

New York won the opener behind Ron Darling's four-hitter. The right-hander

struck out six, walked two and allowed an unearned run in the first inning. Hill, 1-0, was recalled from Louisville of the American Association Wednesday. He pitched 7 2-3 innings, striking out nine, walking three and yielding three walks.

Smith pitched 1 1-3 innings of hitless relief for his 15th save.

Expos 3, Cubs 2, 10 innings

At Montreal, Delino DeShields singled, stole two bases and scored on Tim Raines' single with two outs in the 10th inning lifting the Expos. DeShields singled off Mitch Williams, 1-6, and stole second and third. After Marquis Grissom walked, Raines singled to left to make a winner of Tim Burke, 1-1. Burke pitched 2 1-3 one-hit innings.

Dodgers 8, Braves 1

At Los Angeles, Eddie Murray and Kal Daniels homered to pace a 13-hit attack and Tim Belcher hurled a three-hitter to lead the Dodgers. Belcher, 9-7, worked six innings and allowed one run, to post his fourth win in his last five decisions. Marty Clary went to 1-8 on his seventh straight loss.

Padres 8, Astros 2

At San Diego, Jack Clark slammed a three-run homer to highlight a four-run fifth inning to power the Padres to its fourth straight win. Clark's 15th home run came off loser Mark Portugal, 4-9. Eric Show, 2-8, went 7 1-3 innings to collect his first victory since July 4.

Giants 4, Reds 3

At San Francisco, Brett Butler had four hits, scored two runs and drove in a run and Rick Leach hit his first National League home run to hand Cincinnati its fourth straight loss. Mark Thurmond, 2-2, pitched 1 2-3 innings of hitless relief for the victory. Jeff Brantley pitched the final two innings for his 16th save. Jose Rijo, 6-4, went the distance for Cincinnati.

#90208u0397 07/27/1990 ~United Press International

CHATTANOOGA, Tenn. (JULY 27) UPI - Jails in Hamilton County were brimming full Thursday as authorities closed the net on a huge vehicle insurance fraud operation and simultaneously wrapped up the biggest drug bust in city history.

Authorities in Tennessee, Georgia and Alabama began the widespread arrests of insurance fraud suspects Thursday after a local grand jury issued

nearly 100 sealed indictments to cap a 19-month long investigation dubbed Operation Transfer. Investigators say the suspects plotted to have their vehicles stolen in order to falsely collect insurance money.

Meanwhile, Chattanooga police are searching for dozens of people facing 150 indictments charging they sold crack cocaine to an undercover agent. City narcotics Chief Pat Rowe said the drug buys were so numerous that the amounts purchased have not been calculated. It is the largest number of people sought at one time in the city's 138-year history, police said.

Jails in Hamilton County were jammed to capacity following the arrests and threaten to exceed a federally imposed cap, authorities said.

''I told them to bond them out as fast as they come in,'' said Hamilton County Chief Deputy James Hammond.

Tim Kett, a spokesman for the National Automobile Theft Bureau in Chicago called the insurance fraud sting ''the largest operation that has been made public this year.'' The theft bureau is a non-profit corporation supported by 650 insurance companies.

The fraud operation used undercover police who posed as thieves and stole vehicles at the owners' request. Detective Jim Baker, who posed undercover said the false claims submitted by the vehicle owners may amount to millions of dollars when the sting finally is closed,

''We came awfully close to getting some attorneys,'' said Lt. Ron Conner. ''We got an insurance salesman, a nurse, college professor, and business owners.''

''They are all middle to high class people,'' Baker said. ''I didn't dream it was this widespread. I don't think any of the officers did.''

''I'm surprised how bad it is,'' Conner said. ''We were going for just 10 cars. We got them right off the bat. So we went for 20, then 50, then ...''

''The same thing is going on all across America. All you have to do is set up shop and put the word out,'' Baker said.

-30- 2513

#90208u0417 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The growing number of children across the country entering preschool prompted education professionals Friday to propose a set of voluntary standards designed to enhance learning and social skills.

According to 1989 Department of Education figures, there were 7.4 million

3- and 4-year-old children, of which 1 million were enrolled in public schools and 1.8 milion attended private schools.

The number of children in preschool has nearly quadrupled since 1965, the figures showed.

''We must be ready to serve these very young children,'' said Samuel Sava, the association's executive director. ''These kids are not just younger versions of our first graders. They do not learn in the same ways that older children learn. And their education programs should not be simply patterned after traditional elementary grade programs.''

Sava cited a number of reasons for the increased numbers of preschoolers, including more working parents, more child care and school readiness programs and greater pressure for achievement and the belief that preschool can achieve that end.

The proposal by the National Association of Elementary School Principals stressed a need for a less-structured, unhurried environment to enhance the development of young children.

The principals' voluntary standards were prepared by a committee of elementary school principals and early childhood experts.

Among the 28 recommendations:

-Schools should be ready for the child and should not expect the child to be mature enough for an educational environment. A program must be based on the ways children learn, not on how adults prefer to teach.

-Programs should help children develop a self-esteem, social and communication skills and a curiosity for learning.

-Learning should be the result of experience, such as play, since children learn best through direct sensory encounters and not through formal academics.

-A close relationship between parents and those who plan the program is crucial to the success of early childhood education.

#90208u0436 07/27/1990 ~United Press International

(JULY 27) UPI - A band of intense thunderstorms stretched across Kansas, flooding streets and sending rivers over their banks Friday as other storms hit the Great Plains.

Rivers and streams in central, northcentral and northwestern Kansas poured

over their banks, leading authorities to post flash flood watches in rural and urban areas.

The Smoky Hill River in Ellworth in central Kansas was more than 5 feet above flood level, and the Saline River was expected to top flood stage later Friday near Lincoln before cresting, forecasters said.

The floods were caused by an 80-mile wide area of strong storms that was slowly moving east-northeast through the state.

Between 3 and 4 inches of rain fell late Thursday in northeast Kansas, causing minor street flooding in Colby and causing flood warnings to be posted near Beaver and Sappa creeks. More rain was expected Friday.

A flash flood watch was posted Friday for southwest and southcentral Iowa, where rivers surged to record levels Thursday following days of heavy rain.

Thunderstorms continued early Friday, with as much as 2.5 inches falling on the town of Lamoni, on the Missouri border. The already flooded Nishnabotna River was expected to be spared any heavy rain in the immediate future.

Strong thunderstorms with dangerous lightning and small hail lashed an area 10 miles west of Waterloo, in northeast Iowa.

Thunderstorms hit northeast and northcentral South Dakota, with some producing small hail and high winds, while storms also soaked northeast Colorado and southwest Nebraska, the National Weather Service said.

Dry and clear weather covered the western states with sunny skies predicted for Friday.

A weak cold front pushed into Colorado, and a few scattered showers fell east of the Continental Divide.

Light rain was scattered across West Texas and eastern New Mexico in the wake of severe thunderstorms that dumped heavy rain and hail on a wide area of the Texas Panhandle. Golfball-size hail was reported Thursday in Dalhart, in the upper Texas Panhandle, while quarter-size hail hit areas north of Amarillo.

High pressure kept much of the South relatively dry, but scattered showers rained over parts of Florida and Louisiana. Temperatures were slightly below normal for mid-summer.

In the Caribbean, tropical storm Arthur regained strength Thursday night and continued its course through the sea after being demoted to a tropical depression earlier in the day.

-30- 2659
#90208u0439 07/27/1990 ~United Press International
BANGKOK, Thailand (JULY 27) UPI - Cambodian resistance leader Prince Norodom Sihanouk Friday hailed a decision by Southeast Asian nations to oppose the U.S. policy shift on the 11-year Cambodian conflict.

Sihanouk said in a telegram to foreign ministers of the six Association of Southeast Asian Nations, meeting in Jakarta, that he was delighted with ASEAN's decision to oppose the U.S. policy, which he said would extend and increase the conflict.

The United States announced last week that it favored withdrawing diplomatic recognition of the Sihanouk-led resistance coalition at the United Nations.

The ASEAN ministers Thursday said the U.S. policy would ''set back the search for a comprehensive political solution'' in Cambodia.

''I express to Your Excellencies and to your respective noble countries, our most profound gratitude for your acts of objectivitives and justice,'' Sihanouk said, according to a statement issued by his Bangkok office.

The foreign ministers of ASEAN - Thailand, Indonesia, Malaysia, Singapore, the Philippines and Brunei - were meeting Friday with U.S. Secretary of State James Baker to discuss Cambodia and other issues.

''For the last 11 years, ASEAN was always able to find and propose the best peaceful means to efficiently and equitably solve the problem of Cambodia,'' Sihanouk said.

Sihanouk, 68, said the ouster of the three-party resistance from the U.N. seat would jeopardize peace efforts for Cambodia.

''Instead of leading Cambodia quickly to peace, it will deepen and widen further the gap between the Cambodian national resistance and the group of (Cambodian Prime Minister) Hun Sen and end up with the intensification and the prolongation of the war in Cambodia,'' Sihanouk said.

The conflict stems from Vietnamese invasion of Cambodia in late 1978, which ousted the brutal Khmer Rouge government, which has been blamed for the deaths of more than 1 million Cambodians and installed a pro-Vietnam government.

Sihanouk said the new U.S. policy would be unable to end the Cambodian conflict.

''The best medicine to heal the Cambodian illness is the one prepared by ASEAN,'' he said.

-30- 2378

#90208u0441 07/27/1990 ~United Press International

TOKYO (JULY 27) UPI - Texas oilman T. Boone Pickens, repeatedly snubbed from board representation of a Japanese auto-parts firm despite being its largest stockholder, said Friday he will now battle Toyota Motor Corp., which he says is the smaller company's real master.

''I don't think anybody is going to argue with me that Toyota is controlling Koito (Manufacturing Co., the auto-parts maker),'' Pickens said in a telephone interview from his office in Dallas. ''We might as well go to the top of the organization.''

Toyota, Japan's largest automaker, owns 19 percent of Koito, the country's largest auto-parts manufacturer. Pickens owns 26 percent, the largest of any single shareholder, but has been denied a seat on the board.

''They (Toyota) are able to control Koito, so they, with a 19 percent interest, get a 100 percent benefit,'' Pickens said.

Toyota refused to comment on the latest charges by Pickens.

''Our company's position from the beginning of the dispute between Pickens and Koito has been that we will not intervene,'' said Toyota spokesman Andrew Pfeiffenberger.

Despite Pickens' holdings, Koito's management has denied his request for four seats on the board and access to company records, charging that he is merely seeking to greenmail them.

Greenmail involves a company buying back its stock from certain shareholders at inflated prices to prevent a takeover bid.

Pickens has repeatedly denied the greenmailing charge, and this week he stepped up his countercharge that Koito is a puppet of Toyota.

In a July 24 letter to Toyota's chairman, Eiji Toyoda, Pickens charged that a Washington meeting between representatives of Toyota and Koito proves that the companies have a special relationship. Pickens sent copies of the letter to the media to press his case.

Pickens also pointed out that Koito's president, Takao Matsuura, and two of its board members are former Toyota employees.

In view of this special relationship, Pickens wrote, he would direct all

future questions about Koito to Toyoda. But Pickens said Friday he has been unable to reach Toyota's chairman.

Toyota's Pfeiffenberger refused comment on the letter to Toyoda.

''It's a private matter. It doesn't concern the public,'' he said.

He added that the Washington meeting Pickens referred to was prompted by Pickens' attacks on Toyota and was merely an occasion for Koito to brief Toyota representatives on how they dealt with Pickens.

''We decided that at this point there was no need to take any action,'' Pfeiffenberger said.

But Pickens said the meeting was an attempt to collaborate in frustrating a federal investigation of possible anti-trust violations by Japanese companies, reportedly including Toyota.

''That's very disturbing to a lot of Americans,'' Pickens said. ''It's going to result in restrictive trade legislation.

Pickens said his recent testimony before a Senate subcommittee on his troubles with Koito was well-received.

''In Washington, I hear only encouragement,'' he said.

Pickens also said he was demanding Koito hold a special shareholders' meeting within about 90 days to reconsider his motions.

At Koito's annual meeting on June 28, Pickens and his entourage of 30 American shareholders were heckled by Japanese shareholders, some of whom shouted nationalistic taunts such as ''We won the economic war.''

After three hours, Pickens declared the meeting a farce and walked out. Shortly afterwards, his motions were defeated and the meeting adjourned.

In the interview Friday, Pickens accused Koito management of hiring professional hecklers - a common feature at Japanese shareholders' meetings - and dodging his questions to prevent serious consideration of his proposals. Koito said it had only heard of Pickens' demand through news reports, and could not decide anything before getting a request from him.

TALLAHASSEE, FL (JULY 27) UPI - A Colombian national wanted on drug charges in the United States was extradited to Tallahasse and was being

held Friday pending an arraignment for marijuana and cocaine conspiracy and racketeering.

Luis Alfonso Leon-Sanchez, 34, was turned over to the Special Operations Group of the U.S. Marshal's Service in Bogota, Colombia, and flown to Tallahassee, where he arrived Thursday afternoon, said U.S. Marshal W.L McLendon of the Northern District of Florida.

Leon-Sanchez was indicted on racketeering and conspiracy charges for attempting to import and distribute more than 1,000 kilograms of marijuana and five kilograms of cocaine.

He is the 20th person to be extradited to the United States to face drug charges since Colombia stepped up its war against drugs last August, McLendon said.

#90208u0487 07/27/1990 ~United Press International

JAKARTA, INDONESIA (JULY 27) UPI - Troops staging raids in Indonesia's strongly Islamic province of Aceh killed two suspected rebels and wounded four others and the leader of the extremist group later surrendered, the military said Friday.

The suspects, identified as Isminar, 25, and Ibrahim bin Ismail, 28, were shot and killed Tuesday by soldiers in Aceh Utara district, said Lt. Col. Achmad Sudjai, a spokesman for the regional military command.

Isminar and Ibrahim were shot to death during raids in three Aceh districts, Sudjai said. The government had deployed five battalions of troops to the province to stem extremist violence.

More than 500 rounds of ammunition, seven explosive detonators and a piece of material believed to be the movement's flag were seized during the raids, Sudjai said, as well as two typewriters, two cameras and a telescope.

Four suspects were hospitalized in Lhokseumawe district for treatment of their wounds, he said.

Another man, Abdullah Ismail, 30, who identified himself as commander of the group, surrendered Wednesday to authorities, Sudjai said.

The government refers to the rebel group as a Security Disturbance Movement, a term used for anti-government and separatist groups. Officials blame the Aceh group for a series of attacks and ambushes that have killed more than 40 civilians and about as many troops in recent months.

A religious teacher is believed to have been shot to death by the group July 19 in a village in Pidie district, and a 12-year-old boy was killed four days later in Aceh Utara district.

Thousands of peasants, resettled under a government policy of transmigration, fled their villages after threats or intimidation by the extremists. Some of them are reported to have returned, however.

Sudjai credited the success of Tuesday's raids to support from villagers who he said were embarrassed by the group's recent activities.

Ten extremist suspects have been killed in military raids against the movement, according to official accounts, and about 70 have been arrested or have surrendered.

#90208u0598 07/27/1990 ~United Press International

(JULY 27) UPI - Democratic budget negotiators say it's UNlikely that a final agreement on a deficit-reduction proposal can be reached and approved by Congress before early October. Negotiators hoped to have an agreement finalized before Congress takes its August vacation, but the two sides have NOT even gotten around to exchanging deficit-reduction plans. One Democrat says an October date is more realistic.

General Electric, the nation's fifth-largest defense contractor, was fined 10-Million dollars for defrauding the government on an Army contract. U-S District Judge Lowell Reed also sentenced two G-E employees to jail terms in the case. G-E was convicted of fraud and making false claims. The government says the company negotiated with subcontractors for lower prices on some components but did NOT pass the savings on to the Pentagon.

The House ethics probe of Congressman Barney Frank and the Senate investigation of Senator David Durenberger ended this week, and now the costs are being tallied. Committee aides say the cost of the Senate probe alone far exceeds half-a-Million dollars, and the total pricetag for both investigations could approach one-Million. Frank, a Massachusetts Democrat was reprimanded for his relationship with a male prostitute, and Durenberger, a Minnesota Republican, was denounced for financial misconduct.

In Los Angeles, defense lawyers say yesterday's conviction of their client in the 1985 murder of a U-S drug agent in Mexico is a miscarriage of justice, and they plan to appeal. Honduran drug lord Juan Ramon Matta Ballesteros was convicted of conspiracy, and aiding and abetting the kidnap and torture-murder of Enrique Camarena. But Matta was acquitted of murder in the case.

-30- 1905
#90208u0618 07/27/1990 ~United Press International
(JULY 27) UPI - Police in West Germany say deputy Interior Minister Hans Neusel was slightly injured today in a bomb attack as he drove his car to the ministry in Bonn. He was taken to a hospital for a routine examination following the attack. Police say the bombing may have been the work of the Red Army Faction, a left-wing terrorist group active since the 1970's.

Two Air Force F-4 Phantom jets crashed into a dry lake bed in the California desert yesterday, killing two of the four airmen aboard the planes. Officials say the other two fliers ejected safely. The jets were assigned to the George Air Force Base, about 65 miles northeast of Los Angeles. They crashed within the boundaries of the Death Valley National Monument, 20 miles west of the Nevada state line.

The AIDS toll is expected to rise among women and children. The World Health Organization says women and children increasingly will fall victim to AIDS, with the deadly disease killing about three-Million women and children in this decade. The health organization also says AIDS will create ''several Million'' orphans worldwide. The findings are in a report published in the British medical journal The Lancet.

Congressional staff investigators say the Air Force spent 18-hundred5-B transport plane. The investigators say they were able to find similar commercial toilet covers for about 182-dollars, one-tenth the military's price. The Air Force confirms it paid the price quoted, but denies the part could have been bought for much less. The Air Force calls the cost ''reasonable.''

#90208u0657 07/27/1990 ~United Press International
(JULY 27) UPI - Prices on the Tokyo Stock Exchange closed sharply lower Friday as investors absorbed news of a tax-evasion scandal involving a dozen or more Japanese brokerages, capping a week-long downward trend. Trading remained light.

The closely watched Nikkei Stock Average of 255 select blue-chip stocks, which fell 331.52 points Thursday, tumbled another 506.27 points to close out the week at 30,863.48.

Analysts noted the Nikkei average dropped 991.80 points, or 3.2 percent, within the first two hours of trading before bouncing back.

The Nikkei average lost 1,558.04 points - 4.8 percent of its value - on the week. Friday's close was the first time since May 10 that the

blue-chip index fell below the 31,000-point level.

The closing below 31,000 shattered what dealers had confidently said was the market's floor.

The broader-based Tokyo Stock Exchange Price Index of all listed stocks fell 31.94 points to 2,249.26.

An estimated 450 million shares changed hands, up from 343 million shares Thursday.

Declines hammered advances 800 to 179, while 148 issues escaped the selling barrage.

''Nobody wants to buy on a day when a scandal is hanging over the market '' said one local broker.

On the trading floor, auto stocks, shipbuilding issues, oils and related stocks, mining issues, brokerages and large contstruction companies all ended lower.

After three months of relative stability, the Tokyo stock market's sell-offstemmed, dealers said, from both the scandal and a sense that higher interest rates and bond yields are making other investments more attractive.

Since early April, the Tokyo stock market had been slowly regaining the steep loses suffered in the first three months of the year.

On April 2, the Nikkei bottomed out at 28,002.07 points. The key indicator then made a recovery, climbing above the 33,000-point level, where it stood as recently as July 19.

The tax-evasion scandal added to a downward trend which began late last week and was based largely on interest-rate fluctuations.

The Japanese media reported Thursday that tax authorities were preparing to levy large fines against a dozen or more securities firms that allegedly reimbursed the losses of select clients and wrote off the illegal payments as business expenses.

Elsewhere in Asia, stocks on the Hong Kong Stock Exchange posted slight gains in light trading on a small wave of bargain hunting that erased early sharp losses.

The key Hang Seng Index, which fell 36.95 points Thursday, gained 2.21 points to 3,485.80. For the week, the closely watched index fell more than 37 points.

Among narrower indexes, industrials added 6.72 points, financials gained 13.66, utilities inched up 4.30 but the interest-sensitive properties dropped 30.09 points.

Volume was light at 1.89 billion shares, down from Thursday's turnover of 2.02 billion.

The market opened sharply lower amid strong profit taking, losing more than 36 points in the first 15 minutes of trading. Stocks then drifted higher around midday as bargain hunters stepped in.

The minor rally spilled over into late trading, until a bout of last-minute profit taking cut the gains, analysts said.

''This week, the market lost the gains made last week,'' said David Harman a senior manager at Morgan Grenfell. ''The correction that we've seen this week was by no means severe.

''It was quite a healthy correction. I expect the buyers to come back to this market before too long. The market still offers good value - it is destined to go higher.''

In Singapore, stocks closed slightly higher in fairly active trading on the Singapore Stock Exchange as bargain hunters pushed prices higher.

The key Straits Times Industrial Index, which eased 3.16 points Thursday, reversed course and rose 7.41 points to 1,565.49. The narrower All Singapore Index rose 0.28 points to 444.65.

An estimated 62.61 million shares changed hands, vs. 78.2 million shares Thursday.

Analysts said bargain hunters in the afternoon picking up good buys helped to push prices slightly higher.

The market was undergoing a technical adjustment and will remain weak if Tokyo stocks continue weak, brokers noted.

On the trading floor, Singapore Press foreign shares paced the advancing issues, followed by Sembawang Shipyard and Singapore Bus.

Bukit Sembawang led the declining issues, followed by Isetan Corp. and Industrial Commercial Bank.

In Australia stock prices closed lower in Sydney Sharemarket trading.

#90208u0733 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - America's economy, battered by a plunge in exports, managed only a 1.2 percent gain in the total output of goods and services in the second quarter after a 1.7 percent increase in the first quarter, the government said Friday.

Private economists had predicted an advance of 1.5 percent in the gross national product for April, May and June.

The Commerce Department also released revised data lowering its estimate of the real GNP between 1987 and 1989 to 3.4 percent from 3.8 percent, confirming the generally sluggish state of economic affairs.

''Weaker consumer spending for services accounted for about two-thirds of the revision,'' according to the department's Bureau of Economic Analysis. ''In 1989, growth in GNP was considerably weaker.''

Exports, which had been pumping fuel into the economy, fell by a disappointing 3.7 percent in the second quarter after a solid 11.2 percent gain in the first three months of the year.

Imports gained 3.2 percent.

Not counting inflation, the real GNP rose by $12.6 billion to more than $4 trillion, projected at an annual rate, in the second quarter of the year after increasing by $17.4 billion in the first quarter.

In the fourth quarter of 1989, real GNP edged up by $3.5 billion.

Second-quarter personal spending fell by 0.3 percent, on an 8.7 percent plunge in the purchase of expensive durable goods - items such as home appliances - and a 4.4 percent drop in non-durable goods, like clothing.

Personal spending on services, however, leaped by 5.5 percent.

The Commerce Department also said that business spending on buildings and equipment slid by 6.1 percent in the second quarter and that residential spending collapsed by 13.5 percent, reflecting the anemic pace of home building.

Defense spending by the federal government was up by 3.3 percent, while non-defense spending boomed by 60.7 percent. Total spending by state and local governments, on the other hand, was up by a mere 0.2 percent.

The implicit price deflator, an important gauge of inflation, dipped to 4.4 percent in the second quarter of 1990 from 4.8 percent in the first quarter.

In its revised data for 1987, 1988 and 1989, the Commerce Department said there were no signs of recession, which is defined as two or more consecutive quarters of negative GNP.

The revised data also showed that the inflation averaged 4.2 percent for the three-year period and that personal income and personal savings for 1989 were lower than initially reported, in part because of statistical errors.

Looking ahead, GNP data for July, August and September could be bolstered by an increase in manufacturing activity in the auto industry, which has been anticipating an autumn strike by the United Auto Workers.

Analysts at Mitsubishi Bank of New York said in a market letter that this buildup of cars, trucks and vans could add as much as $20 billion to growth in the third quarter.

In the near term, ''the economy will be fired up a bit by an aggressive third-quarter domestic car production plan, which is a 13 percent increase in production compared to the same period a month ago,'' the market letter said.

''Inventory building is yet another source of potentially stronger growth

in the third quarter,'' Mitsubishi analysts said. ''Over all, a 3 percent jump in third quarter real GNP growth is quite possible.''

#90208u0742 07/27/1990 ~United Press International

(JULY 27) UPI - Today's meeting of all 13 OPEC oil ministers in Geneva is being delayed while the ministers debate a raise in the cartel's reference price. Moderates are proposing a slight increase of two-dollars a barrel, but radicals Iraq and Libya demand a jump of seven-dollars.

Cambodian resistance leader Prince Norodom Sihanouk thanked Southeast Asian ministers for opposing the U-S policy shift on Cambodia. Sihanouk sent a telegram to the ministers meeting in Jakarta, Indonesia... saying the new U-S policy to NOT recognize Cambodia'sresistance movement would be UNable to end the Cambodian conflict.

The United States said last week it favored withdrawing diplomatic support for the Sihanouk-led resistance coalition that includes the brutal Khmer Rouge.

The Moldavian parliament yesterday gave itself veto power over Soviet laws in the latest independence bid by a Soviet republic. The parliament also annulled Moscow's control of criminal proceedings and named a chief prosecutor to run its legal system. A similar move by Lithuania in March drew a sharp response from Moscow.

Tropical Storm Arthur's maximum winds have increased to 40 miles-an-hour, bringing it back up to tropical storm status as it swirls across the Caribbean. At last report, Arthur was 150 miles southeast of Kingston, Jamaica, and heading toward southern Haiti.

The military in Indonesia says troops staging raids in a largely Islamic province killed two suspected rebels and wounded four others this week. A man who identified himself as the leader of the extremist group surrendered one day after the raids. The four wounded suspects were hospitalized.

#90208u0768 07/27/1990 ~United Press International

(JULY 27) UPI - Federal authorities say a Colombian citizen wanted on drug charges in the United States was extradited to Tallahassee, Florida. The suspect is being held pending arraignment for marijuana and cocaine conspiracy, and racketeering. He is accused of attempting to import and distribute more than one-thousand kilograms of marijuana and five kilograms of cocaine.

Authorities raided a house in a Los Angeles suburb this week and confiscated an estimated 15-Millionthousand dollars in cash. U-S Customs officials say the money taken from the house allegedly used in a drug-money laundering operation is the largest such seizure on the West Coast. Four men, all Colombian nationals, were arrested.

Some Moslems in Lebanon are tired of inter-Shiite fighting, and yesterday more than 100-thousand demonstrated to protest the warfare. The demonstrators marched in a city 46 miles south of Beirut. The pro-Iranian Hezbollah and the Syrian-backed Amal have been fighting since July 16th for control of a strategic region east of the port city of Sidon.

The State Department is warning U-S citizens to avoid travel to parts of India, including Kashmir, because of political unrest and the risk of violence. The travel advisory issued yesterday recommends avoiding travel to the states of Jammu and Kashmir until further notice. U-S citizens are advised NOT to take any flights going to or from the city of Srinagar.

Two Detroit women say they're more upset about the way they say they were treated by police, than they are about the man who robbed them July 17th. Meredith Scott and Sharon Edwards say they spent 80 minutes trying to make a report on being robbed, and say an officer told one of them- ''Lady, NObody cares.'' A Detroit police spokesman says the women were NOT mistreated.

#90208u0786 07/27/1990 ~United Press International

JAKARTA, Indonesia (JULY 27) UPI - Secretary of State James Baker said Friday the United States will not tolerate the ''Khmer Rouge's dialogue of death'' and refused to alter Washington's withdrawal of diplomatic recognition of the Cambodia resistance coalition.

In his first confrontation with the Association of Southeast Asian Nations since announcing the policy shift last week, Baker also rejected ASEAN demands for U.S. agreement to forced repatriation of unwanted Vietnamese boat people - a policy he said would lead to ''inhuman chaos and loss of life.''

Baker instead said the United States is willing to join with other nations in a commitment to resettle or return all asylum seekers by the end of 1992 and is accepting a new category of returnees: ''those who do not object.''

In a private session with ASEAN foreign ministers, Baker said the Bush administration had to withdraw support for the three-part rebel coalition holding a U.N. seat in order to win congressional approval for aid to the two non-communist factions in the coalition.

The third, most powerful faction in the coalition trying to oust the Cambodian government is the communist, Chinese-backed Khmer Rouge. Vietnam

invaded Cambodia in late 1978 and in 1979 ousted a Khmer Rouge regime believed responsible for the death of at least 1 million Cambodians in four years of power. Hanoi then installed the current Cambodian government.

The Cambodian resistance launched its fight against Phnom Penh. After years of fighting, Vietnam said it withdrew its troops from Cambodia last September, but Cambodian rebel leaders say many Vietnamese troops remain.

Baker last week announced the U.S. shift on the U.N. seat and said Washington is open to a dialogue with Vietnam on resolving the Cambodian conflict.

Speaking to the ASEAN ministers of Indonesia, Malaysia, Thailand, the Philippines, Singapore and Brunei, Baker said Cambodian self-determination through elections must not be pursued without first ''preventing the Khmer Rouge from shooting their way back into power.''

''That impetus can come from offering new diplomatic incentives and from showing no tolerance for the Khmer Rouge's dialogue of death,'' he said.

Baker said the U.N. seat ''should belong to a freely elected government or a transitional arrangement, to Cambodians committed to fair and free elections in the context of a comprehensive settlement that includes a cease-fire.''

ASEAN wants the seat to remain in possession of the three-party resistance but with the inclusion of the Hanoi-backed government in Phnom Penh by the time the U.N. General Assembly convenes in September.

Wong Kan Seng, Singapore's minister for foreign affairs and the most outspoken critic of the U.S. turnaround, said Baker ''explained to us the reasons why the U.S. adjusted its policy.''

''We explained to him how that might be a problem affecting the peace process'' aimed at resolving the 11-year-old conflict, Wong said. ''We have a difference in approach.''

ASEAN officials contend the military strength of the Khmer Rouge make it essential it be accepted as a partner in any settlement.

The Khmer Rouge are armed by China and the most powerful of the resistance factions fighting the government in Phnom Penh.

''Can there be any doubt that a Khmer Rouge return to power through violence will make a mockery of all our efforts in Cambodia?'' Baker asked.

Baker stressed the goals the United States share with ASEAN for a decade still stand: a verified withdrawal of Vietnamese troops, prevention of a

Khmer Rouge return to power and self-determination for the Cambodian people through free elections.

''These are our common goals today just as they were when we met one year ago,'' he said. ''Our current challenge, and our new opportunity, is to move them towards resolution by the time we meet next year.''

Baker was unwavering in refusing to accept the forced repatriation of Vietnamese boat people found to be economic refugees and not fleeing political repression. The ASEAN countries have threatened to follow the policy set by Malaysia, where international refugee workers estimate the country has pushed off boatloads containing 8,500 people in the past year.

The first-asylum countries in non-communist Southeast Asia, along with the British colony of Hong Kong, host 150,000 refugees awaiting resettlement in the West. ASEAN accused the United States of not meeting its commitments under the U.N.-sponsored Comprehensive Plan of Action adopted in Geneva last year.

Baker disputed the accusation, pointing out the United States has pledged $21 million to the U.N. High Commissioner for Refugees this year and is ahead of schedule in resettling refugees.

BONN, West Germany (JULY 27) UPI - A bomb exploded and slightly wounded a deputy interior minister in charge of countering terrorism as he drove to work Friday and the Red Army Faction extremist group claimed responsibility, police said.

Deputy Interior Minister Hans Neusel was able to walk to his office to get help after the explosion, which severely damaged his vehicle, officials said.

Police said the fact Neusel's chauffeur was on vaction may have saved his life because Neusel was driving and the bomb appeared to be situated to impact the passenger side.

A police spokeman said the RAF claimed responsibility in a letter found at the scene of the attack on an autobahn access road in northern Bonn near the Interior Ministry building.

Neusel, 62, said at a news conference later Friday that he slowly stopped the damaged car and pushed it to the side of the road with the help of passers-by.

''Of course, I had this shock-experience but I was still able to let the

car coast to a complete stop,'' he said.

He then walked to the ministry and was taken to the hospital to be examined.

Neusel called on the assailants to stop what he called their ''criminal destruction.''

The RAF also claimed responsibility for a similar bomb attack last November in Frankfurt. Alfred Herhausen, the head of West Germany's largest bank, was killed in the bomb attack on his car.

Police said both explosions were triggered by an electronic light beam, which must have been switched on by someone watching the road as the car approached.

Neusel said he would not ask for more police protection, adding police could not guarantee maximum security to all the government officials at risk.

''The best protection for people in danger is the successful search,'' he said.

Neusel heads the internal security department in the Interior Ministry, and is responsible for countering West German terrorism.

The left-wing Red Army Faction dates back more than 20 years but its members have constantly changed over that time so that investigators speak of second and third generation RAF members.

Eight former RAF members were arrested in East Germany recently. They had assumed new identities with the help of the now-dismantled East German secret police.

Under interrogation, the eight said they had not carried out any attacks since they left the West.

#90208u0806 07/27/1990 ~United Press International

GENEVA (JULY 27) UPI - OPEC oil ministers reached swift, unanimous, agreement Friday on increasing the cartel's production ceiling from 22.1 million barrels a day to 22.5 million and raising the target price by $3 a barrel to $21. A full session of all 13 ministers was planned for the end of the afternoon or early evening to approve the agreement formally.

"We have finished everything," Iranian Oil Minister Gholamreza Aghazadeh told reporters after a series of intense private talks among the 13 oil

ministers at their key mid-year conference. "The main issue is that the new reference price is $21 and the ceiling is 22.491 million barrels a day."

That price is based on an average of what OPEC members want to be paid for a "basket" of their seven principal crude oils. Prices actually paid by the market depend on production - going down if there is output quota cheating but rising if OPEC members honor their individual shares of the combined pie.

Aghazadeh said the new production and price levels would remain in force until the end of the year and OPEC would set up two groups to "control" production - something the cartel did unsuccessfully in the past.

Delegates and officials said a compromise on the $21 base target price was reached first by powerful members Saudi Arabia and Iraq and then endorsed by the other 11 members.

The agreement, which also was confirmed by Saudi and Iraq oil ministers, emerging in only two days was extraordinarily short by OPEC standards with ministerial meetings in recent years lasting anywhere from five to 12 days.

Any target price of above $20 was seen as a victory for Iraq's tough tactics against the over-production by Kuwait and the United Arab Emirates which had forced actual prices down.

Iraq has strengthened its position within OPEC at the current conference, gaining the support of pivotal members Iran and Saudi Arabia in its drive to discipline Kuwait and the UAE. Iraq had verbally assaulted Kuwait as well as the UAE and sent troops to the Kuwaiti border.

The United States countered with a minor military exercise in the region. The Iraqi threats extracted promises by Kuwait and the UAE to honor their output quotas.

In the price debate, OPEC hawks Iraq and Libya had demanded a $7 increase in the reference price to $25 but the moderate Saudis wanted an increase to $20 a barrel.

Delegates said the $21 compromise between the Saudis and Iraqis was bound to be approved by the others because those two countries with Kuwait have the biggest reserves.

Persian Gulf participants said Iraq deliberately sought an unrealistically high reference price in order to get a compromise on at least $21 a barrel. One delegate said the $21 price represented "a victory" for Iraq.

Delegates and OPEC officials said ministers wanted to reach agreement on a

new reference price and production accord through 1990 before Iraq and Kuwait begin talks Sunday on border and oil production disputes.

The production increase from 22.086 million barrels a day to 22.491 million was for the UAE which ignored previous agreement on grounds its reserves entitled it to a higher quota. The UAE was now getting as quota of 1.5 million barrels a day, the same as Kuwait.

Despite the nearly eight-year Iraq-Iran war, suspended under a cease-fire two years ago, Iran backs Iraq in its bid to make Kuwait and the United Arab Emirates honor their OPEC production quotas.

Iraq has blamed over-production by those two member states for pushing down the actual average price paid for OPEC crudes to just $14.40 in early July. The price currently is up to around $17 a barrel.

Kuwaiti and UAE over-production also meant actual OPEC output was running at some 23.5 million barrels a day against the official cartel combined ceiling of 22.1 million barrels a day.

#90208u0821 07/27/1990 ~United Press International

(JULY 27) UPI - Iran's oil minister says OPEC members meeting in Geneva have reached agreement to raise the basic reference price from 18 dollars to 21 dollars a barrel. The hike is less than the seven-dollar-a-barrel raise sought by more radical nations in the 13-nation oil cartel. OPEC also reached unanimous agreement on increasing production from 22-point-one-Million barrels to 22-point-five Million barrels a day.

A Colombian wanted on drug charges in the United States is being held in Tallahasse, Florida, after his extradition yesterday. 34-year-old Luis Alfonso Leon-Sanchez faces an arraignment for marijuana and cocaine conspiracy and racketeering. Leon-Sanchez is the 20th person extradited to the United States to face drug charges since Colombia stepped up its anti-drug war last August.

South African President Frederick de Klerk held an urgent meeting last night with black nationalist Nelson Mandela. The two leaders met over a crisis sparked by government allegations that communists in the African National Congress are plotting armed insurrection. NO details of the meeting were released. A de Klerk spokesman said only that they agreed to meet again next week.

A federal judge in Philadelphia minced NO words as he handed down a 10-Million-dollar fine to General Electric, the nation's fifth-largest defense contractor. U-S District Judge Lowell Reed called G-E's conduct ''reprehensible'' for defrauding the government on an Army contract. Reed

also sent two G-E employees to jail for fraud.

#90208u0827 07/27/1990 ~United Press International

(JULY 27) UPI - The growing number of children entering pre-school nationwide has prompted education professionals to propose a set of voluntary standards of learning and social skills. The plan proposed by National Association of Elementary School Principals stresses the need for a less-structured, unhurried environment to enhance the development of young children.

A band of intense thunderstorms sent rivers and streams in central, north-central and northwestern Kansas over their banks, leading authorities to post flash flood watches in rural and urban areas. The floods were caused by an 80-mile-wide area of strong storms that was slowly moving east-northeast through the state. Other heavy rain storms hit the Great Plains.

The situation in Liberia is growing more desperate as rebel forces move closer to overthrowing President Doe. Witnesses and diplomats say troops loyal to Doe killed at least two dozen civilians last night. Reports say some of the victims were taken to a beach where they were summarily shot or hacked to death with machetes.

Inmates at Michigan's maximum security Marquette Branch Prison are going to have to find a new way to keep cool. Officials say ice cubes being given to prisoners now contain a skin de-germing agent with iodine that when ingested can cause gastro-intestinal irritation and vomiting. The tainted ice is meant to prevent inmates faking injuries to get ice delivered to their cells.

#90208u0839 07/27/1990 ~United Press International

MIAMI (JULY 27) UPI - Finicky Tropical Storm Arthur weakened Friday and was downgraded to a tropical depression for a second time after its winds dropped to 35 mph, prompting hurricane forecasters to cancel a tropical storm warning posted for Haiti.

Southern Haiti may continue to receive scattered showers as a result of the storm system, but no severe weather, hurricane forecasters said.

Arthur, which packed winds of 70 mph at one point, was downgraded early Thursday to a depression and then upgraded again to tropical storm status at about 10 p.m. EDT. It became disorganized again with maximum sustained winds falling to 35 mph after 6 a.m. Friday.

A system is classified as a tropical storm when winds reach 39 mph and a clear circular cloud pattern is established.

''It has very unorganized rainfall patterns,'' said Miles Lawrence, a meteorologist at the National Hurricane Center. ''These changes are really not important. The wind changes from 40 to 35 miles an hour happen to be at the threshold between tropical storm and depression level, making it look like something's going on.''

At 8:30 a.m. EDT, Arthur was centered near latitude 16.5 north, longitude 76.0 west, about 100 miles southeast of Kingston, Jamaica. Maximum winds were about 35 mph and the system was moving west at near 20 mph.

Arthur, the first named storm of the 1990 Atlantic-Caribbean hurricane season, formed as a tropical depression in the Atlantic July 15 and grew to tropical storm strength Tuesday.

It dumped heavy rains on Tobago and Grenada Wednesday, then turned on a more northwesterly course as it moved over the open Caribbean.

Forecasters at the hurricane center also were tracking a strong tropical wave about 600 miles east of the Lesser Antilles Thursday and said it showed some potential for development. It was moving west at 15 mph.

Forecasters also were tracking an area of low pressure about 400 miles east of Daytona Beach, Fla.

The Atlantic-Caribbean hurricane season runs from June 1 to Nov. 30.

#90208u0893 07/27/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (JULY 27) UPI - President Frederik de Klerk asked black leader Nelson Mandela to drop a communist leader from his team for talks with Pretoria after the state accused communists in the African National Congress of plotting violence, the ANC said Friday.

The ANC also said de Klerk and Mandela, the ANC's deputy president and de facto leader, will meet again Aug. 1 after indecisive talks Thursday on the mass arrests of communists in the ANC allegedly stockpiling arms in the event power-sharing talks with the white minority government fail.

De Klerk summoned Mandela to the urgent meeting Thursday night during a continuing crackdown on ANC elements, saying he wanted the talks because the ANC had ''failed to appreciate the seriousness of the facts.''

The ANC said in a statement its ruling National Executive Committee will review the president's two-hour meeting with Mandela sometime in the next

three days, and Mandela ''will respond in full'' to de Klerk on Aug. 1.

The movement noted de Klerk ''expressed preference for the exclusion'' of the leader of the South African Communist Party, Joe Slovo, from the ANC team due to meet a cabinet delegation for a second round of formal talks on Aug. 6.

The crisis over the alleged plans for an armed insurrection have cast some doubt over the timetable for the talks, aimed at clearing the way to full-blown power-sharing negotiations on ending 42 years of apartheid.

Both sides agreed at their first direct discussions, on May 2-4, to seek a ''peaceful solution'' to South Africa's protracted racial conflict.

The ANC and the SACP have denied their operatives are planning any stepped-up violence, but also note they have not abandoned a 30-year armed struggle against white minority rule.

But the government insists the plot is genuine and has developed separately to the armed struggle, which has become nominal since de Klerk launched his racial reform program in February.

Police have detained at least 45 activists over the past weeks under the Internal Security Act, which permits indefinite detention without trial, and say they will continue their crackdown until satisfied any potential for violence has been averted.

#90208u0896 07/27/1990 ~United Press International

SEOUL, SOUTH KOREA (JULY 27) UPI - Plans for an anniversary rally in a border village next month to mark the end of Japanese colonial rule collapsed Friday when North Korea cancelled a visit to Seoul to organize the event.

The cancellation accompanied by a warning to South Korea of ''serious consequences'' came during renewed contacts between the two sides at Panmunjom, 35 miles north of Seoul.

Blocking the visit originally scheduled for Thursday was a dispute over the lodging site of officials who had planned to attend a meeting in Seoul organized by a South Korean dissident group to organize the ''inter-Korean'' rally in Panmunjom.

North Korean officials initially agreed to follow officially arranged travel plans and rules for maintaining order. They changed their mind after learning their host, the National Democratic Alliance of Korea, was disputing government plans to house them at a plush hotel.

Friday, North Korea sought new contact at Panmunjom.

In a series of telephone conversations the South asked the North to abide by the initial procedural arrangements. North Korea said it will agree to having the visitors guided by authorities while traveling between Seoul and Panmunjom, but hoped they would be solely at the discretion of the host once they arrive at the hotel.

When South Korea insisted the agreed arrangements be followed because it is its responsibility to guarantee safety for the visitors, the North declared that it was cancelling the visit, Seoul officials said.

North Korea in a telephone message accused South Korea of refusing its ''reasonable compromise'' and blocking the proposed visit.

''The South will have to bear due responsibility for the development which will entail serious consequences,'' the South quoted the North as saying.

Also Friday, three other proposed meetings did not materialize because each side rejected the other's requests.

South Korea had asked for separate meetings of military officials and legal experts to discuss North Korean contentions over an perceived border wall and South Korea's legal system. The North had called a meeting of government and political party leaders.

The series of proposals and rejections followed an announcement by President Roh Tae-woo on July 20 proposing temporary free travel between the Koreas to mark the 45th anniversary of the end of Japanese colonial rule on Aug. 15, 1945.

The Koreas have yet to sign a peace treaty following the 1950-53 Korean War.

#90208u0949 07/27/1990 ~United Press International

HONG KONG (JULY 27) UPI - Secretary of Commerce Robert Mosbacher said Friday that upcoming talks with Vietnam on Cambodia's future could lead to an expansion of the dialogue and possible movement on improving U.S.-Vietnamese trade ties.

The meeting set for Aug. 6 in New York is scheduled to concentrate on forging a peace settlement between the Hanoi-backed Cambodian government and a three-party resistance coalition trying to oust it.

Mosbacher said recent changes in U.S. policy on Cambodia could lead to broader discussions with Vietnam and advised American businesses to watch events closely.

''We have talked about a new discourse on the Cambodia issue,'' he said. ''At this point we don't know where that would lead. As our president would say, stay tuned.''

''They (Americans) cannot proceed (to trade with Vietnam) but I would tell them to pay attention to the talks and watch them closely.''

The U.S.-Vietnam talks are a result of a recent shift in U.S. policy toward Cambodia in which Washington ended diplomatic support for the resistance coalition's hold on the Cambodian seat in the United Nations in a move it said was aimed at isolating the most powerful faction, the Khmer Rouge.

Vietnam invaded Cambodia in late 1978 and in 1979 ousted a Khmer Rouge regime believed responsible for the death of at least 1 million Cambodians in four years of power. Hanoi then installed the current Cambodian government.

U.S. firms and individuals have been barred from doing business with Vietnam since U.S. forces were driven out of the nation by communist troops in 1975.

American business lobby groups have said the ban meant American firms were losing out on a $1 billion market. Many U.S. lawmakers have urged President Bush to use the talks to begin normalizing relations between the former foes.

In a related develoment, the Vietnam News Agency reported that Hanoi has granted licenses to 54 foreign investment projects in the tourism, service oil and gas exploration industries during the first six months of this year worth about $245 million.

''Compared with the same period of the last two years, the number of foreign investors increased by 23 percent, that of licenses by treble and the invested capital by 50 percent,'' the report said.

In his first confrontation with the Association of Southeast Asian Nations since announcing the policy shift last week, Secretary of State James Baker said Friday the United States will not tolerate the ''Khmer Rouge's

dialogue of death'' and refused to alter Washington's withdrawal of diplomatic recognition of the Cambodia resistance coalition.

ASEAN officials contend the military strength of the Khmer Rouge make it essential it be accepted as a partner in any settlement.

#90208u0976 07/27/1990 ~United Press International

FORT MILL, SC (JULY 27) UPI - A Jewish-born evangelist's $52 million bid to buy Jim Bakker's PTL ministry and its opulent Christian retreat was in danger of collapse Friday as creditors dragged their heels on finalizing the sale.

''We are very hopeful that the trustee and the creditors can quickly come to a resolution,'' said would-be buyer Morris Cerullo, whose World Evangelism ministry is based in San Diego, Calif.

''However, we made it clear that we cannot stay in this deal much longer '' he added.

The Cerullo bid is the closest the U.S. Bankruptcy Court has come to selling PTL, although a dozen other offers have been considered over the past three years, including some from other evangelists and a few bogus ones.

Cerullo, 58, has offered $52 million for PTL and its Heritage USA retreat - $7 million for its satellite network, which he has placed in an escrow account, and $45 million for the rest of the package. If he backs out now, he still gets the network.

He was in Atlanta, en route to Fort Mill to take possession of PTL, when he learned Thursday night that even though the ministry's secured creditors had approved the sale, they were dickering over language in the sale contract.

Cerullo aborted his trip, checking into an Atlanta hotel to see whether he should continue or return to California.

He issued a statement Friday saying he is satisfied that bankruptcy trustee Dennis Shedd has done everything possible to facilitate the sale. But he warned the creditors that he is not a patient man.

''Time is running out,'' said Cerullo. ''We feel we have gone the extra mile and now it's up to the trustee and the secured creditors to make it happen.

''The remaining issues have nothing to do with our offer,'' he said.

''These are specific issues involving the secured creditors and the trustee and are completely out of our hands.''

The PTL sale appeared to be a done deal Thursday afternoon after the last holdout creditor, the Resolution Trust Corp., agreed to Cerullo's offer.

But then the trustee learned that some of the 29 other secured creditors were waffling over language in a contract that must be signed by U.S. Bankruptcy Judge Thurmond Bishop.

The PTL property is set amid lush, wooded hills that straddle the North Carolina-South Carolina line. It includes 2,200 acres of prime real estate a television studio, satellite network, two luxury hotels, a miniature train and water slide, still standing after the Rev. Jerry Falwell slid down it fully clothed to raise $1 million in his failed attempt to save PTL.

Cerullo says his mother was a Russian Orthodox Jew and his father an alcoholic Italian. His mother died when he was 2 and he was raised in a Jewish orphanage but became a born-again Christian at the age of 14 after an orphanage employee slipped him a copy of the New Testament.

Bakker, serving a 45-year term at the Federal Medical Center in Rochester, Minn., for his conviction last year on charges of fleecing his flock at PTL, could not be reached for comment on Cerullo's intended purchase.

Like Bakker, Cerullo was ordained by the Assemblies of God. But he made it clear through a spokesman that he will not be imitating Bakker's unique ministry.

''We want Christians to know that we are not resurrecting the Jim and Tammy dream,'' said Kirt Salisbury, his vice president of communications.

#90208u0980 07/27/1990 ~United Press International

(JULY 27) UPI - The government today reported the nation's weak economy grew only one-point-two percent in the second quarter... held down by a plunge in exports. The weak showing in the gross national product follows a one-point-seven percent gain in the first quarter. Reacting to the news, Pittsburgh economist Norman Robertson said- ''We are teetering on a borderline recession.''

Prices at the gas pump may be on their way up. OPEC ministers meeting in Geneva today unanimously agreed on hiking the target price of oil from 18 dollars to 21 dollars a barrel. Delegates say Saudi Arabia and Iraq paved the way for the new price increase. Ministers also raised the ceiling on production... from 22-point-one to 22-point-five-Million barrels a day.

In Washington, senators took the first steps to reform the federal crop insurance program last night by adopting a plan that calls for more realistic rates for coverage. However, still more work is needed on the farm bill, and Senate Democratic leader George Mitchell says he intends to finish it this week- even if it means working into the weekend.

-30- 1271

#90208u0986 07/27/1990 ~United Press International

(JULY 27) UPI - West Germany's revolutionary Red Army Faction claimed responsibility for bombing the car of a security minister as he drove to work today in Bonn. Police say the vehicle was badly damaged in the early morning blast, but Deputy Interior Minister Hans Neusel suffered only minor injuries and was able to walk to his office to get help.

In Jakarta, Indonesia, U-S Secretary of State Baker today refused to back down on Washington's withdrawal of diplomatic recognition of the Cambodia resistance coalition. Baker told ASEAN foreign ministers the United States won't tolerate what he called the ''dialogue of death'' of the Khmer Rouge. He said Cambodian self-determination through elections must NOT be pursued without first ''preventing the Khmer Rouge from shooting their way back into power.''

Finicky Tropical Storm Arthur weakened today and was downgraded to a tropical depression for a second time after its winds dropped to 35 miles an hour. That prompted hurricane forecasters to cancel a tropical storm warning posted for Haiti. But forecasters say southern Haiti may continue to receive scattered showers as a result of the storm system. Arthur had packed winds of 70 miles an hour at one point.

-30- 1383

#90208u0987 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The House moved Friday to wipe an anachronism off its rule book, kicking out a provision requiring Congress to adjourn by July 31 every year unless the nation is at war.

The action also must be approved by the Senate because it is a joint rule affecting both chambers, and some House members expressed fears the Senate might try to add language tampering with the budget act or the Gramm-Rudman budget balancing law.

The rule has been routinely ignored for years.

The last time Congress quit before the deadline was in 1956, when lawmakers managed to get out of town on July 27. The earliest Congress has adjourned since then was Oct. 1 in 1976.

Most years Congress has realized at the last minute it was about to violate its own rules and rushed through to passage a resolution waiving the requirement.

In 1988 Congress just ignored the rule and stayed in session and, Rules Committee Chairman Joe Moakley, D-Mass., noted thankfully, ''no question has been raised'' about the legality of the remainder of the session.

#90208u0992 07/27/1990 ~United Press International

CHICAGO (JULY 27) UPI - Prices for soybeans had another round of seesaw action, resulting in lower prices at midmorning on the Chicago Board of Trade. Grains were higher.

The soy complex was mixed with only soyoil able to rally.

With heavy booking by Japan of new-crop corn shown in the weekly crop report, ideas have been cemented that corn futures need go no lower to attract overseas business. Commercial and commission house buying helped corn prices.

A crop tour this week confirms the potential that the Midwest corn crop this year may top last year's crop, even though the harvest may be delayed a few weeks this fall.

There was some light commercial buying in wheat.

The USDA Friday announced it had accepted a bid from Continental Grain to cover the sale of wheat to Zaire under the export bonus program. Word still was being awaited on Bolivia's tender for U.S. wheat.

Private crop forecaster Conrad Leslie Friday threw a little cold water on thought that the Soviets soon may return to the market, saying their farm debt to other nations is so large they may make no immediate U.S. purchases.

The midmorning prices:

Corn Sep 2.63 3/4 up 1/4, Dec 2.59 up 1/4, Mar 2.66 up 1/4, May 2.17 1/2 up 1/2.

Soybeans Aug 5.92 off 1/2, Sep 5.97 off 3/4, Nov 6.07 1/4 off 2, Jan 6.19 off 1 1/2.

Wheat Sep 3.03 1/4 up 1 1/2, Dec 3.19 1/2 up 1 1/4, Mar 3.28 1/4 up 1.3/4, May 3.27 1/2 up 2 1/2.

Oats Sep 1.33 3/4 up 3/4, Dec 1.45 1/2 up 1 1/4, Mar 1.55 3/4 up 1/2, May 1.61 1/2 up 1/2.

#90208u1052 07/27/1990 ~United Press International
(JULY 27) UPI - A doctor at Baguio General Hospital says two quake survivors are getting medical attention after being pulled the rubble of a hotel in the Philippine resort city. The doctor... who did NOT want to be named... says the two are- in his words- ''alive but they are still being given emergency treatment.''

A Philippine radio station earlier reported the rescue in Baguio, 120 miles north of Manila, saying relatives camped outside the hotel wept and applauded as the woman and man were extricated. Philippine rescuers returned to the rubble in the hopes of finding more survivors. Foreign rescuers had given up hope of finding survivors in the collapsed hotel and had left the country.

The government today blames a plunge in exports for the nation's weak economy in the second quarter. The Commerce Department reports only a one-point-two percent gain in the gross national product following a one-point-seven percent increase in the first quarter. Chicago economist Robert Dederick says the report indicates- quote- ''This is NO doubt an economy that is gasping for air.''

The Federal Communications Commission says it sees NO reason right now to regulate cable television. The F-C-C said in a report to Congress yesterday that cable operators should face greater competition- NOT re-regulation- to ensure fair consumer rates and improved services for Millions of viewers.

The African National Congress says it'll review last night's meeting between South African President de Klerk and Nelson Mandela in the next three days. The A-N-C says the de Klerk asked the black nationalist leader to drop a communist leader from his negotiating team in talks with the government.

(JULY 27) UPI - Plans have collapsed for a joint rally between North and South Korea on the anniversary marking the end of Japanese colonial rule. North Korean officials today cancelled their visit to Seoul to organize the event that was to take place in a border village next month. The cancellation came during renewed contacts between the two countries.

Tropical Storm Arthur has been downgraded again to a tropical depression... prompting hurricane forecasters to cancel a tropical storm

warning posted for Haiti. Forecasters said southern Haiti may continue to get scattered showers because of the storm system, but NO severe weather.

At last report, Arthur was about 100 miles southeast of Kingston, Jamaica... packing maximum winds of about 35 miles an hour and moving west at nearly 20 miles an hour. It's the second time the storm's winds dropped to 35 miles an hour. Arthur at one point carried winds of 70 miles an hour just shy of hurricane strength.

Federal health officials say they're investigating the first case in which a dentist with AIDS may have passed the virus on to a patient. The Centers for Disease Control in Atlanta is NOT revealing the name or location of the dentist... but it does say the dentist is NO longer practicing.

MIAMI (JULY 27) UPI - South Florida should not be expected to absorb all of the new immigrants if there is an exodus from Cuba following Fidel Castro's challenge to the United States to send ''ships and visas,'' local officials say.

The Cuban leader suggested the door might be open for a new exodus from the island nation at an annual revolutionary rally Thursday, in which he reaffirmed his commitment to his socialist revolution despite the changes in Eastern Europe.

''If the Yankees want to receive these so-called persecuted citizens, let them bring in their ships and visas,'' Castro said, referring to Cubans who have sought asylum in foreign embassies. ''It is not us stopping them leaving the country, but they who will not let them in.''

That comment raised concerns in south Florida that another exodus like the Mariel boatlift of April 1980 might by ahead. On that occasion, Castro allowed about 125,000 Cubans to leave over a five-month period, including some released from Cuban prisons.

The majority of those immigrants were absorbed into the south Florida community, which cannot be expected to shoulder the burden again, said Miami Mayor Xavier Suarez.

''One can hardly oppose the free emigration from Cuba of people who are seeking freedom,'' he told The Miami Herald. ''We need the usual safeguards and guarantees so we wouldn't get people from jails. There should be a plan with people going to other parts of the country, and not all peole into one community.''

Dade County Manager Joaquin Avino said the federal government will have to

control immigration ''so we do not get into another Mariel situation.''

The White House and State Department had no comment on the possible influx of Cuban immigrants.

''That's speculative and we don't speculate,'' said Martin Judge, a State Department spokesman, when asked if the agency had a plan to handle mass immigration from Cuba.

Gov. Bob Martinez has made it clear to the federal government that if federal policy results in an influx of Cuban immigrants, the state expects federal support to deal with the problems it causes, said Jon Peck, a spokesman for the governor.

''The biggest problem (during the Mariel boatlift) was the federal government opened the doors and didn't provide anything to the state that had to absorb the influx. That would not be something we would want to see repeated.''

BELFAST, NORTHERN IRELAND (JULY 27) UPI - The Irish Republican Army said Friday it executed a man its members believed had infiltrated the IRA as a British informer.

Police found the body of the alleged informant, Paddy Flood, 30, near Newtownhamilton, 65 miles west of Belfast.

The IRA, in keeping with similar acts in the past, put a hood over the head of the victim and bound his hands behind his back before killing him. Flood reportedly was shot late Thursday with a single shot to the head.

In a statement released from its press office in Belfast, the IRA said Flood had worked as a British informer for three years after police

dropped charges against him linked to activities he performed for the IRA.

British officials declined comment on the charge.

Neighbors of the dead man, who was married with one child, said he had been missing for the past month from his home in Londonderry, 85 miles northwest of Belfast.

Elsewhere, a funeral was held for a Roman Catholic nun, Catherine Dunne, 37, who died along with three police officers in an IRA landmine attack on Tuesday.

Dunne was in a car that was behind the police vehicle. The IRA apologized for her death, saying it was ''a tragic fluke.''

#90208u1168 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - Formally reprimanded by the House for improper actions on behalf of a male prostitute, Rep. Barney Frank, D-Mass., is ready to get on with his work as a lawmaker and champion of liberal causes.

''It is concluded as a legislative matter,'' Frank, the five-term congressman from suburban Boston said. ''Do I forget that it ever happened? No. This is a part of my life. It's a part of which I'm not especially proud.''

But, in sifting through the political wreckage of Thurday's formal rebuke by his colleagues, Frank is likely to find very little damage to his political standing.

He faces a little-known under-financed Republican lawyer in fall's election and is a prohibitive favorite to win a sixth term representing Massachusetts' 4th Congressional District. And House members, in overwhelming rejecting efforts by conservative Republicans to harshen the

sanctions to either expulsion or censure, gave Frank something of a back-handed vote of confidence.

''I like this job very much,'' Frank said. ''I can't think of anything I would rather do, so I would tend to keep running for it.''

Frank, a Harvard-educated lawyer and prominent liberal presence in the House who is repected for his intellect and debating skills, is optimistic he will retain political effectiveness.

''I have not found there to have been any diminution of my role in this place,'' Frank said. ''If this were the first thing people knew about me, then it might have that sort of negative effect. I have been dealing with (House colleagues) for some period of time. Whatever opinion they had of the reliability of what I told them I don't think has been altered by this.''

The 50-year-old Frank is one of two acknowledged homosexuals in Congress. The other, Rep. Gerry Studds, also a Massachusetts Democrat, was censured in 1983 for a relationship with a male House page.

Frank said the episode likely won't affect his career in the House, since it already was ''very unlikely'' he would move up in the leadership because he is a homosexual. But he added, ''I hope there will be a time when someone's sexual orientation won't be an obstacle.''

After four hours of unusually heated and emotional debate Thursday, the House adopted a report by the ethics committee that cited Frank for writing a misleading memorandum on behalf of prostitute Stephen Gobie, who was on probation for felony drug and pornography convictions. Frank also was cited for fixing parking tickets incurred by Gobie when he was driving Frank's car.

Frank has admitted to paying Gobie for sex in 1985 and later hiring him with personal funds as an aide. He claims he fired Gobie in 1987 after learning Gobie was operating a prostitution ring out of Frank's Capitol Hill apartment.

Frank said he has learned from the episode and has changed personally. By publicly announcing in June 1987 that he is a homosexual, Frank said, ''I really resolved the kinds of conflicts and pressures that led me to behave stupidly.''

Frank said that admission lifted a burden off his shoulders, but refused to give advice to others considering such an admission.

''If you look at it objectively, I was in a pretty secure position,'' Frank said. ''But I couldn't be sure of that. And given that, I'm not

going to go tell anybody else, 'Oh, yeah, you ought to do this.'''

He continued: ''I can say this to people: if a man or woman, gay or lesbian, feels he or she can do that without substantial loss, then I can tell them the benefits are enormous. The price you pay for that ultimate concealment is a heavy one.''

Two of the leaders of the failed movement to punish Frank more severely, Reps. Newt Gingrich, R-Ga., and William Dannemeyer, R-Calif., stongly suggested that Republicans will make the House action on Frank an issue in this fall's campaigns.

But Frank accused both of being motivated by an anti-gay agenda and dismissed the issue, saying, ''It is not my impression that I am on the top of people's minds across the country.''

#90208u1173 07/27/1990 ~United Press International

DETROIT (JULY 27) UPI - The baseball auctioned off last week for $9,300 and advertised as the one Babe Ruth hit for his 700th home run is a phony, but because Ruth and his New York Yankee teammates signed it the purchaser will keep it anyway, it was reported Friday.

DuMouchelles Galleries acknowledged the ball offered last Saturday in an auction of celebrity and historical memorabilia was not the one Ruth blasted out of what is now Tiger Stadium on July 14, 1934, for his 700th home run.

Instead, it was a different ball signed by Ruth and his teammates to commemorate the event.

Lawrence DuMouchelle, president of DuMouchelles, said he spoke to the winning bidder Thursday night and the man wants the ball anyway.

DuMouchelle said it was an honest mistake.

''It came in from the collection of a young lady. I know her family very well,'' he said. ''She had purchased these things from reliable people. I think she was probably misled on the thing.''

The winning bid was $8,500. The buyer's premium raised the cost to $9,300, making the ball the most expensive item in the auction. The bidder's name was not released.

DuMouchelle said he did not know the ball was not authentic until after the auction, although another gallery official told the Detroit News that DeMouchelles employees were instructed to tell telephone bidders there

were questions about the ball.

DuMouchelle conceded there were rumblings about the authenticity of the ball, which says National League on its cover, while the Yankees play in the American League. But he said such comments are common before an auction and ''I just can't listen to everybody.

''We do a tremendous amount of research. We sell about 2,000 items a month. We're going to have some slips. We're not perfect.''

DuMouchelle noted all items purchased at the gallery's auctions can be returned within 30 days if the buyer is not satisfied.

ABILENE, KS (JULY 27) UPI - A man who robbed an Abilene bank of $2,251 in 1958 will return to the scene of the crime Saturday to present $50,000 to help the city rebuild a band shell that burned down last year.

Delbert Dunmire, now a wealthy Kansas City, Mo. industrialist, will present the gift to President Bush's press secretary, Marlin Fitzwater, at an 11 a.m. ceremony.

Fitzwater, an Abilene native, will be in the city attending the 30th anniversary reunion of his high school graduating class.

''It's Mr. Dunmire's way of repaying the debt with interest,'' said Ray Zakovich, a special assistant to Dunmire.

Dunmire, president of Growth Industries Inc., which produces airplane parts, is no stranger to philanthropy. Not long ago he purchased 300 assault rifles for the Missouri Highway Patrol at a cost of $300,000.

Dunmire announced at an employees' party earlier this year that he planned to donate the money to Abilene's effort to rebuild the bandshell.

Dunmire was a 24-year-old Air Force Lieutenant when he robbed the Commercial State Bank 32 years ago, stationed at defunct Schilling Air Force Base in nearby Salina. A pilot-navigator, Dunmire was married and had a young daughter.

''He never did get out of town,'' Zakovich said. ''The police shot out all his windows and tires.''

Dunmire eventually got out of town - via Leavenworth federal penitentiary, where he served two years for armed robbery. ''Technically, he should still be there,'' Zakovich said. ''He got out on good behavior.''

Dunmire met Fitzwater about eight months ago at a governors' conference in Washington. ''At that time he asked Marlin if he would accept his contribution,'' Zakovich said. The money will be donated in Fitzwater's name.

Over the past four years Dunmire has donated more than $1 million to law enforcement agencies, primarily for the fight against violent crime and drugs. Zakovich said Dunmire has also given more than $1 million to charitable organizations in the Kansas City area.

Dunmire has expressed an interest in purchasing the building that once housed the bank he robbed and will meet with the owner, Lambert Haug.

#90208u1183 07/27/1990 ~United Press International
ASHEVILLE, NC (JULY 27) UPI - An accused serial killer described by authorities as a ''punk'' had a traumatic childhood that left him emotionally scarred, his mother said Friday.

Lesley Eugene Warren, 22, described by police as ''a punk'' because he wears his orange hair in a punk rocker style, was arrested last week and confessed to killing four women over the past three years, authorities said. He is being held without bond in the Buncombe County Jail.

''I don't uphold what he's done, but he's still my son and I love him,'' said Phyllis Murray, 42. ''I want him to know God can forgive him for what he's done.''

Warren is charged with killing Patsy Vineyard, 20, of Sacketts Harbor, N.Y., whose body was found in Lake Ontario in May 1987; Velma Faye Gray, 42, of Travelers Rest, S.C., found Aug. 27, 1989, in Lake Bowen; Jayme Denise Hurley of Asheville, found last week in the Pisgah National Forest; and Katherine Johnson, 21, also found last week in the trunk of her car in High Point, N.C..

Murray saw her son Monday at an initial appearance in Buncombe County District Court. She said he displayed the same detachment she has seen since a sequence of traumatic events when he was a young child.

''I don't think he understood the seriousness of the charges,'' she said. ''It was like he wasn't even there. It was like, 'If you say I did it, OK.'''

Murray said his detachment in court was similar to the way he has reacted in the past.

''You would know he heard you, but what you said wasn't going in,'' she said.

Murray said her son was 4 years old when he saw his family home burn to the ground in 1971. A few months later his parents divorced. The boy stopped playing and rarely talked.

''It was like he stepped out of this world into another one,'' she said.

His mother remarried two years later and had other children, but she said Warren never felt like he was part of the family. She said he began accepting blame for things he did not do, although she did not dispute the allegations that he killed the women.

''My heart goes out to these women and their families - I feel like he has done some of this,'' the mother said.

In 1980, Warren was charged with breaking into his cousin's home and sent to a juvenile detention center for a year. He was in the eighth grade at the time.

Before he was released, he underwent a court-ordered psychiatric evaluation at Dorothea Dix State Hospital in Raleigh and then was sent to Broughton Hospital because it was feared he was suicidal. He spent a year there.

The mother said her son behaved in some peculiar ways after his hospitalization.

He insisted in restaurants that he sit with his back against the wall so people couldn't sneak up on him. He refused to go to grocery stores. When the family went out to buy clothes, he'd stay in the car.

When he was 16, Warren was sent back to the juvenile detention center after tying up the daughter of his grandparents' neighbor, then sitting down and waiting for police to arrive.

He spent 18 months in jail, then went to live with an uncle in Campobello, S.C.. where he met his future wife.

They married right after he finished boot camp at Fort Drum near Watertown N.Y., where he killed the first of his victims, authorities said. He received a bad conduct discharge in February 1988 for stealing his platoon sergeant's boots, and moved with his wife and infant son back to Campobello.

Last month, his mother said, he called her from a gas station screaming for her to come and get him. He told her he had a terrible headache and a doctor had prescribed medicine, which she saw him inject.

Authorities believe the medicine was ''hot shot,'' a liquified form of cocaine typically laced with heroin.

They also believe Warren may have killed other women. Asheville Police Chief Gerald Beavers said earlier this week that he has received more than a dozen calls from parents whose daughters have disappeared.

''There is a strong possibility that there are other victims,'' Beavers said. ''We are looking into that.''

(JULY 27) UPI - Commerce Department official Michael Darby attributes the stiff second quarter decline in the gross national product to fewer exports of computers and farm crops. But Darby predicts a rebound in the second half of the year, particularly October, November and December. The department says the economy managed only a one-point-two percent gain in the total output of goods and services in the second quarter.

In the Philippines, rescuers today plucked two survivors from the rubble of the collapsed Hyatt hotel, 11 days after a powerful earthquake killed more than 16-hundred people. Relatives camped outside the hotel in Baguio reportedly burst into applause and wept as the man and woman were pulled out. A doctor says the survivors- a hotel employee and a casino worker- are in stable condition with bruises and other minor injuries. He says they lived off rainwater that seeped through cracks in the rubble.

OPEC oil ministers meeting in Geneva, Switzerland, today unanimously agreed to raise the cartel's production ceiling from 22-point-one-Million barrels a day to 22-point-five-Million. The ministers of the Organization of Petroleum Exporting Countries also agreed to raise the target price for oil by three dollars a barrel, to 21 dollars. The agreement came in only two days of talk- extraordinarily quick by OPEC standards. The new production and price levels still must be formally approved by all 13 ministers.

West German police say Red Army Faction extremists have claimed responsibility for a bomb that exploded in the car of a deputy minister in Bonn this morning. Although the car was badly damaged, Deputy Interior Minister Hans Neusel sustained only minor injuries. Police say the blast was triggered by an electronic light beam that probably was switched on someone watching the car.

WASHINGTON (JULY 27) UPI - The Student Loan Marketing Association said Friday it is considering taking over the loan portfolio of the Higher Education Assistance Foundation, a troubled guarantor of student loans.

''The Department of Education has invited Sallie Mae to propose ways in which it could participate in a resolution of HEAF's financial difficulties,'' Sallie Mae, as the federally chartered corporation is known, said in a statement.

The announcement came in response to a Wall Street Journal article indicating that Sallie Mae had already bid to take over the student loan portfolio of HEAF, of Overland Park, Kan.

''Among the options being explored on a preliminary basis is the

possibility of Sallie Mae's being designated by the secretary of education as a guarantor of student loans originated under the Guaranteed Student Loan Program,'' the Sallie Mae statement said.

With such a designation, Sallie Mae would consider moving to take over the $9.6 billion HEAF portfolio, said Ross Kleinman, a Sallie Mae spokesman.

HEAF, one of the nation's largest guarantors of college student loans, has sought federal assistance to ease financial difficulties that resulted from too many defaults on its loans to students.

The government backs 80 percent of the value of a defaulted loan, but HEAF and other guarantee agencies, must reimburse the full amount to banks.

The foundation, which guarantees more than $9.6 billion in student loans, recently asked the Department of Education to approve a merger with a smaller agency to ease what the department has called ''serious financial problems.''

Sallie Mae buys student loans and is the owner or source of more than $51 billion in outstanding loans. The company said it is considering a number of options in what could amount to a government rescue of the troubled HEAF.

''Any solution Sallie Mae would propose or undertake would be in keeping with its mandate to support the higher education credit market and in the best interest of its investors,'' the company said.

Disclosures earlier this week about HEAF's problems prompted a steep decline in Sallie Mae's stock, which dropped $4.125 a share Monday and was cited as a factor in the day's overall market slide.

Banks make college loans under three federal programs. These loans are insured by one of 55 guarantee agencies, such as HEAF. The government, in turn, reinsures the agencies against losses from defaults, which total about $2 billion annually.

#90208u1255 07/27/1990 ~United Press International

BAGUIO, PHILIPPINES (JULY 27) UPI - A man and woman rescued from an earthquake-flattened hotel Friday night said they survived 11 days under the rubble by drinking their urine and rainwater and talking to each other.

''Mother, father, I am safe,'' cried Arnel Calabia, 27, a security guard, in a radio interview from a hospital where he and Luisa Mallorca, 21, a casino employee, were taken after they were pulled out of the crushed Hyatt Terraces Hotel.

Officials said miners tunneling through concrete slabs and twisted steel heard Calabia scream, ''Help, help,'' and pulled them out from the third floor of the hotel at about 9 p.m.

The hotel was one of 28 buildings in Baguio, 120 miles north of Manila, crushed by the July 16 temblor that measured 7.7 on the Richter scale.

The military Office of Civil Defense said the quake killed 1,609 people, left 1,037 missing and presumed dead and more than 3,000 injured.

The rescue came five days after foreign experts from Japan, Britain and Singapore gave up hope of finding survivors and left the devastation caused by the worst quake to hit the Philippines since August 1976 when a temblor and tidal wave killed more than 3,000 people.

Doctors at the Baguio General Hospital pronounced Calabia and Mallorca in stable condition and said they were resting in their rooms.

Dr. Samuel Aleta said the survivors were pale, hungry and had minor bruises but were otherwise in good health.

Government spokesman Horacio Paredes said Mallorca and Calabia told hospital authorities they never lost hope in the 11 days they were trapped.

''They said they survived by drinking their urine. The workers found a cup near them which they apparently used,'' Paredes said.

''At times, they said they drank rainwater seeping through the ruins. They said they spent the days talking to each other and praying. They never gave up hope,'' Paredes said.

Calabia told radio station DZMM he was sitting in the administration office when the temblor struck at 4:26 p.m.

He said Mallorca yelled, ''We should jump out. Somebody said 'no, don't jump. Let's stay here.''

''We hid under the table. Then we did not know what happened next. It was dark. I talked and Ging Ging (Mallorca's nickname) talked,'' Calabia said.

He said throughout his ordeal he was in a sitting position with his three fingers on the right hand severely injured.

Calabia said three other companions were killed instantly and a fourth died on the fourth day.

Officials said 18 bodies were retrieved from the hotel. About 60 hotel

employees and 30 guests, including five Filipino-Americans, two Hong Kong Chinese, three Dutch and an Omani, were reported trapped and presumed dead.

Paredes said the discovery of Calabia and Mallorca gave workers digging through the ruins of the hotel hope of finding more survivors. ''Hope springs eternal now that they've found survivors,'' Paredes said.

WASHINGTON (JULY 27) UPI - Legendary actress Katharine Hepburn and jazz great Dizzy Gillespie head the list of the five outstanding artists chosen as this year's Kennedy Center honorees, it was announced Friday.

Composer Jule Styne, director Billy Wilder and opera star Rise Stevens round out the list of artists chosen for their outstanding cultural contributions to America's culture.

In announcing the 13th annual selections, Kennedy Center Chairman James Wolfensohn said the five were being honored ''for enriching all our lives through their lifelong dedication to their art.''

He called Gillespie ''a groundbreaking musician who transformed the sound of jazz'' and termed Hepburn ''an award-winning actress whose very name stands for classic American films.''

The recipients are recognized for their contributions to America's cultural life through the performing arts - dance, opera, theater, music, motion pictures and television.

Hepburn, 80, is the only movie star to win four best-acting Oscars. Her nearly 50 movies include ''The Philadelphia Story'' and ''The African Queen.'' Besides her four Academy Awards for best acting, she was nominated for an Oscar eight other times.

Gillespie, 73, is regarded as one of the creators of modern jazz, and with saxophonist Charlie ''Bird'' Parker, pioneered the style known as ''bebop'' in 1945.

The Austrian-born Wilder, 84, began as a screenwriter and moved to Hollywood in 1934, and made his mark as a director of some of the most memorable dramas of the 1950s: ''The Lost Weekend,'' ''Sunset Boulevard'' and ''Stalag 17.''

Abandoning a classical concert career for pop music, Styne, 85, went to Hollywood as a vocal coach in the 1930s and later teamed with lyricist Sammy Cahn to write film scores, including the Academy Award-winning song, ''Three Coins in a Fountain'' in 1954.

Stevens, 77, a mezzo-soprano, studied at the prestigious Juilliard School and made her debut at the Metropolitan Opera in New York in 1938. She was with the company for 23 seasons and was noted for her roles in ''Carmen'' and Gluck's ''Orpheus.''

President and Mrs. Bush will receive the honorees at the White House Dec. 2, as part of the traditional Honors weekend, followed by the gala performance at Kennedy Center.

The gala, a star-filled evening of tributes by celebrities and performances, will be taped for broadcast on CBS as a two-hour special.

Past honorees have included Helen Hayes, Mary Martin, Claudette Colbert, Myrna Loy, George Burns, former Kennedy Center Chairman Roger L. Stevens, violinist Isaac Stern and conductor Leonard Bernstein.

VIENNA (JULY 27) UPI - A cutback in Soviet oil flowing through Moscow's ''friendship pipeline'' to Eastern Europe is creating long lines at gas stations and putting a new squeeze on the region's shaky economies.

Reductions in oil exports announced by Moscow earlier in the month triggered a sharp hike in gasoline prices in several countries and are forcing governments to look to the Middle East for oil, adding further strain to dwindling hard currency reserves.

Worst-hit is Bulgaria, where gasoline remains in extremely short supply despite a doubling of prices on Monday.

''A painful adaptation lies ahead,'' Prime Minister Andrei Lukanov warned members of parliament in a briefing on the crisis Thursday.

He said the increase in gasoline prices was an ''emergency measure,'' adding his government had no advance warning of an estimated 200,000-ton shortfall in contracted oil deliveries.

Most gasoline stations in the capital have been closed for most of the week, with a handful staying open to service state-owned taxis. At one filling station that reopened to the public Friday, motorists lined up several blocks to get gas.

Those who succeeded paid dearly - a tankful of gasoline for an economy car cost upwards of $7, about one-fifth of the average Bulgarian's monthly income.

But because of higher prices many Bulgarians have stopped using their automobiles, and as a result the yellow-brick streets of downtown Sofia were virutally deserted.

''You don't have to look both ways when you cross the highway,'' remarked one motorist, a 35-year-old teacher who waited more than half an hour Friday to get gasoline.

As a result of the reduced flow of oil in the so-called ''friendship pipeline'' to Eastern Europe, increases in gasoline prices also were announced this month in Romania, Czechoslovakia and Hungary.

Gasoline prices in Czechoslovakia shot up 50 percent last week following an announcement that Moscow was cutting oil exports to Prague by 16 percent.

Oil deliveries to Hungary were expected to be down by 30 percent in the current quarter, the official news agency MTI said, adding that further cuts could force the closure of the giant Szazhalombatta refinery.

''The implications are no less grim for the state budget,'' said MTI, which said the government would have to look to other markets to purchase up to 300,000 tons of oil.

#90208u1284 07/27/1990 ~United Press International

SEOUL, South Korea (JULY 27) UPI - South Korea's main opposition party passed a resolution Friday calling for the merger of anti-government groups into a single movement and unanimously re-elected its leader, Kim Dae Jung.

Kim, who was re-elected at a national convention of the opposition Party for Peace and Democracy, in a speech renewed a demand that the National Assembly be dissolved and replaced by a new one through elections.

He said the current National Assembly, controlled by the government party, does no longer reflect the wishes of the people properly.

All 70 lawmakers of Kim's party and 10 other opposition legislators have submitted resignations protesting disputed legislation passed at a recent National Assembly session.

The more than 1,800 delegates at the opposition party convention also adopted a resolution calling for an early merger of all anti-government forces into a large unified opposition party.

The resolution accused the ruling Democratic Liberal Party of seeking to

replace the presidential form of government with a parliamentary Cabinet formula to prolong its one-party rule.

The controversial laws opposed by Kim's party include a measure placing the entire armed forces under a unified command and other bills seeking to restructure the nation's broadcast systems.

Opposition politicians have charged that the new command arrangement could weaken civilian control over the military and the broadcast restructuring will bring networks under government control.

The government has said the new command system was needed to meet the changing military situation in Korea and the broadcast laws were designed to accommodate demands for more varied information and help the existing networks improve management.

#90208u1285 07/27/1990 ~United Press International

BEIRUT, Lebanon (JULY 27) UPI - Christian Gen. Michel Aoun moderated Friday his defiant opposition to an Arab-proposed peace plan for Lebanon, saying he would accept the Taif peace accord if minor changes are made.

''I am not opposing the peace plan. I am for the Taif accord,'' Aoun said during a news conference at his bunker in the Presidential Palace at Baabda, southeast of Beirut.

Observers say it appears the general has decided to be more diplomatic about the accord, which he has rejected since it was adopted by Lebanese legislators last October at the Saudi Arabian resort of Taif.

But is not clear how deep his support is for the Taif plan. He insists that Lebanon elect a new Parliament to ratify all reforms in the accord and says he is proposing a plan that is better than the Taif accord.

''There are some contradictions in the Taif accord and I asked (Arab League envoy Lakhdar) Ibrahimi to make some efforts to correct these contradictions,'' Aoun said.

''I am proposing another plan which is more constructive and more consistent by accepting all what they have made in Taif and after Taif,'' Aoun said at the press conference.

Accepting decisions made ''after Taif'' is significant in that it implies Aoun may recognize Syrian-backed Christian Maronite President Elias Hrawi who became president after the accord. Aoun has claimed he is the only legitimate authority in the country and refused to yield the Presidential Palace to Hrawi.

The local press has speculated that Aoun may be looking for a face-saving compromise that will leave with an important post, probably in the military.

''What I am asking now is to change the order of one paragraph of Taif by giving priority to stabilization and security, and then discussing reforms '' Aoun said Friday.

And he said, ''I asked them to implement the Taif accord until having new elections, which must lead to a new Parliament.'' The last parliamentary election was 14 years ago; the constitution stipulates elections are to be held every six years.

Aoun said the new Parliament should vote on the reforms of the Taif accord.

The general's new tone follows four rounds of talks with Ibrahimi who arrived in Beirut July 15 to persuade Aoun to accept the accord as written.

Aoun rejected the accord because it did not assure a speedy withdrawal of some 35,000 Syrian troops from Lebanon and for giving the Moslems a greater share in power.

Last year the Christian general launched a war to force Syrians out of the country.

Asked Friday whether he fears the Syrians would blockade areas under his control as they did during the war, he said: ''There is no reason for the Syrians to impose a blockade because nobody is threatening their security or their interests.''

In January, Aoun began war with the Christian Lebanese Forces militia of Samir Geagea that resulted in more than 1,000 deaths and forced 200,000 Christians to flee the country.

Asked Friday if he was expecting Lebanese leaders to have a positive answer to his proposals, Aoun said: ''I hope so. If they want really to implement Taif and are sincere in what they are proposing, I believe they will answer positively to my proposals.''

Newspaper reports Thursday said Aoun rejected a call from Hrawi, made through Ibrahimi at their last meeting, to join the national reconciliation process.

#90208u1305 07/27/1990 ~United Press International

TINLEY PARK, IL (JULY 27) UPI - All of Hank Williams Jr.'s rowdy fans

were able to settle down Friday when his manager said Friday the country western star cut short his performance at the World Music Theatre because of a stomach virus.

''He was ill before he ever left the office,'' said Wilma Jackson, from Williams' headquarters in Paris, Tenn. ''On a lot of his songs he even had to sit down. It's just a stomach virus.''

Williams performed only about 40 minutes of a 90-minute concert Thursday night at the newly opened theater. His abrupt departure from the stage, with no explanation, left fans angry and hurt.

Thousands of people stormed out of the theatre after throwing trash and bottles on the stage, said Prince Mayne, operations director for WCCQ-FM, Joliet, which plays a country western format.

''He was not very active on stage,'' said Mayne, who attended the concert. ''It wasn't really right. He looked like he was working hard at trying to be up but he just wasn't there.''

Mayne said callers to the station Friday morning had a variety of reactions to the news Williams was ill. The near sellout crowd of more than 30,000 shouted obscenities after Williams left the stage.

''A few said they were hurt to hear many people saying obscene things about Hank,'' Mayne said. ''They said it hurt because Hank normally doesn't put on a show like this.''

Officials at World Music Theatre refused to comment on the concert and referred all questions to Jackson.

Jackson said there were no plans for a makeup concert even though Williams did make good on one performance he cut short last year.

Williams was expected to perform Friday night at Alpine Valley, Wis., Jackson said.

#90208u1320 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The defense rested its case Friday without calling Mayor Marion Barry to testify in his own behalf, and the jury was scheduled to begin deliberating next week on 14 counts of drug and perjury charges against him.

The defense case, which lasted a week, followed two weeks of jury selection and five weeks in which the government presented its case. The prosecution called a slew of witnesses to testify about Barry's alleged

involvement with cocaine, opium and marijuana dating back to 1983.

Attorney R. Kenneth Mundy called 17 witnesses to testify in Barry's defense, attempting to cast doubt on specific dates and allegations from a number of the misdemeanor cocaine possession charges. He also sought to discredit the testimony of the government's chief witnesses and question the motives of federal investigators in targeting the three-term Democratic mayor.

But despite Mundy's promises of ''thrills'' and ''surprises'' in the defense case, Barry never took the stand and Mundy's most explosive comments came without the jury present. He alleged at a bench conference Thursday that the FBI agents who participated in Barry's Jan. 18 sting at the Vista International Hotel in Washington were part of an ''assault force'' targeting black elected officials nationwide.

The FBI denied the allegation, and Assistant U.S. Attorney Judith Retchin said in court Friday there is ''absolutely no truth to the charges.''

Retchin added that the female FBI agent who participated in the sting - posing as a friend of Barry's former lover, Rasheeda Moore, and eventually selling the crack cocaine Barry is seen smoking on a surveillance videotape - was the first agent asked to play the part.

Mundy had charged that ''several'' black female FBI agents turned down the role, calling it ''morally repulsive.''

Retchin also said ''absolutely no witness'' was offered money to testify against the mayor, although Mundy alleged Thursday that the government paid Moore $30,000 for her cooperation.

Mundy's allegation Barry is the target of a conspiracy against black officials was the first time the issue had arisen in the courtroom.

Mundy promised at the outset to ''put the government on trial,'' and Barry has conceded he is hoping the jury will refuse to convict him in part because of what he claims were excesses by prosecutors.

Mundy told U.S. District Judge Thomas Penfield Jackson the defense ''considered extensively'' having Barry testify but that it was Barry's ''informed decision'' not to take the stand.

The government planned to call a handful of rebuttal witnesses Friday but hoped to complete rebuttal by the end of the day, said Assistant U.S. Attorney Richard Roberts.

Closing arguments would then be held Monday before the jury would begin deliberating, Jackson said.

If rebuttal lasted until Monday, attorneys would be given a day to prepare before closing arguments Wednesday, said Jackson.

The 18-member jury pool, from which 12 will deliberate, consists of 13 blacks and five whites. It has been sequestered throughout the trial, which was ending its eighth week Friday.

During the calling of defense witnesses, Mundy and his assistant, Robert Mance, appeared to be most successful in casting doubt surrounding the dates and circumstances alleged in three of the 10 misdemeanor cocaine possession charges.

Barry, 54, also faces three felony counts of perjury and single misdemeanor charge of conspiring to possess cocaine.

He could be sentenced to 26 years in prison and fined $1.85 million if convicted of all 14 counts.

The government's case, highlighted by the videotape of Barry smoking crack included 26 witnesses - 10 of whom testified they used cocaine with Barry or supplied drugs to him in 20 homes, 15 hotels, four boats and two government offices in the District of Columbia, Atlanta, the Virgin Islands and the Bahamas.

Under cross-examination Friday, FBI agent Ronald Stern, who headed the sting operation, said agents did not arrest Barry when he took possession of the crack - rather than after he smoked it - because they did not know whether he had criminal intent.

Stern said Barry could have planned to turn Moore - who actually was working with the FBI - in to police or could have flushed the crack down a commode.

Prosecutors claim Barry paid $30 for the crack, and Mundy asked: ''Would it seem likely to you that he would give $30 for drugs then flush them down the toilet?''

''We had to wait to see what his intentions and what his motivations were '' testified Stern. ''Anything could have happened at that stage.''

Prosecutors contend Barry is heard on the Vista tape asking for drugs through a series of code words, such as ''sniffing.''

Mundy told Stern ''it takes a stretch of the imagination'' to equate those terms with drug use.

''I think if you review the tape it speaks for itself,'' Stern shot back.

Barry, who has said he will not seek a fourth term but could still technically run as an independent, is scheduled to leave office Jan. 2.

Under federal guidelines, he would almost certainly be sentenced to some prison time if convicted of any of the felony perjury counts. He would be forced from office if jailed after a felony conviction.

#90208u1334 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The House and the Senate voted Friday to impose trade sanctions against Iraq until its human rights record improves, but the House measure would allow the penalties to be waived if they hurt American farmers.

Both houses attached amendments cutting off credit guarantees that Iraq uses to buy U.S. agricultural exports to the farm bill, which still must be passed by Congress before it can go to President Bush. The differences between the sanctions would be worked out by a conference committee.

The administration opposes the sanctions on grounds that they would only harm American farmers. But supporters of sanctions argue Iraq's record is so offensive there is no reason to continue giving it any help.

U.S. officials have expressed concern about Iraqi attempts to obtain nuclear weapons and have accused Iraq of human rights abuses ranging from the torture of children to poison gas attacks against Iran and Iraq's Kurdish minority.

Iraqi President Saddam Hussein has threatened to ''scorch half of Israel'' with poison gas if it attacks Iraq, and he massed troops on the Kuwaiti border this month to force his Persian Gulf neighbor to agree to higher oil prices.

''He (Hussein) is a butcher, a torturer,'' said Sen. Alfonse D'Amato, R-N.Y., sponsor of the Senate amendment. ''We've got to stand up at this point in time or the mad dog will go further and further.''

The House approved sanctions 234-175 but then voted 208-191 to allow the administration to waive them if they hurt U.S. farmers more than Iraq. The Senate voted 83-12 for the sanctions after killing a waiver proposal 57-38.

Both houses resounded with condemnation of Iraq, but strong concerns were raised that sanctions could hurt farmers in the same way as the grain embargo imposed to protest the Soviet invasion of Afghanistan in 1979.

Sen. Lloyd Bentsen, D-Texas, said sanctions only work if they are backed

by other countries and predicted cutting credits to Iraq would shift business to foreign competitors.

Sen. Phil Gramm, R-Texas, said ending credit guarantees ''is like threatening this terrible bully ... by pulling a gun and putting it to your head and saying, 'If you threaten me I'll shoot myself.'''

But D'Amato compared Hussein to Adolf Hitler, and Sen. William Cohen, R-Maine, said arguments that the sanctions would be ineffective masked ''a policy of appeasement.''

This fiscal year, Iraq received $500 million in agricultural export credit guarantees from the Agriculture Department and $200 million in financing from the Export-Import Bank. The guarantees protect lenders in case of a default.

Iraq is the largest market for American rice, buying 23 percent of total U.S. exports. It also purchases U.S. products including cattle, eggs, corn sugar, chicken, lumber and tobacco.

The amendments would deny Iraq credits until the president certifies it complies with international human rights agreements and with treaties barring chemical weapons and nuclear proliferation.

The Senate amendment also bans commercial military sales to Iraq and sales of dual technology equipment that could have military applications.

Last week, the White House blocked the export of four furnaces to Iraq after an investigation revealed they could be used for making military gear or components of nuclear devices, officials and sources said.

The decision July 16 by the National Security Council, which acted on a recommendation from the Pentagon, overrode a year-old Commerce Department grant of export licenses to the Consarc Corp. of Rancocas, N.J., for the furnaces and related computers to drive them, the sources and officials said.

In an unrelated action last April, the Agriculture Department said it would withhold credit guarantees to Iraq pending completion of an investigation into possible irregularities in past sales to that country.

The irregularities involved Iraqi state enterprises buying U.S. corn, rice and sugar at prices well above world rates in the mid-1980s and then seeking ''after-sale services,'' such as cash rebates, from their U.S. exporters.

#90208u1368 07/27/1990 ~United Press International
(JULY 27) UPI - Just as he promised, Louisiana Governor Buddy Roemer today vetoed a strict anti-abortion bill, saying it was both an insult to women and technically flawed. The bill would have made virtually all abortions a felony with penalties of up to 10 years in prison for a doctor who performed them. Roemer told a news conference in Baton Rouge that he believes abortion as a form of birth control must be curtailed. But he says the bill passed by the state Legislature failed to meet ''even the minimum'' standards he had set for acceptable restrictions.

Negotiators wrangling over the federal budget todray recessed their talks for the weekend with NO formal deficit-reduction plans on the table. President Bush convened congressional leaders at the White House for a fourth meeting in as many days. But participants said afterward there was little progress to report and mounting frustration.

Secretary of State Baker met with Southeast Asian Nations foreign ministers today in his first confrontation since announcing the U-S policy shift on Cambodia last week. Baker told the ministers in Indonesia that Washington won't budge on its withdrawal of diplomatic recognition of the Cambodia resistance coalition. Baker says the United States won't tolerate what he called the ''Khmer Rouge's dialogue of death.''

#90208u1371 07/27/1990 ~United Press International
ANCHORAGE, AK (JULY 27) UPI - A small plane that disappeared seven years ago has been found in mountainous terrain southwest of Anchorage with the remains of its three occupants, authorities reported Friday.

A passing helicopter pilot's chance discovery of the crash closes one of the 50 cases of missing airplanes, presumed crashed, that have occurred in Alaska over the last 20 years, said James Michaelangelo, chief Alaska investigator the National Transportation Safety Board.

There have been a handful of rare occasions where old crashes are discovered, Michaelangelo said.

After so many years, few clues are likely to point to the cause of the crash, but he said the NTSB would investigate.

The Alaska State Troopers flew to the site Friday to recover the remains of Jack Myers, 44, of St. Louis, Cedric Lucas, 55, of Mill Valley, Calif., and Ralph De La Ronde, 56, of Anchorage, trooper spokeswoman Kathy Wolgemuth said.

Myers, who worked as a commercial pilot for Pan American, was flying the trio on a fishing trip in a Cessna 180.

The float plane left Lake Hood in Anchorage on June 11, 1983 and 11 days later, when it failed to return, families called authorities, Michaelangelo said. A two-week search turned up nothing - until Wednesday when a helicopter pilot told the NTSB what he had seen.

The plane was headed for Nonvianuk Lake, 250 miles southwest of Anchorage but was found short of its destination, Federal Aviation Administration spokeswoman Mary Lou Wojtalik said.

The wreckage was found near a glacier in rough terrain. Michaelangelo said that despite the extensive search, sometimes it takes someone looking at the right place at exactly the right moment when perhaps a glint of sunlight might reveal a crash that eluded searchers.

He also said that movement of ice and snow and earth and the weather may cause the wreckage itself to move, thus helping to hide or reveal crash sites.

''Crashes do move,'' he said. ''People don't realize that.''

#90208u1380 07/27/1990 ~United Press International
RENO, Nev. (JULY 27) UPI - A young man who entered into a suicide pact after listening to hours of the albums of the rock group Judas Priest believed the music influenced his actions, a psychiatrist testified Friday.

Dr. Bruce Tanenbaum said that James Vance ''didn't care if he ever got a dime from the law suit'' against Judas Priest and CBS Records. Vance, who survived for three years after blowing away his face, ''felt other people needed to be aware of the dangers'' of the music, said Tanenbaum as the trial ended its second week.

Vance, who was than 20, and his friend Raymond Belknap, then 18, took a shotgun after listening to hours of the record ''Stained Class'', drinking beer and smoking marijuana on Dec. 23, 1985. Belknap shot himself and died instantly. Vance shot himself, but survived until he died from complications of the wounds and prescription drugs in November 1988.

The families claim subliminal messages on the record telling the young men ''Do it'' are responsible for the suicide. They are seeking damages which have not yet been specified except for the more than $400,000 in medical bills for Vance.

Tanenbaum said he treated Vance's mental problems after the incident. Vance, according to the psychiatrist, was ''not in a suicide zone'' the day of the shooting.

He said there was nothing, outside the music, driving him to suicide. ''I cannot see any other event that would have led James to suicide,'' said Tanenbaum.

On that day, Tanenbaum said the two ''were celebrating,'' with Christmas just around the corner. ''They were listening to music, drinking beer and smoking marijuana which is typical of adolescents,'' he said.

''I don't see any stress or circumstances to push him to be suicidal,'' said Tanenbaum, talking about that December day.

Attorneys for the families are expected to complete their case next week.

They have not given any indication whether they will call the four members of the band who cut the record in 1978. The band has denied there were any subliminal messages hidden on the record.

District Judge Jerry Whitehead, who is hearing the case without a jury, has ruled that the music and the words on the album are protected from liability by the First Amendment of free speech. But he has ruled that subliminal messages, if there are any, can be a target for damages.

Attorneys for the family have presented a biologist-turned-sound engineer to testify that after hundreds of hours of listening to the record, he uncovered the words ''Do it'' at least seven times. William Nickloff Jr., testified these phrases were masked by drum beats.

But Nickloff, when he listened to each of the 24 tracks of the album, never was able to hear any voice giving this command. It was only when he meshed some of the sound tracks that the message was able to be deciphered he said.

Vance, in his pre-trial deposition before he died, never said he heard the ''Do it'' commands.

#90208u1382 07/27/1990 ~United Press International

(JULY 27) UPI - The defense rested its case today in the cocaine and perjury trial of Washington, D-C, Mayor Marion Barry. Lawyers defending Barry called only 17 witnesses and Barry never took the stand during rebuttal testimony that lasted only a week. In five weeks of testimony, the prosecution called a slew of witnesses to tell about Barry's alleged involvement with drugs dating back to 1983. The jury in the case is scheduled to begin deliberating early next week.

Many Kansas residents are wading through flooded streets today after a wide band of thunderstorms dumped three to four inches of rain on parts of the state overnight. Flash flood watches were posted after rivers and streams overran their banks in central, northcentral and northwestern parts of the state. Forecasters predicted more rain in the area today.

Officials in South Florida say the area should NOT be expected to absorb a potential new wave of Cuban refugees. Miami Mayor Xaviar Suarez says he wants a plan that guarantees Cuban immigrants will be re-settled throughout the United States. His comments are in response to Cuban leader Fidel Castro's remarks that Cubans who want to go to the United States can leave.

#90208u1443 07/27/1990 ~United Press International

MOSCOW (JULY 27) UPI - A Soviet broadcast journalist punished for controversial reports cited continuing abuses of glasnost Friday, including a recent television ban on Boris Yeltsin.

Reporter Alexander Zhetvin also said that Mikhail Gorbachev's presidential decree earlier this month, though ostensibily aimed at ending Communist Party control of the airwaves, has ominous clauses that may violate a new law ending press censorship.

Zhetvin told the weekly Argumenti i Fakti newspaper that he has been yanked from the air several times this year after he covered politically sensitive stories on state-run radio or television.

''Unfortunately, taking people off the air has become fashionable for radio and television,'' Zhetvin said.

Zhetvin said his broadcasting opportunites were terminated in February when he covered a pro-democracy rally outside the Kremlin and in June after he questioned Soviet leaders' travel privileges.

The reporter said he is currently under wraps again because of an on-air exchange he had about Soviet state founder Vladimir Lenin at the recent 28th Communist Party Congress.

''The surprising thing is that there is no longer any (official) order in taking someone off live broadcasting, and no political assessments are given,'' Zhetvin said. ''They simply call you in and say that you are not working professionally.''

Zhetvin charged that all TV coverage of the radical Yeltsin, one of Gorbachev's strongest critics and a potential rival for power, was banned by order of Nikolai Reshetov, deputy chairman of the State Television and Radio Committee, until his election May 29 as president of the Russian Federation.

Hard-liner Yegor Ligachev could get on television ''on his first telephone call,'' but an interview with Moscow Mayor Gavriil Popov, a radical, was prohibited, Zhetvin said.

Gorbachev's July 15 decree gives local governments, political parties and public organizations access to TV and radio studios, though it requires them to pay all costs and demands that they gain approval from the central government.

Zhetvin criticized the decree, however, saying that it forbids state TV and radio employees from stating personal opinions on the air.

Zhetvin said the provision contradicts an anti-censorship law passed last month by the Soviet Parliament, which he said ''prohibits such discrimination even if the personal viewpoint of the journalist differs from the opinion of the leaders of the media organ where he works.''

The broadcast journalist said his problems began in February last year, when he was demoted to a lower-paying job for three moths after his report on the massacre of 15,131 Polish army officers by Soviet secret service agents at Katyn Forest in 1940.

After the Soviet government reversed a half century of denials three months ago and admitted responsibility for the Katyn massacre, Zhetvin said he asked his bosses to remove the demotion from his record.

Mikhail Nenashev, director of the Soviet broadcasting committee, conceded the punishment was unjust but refused to annul it, Zhetlin said, explaining that ''he didn't want to set a precedent that would lead to a flow of appeals from unjustly insulted people.''

The newspaper that published the interview with Zhetvin ran into trouble itself last October when it published an opinion poll on the Soviet Union's most-respected politicians, in which Gorbachev was not among the top 37 vote-getters.

The survey enfuriated Gorbachev, who called together the country's top editors, lectured them on responsible journalism and demanded that the head of Argumenti i Fakti resign.

But the editor, Vladimir Starkhov, refused to quit and has built the newspaper into the Soviet Union's most popular publication with a circulation of more than 33 million readers.

#90208u1455 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - With President Bush's approval, the Air Force this week quietly ended its 29-year-old practice of keeping a ''Looking Glass'' emergency command plane in the air at all times in case of a surprise nuclear attack.

With no fanfare or advance public notice, the last in an uninterrupted string of flights named ''Looking Glass'' landed at Offutt Air Force Base near Omaha, Neb., at 2:28 p.m. CDT Tuesday.

The United States began the flights from Offutt on Feb. 3, 1961, shortly after the inauguration of President John F. Kennedy and at the height of the Cold War.

Ever since then, one of several EC-135 planes - a military version of a Boeing 707 - has been flying over the United States at all times to act as an emergency command post should a surprise nuclear attack kill the top U.S. political and military leaders.

As soon as one plane landed, the next would take off. But that practice

ended Tuesday, with more than a quarter of a million hours of accident-free flying.

Now, the Looking Glass planes will remain on ground alert and fly ''random sorties'' each week, Maj. Dennis Pierson, a spokesman for the Strategic Air Command at Offutt, said in a telephone interview Friday.

''The roles and responsibilities of the Looking Glass have not changed, only the alert posture,'' Pierson said.

Budgetary constraints and the ability of intelligence-gathering satellites played more of a role in the decision than recent changes in Eastern Europe or improved U.S.-Soviet relations, he said.

''The reason we're doing this is that it's another way to save money,'' Pierson said, adding that the change is expected to save $18 million in fiscal 1991, which begins Oct. 1, and $23 million the next year.

''Also,'' he continued, ''the detection systems for attack are much more sophisticated now than they were back in 1961. We think we would have plenty of warning time to launch those aircraft.

''Better intelligence assessments and money, those really were the factors.''

The Air Force recommended discontinuing the continuous flights last year to save money, but the recommendation became public and pressure from members of Congress and others prompted President Bush last December to reject it.

However, Defense Secretary Dick Cheney recently made the decision to go ahead with the change and received ''presidential concurrence,'' Pierson said.

Air Force Gen. John Chain, commander in chief of the Strategic Air Command was aboard Tuesday's tradition-breaking flight.

No ceremony was held and no public notice was given, Pierson said, because the ''Looking Glass is still very much alive and doing its thing.''

And the name? The Air Force dubbed the mission ''Looking Glass'' because the highly sophisticated planes mirror the command and control functions of the military's underground war-fighting command post.

#90208u1475 07/27/1990 ~United Press International

JERUSALEM (JULY 27) UPI - Israel may face some of its toughest economic

decisions ever as the nation tries to meet the needs of thousands of new Soviet immigrants and grapples with how to divide limited resources among newcomers and longtime citizens.

Finance Minister Yitzhak Moda'i took a first step on the sensitive subject this week - announcing deep cuts in subsidies on basic foods - and encountered some sharp criticism that the move would harm more Israelis than it helped.

The claim is debatable, but it shows how difficult the government's choices are.

''The finance minister tries to put his hands on any kind of government expenditure he could afford (to cut) politically,'' Hebrew University economist Haim Barkai said Friday. ''It seems he succeeded in doing it with these cuts in subsidies.''

The cuts are deep. On bread, for example, subsidies have been ended altogether, sending the price of a standard white loaf up 33 percent to 1.20 shekels, about 60 cents.

Barkai said he believed the subsidy cuts were a long time in coming, and he predicted the government might also have to resort to raising the deficit to help pay for the absorption of Soviet immigrants. ''That's the great danger,'' he said.

Nearly 70,000 immigrants, most from the Soviet Union, have arrived so far this year, and about 100,000 more are expected by the end of December, according to government officials.

Moda'i, who is seeking a $1.25 billion supplemental budget to finance immigration absorption, faced a broad array of angry remarks when he presented his proposals to Israel's Parliament a day after the subsidy cuts.

''Why are you hurting only the weak?'' yelled Eli Dayan, a Knesset member from the opposition Labor Party.

The thousands of immigrants arriving each month need housing that at this point is barely on the drawing boards. Meanwhile, hundreds of Israelis, squeezed by a tightening real estate market and climbing rents, have moved into tent cities, saying they are unable to pay their landlords.

At the same time, hospital and public-sector workers have gone on strike, pressuring the government for increased wages. They say they need higher incomes to keep pace with an inflation, which is running at roughly 16 percent.

Some government ministries are chafing at budget cuts. Defense Minister Moshe Arens said he wants the Israeli Cabinet to reconsider its recent decision to cut more than $35 million from defense to help with the cost of absorbing new immigrants. The decision was made while Arens was in Washington earlier this week for meetings with U.S. Defense Secretary Richard Cheney.

Referring to recent Iraqi threats, increased Iraqi-Jordanian cooperation, and weapons acquisitions by the Arab world, the Defense Ministry made public a statement warning, ''A further cut in the defense budget, without giving the defense establishment the means to contend with the new threats, may have serious consequences.''

Israel's high level of military preparedness puts a heavy burden on the country, with about 20 percent of its $31 billion budget for 1990-91 earmarked for defense. Israel receives $3 billion in economic and military aid from the United States.

In an effort to help low-income families, the government has slightly increased monthly welfare allowances. Israelis receiving pensions of approximately $280 a month will receive about a $1 more a month. A couple receiving $415 will receive an increase of $1.50.

But the increases are not likely to compensate for this week's price increases.

Against the backdrop of subsidy cuts, left-wing Knesset member Ran Cohen sent a letter to Moda'i protesting the proposed increases for low-income families. He called them an insult. For its part, National Insurance, Israel's welfare agency, has proposed increases of approximately $25 per month for low-income individuals.

Barkai, however, disagreed with some of the politicians' gloomy outlooks and predicted the reduction in subsidies would help the Israeli economy in the long run by increasing efficiency and productivity while immediately improving the government's cash flow.

LOS ANGELES (JULY 27) UPI - Jurors in the McMartin Pre-School molestation case, saying Friday several of them have changed their views, were allowed to retract two still-sealed verdicts they had reached in the retrial of Raymond Buckey.

Moments after receiving the verdicts back, the jury issued a second note. Its contents were not disclosed, but the judge met privately with attorneys and scheduled an announcement after lunch, perhaps to either

reveal the verdicts on all eight charges or that the jury was deadlocked on all counts.

Early in their 15th day of deliberations, the panel took the highly unusual step of asking for a return of the verdicts that they reached on two of the eight molestation charges against Buckey.

Superior Court Judge Stanley Weisberg, despite the objections of Buckey's defense attorney, complied.

On Wednesday and Thursday, the jury had the testimony of a prosecution medical expert, Dr. Astrid Heger, read back to them. Heger said all three girls Buckey is accused of molesting bore signs of anal and vaginal scarring that indicated molestation.

''After re-reading Dr. Heger's testimony, a number of jurors have changed their views. The two counts we have rendered a verdict on are affected by this,'' the note from the jury said.

The jurors asked for the sealed verdicts back and Weisberg said they were entitled to change their votes because, ''until a verdict is rendered in open court, it is subject to further consideration.''

John Wagner, one of two lawyers for Buckey, disagreed.

''As to these two counts, they (the jurors) have completed their duties,'' Wagner said.

Buckey, 32, is accused of molesting the three girls at the now-closed Virginia McMartin Pre-School in Manhattan Beach from 1979 until 1983. The former preschool teacher has steadfastly maintained his innocence.

At the end of a marathon first trial in January, Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted of 52 other molestation counts involving a total of 11 children.

The first jury deadlocked on the eight counts on which Buckey is being retried.

The first trial lasted nearly three years and cost $13.2 million, making it the longest, costliest criminal trial in U.S. history. The greatly scaled down retrial has lasted more than three months.

If convicted, Buckey could be sentenced to up to 22 years in state prison. He would be credited for the nearly five years he spent in custody following his 1984 arrest.

#90208u1512 07/27/1990 ~United Press International
SEOUL (JULY 27) UPI - Daewoo Corp. of Korea signed a joint-venture contract with two Philippine companies Friday in Manila to build and operate a bus assembly plant in the Philippines, spokesmen said.

Daewoo said its partners are First Philippine Holding Corp. and Westmont Asia Motors Corp. Total investment will reach $10 million, with Daewoo and First Philippine holding 40 percent of the equity each and Westmont 20 percent.

Plant construction will start in October on a site on an outskirt of Manila for completion in a year. Its production capacity will be 600 highway buses a year, Daewoo said.

The plant will assemble buses from kits in semi-knockdown form manufactured in Korea by Daewoo Motor Co., Ltd., a 50-50 joint venture with General Motors of the United States, Daewoo added.

-30- 999
#90208u1514 07/27/1990 ~United Press International
WASHINGTON (JULY 27) UPI - The State Department raised the level Friday in the verbal war with President Fidel Castro of Cuba, and also formally protested Castro's charges that the United States incited Cubans to take refuge in foreign embassies.

In a long, rambling speech Thursday, Castro charged that the United States and Spain, acting together, have been inducing Cuban dissidents to seek asylum in the Czechoslovak and Spanish embassies.

Richard Boucher, State Department spokesman, said Friday, ''We absolutely reject such charges. We have officially protested to the Cuban government what we see as baseless and irresponsible accusations that the United States government is in any way responsible for the crisis or encouraged by those who are seeking asylum in foreign embassies in Havana.''

Castro also invited Cuban dissidents to leave the country and go to the United States, raising recollections of the Mariel boatlift 10 years ago when he opened the country's prisons and insane asylums to flood the U.S. immigration system with more than 100,000 people.

Boucher accused Castro of trying to solve his political and economic problems by exporting vocal opponents to the United States.

''We reject Castro's attempt to export his internal problems to the United States by encouraging Cubans to leave,'' said Boucher. ''Cuba's problems can only be resolved at home through democratic process and freedom of speech.''

Boucher said he wanted to make clear that the United States would accept such refugees, but he added that Castro has an obligation to deal with the problems that gave rise to the opposition.

''Castro really has to solve his problems at home if the Cuban people are going to have a place where they can live in peace and where they want to stay,'' Boucher said.

On Thursday, the State Department used the occasion of the July 26 Revolution Day to accuse Castro of destroying the Cuban economy and brutally suppressing political opponents.

The State Department noted that one of Castro's fellow revolutionaries, Mario Chanes de Armas, ''is the world's longest serving political prisoner.'' He has been in prison since 1961, when he fell out with Castro over political issues and was sentenced to a 30-year term.

A statement by the State Department said, ''Life in Cuba is hard and is likely to become harder.''

According to World Bank figures, Cuba was third in Latin America in terms of gross national product. Thirty years later it was 15th, and a Cuban economist who defected to the United States in June said this week that the expected end to Soviet subsidies and economic assistance will cut the Cuban GNP another 25 percent.

''Tragically, the (Cuban) revolution's promises, with Castro's assumption of power in 1959, were betrayed,'' the State Department said.

In his Revolution Day speech, Castro said that Cuba would remain on the socialist path, even if it were the only country to do so.

#90208u1518 07/27/1990 ~United Press International

MEXICO CITY (JULY 27) UPI - Non-OPEC Mexico - the world's fourth largest oil producer - said Friday the oil cartel's decision to increase its production ceiling is "satisfactory," and vowed to continue its current production level until the next meeting of independent oil producers.

"It is a satisfactory accord, but OPEC members must comply with their production quotas," said a Mexican Energy and Mines Ministry official, who asked not to be identified.

Mexico, the largest oil producer after the Soviet Union, the United States and Saudi Arabia, is not a member of the 13-nation Organization of Petroleum Exporting Countries, but has been coordinating its production and pricing policies with the oil cartel in recent years. When asked if Mexico would increase its oil production in view of the new OPEC accord, the official said his country had no such plans.

In Geneva, OPEC oil ministers reached a unanimous agreement Friday on increasing the cartel's production ceiling from 22.1 million barrels a day to 22.5 million and raising the target price by $3 a barrel to $21.

"Mexico will continue with the current level of production until independent oil producers hold their meeting to decide their production level," the official said. "No official date for such a meeting has been set yet." Currently, Mexico is producing 2.2 million barrels of oil a day, of which between 1.2 million barrels and 1.3 million barrels a day are exported.

Despite sustained efforts by the Mexican government to reduce its dependence on oil - the country's single largest export item - Mexico still depends heavily on oil revenue. In 1982, 75 percent of Mexican exports were oil related. Currently, oil-related exports account for 35 percent of the country's total exports.

"Mexico will do everything possible to maintain stability in international oil markets and prices. OPEC members must do they same. They must abide by their production quotas," the Mexican official said.

#90208u1543 07/27/1990 ~United Press International
NEW YORK (JULY 27) UPI - Standard & Poor's Corp. said Friday it lowered the ratings on $610 million in General Dynamics Corp.'s long-term senior and subordinated debt, and removed the company from its credit watch.

S&P downgraded the ratings on General Dynamics senior debt to single-A from single-A plus and on subordinated debt to single-A minus from single-A. The A-1 commercial paper ratings of General Dynamics and General Dynamics Credit Corp. were affirmed, S&P said.

S&P said the lower ratings reflect charges of $500 million for cost overruns taken by General Dynamics during second quarter. The charges were $450 million for the A-12 Navy attack aircraft program and $50 million for the Army's SINGCARS radio project.

The company's total debt-to-capitalization ratio is expected to be in the 35 to 40 percent range for the intermediate term, with significant cash requirements during the next few years, S&P said.

Despite the downgrades, General Dynamics, which is based in St. Louis, maintains a strong competitive position in the defense industry, S&P said, with program diversity in high-priority aerospace, naval, and land-based military programs. These programs are in production or development.

S&P also said recent contract awards, including more than $3 billion to provide M1 tanks to Saudia Arabia, should help General Dynamics maintain a good business base despite reduced defense industry prospects. "Furthermore, there is a possibility that some of the A-12 charge could be reversed through claims against the government," S&P said.

However, inability to reduce the expense base in proportion to shrinking defense budgets or acceleration of negative industry trends would put additional pressure on the company's earnings or cash flow. General Dynamics also remains vulnerable to further cost overruns on fixed price development contracts, S&P said.

#90208u1550 07/27/1990 ~United Press International
(JULY 27) UPI - Congressional leaders in Peru are circulating and signing a petition which expresses their concern for- quote- ''the staggering levels of human rights abuses in Peru in recent years.'' They say they plan on submitting the letter to Alberto Fujimori, who will be sworn in

tomorrow as the country's next president.

Secretary of Commerce Mosbacher says upcoming talks between U-S and Vietnamese officials on Cambodia's future may lead to stronger U-S-Vietnamese trade ties. Negotiations set to begin August 6th in New York officially will focus on forging a peace accord between the Hanoi-backed Cambodia government and a three-party resistance rebel coalition.

The House today made an effort to stop breaking a rule about when it must adjourn... by voting to get rid of the rule. The House has routinely ignored a provision in its rule book requiring Congress to adjourn by July 31st every year unless the nation is at war. Now the Senate must consider a vote to eliminate the rule.

A California evangelist is having trouble getting enough money together to make good on his 52-Million-dollar bid to buy what's left of fallen churchman Jimmy Bakker's P-T-L ministry. Morris Cerullo says his creditors are dragging their heels on finalizing the sale.

A Detroit auction house today acknowledged that it hit a foul ball by selling a baseball last week that it mistakenly advertised as the one Babe Ruth hit for his 700th home run. An auction house spokesman says the error was NOT discovered until after the item sold for 93-hundred dollars. The new owner says he'll keep the ball anyway.

FAIRFIELD, CT (JULY 27) UPI - A triathlete who lost a leg to cancer at age 12 and went on to capture national attention with a 3,200-mile run across America to battle disease warmed up Friday for his fourth ''Swim Across the Sound.''

The swim features Jeff Keith, 28, who made the run in 1985; Olympic gold medalists Steve Lundquist and Rowdy Gaines; Olympic swimmers Craig Beardsley and Tracey Caulkins; and other top swimmers.

Proceeds from the 17-mile relay race across Long Island Sound will go to a cancer prevention program at St. Vincent's Medical Center in Bridgeport.

Keith said this year's event was expected to bring in more money than ever.

''Last year we took a quantum leap and brought in Diana Nyad and we raised $77,000,'' said Keith. Nyad had planned to participate in this year's 17-mile swim, but cancelled because of a scheduling conflict, officials said.

''This year we've brought it to an even higher (fund-raising) level,'' said Keith. ''We are already past last year's goal and will probably double it. We were gunning for between $130,000 and $150,000.''

Keith lost his right leg to bone cancer at 12, but went on to ski competitively, play LaCrosse while attending Boston College and participate in other strenuous sports.

''There isn't any challenge that can't be met,'' said Keith, when asked what message he hoped people would glean from his efforts.

He also hoped the swim would raise awareness that the battle against cancer is far from over.

''We aren't making as much progress as most Americans think we are in the fight against cancer,'' he said.

At least a dozen swimmers were slated to participate in the swim Saturday from Port Jefferson, N.Y., on Long Island to Pennfield Pavillion in

Fairfield on the Connecticut shore.

For the first time, it will be a relay race between two teams, which will be accompanied by boats.

Keith, a native of Fairfield, kicked off the event with a 24-hour swim-a-thon Friday at Fairfield University's pool.

Among the other athletes who planned to swim the Sound Saturday are University of Southern California swim coach Ron Orr, Olympic swimmers Craig Beardsley and Tracey Caukins and some of the area's best swimmers.

Orr is the founder of the ''Swim with Mike'' program that has raised more than $450,000 for disabled athletes. Keith said he benefited from the program when he was seeking his master's degree in business administration at USC.

#90208u1580 07/27/1990 ~United Press International

MONROVIA (JULY 27) UPI - More than 300 Liberian rebels stormed into central Monrovia and were locked late Friday in bitter street-to-street fighting to wrest control of the inner city from troops remaining loyal to President Samuel Doe.

Guerrillas under the command of renegade rebel leader Prince Johnson crossed two bridges from Bushrod Island in the early morning and gained a solid foothold on the central district that sits on a peninsula, a goal that had eluded rebel forces during a two-week-long advance into the capital.

The combat took them to about one mile away from the executive mansion, where Doe - who seized power in a bloody 1980 coup - was holed up with members of his crack Israeli-trained guard, vowing to never give up.

Johnson, commander of the attacking forces, split about two months ago with Charles Taylor, the leader of the rebel National Patriotic Front, and their current relationship remains unclear.

Taylor's forces, which are numerically superior, were believed to be fighting government troops in Paynesville, six miles from the city center.

Johnson's force of about 300 fighters seized control of Front street and Water street on the banks of the Mesurado river.

Fighting quickly spread into neighbouring Ashmun Street, where more than 100 soldiers arrived to defend the area.

The troops ordered all civilians to clear the streets, and residents in the areas overrun by the rebels were instructed by guerrillas that they must flee back across captured bridges.

Witnesses reported hundreds of people fled as soon as the rebels told them to go.

They said government soldiers were seen stripping off their uniforms, throwing away their rifles and fleeing in civilian clothes as the rebels advanced through the waterside area.

Heavy fighting also broke out in the diplomatic quarter of Mamba Point. Government troops moved heavy artillery to a hill overlooking the city center, close to the diplomatic missions.

In the confused street battles, rebel units took up positions at the foot of the hill, which leads up to Monrovia's Ducor Palace hotel and offers a commanding control of the city.

Nervous soldiers carried out random arrests of civilians in the city, accusing them of supporting the rebels.

Witnesses said the invading rebel forces did not mistreat the civilians.

Acting Information Minister Paul Allen Wie, responding to eyewitness accounts of a spate of tribal killings by government soldiers this week, said such slayings were not government policy.

A communique issued on Thursday by five European Community ambassadors in Monrovia condemned the summary executions of about 100 Gio and Mano tribesmen by government forces acting against the tribes that back Taylor.

Similar bloodletting has been unleashed during the 6-month-long war by the rebels against the Krahn and Mandingo tribes that support Doe.

Wie said Defense Minister Boimah Barclay went to the John F. Kennedy hospital in the city, where dozens of people were rounded up by government soldiers Wednesday, taken away and summarily shot.

He said Barclay had taken steps to prevent any further killings.

Taylor in a broadcast on rebel radio Thursday exhorted all Liberians to take arms against the government.

''This man (Doe) is the devil,'' said Taylor, a former civil servant dismissed for embezzlement. ''You are the bosses now. Get him now before he gets you.''

LOS ANGELES (JULY 27) UPI - A group of 100 Southern California freelance

writers began a race against the clock Friday to bang out a full-length blockbuster movie script within 48 hours while on display at a chic shopping mall.

''It's a pretty off-beat way to put together a script, but we're having a load of fun doing it so far,'' said Elizabeth Burke, a spokeswoman for the Century City Shopping Center, located within hailing distance of a variety of major film studios, production offices and talent agencies.

The writers hope to produce a complete script out of the non-stop brainstorming session, then spend the next seven weeks fine-tuning their product in time for an invitation-only auction for studio executives and agents on Sept. 15.

The event, something like a literary relay race, was organized by the 450-member non-profit Independent Writers of Southern California. It started at 6 a.m., with each of the writers scheduled to take a 30-minute turn at a word processor set up on a stage in the middle of the open-air mall.

The script is based on a previously prepared 30-page treatment for a romantic comedy called ''The Hot Property,'' a story that involves an elderly man who wants to bestow his home - the last affordable house in Los Angeles - on a deserving young couple.

Passers-by can try out their scripting skills by making a $10 donation, which will go toward writing scholarships for needy students at Venice High School.

Once every hour, actors and directors, including Paul Miller of ''Saturday Night Live'' and Brad Gross of ''The Wonder Years,'' will create performances from the finished parts of the script.

The script-a-thon, which concludes at 6 a.m. Sunday, was organized partly to show off the skills - and the faces - of its members. ''This is a way to get free-lance writers out of their little cubbyholes and into the public eye,'' Burke said.

The Writer's Digest, a monthly magazine that is considered a periodical bible for freelance writers, is also a sponsor of the event.

#90208u1618 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - Sen. Lloyd Bentsen, D-Texas, noting the need for improved research on U.S. trade with Western Hemisphere nations, Friday introduced a bill to set up a North-South center in Texas to study the effects of increased trade in the continent.

The bill seeks a first-year appropriation of about $10 million and expects much of the subsequent funding to come from public-private sector initiative, an aide said. Bentsen hopes the facility would be ready by the end of next year.

"It makes sense to establish this center and to put it in Texas, which shares the longest border with a Latin American nation of any state," the senator said in a statement.

"The facility will study the effects, good and bad, of increasing the flow of trade among the countries of North, South and Central America, including the Caribbean."

Aides said the location for the facility has not been chosen and that the International Trade Commission, which will supervise it, will make that determination.

Bentsen, chairman of the powerful Senate Finance Committee, said the center's need must also be seen in the context of discussions to be held soon between the United States and Mexico on a free-trade agreement, similar to the one the U.S. concluded with Canada in 1988.

"Such an agreement would have a great impact on our country, especially on Texas and other border states - and our negotiators need to have as full an understanding as possible of what that impact would be," he said.

"Research compiled by the North-South Center would provide valuable information on this and other points during these negotiations." The center would conduct research on all issues affecting trade in the hemisphere, ranging from tariffs, investment barriers to debt relief, he said.

The aides said that last year about half of the $51 billion worth of merchandise and other trade between Mexico and the United States flowed through ports of entry in South Texas. "That is why we believe Texas is the most appropriate place for the facility," one aide said.

#90208u1632 07/27/1990 ~United Press International

DALLAS (JULY 27) UPI - The Dallas District Attorney's office said Friday it will file misdemeanor obscenity charges against two record stores for selling the controversial rap group 2 Live Crew's album, ''As Nasty As They Wanna Be.''

A Florida judge earlier declared the album obscene, triggering a nationwide controversy.

Assistant district attorney David Pickett said the office decided to prosecute Sound Warehouse and Hastings Records stores after a 13-year-old boy accompanied by an undercover officer purchased the album Tuesday.

Neither record store commented on the misdeameanor charge. Pickett said the charges would be filed either late Friday or Monday.

Prosecutors said the album lacks serious or literary value, fails to meet accepted community standards in Dallas and its lyrics contain hundreds of references to male and female body parts.

''These albums are harmful because they contribute to the overall environment that romanticizes, trivializes and even encourages violence against women,'' Pickett said.

The attitude that ''everybody does it so it must be okay must not go unchallenged,'' Pickett said at a news conference.

The prosecutor claims studies have shown such material has an addictive effect on society and desensitizes normal relations among youth.

''A major problem is the increasing tendency to act out what is heard and seen and we must send a message that these tendencies are incorrect behavior,'' Pickett said.

''It sends a clear and misleading message that women are men's playthings. They're toys for immmediate pleasure, for instant gratification. The message is a mixture of aggression, anger, lust and domination.''

Brad Lollar, an attorney representing a group of lawyers who have volunteered to defend any Dallas store charged for selling the 2 Live Crew albums, questioned Pickett's motives.

''What we have here is censorship and prior restraint of free speech,'' Lollar said. ''Movie videos, records, tapes, whatever. Mr. Pickett wants them to listen to them first and then if they think the Dallas D.A.'s office might arrest them for selling it, then they should take it off the shelf.''

Lollar also accused Pickett of pressing the obscenity case in order to get fuel for his current political campaign.

Pickett, a former Dallas County Commissioner, is running for a criminal district court bench.

Earlier this month in Dallas the controversial group, angry at not being paid by a local night club, canceled its performance, touching off a melee

by dozens of outranged fans who smashed tables and chairs.

The group performed twice one night later in Austin without incident.

#90208u1643 07/27/1990 ~United Press International

WASHINGTON (JULY 27) UPI - The Senate, in a compromise that ended a daylong fight between Southerners and Midwesterners, voted Friday to give limited help to Great Lakes ports in seeking a share of food-aid shipments.

In other work on the new farm bill, the House and Senate took action to cut off export credit to Iraq, although they disagreed on how far to go. The House refused to eliminate the honey program and agreed to split up control of the Food for Peace program.

It is rare for both houses of Congress to debate the same issue at the same time. For the past week, the House and Senate have debated their own versions of the farm bill. Each would spend about $55 billion on farm subsidies over the next five years but differ on a number of details.

The farm bill would freeze crop subsidy rates, create new programs to prevent farm chemicals from contaminating water supplies and give farmers slightly more freedom to decide which crops to grow.

The Food for Peace program, created in 1954, is the mainstay of U.S. food aid to other nations. It has a number of goals, among them building markets for U.S. products, averting famine and furthering U.S. foreign policy.

Great Lakes senators initially sought a three-year guarantee that their ports would load 240,000 tons of food-aid cargo each year. A similar set-aside was created in 1985 and expired at the start of this year.

Under the compromise, the ports would be allowed to bid on up to half of the Food for Peace shipments, until they reached a total of 240,000 tons.

Southerners argued an explicit set-aside would unfairly favor the Great Lakes and hurt their ports. The House has voted to revive the set-aside but phase it out by 1996.

House members voted to end a dispute over control of the Food for Peace program by giving the Agriculture Department jurisdiction over its concessionary sales programs while the Agency for International Development would control the humanitarian aid portions of the program.

Although the Senate has voted to eliminate the honey support program, the House balked, 215-178, despite the pleas of Rep. Silvio Conte, R-Mass., a longtime foe.

''We've been stung long enough. The honeymoon is over,'' Conte said.

Farm-state congressmen said it would be unfair to single out the honey program for elimination while other programs were continued.

At nearly the same time, the Senate refused, 55-40, to restore the honey support program at a lower price. The current support price is 53.8 cents a pound.

ROTA, Spain (UPI) A U.S. Navy judge Friday found a lieutenant guilty of raping a female officer while the ship on which both served was in port in Cartagena, Spain.

The victim, whose identity the Navy requested remain private, testified that Lt. (j.g.) Robin E. Brown, 27, of Rawlins, Wyo., entered her stateroom on the U.S.S. Suribachi while she was asleep and raped her between 2:30 and 3 a.m. April 4 after a night of drinking in Cartagena with fellow American officers.

The victim's testimony was corroborated by Lisa Pace, an agent of the Naval Investigative Services at the U.S. naval station at the Rota Naval Base.

Lawyers for the defense argued the victim had consented to sexual intercourse and that Brown was under the influence of alcohol.

Thirty minutes after final arguments, the judge, Navy Capt. Thomas A. Lawrence, issued his guilty verdict against Brown. Lawrence said he would impose sentence Saturday. Maximum punishment for the offense is life imprisonment, loss of pay and allowances and dismissal from the Navy.

Both Brown and the victim said that early in the evening of April 3, the ship's officers attended a cocktail party hosted by Spanish naval officers. After that, they said, the Americans returned to their ship, changed to civilian clothes, and split into two groups, Brown in one, the victim in the other, to entertain themselves in Cartagena.

The victim testified she returned to her stateroom at about 2 a.m. and went to sleep. She said she awoke sometime between 2:30 and 3 a.m. and realized Brown was in the room.

She said she tried to resist Brown and ordered him out of her room but he overpowered her. The prosecution introduced evidence that a physical check of the victim found the requisite evidence that sexual intercourse had taken place.

Female officers and crew were first assigned to the U.S.S. Suribachi in

1988.

#90208u1660 07/27/1990 ~United Press International
WASHINGTON (JULY 27) UPI - When the phone rings in the office of Rep. Beverly Byron, D-Md., head of the military personnel subcommittee, the caller often is a nervous serviceman, worried about what will become of his career in an era of peace.

''I'm getting people with questions because they don't know what's down the road,'' Byron said in an interview Friday.

Byron and Rep. Sonny Montgomery, D-Miss., head of the House Veterans' Affairs Committee, had earlier outlined benefits they want to give members of military who get pink slips as the armed forces shrink in response to the end of the Cold War and budget-cutting efforts.

''I'm getting comments ... like, 'What do I do? Do I sell my house? Am I going to be here next year or am I going to be out of the service?''' she said.

There are thousands upon thousands of potential beneficiaries of the Byron-Montgomery measure, similar to a package included in the Senate's defense bill. The bill's price tag has yet to be calculated.

There are nearly 2.1 million men and women in the Army, Air Force, Navy and Marines, and the all-volunteer force is expected to fall by roughly 500,000 in the next five years. Although the Pentagon has suggested about 100,000 a year can be eliminated without involuntary separations, Byron is skeptical that can be done.

Montgomery noted that those now in uniform are there because they wanted a military career, not because they were ordered into service through a wartime draft, and that makes the job of cutting back even harder.

''This is the first time in the volunteer service we've ever had to do it. It wasn't hard to tell draftees they had to go home after World War II, Korea and Vietnam,'' Montgomery said.

The Byron-Montgomery proposal, which will either be included in the House defense bill or passed as a separate measure depending on unrelated budget matters, is a series of ways to cushion to transition to the civilian workforce. They include:

-Expanding separation pay to cover enlisted personnel and lifting the $30,000 payment cap. Those ordered out after serving at least six years, in a second or subsequent enlistment, would get 10 percent of annual base

pay for each full year of service.

-Those forced out involuntarily would get medical coverage for up to 120 days, and pre-existing conditions and pregnancies would be covered for a year.

-Allow those who must leave to collect 26 weeks of unemployment compensation, just as civilians may. The current benefit is 13 weeks after a five-week wait.

-Give the troops counseling about educational benefits, and provide job search and placement help and assistance in obtaining civilian licenses or certifications of various skills.

-Give overseas personnel relocation assistance and job search data.

-Let children stay in Defense Department schools through the end of a school year and let students in their junior year stay through graduation. When available, base housing could be provided to families at market rent rates while the ex-service member looked for work.

-Continue commisssary benefits for up to two years after discharge, send household goods to someplace other than the home of record upon separation grant job searchers extra time off and let them join the National Guard or Reserve where units could go over authorized strength for a time.

-Let those who had not previously signed up for educational benefits buy into the program.

-Expand the authority of the services to order the retirement of lieutnant colonels and commanders already eligible to retire and colonels and Navy captains who are within two years of being eligible to retire.

#90208u1672 07/27/1990 ~United Press International

BOSTON (JULY 27) UPI - Attorney General Dick Thornburgh said Friday he was saddened by what he called Justice Thurgood Marshall's unconstructive criticism of Supreme Court nominee David Souter.

''I don't believe that it is a constructive type of attitude to have on the eve of the consideration by the Senate of the nomination of a man I consider to be possessed of extraordinary abilities of intellect and character,'' Thornburgh said at a conservative legislators' conference in Boston.

Marshall, now considered the last pure liberal on the Supreme Court, said Thursday he was miffed at the nomination of Souter to the panel and

suggested that someone other than President Bush is ''calling (the) shots'' on the issue.

In a television interview broadcast Thursday on the ABC News program ''Primetime Live,'' Marshall, asked to comment on the selection of Souter, said, ''I don't understand what he (Bush) is doing. I don't understand it.''

Marshall said he had never heard of Souter until his nomination.

Addressing other reaction to the appointment questioning Souter's position on controbversial issues, including abortion, Thornburgh said, ''It would be improper for a judge, a nominee to any court, to express in advance how he would decide a particular case or deal with a particular issue when it came on the bench.''

Souter, 50, a conservative whose persona is reserved and his judicial record and philosophy virtually unkown, was selected by Bush to succeed retired William Brennan, 84, who stepped down last Friday after 34 years on the bench.

Souter is a former attorney general and Superior Court and Supreme Court justice in New Hampshire. When selected for the Supreme Court, Souter was a member of the 1st U.S. Circuit Court of Appeals in Boston. The nominee must still be confirmed by the Senate, which will hold hearings starting Sept. 13.

Thornburgh spoke to the American Legislators Exchange Council.

WASHINGTON (JULY 27) UPI - Sen. William Armstrong, R-Colo., has been hospitalized for treatment of angina, a heart ailment, his office disclosed Friday.

A brief statement from his office said that Armstrong was admitted to a Washington area hospital, the name of which was not disclosed, and would return to his Senate duties next week.

Armstrong, who has announced he will not seek re-election this year, had previously undergone angioplasty, a medical procedure to clear blocked arteries to the heart.

#90208u1712 07/27/1990 ~United Press International

NEW YORK (JULY 27) UPI - The father of a defendant accused in a brutal attack on a Central Park jogger insisted Friday he urged his son to lie about raping the woman because police promised it would save him from jail.

''You better tell us what we want to hear and cooperate or you are going to jail,'' Bobby McCray, a 35-year-old parking lot manager, said police shouted at his son Antron, then 14, during questioning about the Central Park attack.

His son and wife, Linda, were crying as police screamed at the youth who earlier only admitted to being with a large gang that attacked a homeless man and male joggers during a two-hour ''wilding'' rampage in the park.

''What about the woman?'' the father recalled police demanding as he and his wife sat with their son at a Manhattan police precinct.

''I don't know about the woman. I didn't do anything,'' Antron Mccray sobbed, testified his father, the first witness for the defense in the five-week trial.

McCray's attorney, Michael Joseph, said he would also call the youth's mother to the stand to bolster his defense that police coerced his confession.

A high school drop-out, Bobby McCray nervously recalled the police interrogation a day after the April 19, 1989, attack on nine poeple, including a woman jogger left with her head bashed in and near death in the park.

''After talking to the detective in the hallway, the father said he went back into the interrogation room and in desperation told his son to lie and confess to the rape and beating of the woman, believing police would release the boy.

''I got upset and angry and I threw a chair across the room,'' he testified in Manhattan state Supreme Court where his son and two other youths are on trial on 13 criminal counts, including rape and attempted murder.

McCray said he was angry about telling his son to lie, but repeated police warnings to him, saying ''Don't cry,'' when his statement was videotaped.

In her cross-examination, Assistant District Attorney Elizabeth Lederer asked McCray about his son's volunteering numerous details to police and about smiling and gesturing to explain his actions in the videotape.

The father admitted police did not coach his son on those aspects of his confession, but added, ''He talks with his hands because everyone in my family talks with their hands.''

''Did you honestly believe that after Antron McCray admitted beating and raping her, admitted being on top of that jogger, holding her down while others raped her, that he hit her and assaulted her, did you honestly believe that he would be permitted to go home?'' Lederer asked incredulously.

''Yes, yes, because they promised they would let him go,'' the father said.

The parents of defendants Raymond Santana, 15, and Yusef Salaam, 16, were also expected to testify. Three other youths also face charges in the attack and were to be tried at a later date.

The prosecution rested its case Thursday after presenting 43 witnesses and 34 photographs depicting the horrifying injuries sustained by the woman jogger who testified even though her injuries left her physically unstable and unable to remember the attack.

#90208u1720 07/27/1990 ~United Press International

NEW YORK (JULY 27) UPI - Retail gasoline prices at the pump will either rise or stay level through the rest of the year, instead of falling as they normally do, as a result of the OPEC cartel's agreement Friday to curb oil output, analysts say.

Ministers of the 13-nation Organization of Petroleum Exporting Countries

that pumps more than a third of the world's crude oil reached agreement to hold output, which had risen to 24.6 million barrels daily in April, to 22.5 million barrels.

"Retail gasoline prices normally peak in July and then decline from the late summer into the fall. As a result of the OPEC agreement we won't see as much weakness this year. We'll see a flatness in gasoline prices," said Charles Maxwell of C. J. Lawrence Morgan Grenfell in New York.

Assuming that OPEC members abide by the cutback, the analyst said the full effect should be felt by year's end and heating oil prices will probably rise by 10-15 percent this winter.

Kevin Lindemer of Cambridge Energy Associates, Cambridge, Mass. agreed that the usual seasonal decline in retail gasoline prices "quite possibly won't happen this year, or at least to the extent it has in the past." "As a result, the retail price of gasoline won't be much different than it is now," Lindemer said.

Crude prices plunged about $6 a barrel in the first six months into early July while the retail price of gasoline rose six cents a gallon on average. As a result, Lindemer said the price of gasoline rose to as much as $8-$9 a barrel higher than the amount oil companies paid for the crude to make it.

In three of the last five years, Lindemer said these "refinery margins" have been on the order of $3 a barrel. They are currently $5.70 a barrel.

The analyst said heating-oil prices might rise a little earlier and a little higher than normal this winter as a result of the agreement. "But weather will still be the major factor."

Cheryl Trench of the oil industry's Petroleum Industry Research Foundation however, said, "We expect crude oil prices will be going up $3-$4 a barrel as a result of the agreement. Normally, this would mean a 'passthrough' increase of seven to ten cents a gallon in gasoline." She said this increase would take place relatively soon before the normal seasonal decline in pump prices starts to take place.

A London oil analyst said British gasoline prices had recently risen four pence, or about 7 U.S. cents, in anticipation of the OPEC agreement.

OPEC members with excess production capacity, especially Kuwait and the United Arab Emirates, created the current world glut of oil and drove prices down by making a habit of violating their OPEC quotas.

But this time militarily powerful Iraq has threatened its two Persian Gulf neighbors, saying their chronic overproduction has endangered its oil-based economy.

It accused Kuwait of being a U.S. stooge and conspiring with the United States to keep world prices low. "Enter the enforcer, Iraq," said Maxwell. "I think this OPEC agreement is very different."

Despite U.S. crude oil inventories of 384 million barrels, more than 50 million barrels higher than last year, Maxwell said, "I think the psychology of the oil market is much improved with Iraq as the enforcer of an OPEC agreement." An inventory 50 million barrels higher than a year ago "is not unreasonable if you think prices are going to go up," Maxwell said.

The OPEC ministers also agreed on a target of $21 a barrel as an average for seven Mideast crudes currently running around $17 a barrel. If the cartel can keep its output to the agreed 22.5-million barrel daily ceiling "then I think you'll see $21," Maxwell said. U.S. crude prices usually run $2-3 higher than the OPEC level.

Lindemer noted that the OPEC price rose above $20 a barrel in January before record warm weather in the United States and OPEC overproduction drove it down to nearly $13 a barrel. So, he said next winter's retail prices may not be all that different.

BATON ROUGE, LA (JULY 27) UPI - Gov. Buddy Roemer Friday vetoed a strict anti-abortion bill designed to provide a Supreme Court test of abortion on demand, saying it was an insult to women and technically flawed.

Roemer said abortion as a form of birth control must be curtailed but the bill passed by the Louisiana Legislature before it adjourned July 9 ''flies in the face of common sense and our own constitution.''

Pro-choice activists hailed the governor's veto as a positive step for women and the state and and called on the Legislature to let the issue rest.

The author of an even more restrictive anti-abortion measure vetoed by Roemer three weeks ago, denounced the action and urged the Legislature to return to override his veto.

Rep. Louis ''Woody'' Jenkins, a Democrat, conceded the bill vetoed Friday was flawed. He said the Legislature passed it to satisfy Roemer's demands for exceptions for victims of rape and incest, after the governor had vetoed Jenkins' original bill because it did not contain the exceptions.

An attempt to override that veto during the regular legislative session failed. In order to override now that the session is over, the Legislature would have to call itself back to Baton Rouge for a veto session, something it has never done.

Roemer said the bill was insensitive to women and had several conflicts with existing criminal law.

It made virtually all abortions a misdemeanor crime of simple battery, with penalties of up to 10 years in prison and fines up to $100,000 for doctors who performed them. It allowed abortions to save a woman's life, but Roemer said the rape and incest exceptions were too restrictive and narrow.

The amended version by Sen. John Saunders, a Democrat, would have required rape victims to report the assault within seven days in order to obtain a legal abortion. It also failed to provide exceptions for victims of simple rape, meaning a woman who was mentally incapacitated by drugs or alcohol or was mentally retarded would not be protected.

''A seven-day reporting period is totally unworkable and uncaring and unrealistic. To ignore simple rape as if it didn't exist is an insult to all women. The vulnerability of mentally retarded women under this bill is totally unacceptable,'' Roemer said.

''The fact that the bill does not provide necessary exceptions honoring the plight of illegally violated women is enough reason to veto this bill.''

He also had problems with the manner in which the bill was hastily drawn on the second-to-last day of the legislative session. It was created by amending a bill originally designed to reduce the penalty for battery on a person who desecrates the flag.

In addition to the substantive weaknesses, Roemer said the bill was developed at the last minute without full scrutiny or open hearings, was enclosed in a non-germane flag-burning bill and was too vague.

''This bill was grafted on to a flag-burning bill, effectively gutting the flag-burning bill and making an abortion a simple battery,'' Roemer said in his veto message. "This flies in the face of common sense as well as our state consitution. An abortion is an exceptional and serious circumstance, and any law governing abortion must be deliberately, publicly and carefully considered.''

Anti-abortion advocates said they were betrayed by Roemer.

''Governor Roemer has abandoned thousands of unborn children who will continue to die needlessly in Louisiana,'' said Sharon Fontenot, legislative director of the Louisiana Right to Life Federation. ''He has bowed to the pro-abortion extremists who insist that abortion be available for any reason throughout all nine months of pregnancy.''

Roemer, who vetoed Jenkins' anti-abortion measure because it failed to provide exceptions for victims of rape and incest, said he believed abortion on demand should be curtailed but the hastily created substitute did not meet his standards.

''We are appalled that the governor would veto this bill after he said he wanted rape and incest exceptions and the Legislature gave him that,'' said Jenkins. ''We are asking the Legislature to come back in a veto session and override his veto not of the flag-burner bill but of the original Louisiana Human Life Act, which Roemer vetoed during the regular session.''

Under Louisiana law, the Legislature must have a veto session 40 days after the adjournment of the regular session, unless a majority of either house votes by mail not to return. The deadline for such a vote is Aug. 13.

Roemer, whose veto of Jenkins' bill was sustained in the regular session, said he would not pressure legislators to uphold his latest veto but, ''I will forcefully make the case this bill is not the best.''

SALT LAKE CITY (JULY 27) UPI - Fallout from above-ground nuclear tests in Nevada is likely responsible for 3 percent to 6 percent of the deaths from leukemia in Utah from 1952 to 1981, researchers said Friday.

A study by scientists at the University of Utah found a weak overall association between fallout and leukemia, but a significant link between the tests and cases of leukemia among people who were under the age of 20 when they were exposed and who died within 10 years of exposure.

The study was the first to estimate the dose of radioactive fallout received by individuals from approximately 100 nuclear weapons tests the United States government carried out from 1951 to 1958.

Walter Stevens, a co-author of the study and interim dean of the university's school of medicine, noted there have been a ''series of epidemiologic investigations that have found an unusually high incidence of leukemia in southern Utah, thought to be related to fallout from the Nevada test site.''

Although the greatest amount of fallout was measured in southwest Utah, the entire state of Utah was included in the new study. Stevens and colleagues will report their results in the Aug. 1 issue of the Journal of the American Medical Association.

The study was restricted to the 70 percent of the Utah population who were members of the Church of Jesus Christ of Latter-day Saints, so that residential histories could be reconstructed using church records.

These histories were combined with fallout deposition data provided by the U.S. Energy Department to determine the degree of fallout exposure of 1,177 people who died of leukemia and of 5,330 others who died from other causes and were included for comparison purposes. The two groups were matched for age, sex and year of death.

Previous studies of survivors of the atom bombs dropped on Japan in 1945 have shown the leukemia risk from radiation was concentrated in those who were young.

In Washington County - in the southwest corner of Utah nearest the test site -investigators estimate about seven of the 17 leukemia cases occurring in Mormon residents between 1952 and 1981 were caused by the fallout.

For the state, approximately 50 cases during that period might have been caused by fallout, the researchers said. However, they said the true number could be as low as zero or as high as 120.

The investigators said it is not possible to distinguish between a case of

leukemia caused by fallout and a naturally occurring case.

The portion of the study that measured the doses of radiation ''represents one of the most detailed reconstructions ever reported for such a large number of individuals,'' Stevens said.

''In Washington County, the average bone marrow dose was about 2 rads. The average fallout dose in Utah overall was 0.3 rads, which is comparable to the average dose from natural background radiation during the same period '' he said.

A rad is a measurement of the amount of ionizing radiation a person's body - particularly his or her bone marrow - absorbs. Ionizing radiation refers to emission of atomic particles from a source, in this case, the nuclear weapons that were tested.

Numerous studies, including those of survivors of the Japanese bomb blasts have found a connection between the numbers of rads to which a person is exposed and the risk for long-term effects such as leukemia.

Under a $7 million grant from the National Cancer Institute, the Utah research team also is studying the effects of radioiodine concentrations in milk produced in the fallout area, and the incidence of thyroid disease in individuals who consumed the contaminated milk and other dairy products. This study should be completed in 1991.

Rep. Wayne Owens, D-Utah, said the report ''probably doesn't have any meaning. We've known from the beginning, you could never tie the deaths directly to the bombing.''

A bill sponsored by Owens would create a $100 million trust fund to compensate so-called ''downwinders'' for radiation injuries from the tests. The bill cleared the House last month and is now being considered by the Senate.
